Individual elephants and Arctic herbivores such as caribou tend to have fixed geographic ranges throughout their lifetimes, which had prompted some researchers to speculate that the Arctic woolly mammoth, an extinct elephantid, might have exhibited similar behavior. Mammoth tusks grew in sequential layers, incorporating ingested minerals and organics, and so each ivory stratum reflects the ratio of strontium isotopes (⁸⁷Sr/⁸⁶Sr) in the local environment; thus, the sequence of strata shows where the animal roamed during life. Recent analysis of the strontium ratios in the strata of one Arctic woolly mammoth tusk in relation to the geographic distribution of strontium ratios in the environment shows the animal's range begin to expand as it reached sexual maturity, only to contract again in its final 1.5 years.

Which choice best describes the function of the underlined statement in the text as a whole?

- A. It discusses a characteristic shared by certain animals in order to explain why researchers raised a possibility that turned out not to be supported by data described later in the text.
- B. It illustrates a pattern of behavior among certain animals in order to present a theory about exceptions to that pattern that is weakened by a finding described later in the text.
- C. It describes a similarity in the behavior of certain animals in order to show why a method described later in the text did not reveal whether another animal also showed that behavior.
- D. It introduces a trait shared by certain animals in order to contextualize a hypothesis about the origin of that trait that is advanced later in the text.

ID: 64506024 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes how the underlined statement functions in the text as a whole. The underlined statement mentions a category of animals that have a feature in common: they tend to have fixed geographic ranges throughout their lifetimes. The text then presents the speculation of some researchers that the Arctic woolly mammoth might also share this characteristic. However, an examination of the content of strontium in the strata (or layers) of a woolly mammoth tusk indicated that contrary to the researchers' hypothesis, the mammoth had an expanding range in its environment that contracted in its last 1.5 years of life. Thus, the underlined statement discusses a characteristic shared by certain animals in order to explain why researchers raised a possibility that turned out not to be supported by data described later in the text.

Choice B is incorrect. Though the underlined statement presents a pattern of behavior (the habit of certain animals of staying within a fixed geographic range), the rest of the text does not present a theory of exceptions to that pattern; rather, the researchers are merely concerned with whether one particular animal has behavior consistent with the pattern. Choice C is incorrect. Though the underlined statement does describe a similarity in the behavior of certain animals (their tendency to stay within a fixed geographic range), this is not done in order to show why a method described later in the text failed to show whether another animal showed that behavior; rather, the method of analysis of strata of a woolly mammoth tusk showed that the mammoth's behavior was different from that of the animals mentioned in the underlined statement. Choice D is incorrect. Though the underlined statement mentions a trait shared by a number of animals (their fixed geographic range), the rest of the text does not present a hypothesis regarding the origin of that trait; rather, the researchers are concerned with whether another particular animal

shares that trait.

Historians have argued that a crucial component of the Civil Rights Movement’s success in the 1960s was the Southern Christian Leadership Conference’s Citizen Education Program (CEP), which invited promising activists from across the South to its one-week training sessions in Dorchester, Georgia. Led by experienced organizers such as Dorothy Cotton and Septima Clark, CEP attendees—more than 7,000 in all—participated in workshops on topics ranging from public speaking to legal doctrine before returning home and using their newly acquired knowledge to spearhead local civil rights initiatives.

- Which choice best describes the function of the underlined portion in the text as a whole?
- A. It underscores the extent of the CEP’s impact on the Civil Rights Movement of the 1960s.
 - B. It illustrates the CEP organizers’ efforts to educate participants on a wide variety of topics.
 - C. It suggests that CEP attendees held a diverse array of opinions about the Southern Christian Leadership Conference’s political philosophy.
 - D. It establishes that criticism of the CEP was limited to a few individuals in the Southern Christian Leadership Conference.

ID: d995ff9d Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The first sentence of the text states that the CEP had a positive impact on the Civil Rights Movement in the 1960s. The next sentence explains that the CEP organized workshops for attendees, who later used the knowledge they gained to lead civil rights initiatives. And the underlined portion indicates the number of activists—more than 7,000—who participated in the workshops. Thus, the underlined portion provides a number that underscores the extent of the CEP’s impact on the Civil Rights Movement in the 1960s.

Choice B is incorrect. Although the sentence that contains the underlined portion mentions some CEP workshop topics, the underlined portion itself addresses the number of participants in the CEP workshops, not the number of topics covered. Choice C is incorrect. Although the underlined portion refers to attendees of the CEP workshops, nothing in the underlined portion or the text as a whole addresses the Southern Christian Leadership Conference’s philosophy or the attendees’ opinions thereof. Choice D is incorrect because neither the underlined portion nor the text as a whole mentions any criticism of the CEP by members of the Southern Christian Leadership Conference.

Changes to vegetation cover and other human activities influence carbon and nitrogen levels in soil, though how deep these effects extend is unclear. Hypothesizing that differences in land use lead to differences in carbon and nitrogen levels that are not restricted to the topsoil layer (0–30 cm deep), Chukwuebuka Okolo and colleagues sampled soils across multiple land-use types (e.g., grazing land, cropland, forest) within each of several Ethiopian locations. They found, though, that across land-use types, carbon and nitrogen decreased to comparably low levels beyond depths of 30 cm.

Which choice best describes the overall structure of the text?

- A.

It describes a phenomenon that scientists do not fully understand, explains a research team’s hypothesis about that phenomenon, and then describes a finding that led the team to refine the hypothesis.
- B.

It introduces an unresolved scientific question, presents a research team’s hypothesis pertaining to that question, and then describes an observation made by the team that conflicts with that hypothesis.
- C.

It discusses a process that scientists are somewhat unclear about, introduces competing hypotheses about that process, and then explains how a research team concluded that one of those hypotheses is likely correct.
- D.

It explains a hypothesis that has been the subject of scientific debate, discusses how a research team tested that hypothesis, and then presents data the team collected that validate the hypothesis.

ID: 401e1856 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the overall structure of the text. The text begins by explaining that human activities influence carbon and nitrogen levels in soil, but how deeply these effects are seen in the soil remains an unresolved question. Next, the text summarizes Okolo and colleagues’ hypothesis regarding this question—which is that the different effects on carbon and nitrogen levels associated with different types of land use would also be observed below the topsoil layer—and then briefly explains the methods they used to test this hypothesis. Finally, the text states that the researchers found that at depths below the topsoil layer, carbon and nitrogen decreased to similarly low levels across all land-use types, a finding that conflicts with the team’s hypothesis presented earlier in the text. Thus, the text introduces an unresolved scientific question, presents a research team’s hypothesis pertaining to that question, and then describes an observation that the team made that conflicted with their hypothesis.

Choice A is incorrect. Although the text introduces a phenomenon (the fact that human activities influence carbon and nitrogen levels in the soil) that isn’t fully understood by scientists and explains a research team’s hypothesis about the phenomenon, the text doesn’t describe how the team refined their hypothesis when a research finding contradicted it. Choice C is incorrect because the text doesn’t discuss a process at all; rather, it poses an unsolved scientific question and presents a hypothesis that Okolo and colleagues tested to answer that question. Moreover, the text only describes one hypothesis; it doesn’t mention any competing hypotheses, nor does it suggest that Okolo’s team was able to determine which hypothesis was correct. Choice D is incorrect because the text doesn’t begin by presenting a hypothesis that is under scientific debate; rather, it presents a question that scientists have been unable to answer and then introduces a hypothesis formulated by Okolo and colleagues. While the text does

explain how Okolo’s team tested their hypothesis, the text goes on to say that their data conflicted with their hypothesis, not that the data validated, or supported, their hypothesis.

A number of Indigenous politicians have been elected to the United States Congress since 2000 as members of the country’s two established political parties. In Canada and several Latin American countries, on the other hand, Indigenous people have formed their own political parties to advance candidates who will advocate for the interests of their communities. This movement has been particularly successful in Ecuador, where Guadalupe Llori, a member of the Indigenous party known as Pachakutik, was elected president of the National Assembly in 2021.

Which choice best states the main purpose of the text?

- A. To trace the history of an Indigenous political movement and speculate about its future development
- B. To argue that Indigenous politicians in the United States should form their own political party
- C. To highlight two approaches to achieving political representation for Indigenous people
- D. To consider how Indigenous politicians in the United States have influenced Indigenous politicians in Canada and Latin America

ID: bfcbec2d Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes the main purpose of the text, which is to illustrate two approaches that Indigenous politicians have taken to achieve political representation for their communities. The text begins by explaining that one approach is exemplified by Indigenous politicians in the United States who, in an effort to ensure that the interests of their communities are represented in government, joined preexisting political parties and were subsequently elected to Congress. The text goes on to highlight a second approach adopted by Indigenous leaders in Canada and several Latin American countries: rather than joining established political parties, many Indigenous politicians in these countries have instead formed their own parties to promote candidates for office who support causes that are important to their communities.

Choice A is incorrect because the text’s focus is on the contrasting approaches adopted by different Indigenous political movements in different countries; thus, it isn’t accurate to say that the text traces the history of one political movement. Moreover, the text only discusses examples from 2000 to 2021, a relatively short period of time; therefore, it provides very little in the way of discussion of larger historical developments, nor does it make any predictions about how these movements might continue to develop in the future. Choice B is incorrect because the text never urges Indigenous politicians in the US to alter their strategy of striving for representation through the established political parties, nor does it suggest that this strategy is inferior to that of Indigenous politicians in Canada and Latin America, who have formed their own parties. In fact, the text notes that both strategies have resulted in the election of Indigenous politicians to national governments. Choice D is incorrect because the text never suggests that Indigenous politicians in the US have influenced those in Canada and Latin America; instead, it stresses how Indigenous politicians’ approach toward achieving representation in the US government has differed from the approach Indigenous politicians have taken to achieve representation in national governments elsewhere in the Americas.

Space scientists Anna-Lisa Paul, Stephen M. Elardo, and Robert Ferl planted seeds of *Arabidopsis thaliana* in samples of lunar regolith—the surface material of the Moon—and, serving as a control group, in terrestrial soil. They found that while all the seeds germinated, the roots of the regolith-grown plants were stunted compared with those in the control group. Moreover, unlike the plants in the control group, the regolith-grown plants exhibited red pigmentation, reduced leaf size, and inhibited growth rates—indicators of stress that were corroborated by postharvest molecular analysis.

Which choice best states the main purpose of the text?

- A.

It describes an experiment that addressed an unresolved question about the extent to which lunar regolith resembles terrestrial soils.
- B.

It compares two distinct methods of assessing indicators of stress in plants grown in a simulated lunar environment.
- C.

It presents evidence in support of the hypothesis that seed germination in lunar habitats is an unattainable goal.
- D.

It discusses the findings of a study that evaluated the effects of exposing a plant species to lunar soil conditions.

ID: da17503b Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text describes an experiment wherein space scientists compared plant growth in terrestrial and lunar soil conditions. It then discusses the findings of the study, including the fact that all the seeds germinated but that the plants grown in lunar soil exhibited signs of stress.

Choice A is incorrect. The text doesn’t address this question, and never describes any specific characteristics of either soil. It merely describes the outcome of an experiment that exposed a plant species to lunar soil conditions. Choice B is incorrect. The text never compares methods of assessing indicators of stress—instead, it simply mentions several stress indicators observed in the study (red pigmentation, reduced leaf size, and inhibited growth rates). Choice C is incorrect. The text doesn’t present any evidence that we could never achieve seed germination in lunar habitats, and in fact states that the seeds in the lunar soil did germinate.

Studying late nineteenth- and early twentieth-century artifacts from an agricultural and domestic site in Texas, archaeologist Ayana O. Flewellen found that Black women employed as farm workers utilized hook-and-eye closures to fasten their clothes at the waist, giving themselves a silhouette similar to the one that was popular in contemporary fashion and typically achieved through more restrictive garments such as corsets. Flewellen argues that this sartorial practice shows that these women balanced hegemonic ideals of femininity with the requirements of their physically demanding occupation.

Which choice best states the main purpose of the text?

- A. To describe an unexpected discovery that altered a researcher’s view of how rapidly fashions among Black female farmworkers in late nineteenth- and early twentieth-century Texas changed during the period
- B. To discuss research that investigated the ways in which Black female farmworkers in late nineteenth- and early twentieth-century Texas used fashion practices to resist traditional gender ideals
- C. To evaluate a scholarly work that offers explanations for the impact of urban fashion ideals on Black female farmworkers in late nineteenth- and early twentieth-century Texas
- D. To summarize the findings of a study that explored factors influencing a fashion practice among Black female farmworkers in late nineteenth- and early twentieth-century Texas

ID: 6a9bf335 Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text provides an overview of a scholarly work discussing the fashion practices of Black female farmworkers in late 19th- and early 20th-century Texas, and how these practices were influenced by both the fashion ideals of the time and the demands of farmwork.

Choice A is incorrect. The text never discusses the rate of fashion change among Black female farmworkers. The text also never categorizes Flewellen’s findings as "unexpected." Choice B is incorrect. The text actually explains that Black female farmworkers were trying to achieve traditional feminine ideals, not resist them. Choice C is incorrect. The text doesn’t evaluate a scholarly work but rather simply describes it. Furthermore, the text is focused on "agricultural and domestic" fashion, not urban fashion as this choice suggests.

The following text is from George Marion McClellan’s 1895 poem “Eternity.”

My spirit swoons, and all my senses cry
For Ocean’s breast and covering of the sky.
Rock me to sleep, ye waves, and outward bound,
Just let me drift far out from toil and care,
Where lapping of the waves shall be the sound,
Which mingled with the winds that gently bear
Me on between a peaceful sea and sky,
To make my soothing slumberous lullaby.

Which choice best states the main purpose of the text?

- A. To illustrate the increasing intensity of the speaker’s desire to escape ongoing hardship by gliding on the ocean
- B. To contrast the demands of the speaker’s everyday life with the serenity of being rocked to sleep by the ocean
- C. To convey the speaker’s longing for the ocean to impart a sense of inner tranquility
- D. To justify the speaker’s qualms about being transported by the ocean to a quiet destination

ID: ef9e1e81 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately states the main purpose of the text, which is to convey the speaker’s longing for the ocean to impart a sense of inner tranquility, or peace. The text begins by expressing the speaker’s strong desire to be on the ocean, appealing directly to the waves to rock the speaker to sleep. The poem then describes the "slumberous lullaby" formed by the sound of the waves and the winds on which the speaker wishes to be carried "gently...between a peaceful sea and sky." All these details serve to emphasize the speaker’s desire for the ocean to give them a sense of inner tranquility.

Choice A is incorrect. Given the poem’s expression of a longing to achieve tranquility by drifting on the ocean, it can be inferred that the speaker desires to escape something unpleasant in daily life. However, the poem doesn’t refer directly to any such hardship—ongoing or otherwise. And since the poem doesn’t establish that the speaker is experiencing a desire to escape ongoing hardship, it can’t be said that such a desire increases in intensity. Choice B is incorrect. The speaker does express a desire for the serenity of being rocked to sleep by the ocean, and it can be inferred that this desire is a response to demands that make the speaker’s daily life stressful. However, the poem doesn’t refer directly to such demands or contrast them with the tranquility of drifting on the ocean. Choice D is incorrect because the text doesn’t suggest the speaker has any qualms, or reservations, about being transported by the ocean. On the contrary, the speaker actively desires to "drift far out" and be carried by the waves and wind. Moreover, the poem doesn’t suggest that this drifting would have any particular destination.

Astronomers are confident that the star Betelgeuse will eventually consume all the helium in its core and explode in a supernova. They are much less confident, however, about when this will happen, since that depends on internal characteristics of Betelgeuse that are largely unknown. Astrophysicist Sarafina El-Badry Nance and colleagues recently investigated whether acoustic waves in the star could be used to determine internal stellar states but concluded that this method could not sufficiently reveal Betelgeuse’s internal characteristics to allow its evolutionary state to be firmly fixed.

Which choice best describes the function of the second sentence in the overall structure of the text?

- A. It describes a serious limitation of the method used by Nance and colleagues.
- B. It presents the central finding reported by Nance and colleagues.
- C. It identifies the problem that Nance and colleagues attempted to solve but did not.
- D. It explains how the work of Nance and colleagues was received by others in the field.

ID: 674aae7d Answer

Correct Answer: C

Rationale

Choice C is the best answer because it best describes how the second sentence functions in the text as a whole. The first sentence establishes something astronomers believe with some certainty: that Betelgeuse will explode in a supernova. The second sentence then introduces a problem: astronomers aren’t certain *when* Betelgeuse will explode because they don’t have enough information about the star’s internal characteristics. Finally, the third sentence indicates that researcher Sarafina El-Badry Nance and colleagues investigated a possible method of obtaining the necessary information about Betelgeuse’s internal characteristics, though they found that the method wouldn’t be sufficient. Thus, the function of the second sentence is to identify the problem that Nance and colleagues attempted to solve but didn’t.

Choice A is incorrect because the second sentence introduces the general problem Nance and colleagues hoped to solve, not a serious limitation of how Nance and colleagues tried to solve it. It is the third sentence that introduces Nance and colleagues, but no serious limitation of their approach to studying a method of determining internal stellar states is described. Choice B is incorrect because the second sentence introduces the general problem Nance and colleagues hoped to solve, not the central finding they ultimately reported. It is the third sentence that presents Nance and colleagues’ conclusion that a potential method for determining internal stellar states would be insufficient. Choice D is incorrect because the second sentence doesn’t indicate how other astronomers or astrophysicists responded to the work done by Nance and colleagues; the text doesn’t address this information at all.

According to Indian economist and sociologist Radhakamal Mukerjee (1889–1968), the Eurocentric concepts that informed early twentieth-century social scientific methods—for example, the idea that all social relations are reducible to struggles between individuals—had little relevance for India. Making the social sciences more responsive to Indians’ needs, Mukerjee argued, required constructing analytical categories informed by India’s cultural and ecological circumstances. Mukerjee thus proposed the communalist “Indian village” as the ideal model on which to base Indian economic and social policy.

Which choice best describes the overall structure of the text?

- A. The text recounts Mukerjee’s early training in the social scientific disciplines and then lists social policies whose implementation Mukerjee oversaw.
- B. The text mentions some of Mukerjee’s economic theories and then traces their impact on other Indian social scientists of the twentieth century.
- C. The text presents Mukerjee’s critique of the social sciences and then provides an example of his attempts to address issues he identified in his critique.
- D. The text explains an influential economic theory and then demonstrates how that theory was more important to Mukerjee’s work than other social scientists have acknowledged.

ID: 83e4ea9a Answer

Correct Answer: C

Rationale

Choice C is the best answer. The text does indeed present Mukerjee’s critique of the social sciences—that they were too Eurocentric—and then provides an example of how he attempted to address the issues he identified: by suggesting a social science model based on the Indian village.

Choice A is incorrect. The text doesn’t discuss Mukerjee’s early training or his oversight of the implementation of social policies at all. Choice B is incorrect. The text never discusses any other Indian social scientists. Choice D is incorrect. The text never mentions other social scientists’ responses to Mukerjee’s work.

The following text is adapted from Herman Melville’s 1855 novel *Israel Potter*. Israel is a young man wandering through New England during the late eighteenth century.

He hired himself out for three months; at the end of that time to receive for his wages two hundred acres of land lying in New Hampshire. [...] His employer proving false to the contract in the matter of the land, and there being no law in the country to force him to fulfil it, Israel—who, however brave-hearted, and even much of a dare-devil upon a pinch, seems nevertheless to have evinced, throughout many parts of his career, a singular patience and mildness—was obliged to look round for other means of livelihood than clearing out a farm for himself in the wilderness.

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It implies that Israel treasures a particular characteristic of his personality when that characteristic should usually be regarded as a flaw.
- B. It suggests that if not for a certain aspect of his character, Israel might not have been as easily thwarted in his ambition to establish a farm.
- C. It shows why Israel would not have been able to undertake the enormous amount of labor necessary to run a farm even if he had owned the necessary property.
- D. It explains why, when the situation requires it, Israel is able to undertake courageous acts that others would generally avoid.

ID: 306f6d2a Answer

Correct Answer: B

Rationale

Choice B is the best answer because it best describes the function of the underlined portion in the text as a whole. The text describes the failed attempt of Israel Potter to establish a farm in New England during the late eighteenth century: according to his contract, he was to receive two hundred acres in exchange for three months’ work, but his employer then refused to fulfill the bargain and Israel had no recourse to law to obtain the land he was owed. Israel was therefore forced to find another means of supporting himself. To explain why Israel was particularly susceptible to his employer’s dishonesty, the underlined portion states that though Israel was "brave-hearted, and even much of a dare-devil upon a pinch," he also possessed "a singular patience and mildness." In other words, Israel could be courageous in certain circumstances, but he was usually meek and disinclined to argument, from which it is reasonable to infer that Israel was often taken advantage of. Thus, the underlined portion suggests that if not for a certain aspect of his character, Israel might not have been as easily thwarted in his ambition to establish a farm.

Choice A is incorrect because although the underlined portion describes aspects of Israel’s personality, it does not address how he feels about his own personality. Choice C is incorrect because the underlined portion addresses Israel’s occasional courage and frequent meekness but does not address whether he would have the skills and resolve necessary to operate a farm if he owned sufficient property. Choice D is incorrect. Though the underlined portion does indicate that Israel could be courageous in certain circumstances, it does not say that he undertook acts of courage that others avoided, but rather that he was habitually meek. Even if the underlined portion did say that Israel was more courageous than most, this would not explain why he found

himself under the circumstances described in the text—that is, as a consequence of his meek nature, cheated of the property to which he had a right.

According to historian Vicki L. Ruiz, Mexican American women made crucial contributions to the labor movement during World War II. At the time, food processing companies entered into contracts to supply United States armed forces with canned goods. Increased production quotas conferred greater bargaining power on the companies’ employees, many of whom were Mexican American women: employees insisted on more favorable benefits, and employers, who were anxious to fulfill the contracts, complied. Thus, labor activism became a platform for Mexican American women to assert their agency.

- Which choice best describes the function of the underlined portion in the text as a whole?
- A. It elaborates on a claim about labor relations in a particular industry made earlier in the text.
 - B. It offers an example of a trend in the World War II–era economy discussed earlier in the text.
 - C. It notes a possible exception to the historical narrative of labor activism sketched earlier in the text.
 - D. It provides further details about the identities of the workers discussed earlier in the text.

ID: c89da8bc Answer

Correct Answer: A

Rationale

Choice A is the best answer because it best describes how the underlined portion functions in the text as a whole. The text says that the increased production quotas of food processing companies during World War II enabled employees to make better bargains in exchange for their labor. The underlined portion presents an example of this increased bargaining power: employees requested more favorable benefits, and employers complied because they were under pressure to fulfill the demanding terms of their contracts. Thus, the underlined portion of the text elaborates on a claim about labor relations in a particular industry (food processing) made earlier in the text.

Choice B is incorrect because there is no indication in the text that the economic factors that influenced food processing also influenced other parts of the economy; thus, the bargaining described in the underlined portion of the text cannot be called an example of a trend. Choice C is incorrect because the underlined portion supports the historical narrative of labor activism in food processing that is sketched in the text, instead of noting an exception to that narrative. Choice D is incorrect because while the underlined portion does discuss the demands that workers made in exchange for their labor, it does not discuss the identities of the workers.

In Jane Austen’s novel *Mansfield Park*, an almost imperceptible smile from potential suitor Henry Crawford causes the protagonist Fanny Price to blush; her embarrassment grows when she suspects that he is aware of it. This moment—in which Fanny not only infers Henry’s mental state through his gestures, but also infers that *he* is drawing inferences about *her* mental state—illustrates what literary scholar George Butte calls “deep intersubjectivity,” a technique for representing interactions between consciousnesses through which Austen’s novels derive much of their social and psychological drama.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It states a claim about Austen’s skill at representing psychological complexity that is reinforced by an example presented in the following sentence.
- B. It advances an interpretation of an Austen protagonist who is contrasted with protagonists from other Austen novels cited in the following sentence.
- C. It describes a recurring theme in Austen’s novels that is the focus of a literary scholar’s analysis summarized in the following sentence.
- D. It provides a synopsis of an interaction in an Austen novel that illustrates a literary concept discussed in the following sentence.

ID: 939f1fe8 Answer

Correct Answer: D

Rationale

Choice D is the best answer. The underlined sentence provides a concrete example to ground readers’ understanding of the “deep intersubjectivity” described in the next sentence as central to Austen’s work.

Choice A is incorrect. There is no evaluation made of Austen’s skill in this sentence, and no examples are given in the following sentence. This choice essentially flips the paragraph: it’s this first sentence that provides an example. Choice B is incorrect. There are no other Austen protagonists mentioned in this passage, so this couldn’t be the answer. Choice C is incorrect. The underlined sentence doesn’t identify any “recurring theme,” but instead simply describes one interaction from one book. This interaction exemplifies the literary technique of “deep intersubjectivity” that is introduced in the next sentence.

The following text is from Charlotte Brontë’s 1847 novel *Jane Eyre*. Jane, the narrator, works as a governess at Thornfield Hall.

I went on with my day’s business tranquilly; but ever and anon vague suggestions kept wandering across my brain of reasons why I should quit Thornfield; and I kept involuntarily framing advertisements and pondering conjectures about new situations: these thoughts I did not think to check; they might germinate and bear fruit if they could.

- Which choice best states the main purpose of the text?
- A. To convey a contrast between Jane’s outward calmness and internal restlessness
 - B. To emphasize Jane’s loyalty to the people she works for at Thornfield Hall
 - C. To demonstrate that Jane finds her situation both challenging and deeply fulfilling
 - D. To describe Jane’s determination to secure employment outside of Thornfield Hall

ID: 7ec676d1 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the main purpose of the text, which is to show that while Jane calmly goes about her daily tasks, she is experiencing internal agitation about possibly seeking a new job. At the start of the text, Jane says, “I went on with my day’s business tranquilly,” indicating that she is outwardly calm. This outward calmness is then contrasted with her intense internal restlessness, as Jane says that thoughts of leaving her job keep running through her mind, that she is “involuntarily framing advertisements” (meaning that she can’t stop herself from thinking up potential listings for jobs), and that she often wonders what new “situations” (or jobs) would be like.

Choice B is incorrect because the text gives no indication of Jane’s feelings, either positive or negative, about the people she works for at Thornfield Hall. And rather than emphasizing that Jane feels particularly loyal to her employers, the text focuses on her constant consideration of leaving her job. Choice C is incorrect because the text gives no indication that Jane finds her current situation fulfilling, or satisfying. Given that much of the text is focused on Jane’s thoughts about possibly leaving her job for a new one, it might be the case that she finds her situation challenging, but there is no evidence in the text that Jane also finds that situation satisfying—she says nothing positive about her current job at all, in fact. Choice D is incorrect because the text describes Jane as wondering about getting a new job, not as determined to definitely do so. Jane keeps thinking about reasons why she “should” quit her current job (indicating that she hasn’t yet decided to) and imagining possible new situations she could find, but she says at the end of the text that these thoughts “might germinate and bear fruit if they could,” meaning that the thoughts haven’t yet led to a decision—that Jane isn’t yet determined to get a new job somewhere else.

Pteropods are small swimming snails with thin, delicate calcium carbonate shells. These animals are thought to be especially vulnerable to ocean acidification due to calcium carbonate’s susceptibility to dissolution at lower pH values. Victoria L. Peck and colleagues recently found that the periostracum (a protective coating on pteropods’ outer shells) prevents this dissolution when intact. Moreover, the team was surprised to discover that even when the periostracum is breached, pteropods can still mitigate damage by rebuilding the inner shell wall.

Which choice best describes the main purpose of the text?

- A.

To call for additional research on biological mechanisms that improve pteropod survival rates
- B.

To discuss a conclusion drawn in a study of calcium carbonate’s role in protecting the periostracum of pteropods
- C.

To address some of the ways ocean acidification has altered pteropod behavior over time
- D.

To present findings that suggest that a concern about the effects of ocean acidification on pteropod shells may be unwarranted

ID: 4c16e3b0 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes the main purpose of the text, which is to present findings that suggest a previously held concern about the effects of ocean acidification on pteropod shells may be unwarranted. The text introduces the concern that pteropods are thought to be particularly vulnerable to ocean acidification, or lower pH levels, due to the susceptibility of their calcium carbonate shells to dissolution at lower pH levels. However, the text then describes findings from a recent study that suggest this concern may be unjustified, insofar as the protective periostracum coating on a pteropod’s shell prevents dissolution, and even when the coating is breached, a pteropod can rebuild the inner shell wall, reducing the damage.

Choice A is incorrect because the text doesn’t call for additional research or suggest that more research is needed on biological mechanisms that improve pteropod survival rates. Instead, the text discusses a recent study showing that pteropods may not be as vulnerable to ocean acidification as is feared. Choice B is incorrect because the study discussed in the text doesn’t address calcium carbonate’s role in protecting the periostracum of pteropods. According to the text, the study addresses the periostracum’s role in protecting pteropods’ calcium carbonate shells from dissolution due to ocean acidification. Choice C is incorrect because the text doesn’t address how ocean acidification has altered pteropod behavior over time. Instead, the text focuses on the potential effects of ocean acidification on pteropods’ shells and the mechanisms protecting against those effects.

Asteroid 6478 Gault has experienced intermittent mass loss since at least 2013, but in contrast to some other asteroids with repeated mass-loss episodes, 6478 Gault has not lost mass at its perihelion (the closest point of its orbit to the Sun), and thus the loss is not attributable to solar energy–driven ice vaporization. And as Jane X. Luu et al. point out, the singular nature of impact ejection makes it untenable as an account of multiple loss episodes of similar duration over several years. Instead, Luu et al. are likely correct that 6478 Gault is shedding mass due to rotational instability.

Which choice best describes the overall structure of the text?

- A.

It presents a scientific observation, describes a contrast between that observation and other observations, and then explains why those other observations should not be considered credible.
- B.

It describes an astronomical finding, discusses competing theories about that finding that the author regards as flawed, and then describes new evidence that supports an alternative theory.
- C.

It introduces a natural phenomenon, refutes two potential explanations for that phenomenon, and then presents a third explanation for that phenomenon that the author regards as plausible.
- D.

It discusses a physical process, evaluates possible causes of that process, and then states that a persuasive account of the process has yet to be put forward.

ID: 4e8b863b Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes the overall structure of the text. The text begins by introducing the natural phenomenon of intermittent mass loss with regard to Asteroid 6478 Gault and notes that it curiously has not lost mass at its perihelion like other asteroids typically do. The text then refutes "solar energy–driven ice vaporization" and "the singular nature of impact ejection" as two possible explanations for Asteroid 6478 Gault’s intermittent mass loss. Finally, the text presents Luu et al.’s explanation that "6478 Gault is shedding mass due to rotational instability," which the author says is "likely correct." Thus, the overall structure of the text is that it introduces a natural phenomenon, refutes two potential explanations for that phenomenon, and then presents a third explanation for that phenomenon that the author regards as plausible.

Choice A is incorrect because the text doesn’t distinguish between multiple observations. It focuses on the single observation that Asteroid 6478 Gault is losing mass and evaluates multiple explanations for the phenomenon. The text also asserts that Luu et al.’s explanation is credible and "likely correct." Choice B is incorrect because the text describes a natural phenomenon, not a specific astronomical finding. In addition, although the text does note flawed reasons for Asteroid 6478 Gault’s intermittent mass loss, it doesn’t mention that Asteroid 6478 Gault’s intermittent mass loss is based on new evidence. Choice D is incorrect. Although the text does evaluate explanations for the cause of Asteroid 6478 Gault’s intermittent mass loss, the text also asserts that Luu et al.’s explanation that they have put forth is persuasive and "likely correct."

Dubautia carrii is a species in a family of plants known collectively as the silversword alliance, all of which grow only on the Hawaiian Islands. Members of this alliance exhibit an extraordinary range of phenotypes, with some species maturing into vines and others into shrubs and trees. All species in the alliance descended from a single ancestral tarweed plant that arrived on the islands around 5 million years ago. The tarweed’s descendants diversified into distinct species as they adapted to live in the wide variety of habitats found on the Hawaiian Islands.

- Which choice best states the main purpose of the text?
- A. To indicate the specific tarweed ancestor of all plants that grow on the Hawaiian Islands and explain why the plants have such varied physical characteristics
 - B. To describe the specific habitat where *Dubautia carrii* are found and identify other plants that share a common ancestor with them
 - C. To describe the silversword alliance and explain how the plant family became so varied
 - D. To advance the claim that all plants on the Hawaiian Islands are part of the silversword alliance and list possible ancestors of the plants that make up the alliance

ID: 0aa32767 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes the main purpose of the text, which is to describe the family of plants known as the silversword alliance and explain why the plants came to exhibit "an extraordinary range of phenotypes." The text introduces the silversword alliance as a family of plants unique to the Hawaiian Islands, presenting those that mature into vines and those that mature into shrubs and trees as examples of different phenotypes. The text concludes by explaining that these plants are all descendants of "a single ancestral tarweed plant" that arrived 5 million years ago in the Hawaiian Islands, where a "wide variety of habitats" drove the plant’s descendants to adapt and thus differentiate themselves, diversifying into a group of related but distinct species with different physical characteristics.

Choice A is incorrect. Although the text explains why the plants within the silversword alliance have varied physical characteristics, the text doesn’t suggest that tarweed is the ancestor of all plants on the Hawaiian Islands. The text states instead that all members of the silversword alliance descend from a single tarweed ancestor. Choice B is incorrect because while *Dubautia carrii* is mentioned as an example of a species in the silversword alliance, no details about its particular habitat are provided. And although the text indicates that the Hawaiian Islands are home to "a wide variety of habitats," it doesn’t describe the specific habitat where *Dubautia carrii* is found. The text discusses the silversword alliance as a whole rather than focusing on *Dubautia carrii* or any one species within this family. Choice D is incorrect. Although the silversword alliance is only found on the Hawaiian Islands and includes "an extraordinary range of phenotypes," the text doesn’t claim that all plants on the Hawaiian Islands are part of the alliance. Furthermore, the text indicates that these plants all "descended from a single ancestral tarweed plant," not that there are multiple possible candidates for that ancestor plant.

“How lifelike are they?” Many computer animators prioritize this question as they strive to create ever more realistic environments and lighting. Generally, while characters in computer-animated films appear highly exaggerated, environments and lighting are carefully engineered to mimic reality. But some animators, such as Pixar’s Sanjay Patel, are focused on a different question. Rather than asking first whether the environments and lighting they’re creating are convincingly lifelike, Patel and others are asking whether these elements reflect their films’ unique stories.

- Which choice best describes the function of the underlined question in the text as a whole?
- A. It reflects a primary goal that many computer animators have for certain components of the animations they produce.
 - B. It represents a concern of computer animators who are more interested in creating unique backgrounds and lighting effects than realistic ones.
 - C. It conveys the uncertainty among many computer animators about how to create realistic animations using current technology.
 - D. It illustrates a reaction that audiences typically have to the appearance of characters created by computer animators.

ID: 4c27795c Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the function of the underlined question in the text as a whole. The text begins with the underlined question, “How lifelike are they?” The text then explains that many computer animators pose this question about the environments and lighting that they create for animated films, striving for realistic animation of those components even if the characters themselves aren’t portrayed in realistic terms. The focus of the text then shifts to describe how some animators strive to create environments and lighting that reflect the film’s unique stories rather than making them appear realistic. Therefore, the function of the underlined question is to reflect a primary goal that many computer animators have for certain components of the animations they produce.

Choice B is incorrect because, as the text makes clear, the underlined question is one posed by computer animators who wish to create realistic backgrounds and lighting effects, not by those who, instead, wish to create effects that reflect films’ unique stories and aren’t necessarily realistic; this latter group of animators is discussed later in the text. Choice C is incorrect. As the text explains, many computer animators strive for realistic environments and lighting, while others do not; this difference of approach relates to whether these components should be realistic, not to how realism can be achieved using current technology, and the text never suggests that animators are uncertain how to achieve it. Choice D is incorrect because the underlined question pertains to the perspective of computer animators, not the audience, and the text never considers audience’s reactions to characters in animated films.

Curious about how people visually perceive objects in their dreams, Stephen LaBerge and team recruited lucid dreamers—people aware that they’re dreaming as it’s happening—for a research study. These participants were reliably able to signal when they had entered a dream state; the team then observed participants’ eye movements as they slept. The smoothness with which participants’ eyes tracked objects in their dreams closely matched how sighted people who are awake visually track objects around them, suggesting to the team that the brain perceives dream objects as the product of something other than pure imagination.

Which choice best states the function of the underlined portion in the text as a whole?

- A. To offer key evidence that undermines LaBerge and team’s initial hypothesis
- B. To show the unexpected result that led LaBerge and team to change the focus of their study
- C. To illustrate an important real-world implication of LaBerge and team’s main finding
- D. To identify a comparable circumstance that helps justify LaBerge and team’s conclusion

ID: 6d4bb994 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The text first establishes that in order to investigate visual perception of objects in dreams, LaBerge and team observed the eye movements of lucid dreamers (people who are aware of their dreaming as it occurs) when these participants signaled that they were in a dream state. The underlined portion then describes a finding that rests on a comparison: the way participants’ eyes tracked objects in dream states was very similar to how sighted people track real objects when awake. Finally, the text states that the team concluded from this finding that objects in dreams are perceived as more than just products of imagination—implying that the team thinks the eye movements are an indication that the brain treats dream objects as more real than imaginary. Thus, the function of the underlined portion is to identify a circumstance that is comparable to one in the study and that helps justify LaBerge and team’s conclusion, presenting the close similarity of visual tracking in wakeful and dreaming scenarios as support for the implicit idea that the brain perceives dream objects not as imaginary but as somewhat or fully real objects.

Choice A is incorrect because the text never presents LaBerge and team’s initial hypothesis, only what question they were interested in studying and what they found. So although the underlined portion does present evidence, that evidence doesn’t serve to undermine any hypothesis in the text. Choice B is incorrect because the text gives no indication that LaBerge and team changed the focus of their study at any point or that the finding described in the underlined portion (or any other finding) was unexpected or surprising. Choice C is incorrect. Rather than illustrating an implication of the main finding by LaBerge and team, the underlined portion only presents the finding itself, stating that the team found that the movements of lucid dreamers’ eyes while dreaming were very similar to those of sighted people visually tracking objects while awake. The next part of the text indicates what the finding implied to the team but still doesn’t offer a real-world example as illustration.

During Rome’s republican period, which ended in the first century BCE, libraries were predominantly owned by wealthy individuals who tightly controlled access to their book collections. The first public library became available in Rome in 28 BCE and was soon followed by one commissioned by Emperor Augustus. As modern scholar Fabio Fernandes notes, however, these two traditions aren’t as distinct as they seem, as both the emperor and the private library owners viewed their libraries as extensions of their personal patronage, just on vastly differing scales.

Which choice best states the main purpose of the text?

- A. To give a brief overview of public access to libraries throughout Rome’s republican period
- B. To contend that early imperial leaders in Rome wielded too much influence over libraries
- C. To assert that private and early public libraries in ancient Rome had an essential similarity
- D. To call into question the notion that private Roman libraries disappeared during the first century BCE

ID: 755cb5eb Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes the main purpose of the text. The text describes two types of libraries in first-century BCE Rome—private libraries controlled by wealthy individuals, and the public libraries like that commissioned by Emperor Augustus—and then notes that "these two traditions aren’t as distinct as they seem." It explains that both private-library owners and the emperor saw their libraries as "extensions of their personal patronage, just on vastly differing scales," because the emperor’s patronage extended to the whole citizenry of Rome. Thus, both private and public libraries in ancient Rome were fundamentally tied to relevant principles of patronage.

Choice A is incorrect because the text mentions that Rome’s republican period only to say that it "ended in the first century BCE," thus it doesn’t support any conclusions about possible occurrences "throughout Rome’s republican period." Choice B is incorrect. The text neither discusses "early imperial leaders in Rome," nor whether their level of influence was appropriate. Rather it discusses the end of "Rome’s republican period" in relation to libraries, who created them, and who got to use them without passing judgment on propriety. Choice D is incorrect. Although the text indicates that Rome’s republican period "ended in the first century BCE," a period that also saw the first public library come into use (28 BCE), nothing in the text suggests that private libraries disappeared at that time.

In 2023 literary scholar Jeremy Douglass cautioned technology investors and enthusiasts who predict conventional books’ ultimate displacement by newer forms of media. Douglass observed that the concept of an “interactive” text is much older than technologists assume, extending back to the first time readers scratched notes into a text’s margins. In addition, newer media, such as video games, haven’t replaced older forms of entertainment, such as comic books, but rather exist alongside them. Douglass believes that rather than supplanting books, technology is simply making new forms of expression possible.

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It challenges the stance of the investors and enthusiasts who are mentioned earlier in the text.
- B. It explains the basis for the claim made by the technologists mentioned in the text.
- C. It suggests that academics are better suited than investors to see the potential uses of contemporary interactive texts.
- D. It provides a historical anecdote about the technological challenges involved in reading the earliest interactive texts.

ID: e3ef19f1 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The first sentence of the text introduces literary scholar Jeremy Douglass’s warning to technology investors and enthusiasts against predicting the displacement of conventional books by newer media forms. The next sentence, which is underlined in part, presents Douglass’s observation that interactive texts are hardly new; they have been available for longer than technologists assume, beginning with the first time readers wrote notes in texts’ margins. Thus, the function of the underlined portion is to challenge the stance of the technology investors and enthusiasts mentioned earlier in the text. As the remainder of the text points out, newer media doesn’t necessarily replace older media, but rather, as Douglass believes, leads to new forms of expression.

Choice B is incorrect because the underlined portion challenges the position taken by investors and enthusiasts; it doesn’t provide context for their claims. Choice C is incorrect because the underlined portion doesn’t mention academics or compare them to investors regarding their ability to see potential in using contemporary interactive texts; instead, the underlined portion challenges the position of investors and enthusiasts who predict that conventional books will be replaced by newer forms of media. Choice D is incorrect because the underlined portion doesn’t address technological challenges; instead, it disputes the stance taken by investors and enthusiasts, suggesting that conventional books haven’t been displaced by traditional interactions with texts, such as writing in the margins, and won’t be supplanted by newer forms of media either.

Vadamalai Elangovan and Ganapathi Marimuthu showed that high moonlight intensity inhibits the activity of the greater short-nosed fruit bat (*Cynopterus sphinx*), a result explicable in terms of benefits and costs: greater lunar intensity may not enable the bats to increase foraging success enough to offset the higher chance of detection by predatory owls or hawks. Most other nocturnal mammals respond to lunar intensity variations similarly to greater short-nosed fruit bats, but mongoose lemurs (*Eulemur mongoz*) display the opposite pattern, as their heavy reliance on visual foraging results in a different balance of reward and risk.

Which choice best describes the overall structure of the text?

- A. It discusses two different responses to the same natural phenomenon, explains why one of those responses occurs, and then suggests that the other response still needs to be explained.
- B. It describes and accounts for a finding, characterizes the finding as representative of a general pattern, and then describes and accounts for an exception to that pattern.
- C. It presents and explains a study result, indicates that the result is similar to the results of many other studies, and then attributes a conflicting study result to a difference in that study’s methods.
- D. It introduces an observation of a behavioral pattern, presents an explanation for the pattern, and then describes an exception to the pattern that casts doubt on that explanation.

ID: 472bbfdf Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the overall structure of the text. The text begins by describing a study’s finding about greater short-nosed fruit bats—namely, that high moonlight intensity inhibits the bats’ activity—and also accounts for that finding, stating that this occurs because the potential increase in foraging success that greater lunar intensity enables doesn’t offset these bats’ increased vulnerability to predators (whose vision is also implied to become more acute under intense moonlight). The text goes on to characterize this finding as representative of a general pattern, stating that many nocturnal mammals behave similarly in response to changes in lunar intensity. The text concludes by describing an exception to this pattern, explaining that mongoose lemurs display an opposite tendency because they rely heavily on visual foraging. This strategy presumably would allow them to derive more benefit from greater lunar intensity than many other nocturnal mammals would, resulting in a "different balance of reward and risk" than exists for other nocturnal mammals. Therefore, the overall structure of the text is best described as a description and account of a finding, a characterization of that finding as representative of a pattern, and then a description and account of an exception to that pattern.

Choice A is incorrect. Although the text discusses two different responses to variations in moonlight intensity, explaining that as moonlight intensity increases, greater short-nosed fruit bats and many other nocturnal mammals decrease their foraging activity but mongoose lemurs increase their foraging activity, it doesn’t leave one of these responses unexplained. The text accounts for both the typical response to increased lunar intensity (reduced activity due to predation risk) and the exception (increased activity due to a reliance on visual foraging) by making reference to a cost-benefit framework. Choice C is incorrect. Although the text

presents a study's finding about the effect of increased lunar intensity on greater short-nosed fruit bats' activity before going on to contrast this behavior with the fact that mongoose lemurs display the opposite response to increased lunar intensity, the text doesn't explicitly invoke other studies and doesn't attribute this difference in observed behavior to the fact that the study of greater short-nosed fruit bats used different methods than studies of mongoose lemurs did. Rather, the text explains that the different observed behaviors can be attributed to differences in species' foraging strategies. Choice D is incorrect. Although the text characterizes the behavior of mongoose lemurs in response to increased lunar intensity as an exception to a pattern of behavior observed in other nocturnal mammal species, this exception doesn't cast any doubt on the explanation that is offered for the general pattern observed among other species. Instead, the text uses the same cost-benefit framework to explain why increased lunar intensity is associated with decreased activity by greater short-nosed fruit bats and other nocturnal mammals but with increased activity by mongoose lemurs.

The 1967 release of Harold Cruse’s book *The Crisis of the Negro Intellectual* isolated him from almost all other scholars and activists of the American Civil Rights Movement—though many of those thinkers disagreed with each other, he nonetheless found ways to disagree with them all. He thought that activists who believed that Black people such as himself should culturally assimilate were naïve. But he also sharply criticized Black nationalists such as Marcus Garvey who wanted to establish independent, self-contained Black economies and societies, even though Cruse himself identified as a Black nationalist.

- Which choice best describes the function of the underlined sentence in the text as a whole?
- A. It describes a direction that Cruse felt the Civil Rights Movement ought to take.
 - B. It indicates that Cruse’s reputation as a persistent antagonist of other scholars is undeserved.
 - C. It describes a controversy that Cruse’s work caused within the Black nationalist movement.
 - D. It helps explain Cruse’s position with respect to the community of civil rights thinkers.

ID: a05fe244 Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text as a whole claims that Cruse disagreed with virtually all other Civil Rights scholars and activists. The underlined sentence describes one way that Cruse both did and didn’t fit in with those thinkers: he criticized Black nationalists, even though he identified as one.

Choice A is incorrect. The underlined sentence doesn’t do this. It describes Cruse’s criticisms—it never mentions what Cruse did want the movement to do instead. Choice B is incorrect. This conflicts with the text, which argues that Cruse did disagree with almost all other scholars of the Civil Rights Movement. Choice C is incorrect. This is a step too far. The text never says that Cruse’s work caused controversy within the Black nationalist movement.

The following text is adapted from Herman Melville’s 1857 novel *The Confidence-Man*. Humphry Davy was a prominent British chemist and inventor.

Years ago, a grave American savant, being in London, observed at an evening party there, a certain coxcombical fellow, as he thought, an absurd ribbon in his lapel, and full of smart [banter], whisking about to the admiration of as many as were disposed to admire. Great was the savant’s disdain; but, chancing ere long to find himself in a corner with the jackanapes, got into conversation with him, when he was somewhat ill-prepared for the good sense of the jackanapes, but was altogether thrown aback, upon subsequently being [informed that he was] no less a personage than Sir Humphry Davy.

- Which choice best states the main purpose of the text?
- A. It portrays the thoughts of a character who is embarrassed about his own behavior.
 - B. It presents an account of a misunderstanding.
 - C. It offers a short history of how a person came to be famous.
 - D. It explains why one character dislikes another.

ID: 0a9b75f3 Answer

Correct Answer: B

Rationale

Choice B is the best answer. The text tells a story of a first impression that turned out to be wrong: a serious American savant was dismissive of a goofy-looking, wisecracking guest at a British party, and then was shocked to learn that the guest was actually a prominent British chemist and inventor.

Choice A is incorrect. This is too strong and too narrow. Only at the very end is the savant "thrown aback" by the fact that the man was Sir Humphry Davy—he’s not "embarrassed about his own behavior." Choice C is incorrect. This isn’t the main purpose. The text never provides the history of how Sir Humphry Davy came to be famous. Nor does it provide any history for the American savant. Choice D is incorrect. This is too narrow. It doesn’t include the second half of the text, where the savant gets into a conversation with the man and then finds out that the man is Sir Humphry Davy.

Several studies have found negligible electoral consequences for governments that impose fiscal austerity measures, yet some European governments recently suffered electorally due to their austerity programs. Evelyne Huebscher and colleagues attribute this incongruity to governments’ tendency—not followed in the recent European cases—to implement austerity programs strategically to avoid electoral costs (e.g., setting spending cuts to take effect only after the next election), which has obscured the inherent political risks of austerity measures in the election data scholars have examined.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It explains a discrepancy between what has been observed in study settings and what has been observed in real-world settings that the text goes on to assert is attributable to the studies not using real-world data.
- B. It identifies a conflict between research findings and recent events that the text goes on to suggest is a consequence of a complicating factor in the data used to generate those findings.
- C. It presents a long-standing divergence in research findings that the text goes on to say is due to different groups of researchers using data that derive from different electoral circumstances.
- D. It describes a recent exception to a general pattern in research findings that the text goes on to explain is a result of researchers underestimating the significance of inconsistencies in the data they’ve analyzed.

ID: a5307779 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it best describes how the underlined sentence functions in the text as a whole. The underlined sentence explains that contrary to what several studies would suggest, recent European governments suffered electorally after the launch of fiscal austerity programs. The text goes on to indicate that the researchers generated their findings from data that didn’t reveal the true political risk of austerity measures because the data were based on cases in which governments had set austerity programs to take effect after the next election, a practice the European governments that recently suffered electorally didn’t adhere to, thus introducing a complicating factor resulting in a conflict between the research findings and recent events.

Choice A is incorrect because the underlined sentence doesn’t indicate that the discrepancy described in the text is between observations made in study settings and observations made in real-world settings. Rather, the underlined sentence indicates that the outcome of recent events is contrary to what would be expected based on the findings of several studies. Additionally, there is nothing in the text to suggest that the studies mentioned did not use real-world data; instead, the text indicates that the data used was generated under potentially different circumstances than the recent events. Choice C is incorrect because the underlined sentence doesn’t present a long-standing divergence in research findings but rather a discrepancy between past research findings and recent events that the text goes on to attribute to researchers’ use of data that didn’t reveal the true political risk of austerity measures. Choice D is incorrect because while the underlined sentence notes that there have been some recent exceptions to a general pattern observed in several research studies, it does not go on to attribute this exception to the researchers underestimating inconsistencies in the data. Rather, the text goes on to attribute this to a circumstance (fiscal austerity measures

being implemented before an election rather than after) which adds a complicating factor into the data not accounted for in past studies.

Some studies have suggested that posture can influence cognition, but we should not overstate this phenomenon. A case in point: In a 2014 study, Megan O’Brien and Alaa Ahmed had subjects stand or sit while making risky simulated economic decisions. Standing is more physically unstable and cognitively demanding than sitting; accordingly, O’Brien and Ahmed hypothesized that standing subjects would display more risk aversion during the decision-making tasks than sitting subjects did, since they would want to avoid further feelings of discomfort and complicated risk evaluations. But O’Brien and Ahmed actually found no difference in the groups’ performance.

Which choice best states the main purpose of the text?

- A. It argues that research findings about the effects of posture on cognition are often misunderstood, as in the case of O’Brien and Ahmed’s study.
- B. It presents the study by O’Brien and Ahmed to critique the methods and results reported in previous studies of the effects of posture on cognition.
- C. It explains a significant problem in the emerging understanding of posture’s effects on cognition and how O’Brien and Ahmed tried to solve that problem.
- D. It discusses the study by O’Brien and Ahmed to illustrate why caution is needed when making claims about the effects of posture on cognition.

ID: 06346bcd Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes the main purpose of the text. The text notes that although some studies have suggested that posture may have an effect on cognition, this phenomenon should not be overstated. In other words, the text begins by urging caution and restraint when discussing the effects of posture on cognition, implying that even though some studies have shown posture to affect cognition, we should not assume that posture always affects cognition or does so in a strong way. The text goes on to discuss O’Brien and Ahmed’s study as a "case in point" (that is, as an example of the point made previously). According to the text, O’Brien and Ahmed hypothesized that since standing is more cognitively demanding than sitting, standing subjects in their experiment would respond differently to decision-making tasks than sitting subjects would, which would show an effect of posture on cognition. What the researchers actually found, however, was that the standing and sitting subjects performed the same—posture did not affect cognition. By presenting a circumstance in which posture does not appear to affect cognition, the discussion of O’Brien and Ahmed’s study shows why it is important not to overstate the phenomenon. The purpose of the text, therefore, is to discuss O’Brien and Ahmed’s study to illustrate why caution is needed when making claims about posture’s effects on cognition.

Choice A is incorrect because the text discusses O’Brien and Ahmed’s study as an example of why caution is needed when discussing posture’s effects on cognition, not as an example of how research findings related to posture and cognition are often misunderstood. Although the text does warn against misunderstanding the scope of the relationship between posture and cognition that has been reported in some previous studies, O’Brien and Ahmed’s study is not one of those studies, and there is no

suggestion that anyone has misunderstood O'Brien and Ahmed's findings. Choice B is incorrect because the text makes no mention of the methods used in previous studies of the effects of posture on cognition. Although the text does urge caution when discussing posture's effects on cognition, it does not critique the results of studies that suggested that posture can affect cognition. Instead, the text suggests that such results should not be exaggerated or taken too broadly. Choice C is incorrect because although the text implies that overstating posture's effects on cognition would be a problem, nothing in the text suggests that O'Brien and Ahmed share that view or that they attempted to solve that problem. O'Brien and Ahmed are presented as hypothesizing that posture would affect cognition in their study, not as trying to resolve the problem the text describes.

Raymond Antrobus, an accomplished poet and writer of prose, recently released his debut spoken word poetry album, *The First Time I Wore Hearing Aids*, in collaboration with producer Ian Brennan. The album contains both autobiographical and reflective pieces combining Antrobus’s spoken words with Brennan’s fragmented audio elements and pieces of music to convey how people who are deaf may experience sound, both its presence and absence. Some critics suggest that the album questions the function of sound in the world, highlighting that the experience of sound is multifaceted.

Which choice best describes the overall structure of the text?

- A. It introduces a collaborative spoken word poetry project, details the approach taken to produce the work, and then provides an example of critique the album received upon release.
- B. It mentions a collection of spoken word poems, distinguishes one poem as being an exemplar on the album, and then offers a summary of the subject matter of the whole collection.
- C. It summarizes the efforts to produce a collection of spoken word poems, presents biographies of two people who worked on the album, and speculates about the meaning behind the poetry.
- D. It connects two artists to the same spoken word poetry project, explains the extent of their collaboration on each poem, and then provides an overview of the technique used to produce the work.

ID: 52aa1317 Answer

Correct Answer: A

Rationale

Choice A is the best answer. The text first introduces the album as being a collaboration between Antrobus and Brennan, then describes the approach taken to produce it, then mentions how critics have said that it calls into question the function of sound.

Choice B is incorrect. While the text does mention a collection of spoken word poems, it doesn’t single out one poem as being particularly noteworthy. Additionally, the text doesn’t simply summarize the subject matter—it goes into detail about the content and production of the album. Choice C is incorrect. The text doesn’t provide biographical information about the two artists, and the text doesn’t speculate about the meaning behind the poetry—instead, it relays what some critics have said about the album. Choice D is incorrect. The text doesn’t provide just an overview of the production techniques used but instead goes into more detail about the content and audio elements of the album, as well as critical response to the album.

Scholarly accounts of the Chicano movement—a movement that advocated for the social, political, and cultural empowerment of Mexican Americans and reached its zenith in the 1960s and 1970s—tend to focus on the most militant, outspoken figures in the movement, making it seem uniformly radical. Geographer Juan Herrera has shown, however, that if we shift our focus toward the way the movement manifested in comparatively low-profile neighborhood institutions and projects, we see participants espousing an array of political orientations and approaches to community activism.

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It presents a trend in scholarship on the Chicano movement that the text claims has been reevaluated by researchers in light of Herrera’s work on the movement’s participants.
- B. It identifies an aspect of the Chicano movement that the text implies was overemphasized by scholars due to their own political orientations.
- C. It describes a common approach to studying the Chicano movement that, according to the text, obscures the ideological diversity of the movement’s participants.
- D. It summarizes the conventional method for analyzing the Chicano movement, which the text suggests creates a misleading impression of the effectiveness of neighborhood institutions and projects.

ID: 43aa094b Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The text begins by mentioning scholarly accounts of the Chicano movement, which the underlined portion describes as tending "to focus on the most militant, outspoken figures in the movement," making the movement as a whole seem uniformly radical. The text then indicates that the work of geographer Juan Herrera shows that focusing less on such militant figures and instead paying more attention to manifestations of the Chicano movement in less widely known neighborhood institutions and projects would reveal that the movement’s participants embraced a range of political orientations and approaches. Thus, the underlined portion describes a common approach to studying the Chicano movement that, according to the text, obscures the ideological diversity of the movement’s participants.

Choice A is incorrect. Though the underlined portion does present a trend in scholarship on the Chicano movement, the text does not indicate that other scholars have reevaluated their methods in light of Herrera’s work. It only indicates that Herrera’s work suggests that the work of those other scholars does not provide a complete picture of the Chicano movement. Choice B is incorrect. Though the underlined portion does identify an aspect of the Chicano movement that the text indicates has been overemphasized, the text does not discuss the political orientations of the scholars whose work is mentioned in the text. Choice D is incorrect. Though the underlined portion does summarize the conventional method for analyzing the Chicano movement, the rest of the text does not address the effectiveness of "comparatively low-profile neighborhood institutions and projects." Instead, the text suggests that those projects were led by people with a variety of approaches to community activism.

In 2020, rap artist and professor A.D. Carson published the first peer-reviewed rap album about his experiences with Black masculinity called “i used to love to dream.” Typically in peer review, experts evaluate scholarly articles prior to publication. For Carson’s album, dubbed a “mixtape/e/ssay,” peer review involved both scholars and rap artists. In combining elements of a mixtape album with scholarly essays that connect Carson’s lyrics to historical and contemporary contexts for listeners both inside and outside academia, Carson’s album helped redefine how scholarship is created and shared.

- Which choice best states the main purpose of the text?
- A. To compare the relative public impact of scholarly articles and albums
 - B. To capture one scholar’s opinion of a new rap album
 - C. To explain why a certain rap album is particularly innovative
 - D. To describe how each step of the peer review process unfolds

ID: f7ed26a4 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it best describes the main purpose of the text, which is to explain why a certain rap album is particularly innovative. The text mentions rap artist and professor A.D. Carson, who published "the first peer-reviewed rap album." The text also describes the unusual process of having the work evaluated by both scholars and rap artists before its release, and details how the album combines elements of a mixtape album with elements of scholarly essays. All of these characteristics of the album and the way in which it was developed help to demonstrate the album’s novelty.

Choice A is incorrect because though the text mentions an album that combines elements of scholarly essays and mixtapes, it does not compare the relative public impact of scholarly articles and albums. Choice B is incorrect because the text does not present the opinion of a scholar regarding the rap album. Choice D is incorrect because though the text mentions that the album was peer reviewed, it does not detail the steps of the review.

The field of study called affective neuroscience seeks instinctive, physiological causes for feelings such as pleasure or displeasure. Because these sensations are linked to a chemical component (for example, the release of the neurotransmitter dopamine in the brain when one receives or expects a reward), they can be said to have a partly physiological basis. These processes have been described in mammals, but Jingnan Huang and his colleagues have recently observed that some behaviors of honeybees (such as foraging) are also motivated by a dopamine-based signaling process.

- What choice best describes the main purpose of the text?
- A. It describes an experimental method of measuring the strength of physiological responses in humans.
 - B. It illustrates processes by which certain insects can express how they are feeling.
 - C. It summarizes a finding suggesting that some mechanisms in the brains of certain insects resemble mechanisms in mammalian brains.
 - D. It presents research showing that certain insects and mammals behave similarly when there is a possibility of a reward for their actions.

ID: d7048b13 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes the main purpose of the text, which is to summarize a finding suggesting that some mechanisms in the brains of certain insects resemble mechanisms in mammalian brains. The text begins by explaining that feelings such as pleasure and displeasure are linked to chemical processes in the brain, such as the release of dopamine when one receives a reward. The text then indicates that such processes have been seen in mammals but that researchers have recently observed similar processes involving dopamine in honeybees. Taken together, this information serves to sum up the discovery that some mechanisms in the brains of certain insects may resemble mechanisms linked to feelings such as pleasure and displeasure in mammals.

Choice A is incorrect because the text doesn't describe any experiments or experimental methods. Instead, the text describes a phenomenon that has been observed in mammals and then presents the recent observations of Huang and colleagues that this phenomenon is also seen in honeybees. Choice B is incorrect because there's nothing in the text to suggest that certain insects can express how they're feeling through particular processes. The text does indicate that certain honeybee behaviors such as foraging are linked to dopamine, but it doesn't suggest that these behaviors enable honeybees to communicate feelings or sensations. Choice D is incorrect because the text presents research showing that certain honeybee behaviors such as foraging are linked to dopamine and therefore may be motivated by similar mechanisms to those in mammalian brains, not that honeybees and mammals behave similarly when there is the possibility of reward for their actions.

Mathematician Claude Shannon is widely regarded as a foundational figure in information theory. His most important paper, “A Mathematical Theory of Communication,” published in 1948 when he was employed at Bell Labs, utilized a concept called a “binary digit” (shortened to “bit”) to measure the amount of information in any signal and determine the fastest rate at which information could be transmitted while still being reliably decipherable. Robert Gallagher, one of Shannon’s colleagues, said that the bit was “[Shannon’s] discovery, and from it the whole communications revolution has sprung.”

Which choice best describes the overall structure of the text?

- A. It presents a theoretical concept, illustrates how the name of the concept has changed, and shows how the name has entered common usage.
- B. It introduces a respected researcher, describes an aspect of his work, and suggests why the work is historically significant.
- C. It names the company where an important mathematician worked, details the mathematician’s career at the company, and provides an example of the recognition he received there.
- D. It mentions a paper, offers a summary of the paper’s findings, and presents a researcher’s commentary on the paper.

ID: bf2915a9 Answer

Correct Answer: B

Rationale

Choice B is the best answer. The text starts with a general statement that introduces Shannon, then describes a specific contribution from one of his papers, then provides a quote that illustrates just how important this contribution was.

Choice A is incorrect. This isn’t the overall structure. The text only mentions very briefly, in parentheses, that “binary digit” was shortened to “bit.” It doesn’t go into detail about this name change, and it doesn’t discuss any “common usage” of the name at all. Choice C is incorrect. This isn’t the overall structure. Shannon’s employment at Bell Labs is only mentioned once, very briefly: the text never goes into detail about his career there, and it never mentions any recognition he received there. Choice D is incorrect. This is too narrow. Overall, the text is about Shannon’s importance in his field, not just this one paper of his.

The mimosa tree evolved in East Asia, where the beetle *Bruchidius terrenus* preys on its seeds. In 1785, mimosa trees were introduced to North America, far from any *B. terrenus*. But evolutionary links between predators and their prey can persist across centuries and continents. Around 2001, *B. terrenus* was introduced in southeastern North America near where botanist Shu-Mei Chang and colleagues had been monitoring mimosa trees. Within a year, 93 percent of the trees had been attacked by the beetles.

Which choice best describes the function of the third sentence in the overall structure of the text?

- A. It states the hypothesis that Chang and colleagues had set out to investigate using mimosa trees and *B. terrenus*.
- B. It presents a generalization that is exemplified by the discussion of the mimosa trees and *B. terrenus*.
- C. It provides context that clarifies why the species mentioned spread to new locations.
- D. It offers an alternative explanation for the findings of Chang and colleagues.

ID: a1b07d88 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the function of the third sentence within the overall structure of the text. The third sentence makes a generalization, asserting that evolutionary links between predators and prey can persist across great expanses of time and distance. This generalization is exemplified by the text’s discussion of the relationship between mimosa trees and *B. terrenus* beetles. When mimosa trees were introduced to North America in 1785, no *B. terrenus* beetles were present, so the relationship between the trees and the beetles that exists in their native East Asia was disrupted. When the beetles were introduced to North America more than 200 years later, however, they quickly attacked mimosa trees, illustrating the generalization that links between predators and prey "can persist across centuries and continents."

Choice A is incorrect because the third sentence doesn’t indicate that Chang and colleagues were investigating any hypothesis. According to the text, Chang and colleagues were simply monitoring mimosa trees when the beetles happened to be introduced to the area. Choice C is incorrect because the third sentence doesn’t discuss any particular species, let alone the species mentioned elsewhere in the text, nor does the sentence explain why species spread to new locations. Choice D is incorrect because the third sentence offers a generalization about the relationship between predators and prey, not an explanation for the findings by Chang and colleagues that’s an "alternative" to an explanation presented elsewhere in the text.

In response to concerns that some recent financial crises were exacerbated by consumers misunderstanding risks associated with credit cards, loans, and other financial products, policymakers in many countries have instituted risk-disclosure requirements on sellers of those products. Enrique Seira et al. investigated a variety of risk-disclosure messages sent to thousands of credit card customers and found that the messages had only small and short-lived effects on behavior. Seira et al. asserted that such effects may nevertheless be worth pursuing, given the negligible cost of messaging.

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It notes a factor that led Seira et al. to not dismiss risk-disclosure messaging altogether despite their evidence of its limited utility.
- B. It acknowledges a type of risk-disclosure messaging that Seira et al. may not have fully accounted for in their study.
- C. It describes a consideration that explains why Seira et al. recommended risk-disclosure messaging even though its effects may be small relative to its costs.
- D. It points out a circumstance that Seira et al. conceded may make risk-disclosure messaging more effective than their study suggests.

ID: e6ee3ccd Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the function of the underlined portion in the text as a whole. The text establishes that many countries have adopted risk-disclosure requirements for financial products due to concerns that consumers don't understand the risks associated with the products. According to the text, Seira et al. found that the effects of such messaging on consumer behavior were small and temporary. The text then adds that the researchers assert that because the cost of the messaging is negligible, the approach may be worth doing even if the effects are limited. Thus, the underlined portion notes a factor—very low cost—that led the researchers to not completely dismiss risk-disclosure messaging despite their evidence of its limited utility.

Choice B is incorrect because the underlined portion doesn't refer to a particular type of risk-disclosure messaging, whether Seira et al. considered it or not; the underlined portion simply indicates that the cost of the messaging (broadly) is very low, which makes the approach worth pursuing even if its effects are limited. Choice C is incorrect. Although the underlined portion does describe a consideration that led the researchers to recommend risk-disclosure messaging despite the messaging's small effects on consumer behavior, it directly states that the cost of such messaging is negligible, or very low—meaning that both the effects and the costs are small, not that the effects are small only relative to the costs. Choice D is incorrect because there's no indication that Seira et al. suggest that risk-disclosure messaging could be more effective if it had lower costs; rather, the underlined portion indicates that Seira et al. believe the already negligible cost of messaging makes the approach worth pursuing even if its effects are limited.

The following text is from Edith Wharton’s 1905 novel *The House of Mirth*. Lily Bart and a companion are walking through a park. Lily had no real intimacy with nature, but she had a passion for the appropriate and could be keenly sensitive to a scene which was the fitting background of her own sensations. The landscape outspread below her seemed an enlargement of her present mood, and she found something of herself in its calmness, its breadth, its long free reaches. On the nearer slopes the sugar-maples wavered like pyres of light; lower down was a massing of grey orchards, and here and there the lingering green of an oak-grove.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It creates a detailed image of the physical setting of the scene.
- B. It establishes that a character is experiencing an internal conflict.
- C. It makes an assertion that the next sentence then expands on.
- D. It illustrates an idea that is introduced in the previous sentence.

ID: cd920288 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it best describes how the underlined sentence functions in the text as a whole. The first sentence of the text establishes that Lily can be “keenly sensitive to” scenes that serve as a “fitting background” for her feelings—that is, she’s very aware of when a setting seems to reflect her mood. The next sentence, which is underlined, then demonstrates this awareness: Lily views the landscape she’s in as a large-scale reflection of her current mood, identifying with elements such as its calmness. Thus, the function of the underlined sentence is to illustrate an idea introduced in the previous sentence.

Choice A is incorrect because the underlined sentence describes the scene only in very general terms, referring to its calmness, breadth, and long stretches of land. It’s the next sentence that adds specific details about colors, light, and various trees nearby. Choice B is incorrect because nothing in the underlined sentence suggests that Lily is experiencing an internal conflict. In fact, the sentence indicates that Lily thinks the landscape reflects her own feeling of calmness. Choice C is incorrect because the only assertion in the underlined sentence is that Lily feels that broad aspects of the landscape, such as its calmness, reflect her current mood, and that assertion isn’t expanded on in the next sentence. Instead, the next sentence describes specific details of the scene without connecting them to Lily’s feelings.

A study by a team including finance professor Madhu Veeraraghavan suggests that exposure to sunshine during the workday can lead to overly optimistic behavior. Using data spanning from 1994 to 2010 for a set of US companies, the team compared over 29,000 annual earnings forecasts to the actual earnings later reported by those companies. The team found that the greater the exposure to sunshine at work in the two weeks before a manager submitted an earnings forecast, the more the manager’s forecast exceeded what the company actually earned that year.

Which choice best states the function of the underlined sentence in the overall structure of the text?

- A. To summarize the results of the team’s analysis
- B. To present a specific example that illustrates the study’s findings
- C. To explain part of the methodology used in the team’s study
- D. To call out a challenge the team faced in conducting its analysis

ID: 9f04b826 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it best describes how the underlined sentence functions in the text as a whole. The first sentence presents the implications of Veeraraghavan’s team’s study: sunshine exposure during work hours can cause overly optimistic behavior. The underlined sentence then describes the data the team consulted and how they were used (comparing predictions about earnings to what the companies actually earned), and the final sentence presents what the team found in their examination of the data. Thus, the underlined sentence mainly functions to explain part of the methodology used in the team’s study.

Choice A is incorrect because the underlined sentence explains in part how the team conducted their analysis of the effect of sunshine but doesn’t address what the team found; a broad summary is instead given in the other two sentences. Choice B is incorrect because the underlined sentence doesn’t present any specific examples from the team’s comparisons of 29,000 earnings predictions to actual earnings; it simply explains in part how the team conducted their analysis. Choice D is incorrect because the underlined sentence simply explains in part how the team conducted their analysis; the text never mentions any challenges that the team encountered in their study.

The following text is from William Shakespeare’s circa 1611 play *The Winter’s Tale*. Camillo has been away from his home in Sicily and serves in the court of Polixenes, the king of Bohemia. He has asked Polixenes for permission to return to Sicily.

POLIXENES: I pray thee, good Camillo, be no more importunate. ’Tis a sickness denying thee anything, a death to grant this.

CAMILLO: It is fifteen years since I saw my country. Though I have for the most part been aired abroad, I desire to lay my bones there. Besides, the penitent king, my master, hath sent for me, to whose feeling sorrows I might be some allay—or I o’erween [presume] to think so—which is another spur to my departure.

- Which choice best describes the function of the underlined portion in the text as a whole?
- A. It establishes Camillo’s hope that Polixenes will be comforted knowing that Camillo isn’t departing at his own discretion.
 - B. It suggests that Camillo feels compelled to persuade Polixenes that Camillo’s decision to leave the court is justified.
 - C. It conveys Camillo’s recognition that one benefit his presence may afford the king of Sicily is merely speculative.
 - D. It bolsters the idea that Camillo’s primary motivation to return home is his concern for the king of Sicily’s well-being in his absence.

ID: f1fe28ab Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. In the text, Camillo explains to Polixenes that he wants to return home after his long absence and that Sicily’s king has summoned him. In the underlined portion, Camillo adds that he also wants to return because he might provide comfort to the king’s sorrows (“to whose feeling sorrows I might be some allay”) but then clarifies that his belief about being able to comfort the king is a presumption—that is, something he thinks is true but can’t be certain of. Thus, the underlined portion indicates that Camillo recognizes that one benefit his presence may offer is merely speculative.

Choice A is incorrect because the underlined portion conveys Camillo’s hope that he might comfort the king of Sicily, which does suggest a personal choice contributing to Camillo’s decision to leave; the idea that Camillo isn’t choosing to leave is established in a different part of the text, when he says “the penitent king, my master, hath sent for me.” Choice B is incorrect because the underlined portion doesn’t suggest Camillo feels compelled to justify his decision to leave. Rather than expressing a need to persuade Polixenes that his departure is warranted, Camillo’s statement simply reveals his awareness that he assumes rather than knows with certainty that his presence will comfort the king of Sicily. Choice D is incorrect because nothing in the text

indicates that Camillo's primary motivation for returning to Sicily is his concern for the king's well-being; Camillo mentions first that he wants to return home because he has been away for so long, then adds that the king has summoned him and that he hopes his presence will comfort the king. The underlined portion simply conveys Camillo's awareness that offering comfort is a hope rather than a certainty; it doesn't suggest that the king's well-being is his main concern.

The following text is adapted from Zora Neale Hurston’s 1921 short story “John Redding Goes to Sea.” John is a child who lives in a town in the woods.

Perhaps ten-year-old John was puzzling to the folk there in the Florida woods for he was an imaginative child and fond of day-dreams. The St. John River flowed a scarce three hundred feet from his back door. On its banks at this point grow numerous palms, luxuriant magnolias and bay trees. On the bosom of the stream float millions of delicately colored hyacinths. [John Redding] loved to wander down to the water’s edge, and, casting in dry twigs, watch them sail away down stream to Jacksonville, the sea, the wide world and [he] wanted to follow them.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It provides an extended description of a location that John likes to visit.
- B. It reveals that some residents of John’s town are confused by his behavior.
- C. It illustrates the uniqueness of John’s imagination compared to the imaginations of other children.
- D. It suggests that John longs to experience a larger life outside the Florida woods.

ID: 77b9ccd9 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it accurately describes how the underlined sentence functions in the text as a whole. The text establishes that John has a strong imagination and then goes on to describe the St. John River near John’s home in the Florida woods. The underlined sentence depicts John sending twigs sailing down the river while he imagines them reaching “Jacksonville, the sea, the wide world,” where he wishes he could follow. This suggests that John longs to expand his life experiences beyond the Florida woods.

Choice A is incorrect because the second and third sentences of the text provide an extended description of the riverbank where John likes to go, whereas the underlined sentence describes what John does at that location. Choice B is incorrect because the first sentence of the text suggests that John’s behavior “was puzzling” to others around him, whereas the underlined sentence concerns the content of John’s imaginings. Choice C is incorrect because the underlined sentence elaborates on John’s imagination but doesn’t mention any other children to whom John could be compared.

The following text is from John Dryden’s 1697 translation of Virgil’s poem the *Aeneid*, written in the first century BCE. Queen Dido has just heard the Trojan hero Aeneas recount a sad tale.

But anxious cares already seiz’d the queen:
She fed within her veins a flame unseen;
The hero’s valor, acts, and birth inspire
Her soul with love, and fan the secret fire.
His words, his looks, imprinted in her heart,
Improve the passion, and increase the smart.

- Which choice best states the main purpose of the text?
- A. To indicate that Dido is hiding her skepticism of Aeneas’s account
 - B. To emphasize that Dido has been deeply affected by Aeneas’s story
 - C. To imply that Dido engages both emotionally and intellectually with Aeneas
 - D. To suggest that Dido is worried that Aeneas might discover a secret she is keeping from him

ID: c6ec16fb Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the main purpose of the text, which is to foreground Queen Dido’s strong emotional response to Aeneas’s story. Throughout, the text emphasizes how deeply the queen is affected by both Aeneas’s tale and persona. At the outset, the speaker explicitly states that "anxious cares...seiz’d the queen" and then uses the metaphor of fire ("within her veins a flame unseen" and "secret fire") to evoke the warmth of Dido’s feelings for Aeneas. In addition, the line "His words, his looks, imprinted in her heart" suggests the deep impression that Aeneas’s story makes on Dido, eliciting passion for him ("improv[ing] the passion") and empathy for his suffering ("increas[ing] the smart").

Choice A is incorrect because there’s no indication in the text that Dido is skeptical of Aeneas’s account, much less that she’s trying to conceal that skepticism. On the contrary, the text shows her being moved by his words and developing feelings for him. Choice C is incorrect. While the text mentions that Dido is impressed by Aeneas’s "valor, acts, and birth," which might suggest (but doesn’t necessarily entail) intellectual engagement, the text doesn’t represent Dido’s engagement with Aeneas in a manner that suggests a balance between emotion and intellect. Rather, the text primarily emphasizes her emotional response—specifically her attraction to Aeneas and her emotional investment in his story, indicating that his "valor, acts, and birth inspire / Her soul with love, and fan the secret fire" and that his words and looks elicit passion and empathy. Choice D is incorrect because the text doesn’t suggest that Dido is worried about Aeneas discovering a secret she is concealing from him. Though the text begins by mentioning Dido’s "anxious cares," this refers to her growing passion for Aeneas and pity for his suffering, not to worry about a secret she is concealing. The text’s reference to a "flame unseen" and "secret fire" points to Dido’s growing feelings for Aeneas that develop as he recounts his tale, not to a secret that existed before their encounter; moreover, the text provides no indication that Dido is

worried Aeneas might discover these feelings.

The following text is adapted from Jane Austen’s 1814 novel *Mansfield Park*. The speaker, Tom, is considering staging a play at home with a group of his friends and family.

We mean nothing but a little amusement among ourselves, just to vary the scene, and exercise our powers in something new. We want no audience, no publicity. We may be trusted, I think, in choosing some play most perfectly unexceptionable; and I can conceive no greater harm or danger to any of us in conversing in the elegant written language of some respectable author than in chattering in words of our own.

- Which choice best states the main purpose of the text?
- A. To offer Tom’s assurance that the play will be inoffensive and involve only a small number of people
 - B. To clarify that the play will not be performed in the manner Tom had originally intended
 - C. To elaborate on the idea that the people around Tom lack the skills to successfully stage a play
 - D. To assert that Tom believes the group performing the play will be able to successfully promote it

ID: f78b6c18 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately portrays the main purpose of the text. At the beginning of the text, Tom asserts that he and the other people staging the play are doing so only for “a little amusement among ourselves” and aren’t interested in attracting an audience or any attention with the production. Then, Tom promises that the play they chose is modest and appropriate, and he further reasons that using the well-written prose of “some respectable author” is better than using their own words. Overall, the main purpose of the text is to convey Tom’s promise that the play will be inoffensive and involve only a few people.

Choice B is incorrect because the text doesn’t indicate that Tom had earlier intentions for the play’s performance or that anything has changed since the group first decided to stage a play. Instead, the text focuses on how harmless the entire endeavor will be. Choice C is incorrect. Although Tom mentions that using the words of a “respectable author” will be better than using their own words, he never addresses the idea that the people around him generally aren’t skilled enough to stage a play. Choice D is incorrect because in the text Tom specifically says that they “want no audience, no publicity,” which indicates that they don’t plan on promoting the play at all.

The following text is adapted from *Indian Boyhood*, a 1902 memoir by Ohiyesa (Charles A. Eastman), a Santee Dakota writer. In the text, Ohiyesa recalls how the women in his tribe harvested maple syrup during his childhood.

Now the women began to test the trees—moving leisurely among them, axe in hand, and striking a single quick blow, to see if the sap would appear. The trees, like people, have their individual characters; some were ready to yield up their life-blood, while others were more reluctant. Now one of the birchen basins was set under each tree, and a hardwood chip driven deep into the cut which the axe had made. From the corners of this chip—at first drop by drop, then more freely—the sap trickled into the little dishes.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It portrays the range of personality traits displayed by the women as they work.
- B. It foregrounds the beneficial relationship between humans and maple trees.
- C. It demonstrates how human behavior can be influenced by the natural environment.
- D. It elaborates on an aspect of the maple trees that the women evaluate.

ID: 9555ec64 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it best describes the function of the underlined sentence in the text’s overall portrayal of how the women in Ohiyesa’s tribe harvested maple syrup. The text states that the women used an axe to strike the maple trees in order to find out which ones would produce sap. The underlined sentence compares the trees to people, with the sap described as the trees’ “life-blood.” Some of the trees are ready to give out their sap, while others are unwilling to do so. Using personification, the sentence provides greater detail about the aspect of the maple trees—their potential to give sap—that the women are evaluating.

Choice A is incorrect because the personalities of the women are not discussed in the text. Although the underlined sentence does mention “individual characters,” this reference is not to the women in the text but rather to the maple trees, which the sentence compares to people with individual character traits. Choice B is incorrect because the underlined sentence focuses on the trees’ willingness or refusal to yield sap, not on the beneficial relationship between the women and the trees. Additionally, although the text does suggest that the women and their tribe benefit from the maple trees since the trees allow the women to harvest syrup, there is nothing in the text to suggest that the trees benefit from this relationship in turn. Choice C is incorrect because the underlined sentence is comparing maple trees to humans, not addressing the influence of the natural environment on how the actual humans in the text, the women, behave.

Generally it takes Tule geese about four days to migrate south for the winter. From their summer breeding grounds in Cook Inlet, Alaska, the birds begin by flying over the Gulf of Alaska, keeping about 100 miles from the Canadian shore. They pause to rest on the Pacific Ocean, then fly toward Summer Lake, Oregon, before finally arriving at their winter destination of Sacramento Valley, California. In 2020, however, it took the geese over twice as long to make their way from Cook Inlet to Sacramento Valley. According to researchers, the reason was airborne pollutants.

Which choice best states the function of the underlined portion in the text as a whole?

- A. It illustrates a change in Tule geese’s usual flight behavior.
- B. It suggests an explanation for why Tule geese breed in Alaska.
- C. It describes part of the Tule geese’s typical winter migration journey.
- D. It compares Tule geese to other birds that migrate south for the winter.

ID: cba8812e Answer

Correct Answer: C

Rationale

Choice C is the best answer because it best states how the underlined portion functions in the text as a whole. The first sentence states that Tule geese typically take four days to migrate south. Then in the next sentence, which contains the underlined portion, the text describes the first part of that journey, which begins with the geese flying over the Gulf of Alaska while keeping about 100 miles from the Canadian shore. The rest of the text details the remainder of the geese’s typical journey and then mentions circumstances in 2020 that resulted in the geese taking an unusually long time to complete it. Thus, the underlined portion describes part of the Tule geese’s typical winter migration journey.

Choice A is incorrect. Although the text concludes by stating that in 2020, Tule geese took twice as long to complete their typical migration, which suggests a change in their usual flight behavior, the underlined portion doesn’t discuss this. Instead, the underlined portion describes the first part of the Tule geese’s typical winter migration journey over the Gulf of Alaska. Choice B is incorrect. Although the sentence containing the underlined portion mentions that Tule geese breed in Alaska, the underlined portion doesn’t explain why the geese breed in that location. Rather, the text mentions Alaska to explain that it’s the starting point of the Tule geese’s typical winter migration. Choice D is incorrect because the underlined portion doesn’t discuss any other birds that migrate south for the winter. In fact, the text is only concerned with the migration of Tule geese.

The following text is from Virginia Woolf’s 1919 novel *Night and Day*. The text describes a gathering of young artists and intellectuals.

One person after another rose, and, as with an ill-balanced axe, attempted to hew out his conception of art a little more clearly, and sat down with the feeling that, for some reason which he could not grasp, his strokes had gone awry. As they sat down they turned almost invariably to the person sitting next them, and rectified and continued what they had just said in public.

Which choice best describes the function of the underlined portions in the text as a whole?

- A. To demonstrate individuals’ puzzlement over the reputation of a certain artwork
- B. To highlight the physical effort involved in individuals’ construction of large-scale works of art
- C. To draw attention to individuals’ discontent with the group’s conversation about art
- D. To emphasize the extent of individuals’ struggles to articulate thoughts on art

ID: 2f887164 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes the function of the underlined portions in the text as a whole. The underlined portions describe the young artists and intellectuals at the gathering as trying to "hew out," or give shape to, their views of art more clearly, but with each seeming to be using "an ill-balanced axe" and then feeling that the "strokes had gone awry." In context, the metaphorical language comparing attempts to refine concepts of art to imprecisely cutting wood with an inadequate axe serves to emphasize how much the individuals at the gathering struggled to articulate, or express, their thoughts; indeed, the text explains that the individuals couldn’t quite grasp why their statements had gone awry and tended to try to rectify, or correct, them in continued discussion after they sat down.

Choice A is incorrect because the underlined portions characterize aspects of the young artists and intellectuals’ attempts to present their general views of art more clearly, not their views of the reputation of a certain artwork; the text never mentions any specific artwork or its reputation. Choice B is incorrect. Although the underlined portions refer to a physical activity—cutting wood with an axe—the descriptions are metaphorical rather than literal. The text isn’t describing people constructing works of art, large-scale or otherwise; rather, it’s describing people talking at a gathering, using the idea of imprecisely cutting wood with an inadequate axe to suggest that each individual struggled when trying to present their view of art more clearly. Choice C is incorrect. Although the underlined portions do provide a reason for the young artists and intellectuals’ discontent, the text focuses on the fact that they were each dissatisfied with their own statements, not on how they felt about the group’s full conversation about art. Instead, the text explains that each individual tried to present their view of art more clearly but struggled (as if imprecisely cutting wood with an inadequate axe), couldn’t grasp what went awry, and then felt the need to rectify, or correct, what they had just said. It’s possible that the individuals were also discontented with the group’s conversation overall, but neither the underlined portions nor the text as a whole suggest that.

Archeological excavation of Market Street Chinatown, a nineteenth-century Chinese American community in San Jose, California, provided the first evidence that Asian food products were imported to the United States in the 1800s: bones from a freshwater fish species native to Southeast Asia. Jinshanzhuang—Hong Kong—based import/export firms—likely coordinated the fish’s transport from Chinese-operated fisheries in Vietnam and Malaysia to North American markets. This route reveals the (often overlooked) multinational dimensions of the trade networks linking Chinese diaspora communities.

- Which choice best describes the function of the underlined sentence in the text as a whole?
- A. It explains why efforts to determine the country of origin of the items mentioned in the previous sentence remain inconclusive.
 - B. It provides information that helps support a claim about a discovery’s significance that is presented in the following sentence.
 - C. It traces the steps that were taken to locate and recover the objects that are described in the previous sentence.
 - D. It outlines a hypothesis that additional evidence discussed in the following sentence casts some doubt on.

ID: 99022257 Answer

Correct Answer: B

Rationale

Choice B is the best answer. The underlined sentence provides information about import/export firms, showing how Chinese communities across the world were connected by trade routes.

Choice A is incorrect. The underlined sentence never suggests that the countries of origin of the fish are in question—in fact, it tells us exactly where they came from. Choice C is incorrect. The passage never describes the steps taken to discover the fish bones described in the previous sentence. Choice D is incorrect. The underlined sentence doesn’t outline a hypothesis but instead provides evidence. And the following sentence agrees with the underlined sentence, so we could eliminate this choice just for saying that the following sentence "casts some doubt on" the underlined one—partly wrong is all wrong.

The people of medieval Europe have traditionally been seen as uninterested in cleanliness and hygiene, but modern research has shown that this is largely a myth. According to historian Eleanor Janega, most medieval towns in Europe had at least one public bathhouse, which often offered both full-immersion baths and—more affordably—steam baths. While such amenities were available mainly to town dwellers, regular bathing in rivers and streams or daily sponge baths at home were common practices throughout medieval Europe.

Which choice best describes the function of the underlined portion?

- A. It asserts that in medieval Europe steam baths were more popular in rural areas than in urban ones.
- B. It describes a limitation of earlier historians’ studies of medieval European bathing habits.
- C. It concedes that not all people in medieval Europe had access to public bathhouses.
- D. It explains why Janega decided to study the popularity of public bathhouses in medieval Europe.

ID: d1f9725e Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most effectively describes the function of the underlined portion. The text discusses the long-standing misconception that people in medieval Europe were uninterested in cleanliness and hygiene. As evidence that this idea is false, the text cites historian Eleanor Janega’s assertion that in medieval Europe, towns usually had at least one bathhouse, where people could take immersion baths or steam baths for a fee. The underlined portion then notes that mainly town dwellers had access to these bathhouses. The remainder of the text explains that those who lacked such access were nonetheless able to bathe in outdoor waterways or take sponge baths at home. Therefore, the underlined portion concedes that some people in medieval Europe lacked access to public bathhouses.

Choice A is incorrect. The underlined portion establishes that amenities such as steam baths were mainly available to town dwellers, which suggests in turn that steam baths were largely unavailable to people in rural areas. Thus, the distinction made by the underlined portion is not between the popularity of steam baths in towns versus their lack of popularity in rural areas but instead between their presence in towns and absence in rural areas. Choice B is incorrect. Although the text does explain that recent historians have disproved the idea that medieval Europeans rarely bathed, it doesn’t attribute that misconception to earlier historians of medieval Europe or suggest that their research was subject to limitations. Moreover, the underlined portion addresses a limitation of life in medieval Europe, not of historical research. Choice D is incorrect because the underlined portion doesn’t address why historian Eleanor Janega decided to study the popularity of public bathhouses in medieval Europe—nor does any portion of the text. The text mentions Janega in passing, but it doesn’t go into detail about why she decided to study the popularity of public bathhouses in medieval Europe.

The following text is from the 1924 poem “Cycle” by D’Arcy McNickle, who was a citizen of the Confederated Salish and Kootenai Tribes.

There shall be new roads wending,
A new beating of the drum—
Men’s eyes shall have fresh seeing,
Grey lives reprise their span—
But under the new sun’s being,
Completing what night began,
There’ll be the same backs bending,
The same sad feet shall drum—
When this night finds its ending
And day shall have come.....

Which choice best states the main purpose of the text?

- A. To consider how the repetitiveness inherent in human life can be both rewarding and challenging
- B. To question whether activities completed at one time of day are more memorable than those completed at another time of day
- C. To refute the idea that joy is a more commonly experienced emotion than sadness is
- D. To demonstrate how the experiences of individuals relate to the experiences of their communities

ID: 35bc6898 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it accurately states the main purpose of the text. The text begins by discussing the promise of the future, with positive references to renewal such as “new roads,” “new beating of the drum,” and “fresh seeing.” But with the “new sun,” the text continues, there will still be “the same backs bending” and “the same sad feet” drumming, indicating that these difficulties will follow people into this new day. The poem thus considers both the rewards and challenges associated with the repetitiveness of human life.

Choice B is incorrect because the text doesn’t say anything about how memorable activities are, let alone compare the memorability of activities completed at different times of the day. Choice C is incorrect. Although the text contrasts hope with difficulty, it does not compare the relative frequency of joyful feelings with that of sad feelings. Choice D is incorrect because the text makes no distinction between the experiences of individuals and the experiences of their communities.

The following text is from Charlotte Perkins Gilman’s 1910 poem “The Earth’s Entail.”

No matter how we cultivate the land,
Taming the forest and the prairie free;
No matter how we irrigate the sand,
Making the desert blossom at command,
We must always leave the borders of the sea;
The immeasurable reaches
Of the windy wave-wet beaches,
The million-mile-long margin of the sea.

Which choice best describes the overall structure of the text?

- A. The speaker argues against interfering with nature and then gives evidence supporting this interference.
- B. The speaker presents an account of efforts to dominate nature and then cautions that such efforts are only temporary.
- C. The speaker provides examples of an admirable way of approaching nature and then challenges that approach.
- D. The speaker describes attempts to control nature and then offers a reminder that not all nature is controllable.

ID: fd7c6d0d Answer

Correct Answer: D

Rationale

Choice D is the best answer. This best describes the overall structure of the text. In the first half of the text, the speaker describes our attempts to control nature: cultivating, taming, and irrigating different kinds of land. In the second half, the speaker states that we can never tame the sea or the beach.

Choice A is incorrect. This doesn’t describe the overall structure of the text. The speaker never argues that we should not interfere with nature. Rather, the speaker says that we are able to tame many different kinds of land, but we are unable to tame the sea or beaches. Choice B is incorrect. This doesn’t describe the overall structure of the text. The speaker never describes our cultivation, taming, and irrigation of land as “temporary.” Rather, the speaker says that we are able to tame many different kinds of land, but we are unable to tame the sea or beaches. Choice C is incorrect. This doesn’t describe the overall structure of the text. The speaker never describes our cultivation, taming, and irrigation of land as an “admirable” approach to nature.” Rather, the speaker says that we are able to tame many different kinds of land, but we are unable to tame the sea or beaches.

The Bayeux Tapestry, from eleventh-century France, depicts 75 scenes over 250 feet of fabric. It was likely produced by workers embroidering in sections and then joining the resulting panels together. It’s plausible that the workshop that produced the tapestry had never produced one so large, and some researchers claim that a close examination of the joins—the places where the panels are stitched together—suggests that the workers developed and refined their joining process over the course of production. For example, the first join the workers completed exhibits a clear misalignment of the borders of the two panels, whereas the later joins are virtually invisible.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It identifies the people and events depicted in the Bayeux Tapestry.
- B. It supports an argument about the workers who produced the Bayeux Tapestry.
- C. It compares the Bayeux Tapestry with other tapestries from eleventh-century France.
- D. It describes how researchers determined where the Bayeux Tapestry was produced.

ID: 11d064fe Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the function of the underlined sentence in the text as a whole. The text discusses the Bayeux Tapestry, making the point that the workers who produced the huge tapestry in the eleventh century might not have ever produced a tapestry so large before. The text goes on to suggest that because of this lack of previous experience, the workers developed and refined the process of joining the tapestry’s panels over time as they worked. The last sentence of the text then provides an example of an observation that suggests the workers’ process changed: clear misalignment of the borders of the two panels the workers joined first and virtually invisible joins completed later. Thus, the underlined sentence serves to support an argument about the workers who produced the tapestry.

Choice A is incorrect because the example given in the last sentence of the text has to do with how the panels of the Bayeux Tapestry were joined by the workers, not with what is depicted in those panels; the text never identifies any people or places depicted in the tapestry. Choice C is incorrect because the last sentence compares how early panels in the Bayeux Tapestry were joined with how later panels in the same tapestry were joined; it doesn’t make any comparison between the Bayeux Tapestry and other tapestries from the same time in France. Choice D is incorrect because the last sentence doesn’t address the location where the Bayeux Tapestry was created; the first sentence of the text presents it as a given that the tapestry was created in France, but nothing in the text indicates how that origin was determined.

For his 1986 album *Keyboard Fantasies*, Beverly Glenn-Copeland wrote songs grounded in traditional soul and folk music, then accompanied them with futuristic synthesizer arrangements featuring ambient sounds and complex rhythms. The result was so strange, so unprecedented, that the album attracted little attention when first released. In recent years, however, a younger generation of musicians has embraced the stylistic experimentation of *Keyboard Fantasies*. Alternative R&B musicians Blood Orange and Moses Sumney, among other contemporary recording artists, cite the album as an influence.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It urges contemporary musicians to adopt the unique sound of *Keyboard Fantasies*.
- B. It responds to criticism of *Keyboard Fantasies* by some younger musicians.
- C. It offers examples of younger musicians whose work has been impacted by *Keyboard Fantasies*.
- D. It contrasts *Keyboard Fantasies* with the recordings of two younger musicians.

ID: 44bce45e Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes the function of the underlined sentence in the text as a whole. The text’s subject is Beverly Glenn-Copeland’s 1986 album *Keyboard Fantasies*, notable for its innovative, experimental arrangements. According to the text, the album was not initially admired, but in recent years it has become popular among younger musicians. The underlined portion of the text mentions two of those musicians, Blood Orange and Moses Sumney, who “cite the album as an influence.” Therefore, the underlined portion of the text offers examples of younger musicians whose work has been impacted by *Keyboard Fantasies*.

Choice A is incorrect because even though the underlined sentence states that Blood Orange and Moses Sumney were influenced by *Keyboard Fantasies*, it doesn’t say that all other musicians should also embrace the album’s experimental style. Choice B is incorrect. Although the text states that *Keyboard Fantasies* was not admired on its first release, the text doesn’t present any criticism of the album by younger musicians: it only presents two younger musicians who cite it as an influence. Choice D is incorrect because the underlined sentence doesn’t mention any differences between *Keyboard Fantasies* and the work of Blood Orange and Moses Sumney.

The following text is adapted from Aphra Behn’s 1689 novel *The Lucky Mistake*. Atlante and Rinaldo are neighbors who have been secretly exchanging letters through Charlot, Atlante’s sister.

[Atlante] gave this letter to Charlot; who immediately ran into the balcony with it, where she still found Rinaldo in a melancholy posture, leaning his head on his hand: She showed him the letter, but was afraid to toss it to him, for fear it might fall to the ground; so he ran and fetched a long cane, which he cleft at one end, and held it while she put the letter into the cleft, and stayed not to hear what he said to it. But never was man so transported with joy, as he was at the reading of this letter; it gives him new wounds; for to the generous, nothing obliges love so much as love.

Which choice best describes the overall structure of the text?

- A. It describes the delivery of a letter, and then portrays a character’s happiness at reading that letter.
- B. It establishes that a character is desperate to receive a letter, and then explains why another character has not yet written that letter.
- C. It presents a character’s concerns about delivering a letter, and then details the contents of that letter.
- D. It reveals the inspiration behind a character’s letter, and then emphasizes the excitement that another character feels upon receiving that letter.

ID: 950d740f Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the overall structure of the text. The narrator begins by explaining how Charlot carefully delivers Atlante’s letter to Rinaldo, and then relates that Rinaldo feels “transported with joy” after reading the letter. Therefore, the overall structure of the text is best described as a description of the delivery of a letter followed by the portrayal of a character’s happiness after reading the letter.

Choice B is incorrect because the text indicates that the letter has been written; there’s no explanation why another character hasn’t written one. In addition, the text’s description of Rinaldo “in a melancholy posture” suggests that he’s sad and thoughtful, not that he’s desperate to receive the letter. Choice C is incorrect. Although the text states that Charlot won’t toss the letter to Rinaldo because she doesn’t want it to fall, the text doesn’t refer to the contents of the letter. Instead, the text describes how happy Rinaldo feels after reading it. Choice D is incorrect. Although the text does describe Rinaldo’s reaction to the letter, the text doesn’t begin by discussing Atlante’s inspiration for writing the letter. Instead, the text begins by discussing the delivery of the letter.

Using NASA’s powerful James Webb Space Telescope (JWST), Mercedes López-Morales and colleagues measured the wavelengths of light traveling through the atmosphere of WASP-39b, an exoplanet, or planet outside our solar system. Different molecules absorb different wavelengths of light, and the wavelength measurements showed the presence of carbon dioxide (CO₂) in WASP-39b’s atmosphere. This finding not only offers the first decisive evidence of CO₂ in the atmosphere of an exoplanet but also illustrates the potential for future scientific breakthroughs held by the JWST.

- Which choice best describes the overall structure of the text?
- A. It discusses a method used by some researchers, then states why an alternative method is superior to it.
 - B. It describes how researchers made a scientific discovery, then explains the importance of that discovery.
 - C. It outlines the steps taken in a scientific study, then presents a hypothesis based on that study.
 - D. It examines how a group of scientists reached a conclusion, then shows how other scientists have challenged that conclusion.

ID: 815b354f Answer

Correct Answer: B

Rationale

Choice B is the best answer. The text begins by describing how the researchers used the JWST to detect CO₂ in WASP-39b’s atmosphere. Then the text discusses the significance of this finding, both as the first evidence of CO₂ in an exoplanet’s atmosphere and as an illustration of the JWST’s potential for making new discoveries in general.

Choice A is incorrect. The text doesn’t compare two different methods, but rather focuses on one study that used the JWST. Choice C is incorrect. The text doesn’t present a hypothesis, but rather reports on the findings of a study. Choice D is incorrect. The text doesn’t mention any scientists challenging the conclusion reached by López-Morales and colleagues.

The following text is from Paul Laurence Dunbar’s 1913 poem “The Poet and His Song.”

A song is but a little thing,
And yet what joy it is to sing!
In hours of toil it gives me zest,
And when at eve I long for rest;
When cows come home along the bars,
 And in the fold I hear the bell,
As Night, the shepherd, herds his stars,
 I sing my song, and all is well.

Which choice best states the main purpose of the text?

- A. To convey how engaging in song makes the speaker feel
- B. To compare the speaker to a singing shepherd
- C. To portray the speaker’s excitement about farming
- D. To describe the pieces of music the speaker enjoys hearing

ID: e07e1984 Answer

Correct Answer: A

Rationale

Choice A is the best answer because is accurately states the main purpose of the text. The text begins by declaring that although a song is "but a little thing," or seemingly insignificant, singing it brings joy and gives the speaker of the text "zest," or excitement, in "hours of toil." The remainder of the text explores the idea that as night is falling, singing allows the speaker to feel that "all is well." Thus, the main purpose of the text is to convey how engaging in song makes the speaker feel.

Choice B is incorrect. Although the text mentions a shepherd, it neither indicates that the shepherd is singing nor does it compare the shepherd to the speaker. Choice C is incorrect. The text indicates that the speaker works hard, engaging in "hours of toil," and it can be inferred that the speaker likely lives in a rural area, since cows and a cowbell can be heard nearby. However, the text does not suggest that the speaker is a farmer or feels excited about farming. Moreover, the shepherd in the text is not a literal reference to someone who herds sheep but instead a figurative description of the moon as the shepherd of the stars. Choice D is incorrect because in the text, the speaker is singing a song, not listening to others sing one. Moreover, the text describes the feelings that the speaker has when singing a song, not the song itself.

In the *Here and Now Storybook* (1921), educator Lucy Sprague Mitchell advanced the then controversial idea that books for very young children should imitate how they use language, since toddlers, who cannot yet grasp narrative or abstract ideas, seek reassurance in verbal repetition and naming. The most enduring example of this idea is Margaret Wise Brown’s 1947 picture book *Goodnight Moon*, in which a young rabbit names the objects in his room as he drifts off to sleep. Scholars note that the book’s emphasis on repetition, rhythm, and nonsense rhyme speaks directly to Mitchell’s influence.

Which choice best describes the overall structure of the text?

- A. The text outlines a debate between two authors of children’s literature and then traces how that debate shaped theories on early childhood education.
- B. The text summarizes an argument about how children’s literature should be evaluated and then discusses a contrasting view on that subject.
- C. The text lists the literary characteristics that are common to many classics of children’s literature and then indicates the narrative subjects that are most appropriate for young children.
- D. The text presents a philosophy about what material is most suitable for children’s literature and then describes a book influenced by that philosophy.

Correct Answer: D

Rationale

Choice D is the best answer. The text starts by introducing Mitchell’s philosophy about using simple, repetitive language in books for young children. Then it describes a book influenced by that philosophy, *Goodnight Moon*.

Choice A is incorrect. Although two authors are mentioned in the text, they both agree about the type of language that should be contained in books for young children. Choice B is incorrect. The text never discusses the evaluation of children’s literature. It does provide one view of how children’s books should be written, but never introduces a competing view. Choice C is incorrect. The text doesn’t mention “many classics of children’s literature.” Instead, it describes an educational theory and identifies one example of a famous children’s book that was influenced by that theory.

Works of moral philosophy, such as Plato’s *Republic* or Aristotle’s *Nicomachean Ethics*, are partly concerned with how to live a morally good life. But philosopher Jonathan Barnes argues that works that present a method of living such a life without also supplying a motive are inherently useful only to those already wishing to be morally good—those with no desire for moral goodness will not choose to follow their rules. However, some works of moral philosophy attempt to describe what constitutes a morally good life while also proposing reasons for living one.

- Which choice best describes the overall structure of the text?
- A. It provides a characterization about a field of thought by noting two works in it and then details a way in which some works in that field are more comprehensive than others.
 - B. It mentions two renowned works and then claims that despite their popularity it is impossible for these works to serve the purpose their authors intended.
 - C. It summarizes the history of a field of thought by discussing two works and then proposes a topic of further research for specialists in that field.
 - D. It describes two influential works and then explains why one is more widely read than the other.

ID: cc00a8cf Answer

Correct Answer: A

Rationale

Choice A is the best answer. The text starts by stating what moral philosophy is concerned with and naming two examples of works in the field. Then it describes a shortcoming of some works in that field (they say how but not why), and finally it states that other works try to avoid that shortcoming (by including both how and why to live a morally good life).

Choice B is incorrect. This is too extreme. The text never mentions whether the two works are popular or not, and it never argues that these works don’t serve their intended purpose of describing how to live a morally good life. Rather, the text claims that works of moral philosophy that don’t include both how and why to be moral are not useful to readers who don’t already want to be moral.

Choice C is incorrect. This isn’t the overall structure. The text never discusses the history of moral philosophy at all, and it doesn’t propose any topic for further research. Choice D is incorrect. This isn’t the overall structure. The text never discusses which of the two works is more widely read.

The following text is from Charlotte Forten Grimké’s 1888 poem “At Newport.”

Oh, deep delight to watch the gladsome waves
Exultant leap upon the rugged rocks;
Ever repulsed, yet ever rushing on—
Filled with a life that will not know defeat;
To see the glorious hues of sky and sea.
The distant snowy sails, glide spirit like,
Into an unknown world, to feel the sweet
Enchantment of the sea thrill all the soul,
Clearing the clouded brain, making the heart
Leap joyous as it own bright, singing waves!

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It portrays the surroundings as an imposing and intimidating scene.
- B. It characterizes the sea’s waves as a relentless and enduring force.
- C. It conveys the speaker’s ambivalence about the natural world.
- D. It draws a contrast between the sea’s waves and the speaker’s thoughts.

ID: 380dee07 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The text presents the speaker’s experience of viewing the sea. In the underlined portion, the speaker focuses on the idea that the waves hitting rocks on the shore are a relentless and enduring force: they are constantly pushed back (“ever repulsed”) but always return (“ever rushing on”), as though they have an energy that can’t be overcome (“a life that will not know defeat”).

Choice A is incorrect. Although the underlined portion characterizes the waves as a relentless force (always “repulsed” but still “rushing on” and never being defeated), the speaker doesn’t suggest that the surroundings are intimidating. Instead, the speaker presents the scene in a positive way, describing the “deep delight” of the “gladsome,” or cheerful, waves and feeling “the heart / Leap joyous” while viewing the sea. Choice C is incorrect because the underlined portion doesn’t suggest that the speaker is ambivalent, or has mixed feelings about, the natural world. Instead, it presents a single view of one part of the immediate surroundings: the speaker characterizes the sea’s waves as an unstoppable force, since they are constantly pushed back but always return (“ever repulsed, yet ever rushing on”). Choice D is incorrect. Although the text later suggests the speaker’s view of her own thoughts by referring to a “clouded brain” and a heart that leaps joyously, this reference neither occurs within the underlined portion nor establishes a clear contrast with the relentless determination of the waves. The underlined portion addresses only the speaker’s view of the waves and doesn’t suggest what her own thoughts might be.

A study by Dr. Paul Hanel and colleagues concluded that people are more likely to behave politely when listening to ideas they disagree with if they think about values before they engage in a discussion. Study participants were assigned to one of two groups. The experimental group spent a few minutes writing about one of their personal values before they had a group discussion on a controversial topic. And the control group spent a few minutes writing about a drink (tea, milk, etc.) before their group discussion on that topic. Hanel and colleagues found that the experimental group’s discussion was more civil than the control group’s discussion was.

- Which choice best describes the main purpose of the text?
- A. To describe a widely held belief and how a study’s results support that belief
 - B. To argue that researchers were surprised by the results of a certain study
 - C. To suggest ways to improve a certain study’s experimental design
 - D. To explain a study’s conclusion and how a research team arrived at that conclusion

ID: 50698bf8 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes the main purpose of the text, which is to explain a study’s conclusion and how researchers involved in the study arrived at that conclusion. The text begins by summarizing the main conclusion of the study conducted by Paul Hanel and colleagues: when confronted with ideas they disagree with in discussions about controversial topics, people are more likely to respond politely if they think about their personal values before engaging in such discussions. The text then goes on to describe the design of Hanel and colleagues’ experiment. By comparing interactions between members of an experimental group (who had been prompted to write about their personal values beforehand) to those between members of a control group (who had been prompted to write about a beverage), the team found that people in the experimental group behaved more civilly, or politely, than people in the control group did during discussions about a controversial topic. This finding led to the conclusion described at the beginning of the text.

Choice A is incorrect. Although the text discusses the results of a study, it doesn’t provide any indication that the conclusion the study supported—that when facing disagreement, people behave more politely when they have thought about their values—is a belief that is widely held. Choice B is incorrect because the text doesn’t indicate that the researchers found the results of their study to be surprising, or contrary to what they expected. In fact, there’s no indication provided in the text about how the researchers felt about the study’s results or that the results should be considered surprising. Choice C is incorrect. Although the text discusses the experimental design of a study, it doesn’t suggest any improvements to that design; instead, it focuses on how the design enabled the researchers to draw a particular conclusion.

Today composer Scott Joplin is mainly celebrated for his catchy ragtime pieces “Maple Leaf Rag” and “The Entertainer.” However, by overlooking his less famous works, listeners will miss the full range of Joplin’s creativity. For instance, his waltz “Pleasant Moments” and his opera *Treemonisha* skillfully blend ragtime and classical music. These masterpieces deserve as much fame as Joplin’s biggest hits.

- Which choice best states the main purpose of the text?
- A. To describe the similarities and differences between ragtime music and opera
 - B. To argue that more attention should be given to Joplin’s lesser-known works
 - C. To encourage music lovers to listen to music by many different composers
 - D. To explain how Joplin learned to compose and perform ragtime music

ID: e816527e Answer

Correct Answer: B

Rationale

Choice B is the best answer because it best states the main purpose of the text, which is to make a case for the importance of Scott Joplin’s less famous works. The text begins by introducing Joplin’s most popular works and then goes on to assert that gaining a full understanding of Joplin’s creativity requires a consideration of his lesser-known pieces as well. The text concludes by characterizing the lesser-known works “Pleasant Moments” and *Treemonisha* as masterpieces that deserve to be famous. These details indicate that the text’s main purpose is to argue that more attention should be given to Joplin’s lesser-known works.

Choice A is incorrect. Although the text discusses some of the ragtime music and an opera that Joplin composed, it does not compare the two types of music in general. Instead, the text argues that Joplin’s lesser-known works, including his opera, deserve as much attention as his more famous ragtime pieces receive. Choice C is incorrect because the text discusses only Joplin’s music and does not ask music lovers to listen to a variety of composers. Instead, the text encourages listeners to pay attention to Joplin’s lesser-known works in order to gain a full understanding of his creativity. Choice D is incorrect because the text does not discuss how Joplin learned to compose and perform ragtime music. Instead, the text focuses on Joplin’s less famous works and makes a case for their importance.

In 1973, poet Miguel Algarín started inviting other writers who, like him, were Nuyorican—a term for New Yorkers of Puerto Rican heritage—to gather in his apartment to present their work. The gatherings were so well attended that Algarín soon had to rent space in a cafe to accommodate them. Thus, the Nuyorican Poets Cafe was born. Moving to a permanent location in 1981, the Nuyorican Poets Cafe expanded its original scope beyond the written word, hosting art exhibitions and musical performances as well. Half a century since its inception, it continues to foster emerging Nuyorican talent.

Which choice best describes the overall purpose of the text?

- A. To explain what motivated Algarín to found the Nuyorican Poets Cafe
- B. To situate the Nuyorican Poets Cafe within the cultural life of New York as a whole
- C. To discuss why the Nuyorican Poets Cafe expanded its scope to include art and music
- D. To provide an overview of the founding and mission of the Nuyorican Poets Cafe

ID: 5b71d7b1 Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text presents a brief history of the Nuyorican Poets Cafe, from how it got started in the '70s, to its expansion in the '80s, to its ongoing mission today.

Choice A is incorrect. This isn't the overall purpose. The text never mentions Algarín's motivations. Choice B is incorrect. This isn't the overall purpose. The text never discusses the cultural life of New York as a whole. Choice C is incorrect. This is too narrow. One sentence mentions that the Nuyorican Poets Cafe expanded its scope to include art and music, but this is only one point in the broader history of the Nuyorican Poets Cafe, which is the overall focus of the text.

The following text is adapted from Paul Laurence Dunbar’s 1902 novel *The Sport of the Gods*. Joe and some of his family members have recently moved to New York City.

[Joe] was wild with enthusiasm and with a desire to be a part of all that the metropolis meant. In the evening he saw the young fellows passing by dressed in their spruce clothes, and he wondered with a sort of envy where they could be going. Back home there had been no place much worth going to, except church and one or two people’s houses.

Which choice best states the main purpose of the text?

- A. It illustrates a character’s reaction to a new environment.
- B. It explains why a character has traveled to a city.
- C. It compares a character’s thoughts about an event at two different times of day.
- D. It presents a character feeling regret over leaving home.

ID: a0d54459 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the main purpose of the text. The narrator describes how Joe responds to being in “the metropolis”: he’s excited and “wild with enthusiasm.” He also envies the young fellows who walk by because, dressed as they are, they look as if they have somewhere special to go. The text contrasts this new place with the place Joe comes from, where apparently there wasn’t as much to do. Thus, the main purpose of the text is to illustrate Joe’s reaction to a new environment.

Choice B is incorrect because the text makes no reference to why Joe has moved. The narrator indicates that Joe is enthusiastic about being in a city, but there’s no explanation provided for the move. Choice C is incorrect because the text makes no reference to how Joe thinks about an event. The narrator describes young men passing by in the evening and then recalls places worth going to at home—church and a few people’s houses—but there’s no explicit comparison made nor is a time of day mentioned for these events back home. Choice D is incorrect because the text doesn’t support the idea that Joe feels regret over leaving home. Instead, Joe is described as “wild with enthusiasm” at being in the city. Joe’s home is mentioned, but only to compare it unfavorably with the city.

The following text is adapted from Gwendolyn Bennett’s 1926 poem “Street Lamps in Early Spring.”

Night wears a garment
All velvet soft, all violet blue...
And over her face she draws a veil
As shimmering fine as floating dew...
And here and there
In the black of her hair
The subtle hands of Night
Move slowly with their gem-starred light.

Which choice best describes the overall structure of the text?

- A. It presents alternating descriptions of night in a rural area and in a city.
- B. It sketches an image of nightfall, then an image of sunrise.
- C. It makes an extended comparison of night to a human being.
- D. It portrays how night changes from one season of the year to the next.

ID: 3bb49e6e Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes the overall structure of the text. Throughout the text, the speaker characterizes nighttime as if it were a person who wears clothing (“a garment” that is “velvet soft” and “violet blue”) and a veil “over her face” and who moves her hands “slowly with their gem-starred light” through her dark hair. Thus, the text is structured as an extended comparison of night to a human being.

Choice A is incorrect because the text never mentions any particular location; instead, it focuses on presenting a single description of night as a person with certain clothing and features. Choice B is incorrect because the text doesn’t make any reference to the sun or sunrise; instead, it focuses on presenting a single image of night as a person with certain clothing and features. Choice D is incorrect. Rather than describing how nighttime changes seasonally (or in any other way), the text presents a single image of night as a person with certain clothing and features.

The following text is adapted from Susan Glaspell’s 1912 short story “Out There.” An elderly shop owner is looking at a picture that he recently acquired and hopes to sell.

It did seem that the picture failed to fit in with the rest of the shop. A persuasive young fellow who claimed he was closing out his stock let the old man have it for what he called a song. It was only a little out-of-the-way store which subsisted chiefly on the framing of pictures. The old man looked around at his views of the city, his pictures of cats and dogs, his flaming bits of landscape. “Don’t belong in here,” he fumed.

And yet the old man was secretly proud of his acquisition. There was a hidden dignity in his scowling as he shuffled about pondering the least ridiculous place for the picture.

- Which choice best states the main purpose of the text?
- A. To reveal the shop owner’s conflicted feelings about the new picture
 - B. To convey the shop owner’s resentment of the person he got the new picture from
 - C. To describe the items that the shop owner most highly prizes
 - D. To explain differences between the new picture and other pictures in the shop

ID: 042d162c Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the main purpose of the text. The text begins by stating that the new picture “failed to fit in” with the other items that the shop owner has. The text goes on to illustrate that point by describing the other pictures the shop owner has, indicating that the shop owner is fuming because he doesn’t think the new picture belongs in the store. In the second paragraph, however, the text indicates that the shop owner is “secretly proud of his acquisition.” The main purpose of the text is thus to reveal the shop owner’s conflicted feelings about the new picture.

Choice B is incorrect because the text doesn’t suggest that the shop owner resents the young man who sold him the new picture; in fact, the text gives no indication of the owner’s feelings about the young man at all. Choice C is incorrect. Although the text indicates that the new picture is different from the other items in the shop, there’s no suggestion that the shop owner prizes either the new picture or the pictures of the city, pets, and landscapes more than he prizes any other items. Choice D is incorrect because the text doesn’t describe what the new picture looks like; rather, the text identifies some of the other kinds of images that the shop owner has and states that they’re different from the new picture without explaining how they’re different.

The following text is from Joseph Conrad’s 1907 novel *The Secret Agent: A Simple Tale*. Mr. Verloc is navigating the London streets on his way to a meeting.

Before reaching Knightsbridge, Mr. Verloc took a turn to the left out of the busy main thoroughfare, uproarious with the traffic of swaying omnibuses and trotting vans, in the almost silent, swift flow of hansoms [horse-drawn carriages]. Under his hat, worn with a slight backward tilt, his hair had been carefully brushed into respectful sleekness; for his business was with an Embassy. And Mr. Verloc, steady like a rock—a soft kind of rock—marched now along a street which could with every propriety be described as private.

Which choice best describes the function of the underlined phrase in the text as a whole?

- A. It qualifies an earlier description of Mr. Verloc.
- B. It emphasizes an internal struggle Mr. Verloc experiences.
- C. It contrasts Mr. Verloc with his surroundings.
- D. It reveals a private opinion Mr. Verloc holds.

ID: d6b84972 Answer

Correct Answer: A

Rationale

Choice A is the best answer. The underline phrase qualifies (meaning adds limits or conditions to) the description of Mr. Verloc as “steady like a rock,” adding that he is a “soft” rock.

Choice B is incorrect. In fact, the passage never mentions Mr. Verloc experiencing any internal struggles. Choice C is incorrect. The underlined phrase doesn’t contrast Mr. Verloc with his surroundings, but is instead modifying the description of him as a rock. Choice D is incorrect. The underlined phrase doesn’t reveal a private opinion Mr. Verloc holds: instead, it further describes his character for the reader.

The following text is from H.D.'s 1916 poem "Mid-Day." In the poem, the speaker is on a path in an outdoor setting.

A slight wind shakes the seed-pods—
my thoughts are spent
as the black seeds.
My thoughts tear me,
I dread their fever.
I am scattered in its whirl.
I am scattered like
the hot shrivelled seeds.

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It illustrates a change in the natural environment that the speaker implies is responsible for the growing misgivings described in the text.
- B. It establishes an example of consistency in the natural landscape that the speaker then contrasts with the unpredictability of human emotions.
- C. It presents an observation of an occurrence in the natural world that the speaker then expands on to convey a sense of a turbulent interior state.
- D. It evokes the ordinariness of an event in nature to suggest that the critical self-evaluation the speaker engages in is a common pursuit.

ID: 16558111 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it best describes the function of the underlined portion in the text as a whole. In the text, the speaker mentions the occurrence in nature of seedpods being shaken by a slight wind. The speaker then goes on to compare the black seeds to thoughts, using language that indicates that the speaker's state of mind is unsettled (e.g., "my thoughts are spent"; "My thoughts tear me, I dread their fever"). The text concludes with a comparison between the speaker's "scattered" state of mind and the "hot shrivelled seeds." Thus, the underlined portion of the text presents an observation of an occurrence in the natural world that the speaker then expands on to convey a sense of a turbulent interior state.

Choice A is incorrect because the text does not indicate that the seedpods are the cause of the speaker's state of mind; thus, they could not be responsible for any misgivings the speaker has. Choice B is incorrect because the text does not contrast the natural landscape with the speaker's state of mind or describe the wind shaking the seedpods as consistent; rather, the text suggests that the state of the natural world and the speaker's state of mind are similar in that both are unsettled. Choice D is incorrect because there is no indication in the text that the speaker regularly engages in critical self-evaluation, only that in this particular instance the speaker's state of mind is turbulent.

Yawn contagion occurs when one individual yawns in response to another’s yawn. Studies of this behavior in primates have focused on populations in captivity, but biologist Elisabetta Palagi and her colleagues have shown that it can occur in wild primate populations as well. In their study, which focused on a wild population of gelada monkeys (*Theropithecus gelada*) in Ethiopia, the researchers further reported that yawn contagion most commonly occurred in males and across different social groups instead of within a single social group.

Which choice best describes the function of the first sentence in the text as a whole?

- A. It defines a phenomenon that is discussed in the text.
- B. It introduces a problem that is examined in the text.
- C. It makes a claim that is challenged in the text.
- D. It presents a hypothesis that is evaluated in the text.

ID: a7038ee7 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes how the first sentence functions in the text as a whole. The first sentence introduces what yawn contagion is, explaining that it occurs when an individual yawns in response to the yawn of another individual. The text goes on to describe Elisabetta Palagi and her colleagues’ study of this phenomenon in a wild population of gelada monkeys. According to the text, the study showed that wild primate populations experience yawn contagion and that the behavior occurs most commonly in male monkeys and across social groups. Thus, the function of the first sentence is to define the phenomenon of yawn contagion that is discussed in the text.

Choice B is incorrect. Although the first sentence introduces the text’s discussion of yawn contagion, it doesn’t present this behavior, or anything else, as a problem. Choice C is incorrect because the first sentence doesn’t present a claim but instead explains what yawn contagion is. Moreover, the text doesn’t challenge anything; it’s an informative text that describes the findings of a research study about yawning in wild primate populations. Choice D is incorrect. Although the text describes a scientific study, and most scientific studies are guided by a hypothesis, the text doesn’t say what Palagi and her colleagues’ hypothesis was; the text discusses their findings instead.

The following text is from Walt Whitman’s 1860 poem “Calamus 24.”

I HEAR it is charged against me that I seek to destroy institutions;
But really I am neither for nor against institutions
(What indeed have I in common with them?—Or what with the destruction of them?),
Only I will establish in the Mannahatta [Manhattan] and in every city of These States, inland and seaboard,
And in the fields and woods, and above every keel [ship] little or large, that dents the water,
Without edifices, or rules, or trustees, or any argument,
The institution of the dear love of comrades.

- Which choice best describes the overall structure of the text?
- A. The speaker questions an increasingly prevalent attitude, then summarizes his worldview.
 - B. The speaker regrets his isolation from others, then predicts a profound change in society.
 - C. The speaker concedes his personal shortcomings, then boasts of his many achievements.
 - D. The speaker addresses a criticism leveled against him, then announces a grand ambition of his.

ID: 86cd2c78 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it best describes the overall structure of the text. The speaker begins by stating that he has heard that others are accusing him of seeking to destroy institutions. The speaker then addresses this criticism by stating that he is “neither for nor against institutions.” Instead, the speaker states that his ultimate goal is to instill “the institution of the dear love of comrades” everywhere in the country. Therefore, the overall structure of the text is best described as an address of criticism followed by an announcement of a grand ambition.

Choice A is incorrect. While the speaker does address an opinion of him that he believes to be untrue, he doesn’t indicate that this attitude has become increasingly prevalent. The speaker also concludes by explaining his goal for the future rather than his current worldview. Choice B is incorrect because the text doesn’t portray the speaker as isolated or regretful, and the speaker gestures toward a hope for societal change but doesn’t offer an explicit prediction that it will happen. Choice C is incorrect because the speaker addresses a criticism of him that he believes to be false; he doesn’t admit any personal shortcomings. Moreover, the speaker concludes by stating a goal he has rather than showcasing his achievements.

A team of researchers discovered that Matabele ants can identify an infected wound in a member of the colony and then treat the infection by covering the wound with antimicrobial secretions that the ants produce. The team found that the mortality rate for Matabele ants with infected injuries was reduced by 90% with this treatment, and they are hopeful that this discovery could aid in the development of new antibiotics for human use.

Which choice best describes the overall structure of the text?

- A. It summarizes research findings on Matabele ants and then identifies an area for further research.
- B. It introduces a study of Matabele ants and then explains the research methods used in the study.
- C. It describes unique properties of Matabele ants and then speculates on how those properties evolved.
- D. It identifies an issue concerning Matabele ants and then proposes a solution to address the issue.

ID: 530afa13 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the overall structure of the text. The text first presents what researchers found from studying Matabele ants: the ants can tell when colony members have infected wounds and can largely successfully treat those infections with their antimicrobial secretions. The text then indicates that the findings about the ants could help with the future development of antibiotics for humans. Thus, the text summarizes research findings and then identifies an area for further research.

Choice B is incorrect. Although the text introduces a study about Matabele ants, it never discusses how the researchers did their work or any methods they used to produce their findings. Choice C is incorrect. Although the text does describe properties of Matabele ants—their ability to detect and largely successfully treat infected wounds in colony members—it never addresses evolution or how these properties might have changed. Choice D is incorrect because the text doesn't present anything about Matabele ants as an issue or problem to be solved. Instead, it discusses beneficial abilities the ants have (detecting and treating infected wounds) and suggests that understanding those abilities might be useful for human medicine.

In the late 1800s, Spanish-language newspapers flourished in cities across Texas. San Antonio alone produced eleven newspapers in Spanish between 1890 and 1900. But El Paso surpassed all other cities in the state. This city produced twenty-two newspapers in Spanish during that period. El Paso is located on the border with Mexico and has always had a large population of Spanish speakers. Thus, it is unsurprising that this city became such a rich site for Spanish-language journalism.

Which choice best states the main purpose of the text?

- A. To compare Spanish-language newspapers published in Texas today with ones published there during the late 1800s
- B. To explain that Spanish-language newspapers thrived in Texas and especially in El Paso during the late 1800s
- C. To argue that Spanish-language newspapers published in El Paso influenced the ones published in San Antonio during the late 1800s
- D. To explain why Spanish-language newspapers published in Texas were so popular in Mexico during the late 1800s

ID: 1b68b809 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the main purpose of the text. The text begins by stating that there were many Spanish-language newspapers in cities across Texas in the late 1800s, citing San Antonio as a city that produced eleven such newspapers. The text then goes on to note that in El Paso, there were twenty-two newspapers published in Spanish in the late 1800s, more than any other Texas city. The text then concludes by explaining that the reason for this large number of Spanish-language newspapers was likely El Paso’s location near Mexico and its large population of Spanish speakers. Therefore, the main purpose of the text is to explain that Spanish-language newspapers thrived in Texas cities, especially in El Paso, in the late 1800s.

Choice A is incorrect because the text doesn’t discuss Spanish-language newspapers published in Texas today, let alone compare them with newspapers that were published in the 1800s. Choice C is incorrect. Although the text characterizes El Paso as a particularly rich site for Spanish-language journalism in the late 1800s, the text doesn’t discuss whether newspapers published in El Paso influenced the newspapers published in other cities across Texas, including San Antonio. Choice D is incorrect because the text doesn’t mention whether Spanish-language newspapers published in Texas were also widely read in Mexico. The text only focuses on the popularity of Spanish-language newspapers within Texas, and especially in El Paso.

The following text is adapted from Charles Dickens’s 1854 novel *Hard Times*. Coketown is a fictional town in England. [Coketown] contained several large streets all very like one another, and many small streets still more like one another, inhabited by people equally like one another, who all went in and out at the same hours, with the same sound upon the same pavements, to do the same work, and to whom every day was the same as yesterday and tomorrow, and every year the counterpart of the last and the next.

- Which choice best states the main purpose of the text?
- A. To emphasize the uniformity of both the town and the people who live there
 - B. To explain the limited work opportunities available to the town’s residents
 - C. To reveal how the predictability of the town makes it easy for people lose track of time
 - D. To argue that the simplicity of life in the town makes it a pleasant place to live

ID: 014ae202 Answer

Correct Answer: A

Rationale

Choice A is the best answer. The author describes Coketown as having streets that are all very similar and residents who live similarly and do the same work. This repetition of similarities emphasizes how everything in Coketown is alike.

Choice B is incorrect. While the text mentions that all the residents “do the same work,” it never explains what that work is or why everyone does it. Besides, the idea that they all do the same work is just one of several similarities among the townspeople described in the text. Choice C is incorrect. While the last sentence states that “every day was the same as yesterday and tomorrow, and every year the counterpart of the last and the next,” it never suggests that people actually “lose track of time.” This is also too narrow to be the main idea, since time is just one of many aspects of Coketown that the text describes as always being the same. Choice D is incorrect. The text never mentions whether life is simple in Coketown, and the town sounds as though it’s probably a pretty dull place to live, rather than a pleasant one.

Chile’s Atacama Desert is one of the driest places on Earth. Mary Beth Wilhelm and other astrobiologists search for life, or its remains, in this harsh place because the desert closely mirrors the extreme environment on Mars. The algae and bacteria found in Atacama’s driest regions may offer clues about Martian life. By studying how these and other microorganisms survive such extreme conditions on Earth, Wilhelm’s team hopes to determine whether similar life might have existed on Mars and to develop the best tools to look for evidence of it.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. To contrast the conditions in the Atacama Desert with those on Mars
- B. To explain why many life-forms cannot survive in the Atacama Desert
- C. To indicate why astrobiologists choose to conduct research in the Atacama Desert
- D. To describe certain limitations to conducting scientific study in the Atacama Desert

ID: 61f51c7e Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The first sentence describes a unique location on Earth, the Atacama Desert. The next sentence, which is the underlined sentence, states that the reason why astrobiologists study life, or its remains, in this unique location is that Atacama is a harsh environment that closely resembles the extreme environment of Mars. The remainder of the text explains that the researchers hope their work in Atacama will support inquiry into life on Mars. Thus, the underlined portion functions mainly to indicate why astrobiologists choose to conduct research in the Atacama Desert.

Choice A is incorrect because to contrast two things means to show the differences between them, and the phrase "closely mirrors" in the underlined sentence indicates that the extreme environment in the Atacama Desert is similar to, not different from, that on Mars. This similarity is why, according to the underlined sentence, astrobiologists conduct research in Atacama. Choice B is incorrect because the underlined sentence doesn’t address forms of life that are unable to survive the harsh environment of the Atacama Desert. Instead, the underlined sentence explains why astrobiologists study life, or its remains, in this environment. Choice D is incorrect because the underlined sentence doesn’t suggest that the scientific research in the Atacama Desert is limited in any way; instead, the sentence explains that the similarity between the environments of Atacama and Mars is the reason why astrobiologists search for life, or its remains, in Atacama.

The following text is adapted from Etsu Inagaki Sugimoto’s 1925 memoir *A Daughter of the Samurai*. As a young woman, Sugimoto moved from feudal Japan to the United States.

The standards of my own and my adopted country differed so widely in some ways, and my love for both lands was so sincere, that sometimes I had an odd feeling of standing upon a cloud in space, and gazing with measuring eyes upon two separate worlds. At first I was continually trying to explain, by Japanese standards, all the queer things that came every day before my surprised eyes; for no one seemed to know the origin or significance of even the most familiar customs, nor why they existed and were followed.

- Which choice best describes the main purpose of the text?
- A. To convey the narrator’s experience of observing and making sense of differences between two cultures she embraces
 - B. To establish the narrator’s hope of forming connections with new companions by sharing customs she learned as a child
 - C. To reveal the narrator’s recognition that she is hesitant to ask questions about certain aspects of a culture she is newly encountering
 - D. To emphasize the narrator’s wonder at discovering that the physical distance between two countries is greater than she had expected

ID: d3fe0b12 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the main purpose of the text. The narrator asserts that she loves both her “own” country (Japan) and her “adopted country” (the United States) even though the two countries differ “widely.” She also indicates that, at first, she would try to explain unfamiliar experiences that she had in the United States using the standards ingrained in her from growing up in Japan. Thus, the main purpose of the text is to convey the narrator’s experience of observing and making sense of the differences between two cultures she embraces.

Choice B is incorrect because the text makes no reference to possible companions. Although the text does indicate that the narrator sometimes used the cultural framework she acquired growing up in Japan to explain some experiences she’s had, there is no suggestion that this was in service of making friends. And although “no one seemed to know” strongly implies that the narrator has interacted with other people in the United States, there is no indication that these conversations involved her discussing Japanese customs. Choice C is incorrect because nothing in the text suggests that the narrator was hesitant to ask questions. In fact, the narrator indicates that “no one seemed to know the origin” of various customs, which provides evidence that, rather than being hesitant, she sought information from several people. Choice D is incorrect because the text makes no reference to the physical distance between Japan and the United States. Although the narrator indicates that the two countries differ “widely” and likens them to “two separate worlds,” these descriptions relate to cultural aspects of the countries and the narrator’s feelings about the two countries, not the physical distance between them.

The north celestial pole (NCP)—the fixed point around which stars in the Northern Hemisphere (including the Sun) appear to rotate—is discernible only at night. Inspired by the navigational strategies of some insects and birds, researchers devised a method for locating the NCP in daytime using skylight polarization, which occurs as atmospheric particles scatter sunlight. A polarimetric camera captures images of polarization patterns, which rotate as the Sun’s position in the sky changes; temporal variances across images can then be used to determine an observer’s latitude and bearing relative to the NCP.

Which choice best describes the overall structure of the text?

- A. It illustrates how most navigational tools utilize the NCP, recounts how researchers discovered that certain animals are able to navigate without using the NCP, and then proposes that this discovery could be used to avoid problems in navigation associated with reliance on the NCP.
- B. It presents a celestial-based method of navigation, enumerates the comparative benefits of an alternative method used by certain animals that is based on an unrelated natural occurrence, and then indicates how researchers assessed the relative accuracy of the two methods.
- C. It explains how the NCP is typically located, emphasizes a key difference between how humans and certain animals use the NCP for navigation, and then suggests an alternative way of using the NCP to improve existing navigational instruments.
- D. It notes an obstacle to observing an astronomical phenomenon, mentions a navigational ability of certain animals that inspired a solution to that obstacle, and then explains how researchers used an optical device to mimic that ability.

ID: 0b51f310 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it accurately describes the overall structure of the text. The text begins by pointing out an obstacle to observing the astronomical phenomenon of the NCP: the NCP is visible only at night. The text then indicates that, inspired by the ability of some insects and birds to navigate using visualizations of polarized sunlight, researchers devised a way to locate the NCP during daylight. The text then indicates that the researchers mimicked the insects’ and birds’ polarized-light visualization capabilities using a polarimetric camera. Thus, the text notes an obstacle to observing an astronomical phenomenon, mentions a navigational ability of certain animals that inspired a solution to that obstacle, and then explains how researchers used an optical device to mimic that ability.

Choice A is incorrect. Although it’s reasonable to conjecture that humans have used the NCP for navigation, the text doesn’t indicate this is the case, let alone that the NCP is relevant to a majority of navigational tools. Furthermore, the text doesn’t state that researchers discovered that insects and birds navigate without the NCP; rather, it indicates that it’s known that some animals navigate by using skylight polarization to locate the NCP during the day and that this knowledge inspired the method the researchers devised. Choice B is incorrect. Although it’s reasonable to conjecture that humans have used the NCP for navigation, the text doesn’t state that this is the case. Furthermore, the text discusses how some animals’ use of navigational strategies based on the same celestial occurrence served as the inspiration for the researchers’ polarized-light approach, not as the basis for a comparison of the relative effectiveness of animal and human methods of navigation. Choice C is incorrect. Although the text

implies that humans have typically been able to locate the NCP visually at night and indicates that some animals use the NCP to navigate, the text doesn't state that humans use the NCP for navigation. The text therefore doesn't emphasize a difference between how humans and animals use the NCP for this purpose. Furthermore, the text doesn't suggest that existing navigational instruments will be augmented with polarimetric technologies.

The following text is from the 1923 poem “Black Finger” by Angelina Weld Grimké, a Black American writer. A cypress is a type of evergreen tree.

I have just seen a most beautiful thing,
Slim and still,
 Against a gold, gold sky,
A straight black cypress,
Sensitive,
Exquisite,
A black finger
Pointing upwards.
Why, beautiful still finger, are you black?
And why are you pointing upwards?

Which choice best describes the overall structure of the text?

- A. The speaker assesses a natural phenomenon, then questions the accuracy of her assessment.
- B. The speaker describes a distinctive sight in nature, then ponders what meaning to attribute to that sight.
- C. The speaker presents an outdoor scene, then considers a human behavior occurring within that scene.
- D. The speaker examines her surroundings, then speculates about their influence on her emotional state.

ID: 333f6512 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the overall structure of the text. First, the speaker describes observing a “most beautiful” sight: a tree (“black cypress”) standing out from the golden sky behind it, looking like a person’s finger “pointing upwards” and appearing “sensitive” and “exquisite.” Then the speaker wonders about the image’s meaning, asking why the finger is black and why it’s pointing upward. Thus, the text moves from the speaker’s description of a distinctive sight in nature to her pondering about what meaning to attribute to that sight.

Choice A is incorrect because the speaker assesses a natural sight—a “black cypress” tree standing “against a gold, gold sky” like a pointed finger—but doesn’t question the accuracy of her own assessment. Although she wonders why the finger, which is really a tree, is black and why it’s pointing, the speaker doesn’t suggest that her belief that the tree resembles a finger is wrong. Choice C is incorrect. Although the speaker describes seeing a “black cypress” tree standing “against a gold, gold sky” like a pointed finger, she wonders about that natural image (asking why the finger, which is really a tree, is black and why it’s pointing) and doesn’t give any indication that any people are present in the scene. Choice D is incorrect. Although the speaker examines and wonders about one thing in her surroundings—a “black cypress” tree standing “against a gold, gold sky” like a pointed finger—she doesn’t address her own emotional state or consider how it’s affected by her surroundings.

The following text is adapted from Louise Erdrich’s 2020 novel *The Night Watchman*. Louis Pipestone is collecting signatures for a petition from fellow members of the Turtle Mountain Band of Chippewa on the tribe’s reservation in North Dakota.

Louis Pipestone tended the petition like a garden. He kept it with him at all times. In town, his eyes sharpened when he noticed a tribal member who hadn’t yet signed. Wherever they were—at the gas pump, mercantile [general store], at Henry’s [Café], on the road, or outside the clinic and hospital—Louis cornered them. If they were waiting for a baby to be born, he’d have them sign. If they were laughing, if they were arguing. If they were taking a child home from school, they signed.

©2020 by Louise Erdrich

Which choice best states the main purpose of the text?

- A. To suggest that some tribal members refuse to sign the petition because they dislike Louis Pipestone
- B. To show that attitudes toward the petition within the tribal community change over time
- C. To demonstrate that most tribal members are enthusiastic about signing the petition
- D. To portray Louis Pipestone’s strong commitment to collecting signatures for the petition

ID: b5c5b387 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the text’s main purpose. The text indicates that Louis always had his petition with him, asked everyone he encountered to sign it if they hadn’t already, and lists several comical circumstances in which he might try to get someone to sign. Thus, the main purpose of the text is to illustrate Louis’s dedicated focus on getting people to sign the petition.

Choice A is incorrect. Although the text suggests that Louis was aggressive in seeking signatures for the petition—for example, saying that he "cornered" people—nothing in the text addresses how those people feel toward Louis, let alone that they are refusing his request. Choice B is incorrect because, other than portraying Louis’s commitment to gathering signatures, the text doesn’t discuss community members’ attitudes toward Louis or the petition. Choice C is incorrect because the text never mentions the attitudes of the people Louis approaches toward the petition, but the text does indicate that he "cornered" prospective signatories, strongly suggesting that their enthusiasm was neither needed nor considered.

The following text is from the 1895 poem “Marshlands” by Emily Pauline Johnson, a Kanienkahagen (Mohawk) writer also known as Tekahionwake.

Among the wild rice in the still lagoon,
In monotone the lizard shrills his tune.
The wild goose, homing, seeks a sheltering,
Where rushes grow, and oozing lichens cling.
Late cranes with heavy wing, and lazy flight,
Sail up the silence with the nearing night.
And like a spirit, swathed in some soft veil,
Steals twilight and its shadows o’er the swale.
Hushed lie the sedges, and the vapours creep,
Thick, grey and humid, while the marshes sleep.

- Which choice best describes the overall structure of the text?
- A. It names animal species found in a place, then names plant species there.
 - B. It sketches a setting by presenting a series of images of nature.
 - C. It makes an extended comparison of nature to human emotions.
 - D. It identifies a location, then refers to a person living there.

ID: f318de52 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it best describes the overall structure of the text. The text first establishes the setting, a "still lagoon," and then goes on to provide more details about the lagoon by presenting several descriptive images of nature, including a lizard that "shrills his tune," "oozing lichens," and "thick, grey and humid" vapors.

Choice A is incorrect. Instead of simply naming species, the text presents descriptive images of nature; further, instead of naming animals and then moving on to name plants, the text refers first to a plant ("the wild rice"), then to two animals ("the lizard," "the wild goose"), then to another plant ("rushes"), and so on. Choice C is incorrect because the text does not draw any comparison between nature and human emotions; it does not refer to human emotions at all. Choice D is incorrect. While the text does begin by identifying a specific location, a "still lagoon," it makes no mention of a person living there.

Horizontal gene transfer occurs when an organism of one species acquires genetic material from an organism of another species through nonreproductive means. The genetic material can then be transferred “vertically” in the second species—that is, through reproductive inheritance. Scientist Atma Ivancevic and her team have hypothesized infection by invertebrate parasites as a mechanism of horizontal gene transfer between vertebrate species: while feeding, a parasite could acquire a gene from one host, then relocate to a host from a different vertebrate species and transfer the gene to it in turn.

- Which choice best describes the function of the underlined portion in the text as a whole?
- A. It explains why parasites are less susceptible to horizontal gene transfer than their hosts are.
 - B. It clarifies why some genes are more likely to be transferred horizontally than others are.
 - C. It contrasts how horizontal gene transfer occurs among vertebrates with how it occurs among invertebrates.
 - D. It describes a means by which horizontal gene transfer might occur among vertebrates.

ID: f3a51fa6 Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text defines horizontal gene transfer and then gives one possibility for how it happens in vertebrates (via infection by parasites). The underlined part describes how that mechanism could work.

Choice A is incorrect. The underlined portion doesn’t do this. Parasites are only described as the mechanism that does the transferring, not the species that gives or receives the genes. Choice B is incorrect. The underlined portion doesn’t do this. The text never discusses which genes are more likely to be transferred. Choice C is incorrect. The underlined portion doesn’t do this. The text never discusses how horizontal gene transfer occurs among invertebrates.

By combining Indigenous and classical music, Cree composer and cellist Cris Derksen creates works that reflect the diverse cultural landscape of Canada. For her album *Orchestral Powwow*, Derksen composed new songs in the style of traditional powwow music that were accompanied by classical arrangements played by an orchestra. But where an orchestra would normally follow the directions of a conductor, the musicians on *Orchestral Powwow* are led by the beat of a powwow drum.

Which choice best states the main purpose of the text?

- A. To examine how Derksen’s musical compositions blend cultures
- B. To argue that Derksen should be recognized for creating a new style of music
- C. To describe the difficulties Derksen encountered when producing her album
- D. To establish a contrast between Derksen’s classical training and her Cree heritage

ID: 95195865 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the main purpose of the text, which is to discuss how Derksen’s compositions incorporate elements from both Indigenous and classical music. After introducing Derksen, the text describes how the songs Derksen composed for her album *Orchestral Powwow* feature aspects of the two musical traditions. Specifically, the text notes that Derksen wrote songs in the style of traditional powwow music but accompanied them with classical arrangements played by an orchestra that followed the beat of a powwow drum rather than the directions of a conductor. In this way, Derksen’s compositions blend different cultures.

Choice B is incorrect because although the text suggests that Derksen’s songs contain innovative elements since they blend styles from two different musical traditions, it doesn’t discuss whether her compositions constitute a new style of music, let alone whether Derksen should be recognized for creating a new style of music. Choice C is incorrect because the text doesn’t mention any difficulties Derksen encountered when producing her album. Rather, the text describes how the songs on the album exemplify how Derksen combines music from two different cultures. Choice D is incorrect because although the text mentions Derksen’s Cree heritage and suggests that she relies on knowledge of both Indigenous and classical music when she composes her songs, it doesn’t discuss her musical training. Additionally, the text is primarily focused on how Derksen combines different cultural traditions, not on contrasting Derksen’s training with her heritage.

The following text is from Annie Dillard’s 1987 autobiographical novel *An American Childhood*. The narrator is a young girl living in Pittsburgh.

I walked. My mother had given me the freedom of the streets as soon as I could say our telephone number. I walked and memorized the neighborhood. I made a mental map and located myself upon it. At night in bed I rehearsed the small world’s scheme and set challenges: Find the store using backyards only. Imagine a route from the school to my friend’s house.

©1987 by Annie Dillard

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It describes the narrator trying to memorize her telephone number.
- B. It provides examples of what the narrator thinks about at night.
- C. It gives directions to the narrator’s favorite local store.
- D. It portrays the narrator’s relationship with her mother.

ID: 5cf1663b Answer

Correct Answer: B

Rationale

Choice B is the best answer because it accurately describes how the underlined portion functions in the text as a whole. In the text, the narrator explains that she walks around her neighborhood, making a "mental map" of the area that she imagines herself navigating through. She then states that she rehearses "the small world’s scheme"—that is, imagines moving through her mental map—and challenges herself to use the map in her mind while lying in bed at night. The underlined portion presents two such challenges (getting to the store through backyards and traveling from school to a friend’s house) and thus provides examples of what the narrator thinks about at night.

Choice A is incorrect because the underlined portion makes no mention of memorizing a telephone number. Although the narrator mentions that she had to learn the home telephone number before her mother would give her permission to walk around the neighborhood, there is nothing in the underlined portion or the rest of the text about memorizing the telephone number. Choice C is incorrect. Although the underlined portion refers to navigation tasks like finding a route to a store only through backyards, the text contains no specific directions to any store, nor is any store identified as the narrator’s favorite. Choice D is incorrect because the underlined portion makes no mention of the narrator’s mother and doesn’t address the narrator’s relationship with her. Although the narrator mentions that her mother gave her permission as a child to walk around the neighborhood, there is nothing in the underlined portion or the rest of the text about the mother or her relationship to her child.

The following text is from Herman Melville’s 1854 novel *The Lightning-rod Man*.
The stranger still stood in the exact middle of the cottage, where he had first planted himself. His singularity impelled a closer scrutiny. A lean, gloomy figure. Hair dark and lank, mattedly streaked over his brow. His sunken pitfalls of eyes were ringed by indigo halos, and played with an innocuous sort of lightning: the gleam without the bolt. The whole man was dripping. He stood in a puddle on the bare oak floor: his strange walking-stick vertically resting at his side.

Which choice best states the function of the underlined sentence in the overall structure of the text?

- A. It elaborates on the previous sentence’s description of the character.
- B. It introduces the setting that is described in the sentences that follow.
- C. It establishes a contrast with the description in the previous sentence.
- D. It sets up the character description presented in the sentences that follow.

ID: 5405400f Answer

Correct Answer: D

Rationale

Choice D is the best answer. This best states the function of the underlined sentence. The sentence basically says: “He stood out, so I looked more closely at him.” Then the rest of the text describes him in detail.

Choice A is incorrect. This doesn’t state the function of the underlined sentence. The previous sentence basically says: “He was still standing in the middle of the cottage”—it doesn’t include any description of the character himself. Choice B is incorrect. This doesn’t state the function of the underlined sentence. The following sentences describe the character, not the setting. Choice C is incorrect. This doesn’t state the function of the underlined sentence. The underlined sentence basically says: “He stood out, so I looked more closely at him.” The previous sentence basically says: “He was still standing in the middle of the cottage.” There’s no contrast between these two sentences.

Early in the Great Migration of 1910–1970, which involved the mass migration of Black people from the southern to the northern United States, political activist and *Chicago Defender* writer Fannie Barrier Williams was instrumental in helping other Black women establish themselves in the North. Many women hoped for better employment opportunities in the North because, in the South, they faced much competition for domestic employment and men tended to get agricultural work. To aid with this transition, Barrier Williams helped secure job placement in the North for many women before they even began their journey.

Which choice best states the main purpose of the text?

- A. To introduce and illustrate Barrier Williams’s integral role in supporting other Black women as their circumstances changed during part of the Great Migration
- B. To establish that Barrier Williams used her professional connections to arrange employment for other Black women, including jobs with the *Chicago Defender*
- C. To demonstrate that the factors that motivated the start of the Great Migration were different for Black women than they were for Black men
- D. To provide an overview of the employment challenges faced by Black women in the agricultural and domestic spheres in the southern United States

ID: e2aebe0a Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the text’s purpose, which is to discuss the important role Barrier Williams played in supporting many other Black women as they relocated to the northern United States during the early years of the Great Migration. After introducing Barrier Williams, the text describes how she helped find jobs for other Black women, who in many cases relocated in search of better employment prospects than the South could offer at the time. The text indicates that by doing so, she eased these women’s transition as their circumstances changed.

Choice B is incorrect. Although the text mentions Barrier Williams’s work as a political activist and writer for the *Chicago Defender*, it doesn’t discuss any professional connections she made in these roles or indicate that she used any such connections in her work to secure employment for other Black women. Choice C is incorrect. Although the text discusses a factor that caused many women to relocate during the Great Migration, their difficulty finding employment in the South, the text doesn’t indicate that this factor motivated the start of the Great Migration. Moreover, the text doesn’t discuss the factors that motivated Black men to migrate. Choice D is incorrect. Although the text mentions the difficult employment prospects for Black women in the domestic and agricultural sectors in the South during the Great Migration, the text’s main purpose isn’t to provide an overview of the employment challenges Black women faced in these sectors. Rather, it provides this information to show that Barrier Williams played a crucial role in supporting many Black women who relocated to the North by helping them achieve one of their main goals, securing a job.

The following text is from Lucy Maud Montgomery’s 1908 novel *Anne of Green Gables*. Anne, an eleven-year-old girl, has come to live on a farm with a woman named Marilla in Nova Scotia, Canada.

Anne reveled in the world of color about her.
“Oh, Marilla,” she exclaimed one Saturday morning, coming dancing in with her arms full of gorgeous boughs, “I’m so glad I live in a world where there are Octobers. It would be terrible if we just skipped from September to November, wouldn’t it? Look at these maple branches. Don’t they give you a thrill—several thrills? I’m going to decorate my room with them.”
“Messy things,” said Marilla, whose aesthetic sense was not noticeably developed. “You clutter up your room entirely too much with out-of-doors stuff, Anne. Bedrooms were made to sleep in.”

- Which choice best states the main purpose of the text?
- A. To demonstrate that Anne has a newly developed appreciation of nature
 - B. To describe an argument that Anne and Marilla often have
 - C. To emphasize Marilla’s disapproval of how Anne has decorated her room
 - D. To show that Anne and Marilla have very different personalities

ID: 3fcc2cee Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes the main purpose of the text. The text begins by noting that Anne “reveled in the world of color about her”—that is, she takes great delight in colorful things. It then relates a scene when she enthusiastically enters the house with autumn foliage and announces that she will decorate her room with it. The focus of the text then shifts to Marilla, who has an undeveloped “aesthetic sense,” or appreciation of beauty, as can be seen when she dismisses the maple leaves as “messy things” and criticizes Anne for cluttering her room with objects from outside. This episode thus illustrates that Anne and Marilla differ in their appreciation of beauty and, more generally, in their basic character: Anne is exuberant and joyful, while Marilla is stern and critical. Therefore, the purpose of the text is to show that Anne and Marilla have very different personalities.

Choice A is incorrect because the text presents Anne’s appreciation of nature as a basic personality trait, not as a newfound enthusiasm, and never indicates how recently she developed that appreciation. Choice B is incorrect. Although the text portrays Anne and Marilla as having different personalities and attitudes toward natural beauty and home decoration, it doesn’t show them engaging in an argument about this difference or suggest that they often argue about it. Choice C is incorrect. Although the text does indicate that Marilla disapproves of how Anne plans to decorate her room, Marilla’s disapproval is a supporting detail that serves to develop her personality, which the text as a whole contrasts with Anne’s personality.

When ancient oak planks were unearthed during subway construction in Rome, Mauro Bernabei and his team examined the growth rings in the wood to determine where these planks came from. By comparing the growth rings on the planks to records of similar rings in oaks from Europe, the team could trace the wood to the Jura region of France, hundreds of kilometers from Rome. Because timber could only have been transported from distant Jura to Rome by boat, the team’s findings suggest the complexity of Roman trade routes.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It presents a conclusion about Roman trade routes based on the team’s findings.
- B. It questions how the team was able to conclude that the planks were used to build a boat.
- C. It explains why the planks were made from oak rather than a different kind of wood.
- D. It describes common methods used in Roman subway construction.

ID: 672d26e8 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The first sentence explains that Bernabei and his team studied growth rings to obtain information about the ancient oak planks found during a construction project in Rome. The next sentence presents what the researchers learned: the wood from the planks came from France’s Jura region, which is far from Rome. The underlined sentence then presents the implications of the findings about the planks: the wood must have been brought to Rome by boat, a difficult task that suggests Roman trade routes were complex. Thus, the underlined sentence mainly functions to present a conclusion about Roman trade routes based on the team’s findings.

Choice B is incorrect because the text doesn’t suggest that the team thought the ancient planks were used in the construction of a boat, nor does the underlined sentence question that conclusion. Instead, the text states that the wood could only have been transported from Jura to Rome in a boat. Choice C is incorrect because the underlined sentence simply offers a conclusion drawn from the team’s findings about the likely place of origin of the ancient planks; the text never mentions why oak was chosen for the planks instead of other wood. Choice D is incorrect because neither the underlined sentence nor the text as a whole addresses any methods that Romans used in constructing subways. Instead, the underlined sentence offers a conclusion drawn from the team’s findings about the likely place of origin of the ancient wooden planks discovered.

The following text is adapted from George Eliot’s 1857 short story “The Sad Fortunes of the Rev. Amos Barton.” Mr. Ely is a clergyman in the town of Milby.

By the laity of Milby and its neighbourhood [Mr. Ely] was regarded as a man of quite remarkable powers and learning, who must make a considerable sensation in London pulpits and drawing-rooms on his occasional visit to the metropolis; and by his brother clergy he was regarded as a discreet and agreeable fellow. Mr. Ely never got into a warm discussion; he suggested what might be thought, but rarely said what he thought himself; he never let either men or women see that he was laughing at them, and he never gave any one an opportunity of laughing at *him*.

- Which choice best describes the overall structure of the text?
- A. It shows that Mr. Ely had originally been held in high regard by his friends and then details the events that caused their regard for him to subside.
 - B. It implies that Mr. Ely’s neighbors are more naïve in their estimation of him than people in London are and then explains why his neighbors have been so easily misled.
 - C. It stresses the discrepancy between Mr. Ely’s public and private conduct and then alludes to his motivation for hiding his true personality.
 - D. It presents the favorable opinion of Mr. Ely that other people hold and then describes the behaviors of Mr. Ely that enable him to maintain that favorable opinion.

ID: 684132cd Answer

Correct Answer: D

Rationale

Choice D is the best answer because it best describes the overall structure of the text. The first part of the text presents the favorable opinions that others hold of Mr. Ely: the laity of Milby regard him as having "remarkable powers and learning" and assume that he also impresses people in London, while his fellow clergy see him as "a discreet and agreeable fellow." The text then goes on to describe Mr. Ely’s behaviors that enable him to cultivate and preserve his positive reputation. The text conveys that he avoids confrontations, abstaining from "warm discussion[s]" (that is, heated or contentious ones); that he avoids offending anyone by "rarely [saying] what he thought himself" and by refraining from openly ridiculing anyone; and that he doesn’t give anyone any reason to ridicule or belittle his own character ("he never gave any one an opportunity of laughing at *him*"). In other words, these are all behaviors that suggest that Mr. Ely avoids doing anything that might make people dislike him or think poorly of him. Thus, the text begins by presenting the favorable view that people have of Mr. Ely and then describes the behaviors that enable him to maintain that favorable view.

Choice A is incorrect because the text doesn’t describe any events that caused people’s regard for Mr. Ely to diminish. Instead, the text explains that the people of Milby hold him in high regard and describes behaviors that suggest how he cultivates that regard. Choice B is incorrect because the text doesn’t suggest that Mr. Ely’s neighbors are more naïve than Londoners are or that they’ve been misled. Although the text suggests that Mr. Ely is very guarded in his outward behavior and conceals from people when he

may be internally mocking them, which might suggest that people know him less well than they think they do, there's nothing in the text to suggest that Londoners are less naïve and therefore less easily misled than Mr. Ely's neighbors are. The text states that the people of Milby believe Mr. Ely to be "remarkable" and that they assume that people in London must find him so, too; it doesn't say anything about what Londoners actually think of him. Choice C is incorrect. While the text discusses Mr. Ely's public conduct at length, describing the ways in which he carefully cultivates an agreeable public persona, the text doesn't discuss how Mr. Ely behaves in private at all; it therefore wouldn't be accurate to say that the text begins by emphasizing a discrepancy between his public and private conduct. Furthermore, although the text concludes with examples illustrating that Mr. Ely typically doesn't share his true thoughts, indicating that he may be hiding aspects of his true personality when in public, and although the text as a whole conveys the idea that Mr. Ely benefits from this behavior, which might hint at his motives for doing so, the text doesn't conclude by alluding to those motives. Instead, the text merely concludes with a description of the behaviors he engages in to win his neighbors' and colleagues' approval.

Musician Joni Mitchell, who is also a painter, uses images she creates for her album covers to emphasize ideas expressed in her music. For the cover of her album *Turbulent Indigo* (1994), Mitchell painted a striking self-portrait that closely resembles Vincent van Gogh’s *Self-Portrait with Bandaged Ear* (1889). The image calls attention to the album’s title song, in which Mitchell sings about the legacy of the postimpressionist painter. In that song, Mitchell also hints that she feels a strong artistic connection to Van Gogh—an idea that is reinforced by her imagery on the cover.

Which choice best describes the overall structure of the text?

- A. It presents a claim about Mitchell, then gives an example supporting that claim.
- B. It discusses Van Gogh’s influence on Mitchell, then considers Mitchell’s influence on other artists.
- C. It describes a similarity between two artists, then notes a difference between them.
- D. It describes the songs on *Turbulent Indigo*, then explains how they relate to the album’s cover.

ID: 7d1c8a2b Answer

Correct Answer: A

Rationale

Choice A is the best answer because it accurately describes the organization of the elements within the text. The text begins with the claim that Joni Mitchell’s album covers use images she creates in order to emphasize ideas embedded in her albums. It then goes on to provide an example of how Mitchell’s self-portrait on the cover of *Turbulent Indigo* resembles a painting by Van Gogh, which the text indicates helps emphasize the strong connection Mitchell feels toward Van Gogh, a connection that is also expressed in the album’s title song.

Choice B is incorrect because there are no references in the text to artists other than Joni Mitchell and Van Gogh. Choice C is incorrect because there is nothing in the text that calls attention to any similarities or differences between Joni Mitchell and Van Gogh. Instead, it mentions that Mitchell feels a strong “artistic connection” to Van Gogh. Choice D is incorrect because the text discusses the cover before referring to any songs, and it only references one song from the album not all the songs.

Michelene Pesantubbee, a historian and citizen of the Choctaw Nation, has identified a dilemma inherent to research on the status of women in her tribe during the 1600s and 1700s: the primary sources from that era, travel narratives and other accounts by male European colonizers, underestimate the degree of power conferred on Choctaw women by their traditional roles in political, civic, and ceremonial life. Pesantubbee argues that the Choctaw oral tradition and findings from archaeological sites in the tribe’s homeland supplement the written record by providing crucial insights into those roles.

Which choice best describes the overall structure of the text?

- A. It details the shortcomings of certain historical sources, then argues that research should avoid those sources altogether.
- B. It describes a problem that arises in research on a particular topic, then sketches a historian’s approach to addressing that problem.
- C. It lists the advantages of a particular research method, then acknowledges a historian’s criticism of that method.
- D. It characterizes a particular topic as especially challenging to research, then suggests a related topic for historians to pursue instead.

ID: cd742fda Answer

Correct Answer: B

Rationale

Choice B is the best answer. The text begins by stating a problem with research on the status of Choctaw women in the 1600s and 1700s: written primary sources underestimate the power they had in their traditional roles. Then it presents one historian’s solution: looking to oral tradition and archeological findings for more insight into these roles.

Choice A is incorrect. This isn’t the overall structure. The text never says that research should avoid written primary sources, just that research should also use oral tradition and archeological sites as sources. Choice C is incorrect. This isn’t the overall structure. The text never mentions the advantages of using written primary sources. Choice D is incorrect. This isn’t the overall structure. The text never says that the status of Choctaw women during the 1600s and 1700s is too challenging to research. And it doesn’t mention any other topics to research instead.

Many archaeologists assume that large-scale engineering projects in ancient societies required an elite class to plan and direct the necessary labor. However, recent discoveries, such as the excavation of an ancient canal near the Gulf Coast of Alabama, have complicated this picture. Using radiocarbon dating, a team of researchers concluded that the 1.39-kilometer-long canal was most likely constructed between 576 and 650 CE by an Indigenous society that was relatively free of social classes.

Which choice best describes the overall structure of the text?

- A. It describes a common view among archaeologists, then discusses a recent finding that challenges that view.
- B. It outlines a method used in some archaeological fieldwork, then explains why an alternative method is superior to it.
- C. It presents contradictory conclusions drawn by archaeologists, then evaluates a study that has apparently resolved that contradiction.
- D. It identifies a gap in scientific research, then presents a strategy used by some archaeologists to remedy that gap.

ID: f242d54d Answer

Correct Answer: A

Rationale

Choice A is the best answer. The text starts by introducing a common view among archaeologists about the need for an elite class to direct large-scale engineering projects. Then, it discusses the discovery of a large canal most likely built by a society without an elite class, which challenges the first view.

Choice B is incorrect. Although the text discusses carbon dating as an archaeological method, it doesn't compare it to any other alternative methods. Choice C is incorrect. The study doesn't resolve any contradictions—rather, it introduces a contradiction to the one view presented at the beginning of the text. Choice D is incorrect. The text never identifies any gaps in scientific research.

Researchers have long hypothesized that woolly mammoths were hunted to extinction in North America by humans using spears with grooved tips known as Clovis points. One anthropologist set out to test this hypothesis. Using a mechanical spear-thrower, he launched spears with Clovis points into mounds of clay—substitutes for the animals’ large bodies. The projectiles generally penetrated only a few inches into the clay, an amount insufficient to have harmed most woolly mammoths. This led the anthropologist to conclude that hunters using spears with Clovis points likely weren’t the principal drivers of the extinction.

Which choice best states the main purpose of the text?

- A. To argue for the significance of new findings amid an ongoing debate among researchers
- B. To discuss the advantages and disadvantages of the method used in an experiment
- C. To summarize two competing hypotheses and a major finding associated with each one
- D. To describe an experiment whose results cast doubt on an established hypothesis

ID: 4cebc520 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main purpose of the text, which is to describe an experiment whose results cast doubt on an established hypothesis. The text begins by noting that researchers have long believed that woolly mammoths were hunted to extinction in North America by humans using spears with Clovis points. The text then describes an experiment conducted by an anthropologist to test this hypothesis. According to the text, the results of the experiment led the anthropologist to conclude that hunters using spears with Clovis points likely weren’t the primary cause of the extinction. The anthropologist’s results cast doubt on the long-held hypothesis presented at the beginning of the text and suggest that woolly mammoths may have become extinct in North America due to some other cause.

Choice A is incorrect because there’s nothing in the text to suggest that researchers have been involved in an ongoing debate. On the contrary, the text suggests that most researchers agree on the cause of the woolly mammoth’s extinction in North America. Choice B is incorrect because the text never mentions any advantages or disadvantages of the method used in the experiment, focusing instead on the results achieved using that method. Choice C is incorrect because the text addresses only one hypothesis, that mammoths were hunted to extinction in North America by humans using spears with Clovis points. Rather than present a competing hypothesis, the text explains how one anthropologist designed an experiment to test this long-held hypothesis.

The following text is from Sarah Orne Jewett’s 1899 short story “Martha’s Lady.” Martha is employed by Miss Pyne as a maid.

Miss Pyne sat by the window watching, in her best dress, looking stately and calm; she seldom went out now, and it was almost time for the carriage. Martha was just coming in from the garden with the strawberries, and with more flowers in her apron. It was a bright cool evening in June, the golden robins sang in the elms, and the sun was going down behind the apple-trees at the foot of the garden. The beautiful old house stood wide open to the long-expected guest.

Which choice best states the main purpose of the text?

- A. To convey the worries brought about by a new guest
- B. To describe how the characters have changed over time
- C. To contrast the activity indoors with the stillness outside
- D. To depict the setting as the characters await a visitor’s arrival

ID: 9fa95c2c Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately reflects the main purpose of the text. The text portrays Miss Pyne as awaiting the arrival of a carriage while Martha brings strawberries and flowers from the garden into the house. The text also describes the surroundings of the scene, stating that Miss Pyne looks "stately and calm," the evening is bright and cool, and birds are singing in the garden as the sun sets. Then the last sentence states that the house was "wide open to the long-expected guest," which strongly suggests that Miss Pyne’s anticipation and Martha’s activities were in preparation for the guest who is expected to arrive in the carriage. Thus, the text depicts the setting and conveys what these characters are doing as they await the arrival of their visitor.

Choice A is incorrect because there is nothing in the text to indicate that the characters feel any worry about the guest’s arrival. The text indicates that the guest was "long-expected," but characterizing Miss Pyne as "stately and calm" conflicts with the idea that the characters are worried about the guest. Choice B is incorrect because the text describes a moment in time when two characters are awaiting the arrival of a visitor rather than an extended period over which characters could be seen changing. Choice C is incorrect. Although the text describes the activity indoors (Miss Pyne sitting calmly), it describes a higher level of activity, not stillness, outside (Martha bringing fruit and flowers and birds singing).

Part of the Atacama Desert in Peru has surprisingly rich plant life despite receiving almost no rainfall. Moisture from winter fog sustains plants once they’re growing, but the soil’s tough crust makes it hard for seeds to germinate in the first place. Local birds that dig nests in the ground seem to be of help: they churn the soil, exposing buried seeds to moisture and nutrients. Indeed, in 2016 Cristina Rengifo Faiffer found that mounds of soil dug up by birds were far more fertile and supported more seedlings than soil in undisturbed areas.

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It elaborates on the idea that the top layer of Atacama Desert soil forms a tough crust.
- B. It describes the process by which seeds are deposited into Atacama Desert soil.
- C. It identifies the reason particular bird species dig nests in Atacama Desert soil.
- D. It explains how certain birds promote seed germination in Atacama Desert soil.

ID: fb052096 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The first two sentences establish a natural phenomenon: there is a richness of plant life found in the Atacama Desert despite the hard soil that makes it challenging for seeds to germinate. The next sentence, which contains the underlined portion, offers a potential explanation for the phenomenon: local birds dig ground nests exposing seeds to moisture and materials in the soil necessary for germination. The last sentence summarizes a study that compared the fertility of mounds of dirt dug up by birds to mounds that were undisturbed to support the explanation in the underlined portion. Thus, the underlined portion mainly functions to explain how certain birds promote seed germination in the Atacama Desert soil.

Choice A is incorrect because the underlined portion doesn’t address the topic of the soil’s tough crust or its formation. Instead, the text elaborates on the idea that local birds that build ground nests may help seeds germinate in the hard soil. Choice B is incorrect because the underlined portion describes how some birds may support seed germination in Atacama Desert soil but doesn’t describe how the seeds are deposited into the soil before germination begins. Choice C is incorrect because neither the underlined portion nor the text as a whole identifies a reason that a particular bird species may choose to dig ground nests in the Atacama Desert soil.

On painter William H. Johnson’s return to the United States in 1938 after a decade in Europe, his style underwent an abrupt transformation. Turning away from landscapes painted in an expressionist style—a style that often involves using fluid, distorted shapes and thick, textured brushstrokes to express the artist’s subjective experience of reality—Johnson began painting portraits of Black Americans in a bold new way. Evocative of African sculpture and American and Scandinavian folk art, these portraits feature flat, deliberately oversimplified figures in a vibrant but limited color palette.

- Which choice best describes the function of the underlined sentence in the text as a whole?
- A. It elaborates on the previous sentence’s statement about a transitional moment in Johnson’s artistic career.
 - B. It provides information about Johnson’s travels in support of a claim about his artistic influences, which is advanced in the following sentence.
 - C. It recounts a moment in Johnson’s personal life that enabled the success of his subsequent career, which is summarized in the following sentence.
 - D. It presents evidence that calls into question the previous sentence’s characterization of Johnson’s artistic development.

ID: c82fd5ce Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the function of the underlined sentence in the text as a whole. The first sentence of the text indicates that Johnson returned to the US in 1938 at which time his painting style suddenly changed. The second sentence is underlined and gives more detail about this stylistic change, noting that his earlier work consisted largely of landscapes in an expressionist style and his new works were highly stylized portraits of Black Americans. In other words, the function of the underlined sentence is to elaborate on a transitional moment in Johnson’s painting career.

Choice B is incorrect. Although the text does mention that Johnson spent a decade in Europe, it does not discuss what other travel Johnson might have done. Furthermore, although the text mentions African, American, and Scandinavian artistic elements in Johnson’s work, it does not indicate that he traveled to different locations to learn about these practices. Choice C is incorrect because the text does not focus on Johnson’s personal life nor does it address how successful his career was in general. Choice D is incorrect because, rather than call it into question, the underlined sentence continues the discussion of Johnson’s career by adding further relevant detail of Johnson’s artistic transformation.

Very little is known about the role nocturnal insects, such as moths, play in flower pollination because it is difficult to monitor insects at night. To address this problem, a team of scientists used time-lapse cameras to record pollinator visits to red clover all day and night. The recordings showed that while most pollinator visits were by bumblebees, one-third of visits were by moths. Additionally, flowers that were visited by both moths and bees produced more seeds than flowers that were only visited by bees.

Which choice best states the function of the underlined sentence?

- A. To describe an approach a team of scientists used to study pollinators
- B. To question a claim scientists make about pollinators
- C. To explain why moths prefer red clover to other flowers
- D. To announce an unexpected research finding about red clover

ID: 75de8012 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the function of the underlined sentence. The sentence indicates that scientists used time-lapse photography during both day and night to detect pollinators visiting red clover. Therefore, the underlined sentence has the function of describing an approach scientists used in the pollinator study discussed in the text.

Choice B is incorrect because the underlined sentence discusses equipment the scientists used to conduct their study, and the text provides nothing to suggest these elements of their experimental design could, by themselves, question claims resulting from the study. Choice C is incorrect because nothing in either the underlined sentence or the rest of the text addresses whether moths have a preference for red clover or any other flowers. Choice D is incorrect. Although the sentences that follow the underlined sentence discuss research findings, nothing in the text suggests that these findings were unexpected. Moreover, the underlined sentence describes part of the scientists’ experimental design (day and night time-lapse photography), not a finding of the scientists’ study.

In 1154, Muhammad al-Idrisi completed a collection of maps of the lands known to medieval Arabic and European scholars. This collection was titled *Al-Kitāb al-Rujārī* (*The Book of Roger*), after the Norman king Roger II who hired him to create it. To create the collection, al-Idrisi consulted Arabic and Greek maps and interviewed travelers about the lands they visited. He included these travelers’ stories alongside the map illustrations.

- Which choice best states the main purpose of the text?
- A. To discuss the benefits of studying mapmaking
 - B. To explain how travelers created maps
 - C. To describe a collection of medieval maps and how it was created
 - D. To compare medieval Arabic and Greek mapmaking techniques

ID: 5378c224 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately states the main purpose of the text, which is to describe a collection of medieval maps and how it was created. The text begins by mentioning Muhammad al-Idrisi’s collection of maps of lands known to medieval Arabic and European scholars. It then states that the Norman king Roger II hired al-Idrisi to create the collection and details al-Idrisi’s methods of creation: consulting Arabic and Greek maps and interviewing travelers. In short, the text presents a collection of medieval maps and then goes on to describe how that collection came to be.

Choice A is incorrect because the text describes a collection of maps and the process of creating that collection but does not discuss the benefits of studying mapmaking in general. Choice B is incorrect because though the text mentions that al-Idrisi interviewed travelers, the text does not describe how those travelers created maps. Choice D is incorrect because though the text mentions that al-Idrisi consulted Arabic and Greek maps, the text does not offer a comparison of Arabic and Greek mapmaking techniques.

Why do sand cats purr but lions roar? Researchers hypothesize that this difference between the two feline species may be partly due to a U-shaped bone in their throats called the hyoid. Sand cats, which are much smaller than lions, have a rigid hyoid that rumbles when the cat’s larynx vibrates, resulting in a purr. By contrast, lions have a somewhat flexible hyoid, and the bone is attached to the skull with a stretchy ligament that sand cats lack. These traits allow lions and most other species of big cats to produce powerful roars. The same traits may also prevent most big cats from purring.

Which choice best describes the overall structure of the text?

- A. The text presents a theory about two species, then discusses facts that weaken it.
- B. The text compares the habitats of two species, then explains how those habitats are changing.
- C. The text describes a behavior shared by two species, then discusses other behaviors shared by them.
- D. The text poses a question about two species, then presents a possible answer.

ID: 75edb37f Answer

Correct Answer: D

Rationale

Choice D is the best answer because it best describes the overall structure of the text. The text begins by posing a question about two different cat species: "Why do sand cats purr but lions roar?" The remainder of the text then presents a possible answer to this question by explaining a hypothesis about differences in these cats’ hyoid bone structure. The text details how sand cats have rigid hyoids that produce purring sounds when their larynx vibrates, while lions have more flexible hyoids attached to the skull with a stretchy ligament that enables roaring but may prevent purring.

Choice A is incorrect because the text doesn’t present facts that weaken the theory about two cat species; rather, it asks a question about two species and then discusses a potential answer. Choice B is incorrect because the text doesn’t discuss the habitats of sand cats and lions at all, nor does it mention any changes to their habitats. Choice C is incorrect because the text doesn’t describe a behavior shared by the two cat species mentioned. On the contrary, it specifically focuses on the different vocalization behaviors of each species (purring versus roaring) and why those differences may exist.

The following text is from Betty Smith’s 1943 novel *A Tree Grows in Brooklyn*. Francie, a young girl, visits the library often.

Francie thought that all the books in the world were in that library and she had a plan about reading all the books in the world. She was reading a book a day in alphabetical order and not skipping the dry ones. She remembered that the first author had been Abbott. She had been reading a book a day for a long time now and she was still in the B’s. Already she had read about bees and buffaloes, Bermuda vacations and Byzantine architecture. For all her enthusiasm, she had to admit that some of the B’s had been hard going. But Francie was a reader.

©1947 by Betty Smith

Which choice best states the main purpose of the text?

- A. To illustrate Francie’s enjoyment of an unusual topic
- B. To explain why Francie prefers reading over other activities
- C. To portray Francie’s determination to meet a goal
- D. To describe a book that Francie greatly admires

ID: dd55c580 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes the main purpose of the text, which is to portray Francie’s determination to reach her goal of reading all the books in the world. The text indicates that to achieve this aim, Francie works systematically and persistently: she reads all the books in the library in alphabetical order and devotes much time and effort to the project, finishing one book per day over a long period of time. The text then suggests that even though she progresses slowly ("she was still in the B’s") and that she struggled with some books ("some of the B’s had been hard going"), she doesn’t give up because she thinks of herself as "a reader." These details show Francie’s resolve.

Choice A is incorrect. Although the text mentions several topics (bees and buffaloes, Bermuda vacations, and Byzantine architecture) that Francie has read about, it doesn’t indicate that any of these topics are unusual or that she especially enjoyed reading about one of these topics in particular. If anything, the text suggests that she may have found some of these topics to be dull, saying that she even read the "dry ones"—that is, the boring books—and that some of the books were "hard going," meaning they were difficult to get through. Choice B is incorrect because the text doesn’t discuss Francie’s involvement in other activities, only her dedication to reading. Although it’s possible that Francie dedicates herself to reading because she prefers it to other activities, the text doesn’t indicate whether this is the case. Choice D is incorrect. Although the text mentions one author (Abbott) whose book Francie has read as well as several topics (bees and buffaloes, Bermuda vacations, and Byzantine architecture) she has encountered, the text doesn’t say whether Francie admires any of the books she’s read so far. Instead, the text focuses on the time and effort she devotes to reaching her goal of reading all the books in the world—even ones she doesn’t enjoy.

Industrial activity is often assumed to be a threat to wildlife, but that isn’t always so. Consider the silver-studded blue butterfly (*Plebejus argus*): as forest growth has reduced grasslands in northern Germany, many of these butterflies have left meadow habitats and are now thriving in active limestone quarries. In a survey of multiple active quarries and patches of maintained grassland, an ecologist found silver-studded blue butterflies in 100% of the quarries but only 57% of the grassland patches. Moreover, butterfly populations in the quarries were four times larger than those in the meadows.

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It challenges a common assumption about the species under investigation in the research referred to in the text.
- B. It introduces discussion of a specific example that supports the general claim made in the previous sentence.
- C. It suggests that a certain species should be included in additional studies like the one mentioned later in the text.
- D. It provides a definition for an unfamiliar term that is central to the main argument in the text.

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The first sentence presents the general claim that industrial activity is not always a threat to wildlife. The underlined portion of the sentence that follows suggests that the silver-studded blue butterfly is an example of wildlife thriving in areas of industrial activity: active limestone quarries. Thus, the function of the underlined portion is to introduce a specific example in support of the general claim in the previous sentence.

Choice A is incorrect. Although the first sentence indicates that “industrial activity is often assumed” to harm wildlife, in the case of the silver-studded blue butterfly the text mentions neither an assumption about this species nor any challenge to such an assumption. Choice C is incorrect because the text mentions only one study: the “survey.” Additional studies are not mentioned in the text. Choice D is incorrect because neither the underlined portion nor any other portion of the text provides a definition for any of the terms used in the text’s argument.

Jackie Ormes’s *Torchy Brown in Dixie to Harlem* (1937–38) was the first comic strip by a Black woman to appear in a widely read newspaper. The strip tells the story of Torchy, a young woman who leaves Mississippi to become a performer in New York City. Torchy’s story reflects the experience of the Great Migration (1910–1970), when millions of Black Americans left the South in search of opportunities in other parts of the United States. *Torchy Brown* thus shows how Ormes used comics to comment humorously on issues affecting Black Americans, which she continued to do throughout her career.

Which choice best states the main purpose of the text?

- A. To show how Ormes’s *Torchy Brown* inspired other Black women to write comic strips in the 1930s
- B. To illustrate how the subjects Ormes addressed in her comic strips changed over the course of her career
- C. To give an example of how Ormes presented the experiences of Black Americans in her comic strips
- D. To claim that several characters in *Torchy Brown* were based on people that Ormes knew personally

ID: 88b4e212 Answer

Correct Answer: C

Rationale

Choice C is the best answer. The text describes how *Torchy Brown* depicted the experiences of a young Black woman experiencing America’s Great Migration. It further states that Ormes continued to use comics throughout her career to humorously comment on important issues impacting Black Americans.

Choice A is incorrect. The text never mentions other Black women comic strip writers. Choice B is incorrect. The text never mentions any changes in the subjects Ormes addressed. Choice D is incorrect. The text never mentions the inspiration for characters in *Torchy Brown*.

The following text is from Srimati Svarna Kumari Devi’s 1894 novel *The Fatal Garland* (translated by A. Christina Albers in 1910). Shakti is walking near a riverbank that she visited frequently during her childhood.

She crossed the woods she knew so well. The trees seemed to extend their branches like welcoming arms. They greeted her as an old friend. Soon she reached the river-side.

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It suggests that Shakti feels uncomfortable near the river.
- B. It indicates that Shakti has lost her sense of direction in the woods.
- C. It emphasizes Shakti’s sense of belonging in the landscape.
- D. It conveys Shakti’s appreciation for her long-term friendships.

ID: e2666b77 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The first sentence of the text states that Shakti knows the woods she is walking in well. The next sentence, which is underlined, emphasizes Shakti’s familiarity with, and sense of security within, the woods by describing how the tree branches are friendly and “welcoming,” as they are depicted as extending open arms to her. The remainder of the text also shows that Shakti is comfortable and content in the woods by describing her as “an old friend” of the trees. Thus, the function of the underlined portion is to emphasize Shakti’s sense of belonging in the wooded landscape that she visits.

Choice A is incorrect because the text and underlined portion suggest that Shakti is comfortable, not uncomfortable, in her surroundings: the trees around her are described as welcoming and reassuring. Moreover, the underlined portion discusses Shakti’s feelings in the forest, not the river, since she hasn’t reached the river yet. Choice B is incorrect because the text and underlined portion emphasize Shakti’s familiarity with the woods. The trees are inviting, and she feels like “an old friend” to the woods, so she isn’t lost or confused there. Choice D is incorrect because the third sentence uses the phrase “as an old friend” figuratively in reference to Shakti’s sense of familiarity with the landscape, not in reference to her long-standing friendships with other people, and the text and underlined portion never discuss her feelings about such friendships.

The majority of plastics today wind up in landfills or are, at best, recycled into materials that have a very limited range of applications. To address this problem, chemist Guoliang Liu and colleagues designed a reactor that melts polyethylene and polypropylene—two widely used plastics—into a wax. The wax can then be transformed into a surfactant (a chemical compound usable as a detergent). With this promising new method, plastic waste could be turned into a range of useful cleaning products.

Which choice best states the function of the underlined portion of the text?

- A. It clarifies the meaning of a scientific term.
- B. It describes an environmental concern.
- C. It explains the significance of a scientific discovery.
- D. It identifies a result that confused the team.

ID: 6d533192 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes how the underlined phrase functions in the text as a whole. The text states that the wax produced by Liu and colleagues’ reactor can be turned into a surfactant. The underlined phrase, which is set off with parentheses, then provides a definition for the term "surfactant," explaining that it’s a chemical compound that can be used as a detergent. Thus, the underlined portion of the text functions to clarify the meaning of a scientific term.

Choice B is incorrect. Though the text as a whole focuses broadly on an environmental concern, the underlined phrase does not; it simply indicates what a surfactant is. Choice C is incorrect. Though the text as a whole focuses on a scientific discovery (Liu and colleagues’ solution to the problem of plastic recycling), the underlined phrase does not explain its significance; it simply defines a scientific term used in the discussion. Choice D is incorrect. Though the text as a whole includes discussion of the result found by Liu and colleagues, the underlined phrase does not discuss it; it simply defines a scientific term used in the discussion. Additionally, at no point in the text is it mentioned that the team was confused.

In many agricultural environments, the banks of streams are kept forested to protect water quality, but it’s been unclear what effects these forests may have on stream biodiversity. To investigate the issue, biologist Xingli Giam and colleagues studied an Indonesian oil palm plantation, comparing the species richness of forested streams with that of nonforested streams. Giam and colleagues found that species richness was significantly higher in forested streams, a finding the researchers attribute to the role leaf litter plays in sheltering fish from predators and providing food resources.

Which choice best states the main purpose of the text?

- A. It discusses research intended to settle a debate about how agricultural yields can be increased without negative effects on water quality.
- B. It explains the differences between stream-protection strategies used in oil palm plantations and stream-protection strategies used in other kinds of agricultural environments.
- C. It describes findings that challenge a previously held view about how fish that inhabit streams in agricultural environments attempt to avoid predators.
- D. It presents a study that addresses an unresolved question about the presence of forests along streams in agricultural environments.

ID: c014a78c Answer

Correct Answer: D

Rationale

Choice D is the best answer. The author first describes an unresolved question: what effect do bank forests have on stream biodiversity? Then the author presents a study that answers the question: bank forests increase stream biodiversity.

Choice A is incorrect. This isn’t the main purpose of the text. The text never mentions agricultural yields. Choice B is incorrect. This isn’t the main purpose of the text. The text never mentions other kinds of agricultural environments. Choice C is incorrect. This isn’t the main purpose of the text. The text never mentions any previously held view about how fish in these streams try to avoid predators.

Wakako Yamauchi is best known for *And the Soul Shall Dance*, her 1977 play about a Japanese American family in Southern California. The play is based on a short story Yamauchi had published three years earlier. Adapting the story wasn't easy. Theater relies on dialogue between characters, but the original story features little dialogue and instead describes its characters' silent thoughts. To transform the story into a play, Yamauchi created situations where characters reveal their thoughts by speaking them aloud during conversations with each other.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It offers information about how Yamauchi adapted her short story into a play.
- B. It argues that Yamauchi's play influenced later playwrights.
- C. It explains why Yamauchi's short story is better known than the play adaptation is.
- D. It describes how Yamauchi chose the actors who performed in the play.

ID: bb453c44 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it best describes how the underlined sentence functions in the text as a whole. According to the text, it was hard for Yamauchi to adapt her short story into the play *And the Soul Shall Dance* because the story had included little dialogue, instead describing the characters' silent thoughts. The underlined sentence offers information about how Yamauchi ultimately succeeded in adapting the story into a play: it explains that Yamauchi created situations where the characters of the play could reveal their internal thoughts while speaking with each other.

Choice B is incorrect because neither the underlined sentence nor the text as a whole makes any mention of playwrights other than Yamauchi or how the play might have influenced them. Choice C is incorrect because the text states that Yamauchi is best known for her play *And the Soul Shall Dance*, which conveys that the play is better known than the short story it's based on is. Choice D is incorrect because neither the underlined sentence nor the text as a whole mentions the actors who performed in the play or Yamauchi's approach to choosing them.

The following text is from Reyna Grande’s 2012 memoir *The Distance Between Us*. In the text, Grande reflects on a time when she and her older sister Mago were children. A Barbie is a type of doll.

I begged Mago to come play with me. She wasn’t as interested in my Barbie as she had been just two months before, which made me sad because that was the only thing Mago had envied me for. Usually, it was me doing the envying. After I pestered her relentlessly, she finally put her notebook down and came over to me.

©2012 by Reyna Grande

Which choice best describes the function of the underlined portion in the text?

- A. It indicates Grande’s unhappiness over Mago’s disinterest in Grande’s doll.
- B. It expresses Grande’s anger over Mago’s refusal to spend time with her.
- C. It presents an example of how Mago and Grande generally played together as children.
- D. It provides a reason for why Mago is unwilling to play with Grande.

ID: 7846158d Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the function of the underlined portion in the text. The underlined portion ("which made me sad because that was the only thing Mago had envied me for") directly expresses Grande’s unhappiness about her sister’s diminished interest in her Barbie doll. The underlined text specifically identifies that Grande feels sad and explains why Mago’s disinterest particularly affects her—because it was the one rare instance where her older sister had envied her, rather than the reverse.

Choice B is incorrect because the underlined portion expresses sadness, not anger. Although there is some correspondence between the emotions anger and envy and the text does indicate that Grande usually envies her sister, the underlined portion states that Grande feels sad about Mago’s disinterest in Grande’s Barbie, not angry about Mago’s refusal to spend time with her. Choice C is incorrect. While the first part of the sentence that contains the underlined portion indicates that Mago has previously taken an interest in Grande’s Barbie, implying that the sisters may regularly have played with the Barbie together in the past, the underlined portion doesn’t provide an example of this. The underlined portion instead explains why Mago’s recently developed disinterest in the Barbie saddens Grande. Choice D is incorrect because neither the underlined portion nor the text as a whole explains why Mago is unwilling to play with Grande. Rather than addressing Mago’s motivation or reasoning, the underlined portion describes Grande’s emotional reaction to Mago’s disinterest in Grande’s Barbie and explains why this lack of interest matters to Grande.

Ordinary soap bubbles usually exist for a minute or less before popping due to either a rupture forced by gravity-induced drainage or the evaporation of the liquid from which the bubble is composed. But physicist Aymeric Roux and colleagues discovered ways to mitigate these factors, resulting in bubbles that can last for a year or more. For example, glycerol tends to adhere to water molecules, so a bubble with a shell that contains both water and glycerol is able to draw additional water molecules from the surrounding air and thereby compensate for evaporation.

Which choice best states the purpose of the underlined portion in the text as a whole?

- A. It describes the effects of a process devised by researchers that increases the longevity of an object discussed in the text.
- B. It details the circumstances that prompted the research discussed in the text.
- C. It presents a reason why the phenomenon discussed in the text that the researchers wanted to avoid will inevitably occur.
- D. It mentions a method discussed in the text that researchers intend to test in future experiments.

ID: d27d34bc Answer

Correct Answer: A

Rationale

Choice A is the best answer because it describes how the underlined portion of the sentence functions in the text as a whole. The text begins by discussing ordinary soap bubbles, objects that usually exist for less than a minute before popping due to either evaporation or gravity-induced drainage. The text then goes on to mention work by researchers Aymeric Roux and colleagues, who have discovered how to increase the longevity of bubbles by altering their chemical composition. Finally, the underlined portion of the text describes how this process works: since the bubble contains both water and glycerol, it can draw water molecules from the surrounding air to replace those lost to evaporation. Therefore, the underlined portion of the sentence describes the effects of a process devised by researchers that increases the longevity of an object described in the text.

Choice B is incorrect because the circumstance that prompted the research is discussed in the first sentence of the text, not the underlined portion. Choice C is incorrect because the underlined portion of the text does not address why soap bubbles must eventually rupture. Rather, it explains how the longevity of soap bubbles can be extended. Choice D is incorrect because the underlined portion of the text does not mention any future experiments.

The following text is adapted from Cynthia Kadohata’s 2004 novel *Kira-Kira*.

[Uncle Katsuhisa] was as loud as my father was quiet. Even when he wasn’t talking, he made a lot of noise, clearing his throat and sniffing and tapping his fingers.

©2004 by Cynthia Kadohata

Which choice best describes the function of the underlined sentence?

- A. It lists the kinds of topics Uncle Katsuhisa enjoys discussing.
- B. It suggests that Uncle Katsuhisa dislikes meeting new people.
- C. It contrasts Uncle Katsuhisa with the narrator’s father.
- D. It describes a conversation between the narrator and the narrator’s father.

ID: a69df884 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The underlined sentence establishes a difference between Uncle Katsuhisa and the narrator’s father by describing Uncle Katsuhisa as "loud" and the narrator’s father as "quiet." The text then elaborates on that contrast, describing some ways Uncle Katsuhisa is very noisy even when he isn’t speaking.

Choice A is incorrect because the text doesn’t indicate what kinds of topics Uncle Katsuhisa enjoys discussing, only that he is loud even when he isn’t speaking. Choice B is incorrect because the text never indicates how Uncle Katsuhisa feels about meeting new people, only how loud he is. Choice D is incorrect because the text never describes a conversation occurring between any people; it refers to talking only when stating that Uncle Katsuhisa is loud even when he isn’t speaking.

Some bird species don't raise their own chicks. Instead, adult females lay their eggs in other nests, next to another bird species' own eggs. Female cuckoos have been seen quickly laying eggs in the nests of other bird species when those birds are out looking for food. After the eggs hatch, the noncuckoo parents will typically raise the cuckoo chicks as if they were their own offspring, even if the cuckoos look very different from the other chicks.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It introduces a physical feature of female cuckoos that is described later in the text.
- B. It describes the appearance of the cuckoo nests mentioned earlier in the text.
- C. It offers a detail about how female cuckoos carry out the behavior discussed in the text.
- D. It explains how other birds react to the female cuckoo behavior discussed in the text.

ID: 27bccd45 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it best describes how the underlined sentence functions in the text as a whole. The first two sentences establish that birds of some species don't raise their own young; instead, they lay their eggs in the nests of birds of other species. The underlined sentence then states that female cuckoo birds engage in this behavior, having been observed specifically laying their eggs in other nests while the other birds are out finding food. According to the text, the cuckoo chicks are then raised by the other birds. Thus, the underlined sentence provides a particular detail about how female cuckoos carry out the behavior of laying eggs for other birds to raise.

Choice A is incorrect. Rather than mentioning a physical feature of female cuckoos, the underlined sentence introduces a specific behavior of female cuckoos: laying eggs in the nests of birds of other species when the other birds are away. The only reference to physical features is the last sentence's general mention of cuckoo chicks looking different from chicks of other species. Choice B is incorrect because the underlined sentence refers to the nests of birds other than cuckoos and doesn't describe how any nests look, cuckoo or otherwise. Instead, the sentence addresses how female cuckoos use other birds' nests. Choice D is incorrect because the underlined sentence describes only female cuckoo behavior (laying eggs in the nests of birds of other species when the other birds are away); it's the last sentence of the text that addresses the other birds' reaction, indicating that those birds usually raise the cuckoo chicks once they've hatched.

Catherine L. Cardelús is a researcher who studies canopy soil. Canopy soil is formed in a tree’s branches (its canopy) when dead leaves and other falling things collect. This material breaks down, becoming canopy soil. Canopy soil helps preserve a healthy water cycle (how water moves through the environment) in rainforests. This benefit is one reason Cardelús is interested in the canopy soils in large choibá trees in rainforests in Costa Rica.

Which choice best describes the text’s overall structure?

- A. It explains a disagreement between researchers and how it was resolved.
- B. It presents an idea and mentions a researcher who disagrees with that idea.
- C. It compares the sizes of two types of trees over several years.
- D. It introduces a researcher and gives information about what she researches.

ID: 33a59ff5 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes the overall structure of the text. The text begins by mentioning Catherine L. Cardelús, "a researcher who studies canopy soil." The text then provides information about her chosen research topic: the formation of canopy soil in tree branches, the role of canopy soil in preserving a healthy water cycle in rainforests, and Cardelús’s specific interest in "the canopy soils in large choibá trees in rainforests in Costa Rica." Thus, the text introduces a researcher and then gives information about what she researches.

Choice A is incorrect because the text doesn’t mention any disagreement between researchers, nor does it describe how such a disagreement was resolved. Choice B is incorrect because the text doesn’t present an idea that Cardelús disagrees with; rather, it describes her research interests and the significance of canopy soil. Choice C is incorrect because the text doesn’t compare the sizes of different types of trees over time. While the text mentions "large choibá trees," it doesn’t compare them to any other tree type or discuss changes in tree size over several years.

The following text is from Louise Erdrich’s 1986 novel *The Beet Queen*. The narrator discusses her relationship with her young niece, Dot. Celestine, the narrator’s sister-in-law, is Dot’s mother.

Dot was as impatient with babyhood as I. She tried at once to grow out of it. Celestine never saw that, because she, and only she, took pleasure in Dot’s helpless softness. Only Celestine was saddened by her daughter’s fierce progress. Day by day, Dot grew stronger. In her shopping-cart stroller she exercised to exhaustion, bouncing for hours to develop her leg muscles.

©1986 by Louise Erdrich

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It offers a detail that shows how Dot is growing stronger.
- B. It expresses hope that Celestine will mature psychologically.
- C. It explores some of the narrator’s psychological characteristics.
- D. It indicates how sad Celestine is by describing a behavior she engages in.

ID: 367f3651 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. In the text, the narrator makes observations about her young niece, Dot, noting that Dot is making progress toward outgrowing babyhood and is growing stronger "day by day." The description of Dot purposefully exercising by "bouncing for hours" reinforces the narrator’s earlier characterization of Dot. The underlined sentence thus offers a detail that shows how Dot is growing stronger.

Choice B is incorrect. While a sentence earlier in the text mentions Celestine’s psychological state (sadness because Dot is growing fast), the underlined sentence doesn’t focus on Celestine at all. Instead, the sentence focuses on Dot’s physical activities to show that she is getting stronger. Choice C is incorrect because the underlined sentence describes Dot’s behavior, not the narrator’s psychological characteristics. While a sentence earlier in the text establishes that the narrator, like Dot, was "impatient with babyhood," the underlined sentence specifically addresses Dot’s physical activities in her stroller. Choice D is incorrect. While an earlier sentence in the text mentions that Celestine is sad, the underlined sentence doesn’t focus on how Celestine feels nor does it describe a behavior that Celestine engages in. The sentence focuses entirely on Dot’s actions, describing her as "bouncing for hours" to show that she is growing stronger.

The following text is from Bram Stoker’s 1911 novel *The Lair of the White Worm*. Adam is meeting his great-uncle Richard at a port.

The meeting so auspiciously begun proceeded well. Adam, seeing that the old man was interested in the novelty of the ship, suggested that he should stay the night on board, and that he would himself be ready to start at any hour and go anywhere that the other suggested. This affectionate willingness to fall in with his own plans quite won the old man’s heart. He warmly accepted the invitation, and at once they became not only on terms of affectionate relationship, but almost like old friends.

Which choice best states the main purpose of the text?

- A. It states the reasons why Adam and his great-uncle Richard decide to sleep on the ship rather than finding lodging on land.
- B. It showcases how Adam’s flexibility and consideration strengthen his relationship with his great-uncle Richard.
- C. It describes why Adam and his great-uncle Richard are excited for their upcoming journey on the ship.
- D. It contrasts great-uncle Richard’s wary first impressions of Adam with his ultimate affection toward him.

ID: 389d2919 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the main purpose of the text, which is to showcase how Adam’s flexibility and consideration strengthen his relationship with his great-uncle Richard. The text begins by stating that the meeting between the two characters is proceeding well and then describes Adam’s thoughtful behavior: noticing his great-uncle’s interest in the ship, Adam suggests staying on board overnight and expresses willingness to accommodate his great-uncle’s schedule and destination preferences. The text goes on to describe the positive effect of Adam’s thoughtfulness and flexibility, indicating that Adam’s “affectionate willingness” to accommodate Richard’s preferences “quite won the old man’s heart.” The text concludes by suggesting that Adam’s ability to anticipate his great-uncle’s wishes and willingness to accommodate them result in the rapid development of affection and intimacy between them, stating that they soon became “almost like old friends.” Therefore, the text’s main purpose is to demonstrate how Adam’s flexibility and consideration strengthened his and his great-uncle’s relationship.

Choice A is incorrect. Although the text explains Adam’s reason for suggesting that Richard spend the night on the ship rather than finding lodging on land (which is that Adam perceives Richard’s interest in the ship), this isn’t the text’s main purpose. Rather, Adam’s suggestion about where to sleep for the night serves as an example of the consideration Adam shows toward Richard, and the text mentions it mainly to explain how an affectionate relationship developed so quickly between them. Moreover, the text only states that Adam encourages Richard to stay on the ship; it doesn’t specify where Adam plans to spend the night. Choice C is incorrect because the text doesn’t describe why Adam and his great-uncle Richard are excited about their journey. While the text mentions that Adam is willing to “start at any hour and go anywhere,” it provides no details about any planned journey, its destination, or even whether they will be continuing by ship or some other mode of transportation, nor does the text mention anything about either character’s feelings of excitement about their plans. We learn only that Adam is accommodating about potential travel plans, not that either character is particularly eager about the journey itself. The text’s main focus is on Adam and

Richard's developing relationship, not on any anticipated travel experiences. Choice D is incorrect because the text doesn't show a contrast between initial wariness and later affection. On the contrary, the text begins by stating that the meeting between Adam and his great-uncle Richard has begun in an "auspicious," or promising, manner and is "proceed[ing] well," suggesting that Richard's impression is positive from the outset. There's no indication of any initial suspicion, caution, or reserve on Richard's part that later changes to affection. Instead, the text describes a consistently positive interaction that deepens from a good first impression into a stronger, more familiar relationship because of Adam's considerate behavior.

The following text is adapted from George Bernard Shaw’s 1912 play *Pygmalion*. Henry Higgins has just arrived at the house of his mother (Mrs. Higgins). She is expecting her friends to visit soon.

MRS. HIGGINS: I’m serious, Henry. You offend all my friends: they stop coming whenever they meet you.

HIGGINS: Nonsense! I know I have no small talk; but people don’t mind.

MRS. HIGGINS: Oh! don’t they? Small talk indeed! What about your large talk? Really, dear, you mustn’t stay.

Which choice best states the main purpose of the text?

- A. To describe what Henry’s mother does when she goes out with her friends
- B. To show that Henry’s mother wants him to leave
- C. To present a detailed account of what Henry’s home looks like
- D. To explain why Henry often visits his mother

ID: 6b16c91b Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately states the main purpose of the text, which is to show that Henry’s mother, Mrs. Higgins, wants Henry to leave her house. In the text, Mrs. Higgins complains that Henry offends all her friends and that they stop coming when he’s also visiting. She then tells him directly, "you mustn’t stay." The overall exchange conveys Mrs. Higgins’s intention for Henry to leave so as not to drive away her friends with his behavior.

Choice A is incorrect because the text doesn’t indicate what Henry’s mother does when she’s out with her friends. Instead, it focuses on what goes on when Henry and her friends visit her at the same time, indicating that since her friends find Henry’s company disagreeable, she wishes him to leave before they arrive. Choice C is incorrect because the text doesn’t contain an account of what Henry’s home looks like. The setting is established as the house of Henry’s mother, and the dialogue focuses solely on her wish that Henry should depart before her friends arrive. Choice D is incorrect because the text doesn’t mention how often Henry visits his mother nor does it provide any explanation for why he visits his mother. Instead, it indicates that she thinks her friends dislike Henry and that she therefore wants him to depart before they arrive.

Companies are providing consumers with more opportunities to purchase customized products than ever before. Whether buying customized sneakers, jewelry, or clothing, consumers can participate in the design of products to meet their specific needs and tastes. In turn, companies profit too: studies have shown that consumers are willing to pay more and wait longer for a customized product. Still, it can be difficult for companies to offer customization while keeping costs low, as the standard methods of mass production may not be able to accommodate making a unique product each time.

Which choice best describes the overall structure of the text?

- A. It discusses several recent innovations in product manufacturing and then suggests some potential applications of those innovations.
- B. It describes a company’s recent success with new products and then explains multiple factors that may have contributed to that success.
- C. It introduces a trend in consumer products and then explains how the trend both benefits and poses a challenge to companies.
- D. It presents two contrasting product-marketing techniques and then provides examples of one of those techniques.

ID: 98fff85c Answer

Correct Answer: C

Rationale

Choice C is the best answer because it presents the best description of the overall structure of the text. The text begins by stating that companies are increasingly giving consumers opportunities to customize products, allowing them to make design choices when buying certain sneakers, jewelry, and clothing. The text then indicates that although this trend benefits companies because they can successfully charge buyers more for customized products and don’t have to rush production, it also poses a challenge because producing unique items may require different and more expensive methods than the ones typically used for mass production, raising the companies’ costs. Thus, the text first introduces a trend in consumer products and then explains how the trend both benefits and poses a challenge to companies.

Choice A is incorrect because the text doesn’t present the customization of various products as a recent innovation—the fact that there are "more opportunities" now indicates that there were opportunities before—and no other innovations, in product manufacturing or otherwise, are discussed. Choice B is incorrect because the text doesn’t discuss any particular company or example and instead speaks broadly about the trend of companies providing customizable products. Choice D is incorrect. Although the text discusses companies offering something that consumers like and are willing to pay more for—the ability to customize products—it doesn’t characterize this as a product-marketing technique and doesn’t compare it to any other kind of offering or technique.

Animals use many objects as tools to achieve goals more easily. Such goals include grooming, finding food, and protecting themselves. For a long time, people thought tool use was unique to primates. Dolphins and other animals, though, have busted the myth that tool use requires hands. Inventively, dolphins use sponges to protect their noses from scratches when foraging on the seafloor. Palm cockatoos also get creative. They use leaves to pad their beaks when opening nuts.

Which choice best states the main purpose of the text?

- A. To question the belief that birds are intelligent
- B. To compare tool use in humans with tool use in palm cockatoos
- C. To establish that tool use doesn't indicate intelligence
- D. To argue that a variety of animals use tools

ID: e4cf5cc5 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main purpose of the text. The text first states that animals make use of objects as tools to help them achieve different goals. The text then explains that although people used to think only primates use tools, tool use by dolphins (aquatic mammals) and palm cockatoos (birds) has shown that primates are not the only animals that use tools. Thus, the main purpose of the text is to argue that a variety of animals, not just primates, use tools.

Choice A is incorrect because the text doesn't mention intelligence at all, focusing just on the idea that animals use tools. Further, the text mentions one kind of bird (palm cockatoos) only as an example of a non-primate that uses tools and describes its use of tools as creative, not unintelligent. Choice B is incorrect. Although the text mentions tool use in primates (a group that includes humans) and in palm cockatoos, it doesn't compare humans' tool use with palm cockatoos' tool use. The text mentions palm cockatoos only as one example out of the variety of animals that use tools and never directly mentions tool use in humans. Choice C is incorrect because the text discusses tool use but never makes any mention of intelligence. Rather than establishing that tool use doesn't indicate intelligence, the text describes certain tool use as inventive and creative.

In the early days of television in the 1940s, many people thought that US television programs would rely on the financial support of ad agencies and commercial sponsors, much like radio did. But advertisers hesitated to jump into a new space, particularly at a time when the manufacturing of new television sets was stalled due to the US’s involvement in World War II. Broadcasters, like the National Broadcasting Company (NBC), needed to persuade advertisers to support their programming despite not knowing whether there would be a robust television audience to begin with.

Which choice best describes the function of the underlined phrase in the text as a whole?

- A. It compares the beginnings of radio programming with the beginnings of television programming in the United States.
- B. It identifies a specific reason behind some advertisers’ hesitance to support television.
- C. It describes how broadcasters attempted to convince advertisers to support television.
- D. It explains why a type of television programming was popular at the time.

ID: b4a053c7 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it accurately describes the function of the underlined phrase in the text as a whole. According to the text, advertisers were reluctant to support television in its early days. The underlined phrase then indicates that this reluctance was partly due to the US’s involvement in World War II, which hindered television production. Thus, the underlined phrase identifies a specific reason behind some advertisers’ hesitance to support television.

Choice A is incorrect. The text merely mentions that television was expected to be financed through advertising, as radio was at the time. Nothing in the text compares the origins of radio and television. Choice C is incorrect. The underlined phrase focuses on a reason advertisers were reluctant to support television, not measures taken to convince advertisers to support television. Choice D is incorrect. The underlined phrase focuses on a reason advertisers were reluctant to support television, not what types of television programming were popular.

In 1801, a Blackfoot chief named Ac Ko Mok Ki drew a finely detailed map of the Upper Missouri region. This work demonstrates a vast amount of topographic knowledge, as the map features specific names of mountains and rivers, as well as the first-known sketch of the drainage network of the Missouri River. The map is especially notable because Ac Ko Mok Ki also included details about the numerous tribes that lived in the area.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It emphasizes Ac Ko Mok Ki’s desire to represent other tribes on the map.
- B. It explains how Ac Ko Mok Ki developed an interest in mapmaking.
- C. It identifies some reasons why the map is impressive.
- D. It details how the map was used for hunting and trading purposes.

ID: 40614504 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it best describes how the underlined sentence functions in the text as a whole. The text presents information about a map drawn by Blackfoot chief Ac Ko Mok Ki in 1801. The underlined sentence states that the map "demonstrates a vast amount of topographic knowledge" and mentions that it features the "specific names of mountains and rivers" and includes the first-known sketch of the Missouri River’s drainage network. These are all characteristics that indicate that the map was executed with remarkable skill. Thus, the underlined sentence identifies some reasons why the map is impressive.

Choice A is incorrect. Though the sentence after the underlined sentence in the text mentions that Ac Ko Mok Ki included information about other tribes on his map, the underlined sentence itself does not address this topic. Choice B is incorrect because nothing in the underlined sentence indicates how Ac Ko Mok Ki became interested in mapmaking, only that his mapmaking skills are impressive. Choice D is incorrect because though the underlined sentence describes several features of the map, it does not specifically describe how the map was used.

The following text is adapted from Pam Muñoz Ryan’s 2020 novel *Mañanaland*. In the village where Max lives, there is an old fortress called La Reina. Children in the village say that the fortress is haunted.

For as long as he could remember, Max had begged Papá [his father] to take him to see La Reina and the ruins up close. He’d be a hero among his friends if he was the first boy to cross the haunted gates! Just because Papá didn’t believe in ghosts didn’t mean they weren’t there. Maybe this summer Papá would finally take him. He was almost twelve.

©2020 by Pam Muñoz Ryan

Which choice best describes the overall purpose of the text?

- A. To portray how proud Max’s father is of Max
- B. To explain why Max doesn’t want to grow up yet
- C. To criticize Max for disliking summer
- D. To show how much Max wants to visit La Reina

ID: 6b04681b Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes the overall purpose of the text. The text indicates that "for as long as he could remember," Max had "begged" his father to take him to La Reina. This point is later emphasized in the text by indicating that "this summer" his father might "finally take" Max to visit La Reina. Thus, the purpose of the text as a whole is to show how much Max wants to visit La Reina.

Choice A is incorrect. The text does not discuss Papa’s feelings toward Max. Rather, it mentions that Max has long wanted Papa to take him to La Reina and that, unlike Max and some other children, Papa does not believe that La Reina is haunted. Choice B is incorrect. The text mentions that Max is "almost twelve" at the time, which suggests anticipation of growing up rather than refusal to. Choice C is incorrect. The text indicates that Max hopes to visit La Reina during the current summer, but nothing suggests that Max dislikes summer.

Were penguins always flightless? Theresa Cole and her team argue that penguins could fly at some point, but that they lost that ability more than 60 million years ago as they adapted to marine life. After examining various penguin fossils and genetic information, the researchers concluded that over time penguins developed underwater vision, blood oxygenation, and bone density better suited for swimming than flying. Thus, environmental conditions might have driven penguins to change from flyers to swimmers.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It defines a scientific term used in the sentence that follows.
- B. It contradicts a description in the sentence that follows.
- C. It provides an answer to the question in the previous sentence.
- D. It notes that the question in the previous sentence has not been researched.

ID: 90380e5c Answer

Correct Answer: C

Rationale

Choice C is the best answer because it best describes how the underlined sentence functions in the text as a whole. The text begins with a question: have penguins always been unable to fly? The underlined sentence then presents an answer that has been offered by researchers, indicating that Theresa Cole and her team believe that penguins were once able to fly but lost that ability long ago as they began living in the sea. The text then describes the research that led to that answer. Thus, the function of the underlined sentence is to provide an answer to the question in the previous sentence.

Choice A is incorrect because none of the terms used in the sentence that follows are defined in the underlined sentence; no definitions are given at all. Instead, the sentence presents Theresa Cole and her team’s answer to the earlier question about penguins’ ability to fly. Choice B is incorrect because there is no contradiction between the underlined sentence and the sentence that follows since both convey that at some point penguins underwent adaptations that limited their ability to fly and helped them swim and live in the sea. Instead of contradicting later information, the underlined sentence presents an answer to the earlier question about penguins’ ability to fly. Choice D is incorrect because the question in the previous sentence is about penguins’ ability to fly and the underlined sentence presents Theresa Cole and her team’s answer to that question based on their research into penguin flight, which is described in the rest of the text.

Streams and rivers carry soil and rocks from one location to another. But there is another way for these geological materials to move. Scientists call this process “aeolian transport.” In aeolian transport, winds move small particles of soil or rock over potentially great distances. Geologist Melisa Diaz and her team studied dust in Antarctica to find out if it was moved by aeolian transport. They discovered that the dust matched geological material in Australia. Aeolian transport had carried it from one continent to another, across thousands of miles of open ocean.

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It presents Melisa Diaz’s remarks about difficulties that her team encountered.
- B. It introduces a scientific term that is used in the discussion that follows.
- C. It emphasizes the surprising nature of the findings that are presented.
- D. It explains the difference between two kinds of geological material.

ID: 02e06d14 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the function of the underlined portion in the text as a whole. The first two sentences introduce the idea that soil and rocks can be moved from one location to another by something other than rivers and streams. The underlined sentence then states that the term used by scientists to refer to this process is “aeolian transport.” The discussion that follows explains what aeolian transport is (the movement of small geological materials over potentially great distances by the wind) and describes an example of a study that found that dust particles had been moved by aeolian transport from Australia to Antarctica. Thus, the underlined portion introduces a scientific term that is used in the discussion that follows.

Choice A is incorrect because the underlined portion of the text doesn’t present any remarks from Melisa Diaz, nor does it suggest that Diaz and her team encountered difficulties in their study. Instead, the phrase in quotation marks in the underlined portion simply presents a term that is used by scientists to refer to a specific process discussed in the text. Choice C is incorrect because nothing in either the underlined portion or the text as a whole suggests that the findings of the study presented in the text were surprising or unexpected. In fact, the text suggests that Diaz and her team wanted to see if aeolian transport could explain the appearance of certain geological materials in Antarctica, and their findings did indeed confirm the involvement of aeolian transport. Choice D is incorrect. Although the first sentence of the text mentions soil and rocks, which are two different kinds of geological material, the underlined portion doesn’t refer to these materials, nor does it explain the difference between them. Rather, the underlined portion introduces the scientific term “aeolian transport,” which is used in the discussion that follows.

Built in the 1970s, Raccoon Mountain is a pumped-storage hydropower facility (a “water-battery”) located in the United States along the Tennessee River. When energy demand is low, excess power from the regional electric utility’s nuclear plants is used to pump water (from a lower reservoir filled from the Tennessee River) up a shaft to the summit lake, where the water is stored as gravitational potential energy. When energy demand peaks, the water drains down from the summit lake, spinning turbines and generating upward of 1,700 megawatts of power—enough to power one million homes for twenty hours.

- Which choice best states the main purpose of the text?
- A. To point out the differences between two methods of energy generation
 - B. To explain the basics of how a specific energy technology works
 - C. To encourage regional electric utilities to build energy storage facilities
 - D. To discuss the benefits of a new energy technology

ID: 4437ac5b Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the main purpose of the text, which is to explain the basics of how a specific energy technology works. The text introduces Raccoon Mountain as a pumped-storage hydropower facility built in the 1970s and then explains how it operates: during periods of low demand, excess power pumps water up to a lake at the mountain’s summit, and when demand for energy peaks, the water flows back down, spinning turbines along the way to generate electricity. The text provides some additional details, like the name of the water source, but the overall focus is on explaining the basics of how pumped-storage hydropower works.

Choice A is incorrect because the text focuses on one method of energy generation—pumped-water hydropower—and briefly mentions another type of energy generation (nuclear plants) only to identify it as a source of power for the pumping process. The text never makes any comparison between the two methods. Choice C is incorrect because the text simply gives a factual description of how Raccoon Mountain, a pumped-storage hydropower facility, operates; it never suggests that more energy storage facilities should be built, whether by regional utilities or by any other entity. Choice D is incorrect because the text doesn’t present pumped-storage hydropower as a new technology; it indicates that Raccoon Mountain was built in the 1970s, meaning that, rather than being new, this facility is approximately 50 years old.

Researchers have found a nearly 164,000-year-old molar from a member of the archaic human species known as Denisovans in a cave in Laos, suggesting that Denisovans lived in a wider range of environments than indicated by earlier evidence. Before the discovery, Denisovans were thought to have lived only at high altitudes in relatively cold climates in what are now Russia and China, but the discovery of the tooth in Laos suggests that they may have lived at low altitudes in relatively warm climates in Southeast Asia as well.

Which choice best states the function of the underlined portion in the text as a whole?

- A. It dismisses as untrue the research presented in the previous sentence.
- B. It defines a term used in the description that follows in the rest of the sentence.
- C. It emphasizes the main goal of the research introduced in the previous sentence.
- D. It provides context that clarifies the significance of the information that follows in the rest of the sentence.

ID: 2e6f2fb0 Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text describes how a new discovery expands our understanding of Denisovans. The underlined portion describes what we used to believe about Denisovans, which helps the reader understand the significance of the discovery of the molar: it suggests that they lived in more places than we’d previously thought.

Choice A is incorrect. The underlined portion doesn’t do this. Instead, it explains what we used to believe about Denisovans before the discovery—it doesn’t dismiss the new discovery as false. Choice B is incorrect. The underlined portion doesn’t do this. No term is defined here. Choice C is incorrect. The underlined portion doesn’t do this. The text never tells us what the “goal” of the research was, just what its discovery was.

Hiroshi Senju is known worldwide for his paintings of waterfalls. These paintings are large and tend not to show the entire waterfall. Instead, Senju focuses on just the point where the falling water reaches the pool below, keeping the top of the waterfall out of view. While Senju’s paintings are rooted in art movements originating in the United States, the artist uses traditional Japanese techniques and materials that make his work instantly recognizable.

Which choice best describes the overall structure of the text?

- A. It introduces an artist and then explains some common characteristics of well-known paintings by that artist.
- B. It explains a specific painting technique and then provides examples of artists who use the technique.
- C. It describes a famous painting and then compares it to a lesser-known painting from the same time period.
- D. It gives an opinion on an artist and then suggests multiple reasons why the artist’s work has been largely overlooked.

ID: 8be97589 Answer

Correct Answer: A

Rationale

Choice A is the best answer. The first sentence introduces Senju as a famous artist, while the next three sentences describe the defining features of his art, such as it only showing part of the waterfall and its origins in US art movements and Japanese techniques.

Choice B is incorrect. The text doesn’t provide examples of any other artists who use Senju’s techniques. Choice C is incorrect. The text doesn’t describe any single famous painting or make comparisons between paintings. Choice D is incorrect. The text doesn’t provide an opinion on Senju (just facts), nor does it suggest that his art has been overlooked—in fact, it states that he is “known worldwide.”

The following text is from Georgia Douglas Johnson’s 1922 poem “Benediction.”

Go forth, my son,
Winged by my heart’s desire!
Great reaches, yet unknown,
Await
For your possession.
I may not, if I would,
Retrace the way with you,
My pilgrimage is through,
But life is calling you!

Which choice best states the main purpose of the text?

- A. To express hope that a child will have the same accomplishments as his parent did
- B. To suggest that raising a child involves many struggles
- C. To warn a child that he will face many challenges throughout his life
- D. To encourage a child to embrace the experiences life will offer

ID: 36f95e96 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it accurately states the text’s main purpose. The poem begins with the speaker urging a child to “go forth” with her encouragement (“my heart’s desire”). The speaker goes on to suggest that new experiences (“Great reaches, yet unknown”) lie ahead for the son that “life is calling” him to seek out. Thus, the main purpose is to encourage a child to embrace the experiences available to him in his life.

Choice A is incorrect because the speaker encourages the child to pursue new experiences (“Great reaches”) without knowing exactly what those experiences will be (“yet unknown”) or suggesting that they should match the speaker’s own accomplishments. Choice B is incorrect because the speaker focuses on positive possibilities for her son (“Great reaches, yet unknown”) and her enthusiastic encouragement to embrace those possibilities (“life is calling you!”), while there is no mention of raising a child or associated struggles. Choice C is incorrect because the speaker frames the possibilities for her son in a positive light when she says that “great reaches, yet unknown” are waiting for him, and this positive outlook for the son is consistent throughout the text.

The following text is adapted from Louisa May Alcott’s 1869 novel *An Old-Fashioned Girl*. Polly, a teenager, is visiting her friend Fanny.

Fanny’s friends did not interest Polly much; she was rather afraid of them [because] they seemed so much older and wiser than herself, even those younger in years. They talked about things of which she knew nothing and when Fanny tried to explain, she didn’t find them interesting; indeed, some of them rather shocked and puzzled her.

Which choice best states the main purpose of the text?

- A. To portray Polly’s reaction to Fanny’s friends
- B. To identify the topics Polly talks about with Fanny’s friends
- C. To explain how Fanny met some of her friends
- D. To illustrate how Fanny’s friends feel about Polly

ID: ce4a476d Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes the main purpose of the text, which is to show how Polly reacted to some of Fanny’s other friends. The text describes Polly as being frightened of Fanny’s friends because they seemed “much older and wiser” to her and elaborates that they “talked about things of which” Polly was unfamiliar, uninterested, and shocked. Thus, the main purpose of the text is to describe Polly’s impressions of Fanny’s other friends.

Choice B is incorrect because the text does not provide any of the topics Polly discussed with Fanny’s friends, stating only that Polly found the topics unfamiliar, uninteresting, and shocking. Choice C is incorrect because the text says nothing about how Fanny and her other friends first met. Choice D is incorrect because the focus of the text is on Polly’s feelings about Fanny’s other friends, not on the other friends’ feelings about Polly.

Genetic studies have led researchers to suggest that turtles are most closely related to the group that includes modern crocodiles. But studies of fossils have suggested instead that turtles are most closely related to other groups, such as the one that contains modern snakes. However, many of the fossil studies have relied on incomplete data sets. For a 2022 investigation, biologist Tiago R. Simões and colleagues examined more than 1,000 reptile fossils collected worldwide. From this large data set, they found clear agreement with the results of the genetic studies.

Which choice best describes the function of the underlined sentence?

- A. It offers an overview of the tools scientists use to examine fossils.
- B. It describes a limitation of some studies about the origin of turtles.
- C. It summarizes previous research on the evolution of crocodiles.
- D. It criticizes a widely held belief about genetic studies of reptiles.

ID: 74ce57b4 Answer

Correct Answer: B

Rationale

Choice B is the best answer. The sentence mentions that some fossil studies have relied on incomplete data sets, suggesting that these studies are limited in what they can tell us about turtles’ origins.

Choice A is incorrect. While the sentence mentions the incompleteness of the data sets studied, it doesn’t mention any tools or techniques used to examine fossils. Choice C is incorrect. The sentence doesn’t mention anything about the evolution of crocodiles. Choice D is incorrect. This sentence doesn’t directly mention or criticize any "widely held belief," and it focuses on a limitation of fossil studies of reptiles, not genetic studies.

In most building demolitions, the building materials are destroyed and sent to landfills. City officials in Portland, Oregon, wanted to reduce this waste. The officials passed a law requiring demolition companies to deconstruct some buildings instead. Deconstruction involves carefully taking buildings apart piece by piece. Damage to the materials is avoided so that they can be reused in new constructions. A 2019 study found that 27 percent of materials from deconstructions in Portland were able to be reused. The remaining materials were processed for recycling instead of going to a landfill.

Which choice best states the main purpose of the text?

- A. To explain an effort made by the city of Portland to reduce demolition waste and some results of that effort
- B. To show that popular support for measures that reduce demolition waste has increased since 2019
- C. To argue that building deconstruction is not as effective as other measures at reducing demolition waste
- D. To discuss laws aimed to reduce demolition waste in Portland and compare them to similar laws in other cities

ID: 01785861 Answer

Correct Answer: A

Rationale

Choice A is the best answer. The author first describes a Portland law aimed at reducing demolition waste, and then goes on to explain that 27% of materials from building deconstructions were able to be reused and the rest were recycled.

Choice B is incorrect. The text never discusses the popularity of the law. Choice C is incorrect. The text never compares building deconstruction to other measures designed to reduce demolition waste. Choice D is incorrect. The text never mentions laws in cities other than Portland, Oregon.

In 2007, computer scientist Luis von Ahn was working on converting printed books into a digital format. He found that some words were distorted enough that digital scanners couldn’t recognize them, but most humans could easily read them. Based on that finding, von Ahn invented a simple security test to keep automated “bots” out of websites. The first version of the reCAPTCHA test asked users to type one known word and one of the many words scanners couldn’t recognize. Correct answers proved the users were humans and added data to the book-digitizing project.

Which choice best states the main purpose of the text?

- A. To discuss von Ahn’s invention of reCAPTCHA
- B. To explain how digital scanners work
- C. To call attention to von Ahn’s book-digitizing project
- D. To indicate how popular reCAPTCHA is

ID: 5085d3c6 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states the main purpose of the text. After providing a brief introduction to computer scientist Luis von Ahn, the text focuses on discussing how von Ahn’s digitization work led to the invention of a digital security test known as reCAPTCHA.

Choice B is incorrect because the text doesn’t address how digital scanners work. Choice C is incorrect. Although the text mentions von Ahn’s book-digitizing project, that information is provided as a detail, not as the main purpose of the text. Choice D is incorrect because the text doesn’t provide any indication of reCAPTCHA’s popularity; instead, it describes reCAPTCHA’s origin.

Many films from the early 1900s have been lost. These losses include several films by the first wave of Black women filmmakers. We know about these lost movies only from small pieces of evidence. For example, an advertisement for Jennie Louise Touissant Welcome’s documentary *Doing Their Bit* still exists. There’s a reference in a magazine to Tressie Souders’s film *A Woman’s Error*. And Maria P. Williams’s *The Flames of Wrath* is mentioned in a letter and a newspaper article, and one image from the movie was discovered in the 1990s.

Which choice best describes the overall structure of the text?

- A. The text identifies a complex problem, then presents examples of unsuccessful attempts to solve that problem.
- B. The text summarizes a debate among researchers, then gives reasons for supporting one side in that debate.
- C. The text describes a general situation, then illustrates that situation with specific examples.
- D. The text discusses several notable individuals, then explains commonly overlooked differences between those individuals.

ID: dbcaf826 Answer

Correct Answer: C

Rationale

Choice C is the best answer. The first three sentences describe the general situation: these early films have been lost, and we only know about them from small pieces of evidence. The rest of the text offers specific examples of the small pieces of evidence.

Choice A is incorrect. This isn’t the overall structure. The fact that we only know about these lost early films from small pieces of evidence isn’t presented as a “complex problem”—that’s too extreme. And the examples presented are not “unsuccessful attempts” to solve it. If anything, the examples represent a success, because we discovered that these films existed in the first place. Choice B is incorrect. This isn’t the overall structure. There’s no “debate” presented in the text, so there’s no “side” for the text to support. Choice D is incorrect. This isn’t the overall structure. The text doesn’t discuss any “differences” between the filmmakers.

Archaeologists studying the ancient city of Pompeii in Italy recently discovered a well-preserved food shop known as a *thermopolium*. The site contains food remains, artworks, and decorations. These items give researchers a better understanding of what daily life in Pompeii may have been like. For example, the archaeologists found a ceramic jar that they believe likely contained a meat and seafood stew.

Which choice best states the main purpose of the text?

- A. To compare ancient artworks with modern ones
- B. To discuss the political system of Italy
- C. To present a recent archaeological discovery
- D. To describe a region’s climate

ID: 03241e06 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes the main purpose of the text. The text states that archaeologists recently discovered a well-preserved food shop, or *thermopolium*, in Pompeii, Italy. The text then further describes the contents of the discovery and provides an example of what was found. Thus, the overall purpose of the text is to present a recent archaeological discovery.

Choice A is incorrect. Although the text states that archaeologists found ancient artworks, it doesn’t compare these artworks to modern ones or to any other artworks. Choice B is incorrect. Although the archaeological discovery discussed in the text was made in Italy, the text doesn’t provide any information about politics or government in Italy. Choice D is incorrect because the text doesn’t discuss the climate where the archaeological discovery was made or in any other region.

In the 1950s, scientists didn’t know much about the ocean floor. Many scientists at the time believed that the ocean floor was mostly flat. But geologist Marie Tharp and her research partner, Bruce Heezen, proved that this idea was wrong. Using sonar data collected from the Atlantic Ocean, Tharp and Heezen showed that the floor was filled with canyons, mountains, and valleys.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It identifies a scientific belief that Tharp and Heezen showed to be wrong.
- B. It describes the design of Tharp and Heezen’s experiment.
- C. It emphasizes a disagreement between Tharp and Heezen.
- D. It presents data to support a claim that Tharp and Heezen made.

ID: 2e3e4808 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The first sentence of the text establishes that scientists didn’t know much about the ocean floor in the 1950s. The second sentence, which is underlined, describes what many scientists thought at the time—that the ocean floor was mostly flat. The remainder of the text establishes that the ocean floor is far from flat, citing research conducted by Marie Tharp and Bruce Heezen. Thus, the purpose of the underlined sentence is to identify a scientific belief that Tharp and Heezen showed to be wrong.

Choice B is incorrect. Although Tharp and Heezen’s work with sonar data in the Atlantic Ocean is mentioned later in the text, the underlined sentence doesn’t describe the design of their experiment. Instead, it identifies a belief held by scientists that Tharp and Heezen demonstrated to be wrong. Choice C is incorrect because the underlined sentence presents a belief held by many scientists in the 1950s; nowhere does the text mention a disagreement between Tharp and Heezen, whom the text describes as research partners working together to map the ocean floor. Choice D is incorrect because the underlined sentence doesn’t present data in support of a claim; instead, it presents a scientific belief that Tharp and Heezen’s work showed to be wrong.

The following text is adapted from Oscar Wilde’s 1897 nonfiction work *De Profundis*.

People whose desire is solely for self-realisation never know where they are going. They can’t know. In one sense of the word it is of course necessary to know oneself: that is the first achievement of knowledge. But to recognise that the soul of a man is unknowable, is the ultimate achievement of wisdom. The final mystery is oneself. When one has weighed the sun in the balance, and measured the steps of the moon, and mapped out the seven heavens star by star, there still remains oneself. Who can calculate the orbit of his own soul?

Which choice best describes the function of the underlined question in the text as a whole?

- A. It reinforces the text’s skepticism about the possibility of truly achieving self-knowledge.
- B. It speculates that some readers will share the doubts expressed in the text about the value of self-knowledge.
- C. It cautions readers that the text’s directions for how to achieve self-knowledge are hard to follow.
- D. It concedes that the definition of self-knowledge advanced in the text is unpopular.

ID: 1a3cbb81 Answer

Correct Answer: A

Rationale

Choice A is the best answer. The text repeatedly claims that true self-knowledge can’t possibly be achieved, and this rhetorical question emphasizes that point.

Choice B is incorrect. The underlined question doesn’t do this. The text never expresses doubts about the value of self-knowledge—rather, the text expresses doubts about the possibility of achieving self-knowledge. Choice C is incorrect. The underlined question doesn’t do this. The text doesn’t provide directions for how to achieve self-knowledge—rather, it claims that true self-knowledge is impossible to achieve. Choice D is incorrect. The underlined question doesn’t do this. The text doesn’t ever define self-knowledge, and popularity isn’t mentioned in the text at all.

Following the eradication of the gray wolf in Yellowstone National Park in 1926, the population of elk—a primary prey of the gray wolf—exceeded a healthy size for the park’s ecosystem. Elk overpopulation led to overgrazing of areas that a multitude of other animals relied on for food and shelter. As scientists began to see how essential the gray wolf was to the Yellowstone food chain, ecological restoration strategies were employed to reintroduce the gray wolf to the park in 1996. The rebound effect in the park’s natural ecosystem was noticed almost immediately.

Which choice best describes the overall structure of the text?

- A. It summarizes a problem that developed in Yellowstone National Park in the 1920s and then offers potential solutions to that problem.
- B. It mentions the elimination of the gray wolf from Yellowstone National Park and then explains why the wolf was eventually restored to the park.
- C. It presents a claim about the health of the Yellowstone National Park gray wolf population and then gives specific examples to support that claim.
- D. It explains why Yellowstone National Park allowed the eradication of the gray wolf and then discusses the consequences of reintroducing the wolf to the park.

ID: 2593586b Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the overall structure of the text. The text begins by stating that the gray wolf was eradicated from Yellowstone National Park in 1926. It then explains the consequences of this elimination—namely that the elk population grew too large and overgrazing occurred, negatively affecting other animals in the area. The text then states that once scientists realized the importance of the gray wolf to the Yellowstone food chain, they undertook efforts leading to the wolves’ reintroduction to the park in 1996. Thus, the structure of the text can be accurately described as mentioning the elimination of the gray wolf from Yellowstone and then explaining why the wolf was later restored to the park.

Choice A is incorrect. While the text does summarize a problem associated with an event in the 1920s (the eradication of gray wolves from Yellowstone in 1926), the problems discussed arose after that event—namely, the subsequent elk overpopulation, resultant overgrazing, and then further impacts to other animals in Yellowstone. Furthermore, the text doesn’t present multiple potential solutions. Instead, it describes one solution that was actually implemented: the reintroduction of gray wolves in 1996. Choice C is incorrect because the text doesn’t make a claim about the health of the gray wolf population apart from pointing out that the wolves had been eradicated from, and then subsequently restored to, Yellowstone. Instead, the text focuses on outcomes associated with the gray wolf’s eradication and reintroduction. Choice D is incorrect. Though the text does mention that the ecosystem of Yellowstone rebounded after the gray wolf was reintroduced in 1996, the text never explains why the park allowed the wolves to be eradicated in 1926. It simply states that this eradication occurred without elaborating on the decision-making process behind it.

Jazz tap is a dance form that was first developed in African American communities. Jazz tap was heavily influenced by jazz music, which became widely popular in the United States in the 1920s. Tap dancers were inspired by jazz music’s quick rhythms and by the way jazz musicians would make up melodies as they played. As jazz music continued to develop in the 1930s and 1940s, jazz tap evolved with it. Because of jazz music’s influence, jazz tap quickly developed into a dance form that was very different from earlier kinds of tap dance.

- Which choice best states the main purpose of the text?
- A. It explains why audiences prefer some kinds of music over others.
 - B. It discusses the development of a dance form.
 - C. It describes how to play a musical instrument.
 - D. It emphasizes the popularity of a famous dancer.

ID: 0ea2bc8b Answer

Correct Answer: B

Rationale

Choice B is the best answer because it best describes the main purpose of the text. The text indicates where and when jazz tap first developed (in African American communities in the 1920s) and what influenced it (the quick rhythms and improvisations in jazz music) and then explains that it evolved alongside jazz music in the 1930s and 1940s, resulting in a very different form of tap dance than had existed before. Therefore, the main purpose of the text is to discuss jazz tap’s development.

Choice A is incorrect. Although the text indicates that jazz music became widely popular in the US in the 1920s and describes some of jazz music’s qualities, the text never explains why audiences prefer some kinds of music—jazz or otherwise—over others. Choice C is incorrect because the text never mentions any musical instruments and doesn’t describe how to play one. Choice D is incorrect because the text discusses jazz tap generally and never identifies a particular dancer, famous or otherwise.

Composer Florence Price won first place for her score Symphony in E Minor at the 1932 Wanamaker Foundation Awards. The piece was performed the following year by the Chicago Symphony Orchestra, a significant recognition of its quality. Price continued to compose many musical pieces throughout her career, blending traditional Black spirituals with classical European Romantic musical traditions. In recent years, Price’s concertos and symphonies have been performed and recorded by several major orchestras, further preserving her work for others to enjoy.

Which choice best states the main purpose of the text?

- A. To provide examples of Price’s importance as a composer
- B. To argue that more major orchestras should perform Price’s compositions
- C. To describe the musical styles that inspired many of Price’s symphonies
- D. To compare Price’s scores with those of classical European composers

ID: 9115eb54 Answer

Correct Answer: A

Rationale

Choice A is the best answer. The text provides an overview of Florence Price’s importance by describing her success at the 1932 Wanamaker Foundation Awards, her blending of Black spirituals and classical European Romantic musical traditions, and the recent performances and recordings of her concertos and symphonies by major orchestras.

Choice B is incorrect. The text does mention that Price’s compositions have been performed and recorded by major orchestras, but it doesn’t argue that more orchestras should do so. Choice C is incorrect. The text does mention the blending of Black spirituals and classical European Romantic musical traditions, but only briefly, as part of a broader overview of Price’s career. Choice D is incorrect. The text mentions Price’s blending of Black spirituals with classical European Romantic musical traditions, but it doesn’t directly compare Price’s scores with those of classical European composers.

The following text is from Joan Didion’s memoir *The Year of Magical Thinking*. In the text, the author discusses her home life.

[] In California we heated our houses by building fires. We built fires even on summer evenings, because the fog came in. Fires said we were home, we had drawn the circle, we were safe through the night.

©2005 by Joan Didion

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It illustrates that a fire provides comfort beyond physical warmth.
- B. It summarizes the information that came before it in the text.
- C. It explains that the house remains cold even in summer.
- D. It suggests that the author feels comfortable in her home with or without a fire.

ID: 74910ef4 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The first two sentences of the text establish that in California, houses were heated by building fires year-round. The underlined portion then indicates that the fires didn’t merely provide physical warmth: they also represented being "home" and feeling protected. The underlined portion thus illustrates that a fire provides comfort beyond physical warmth.

Choice B is incorrect because the underlined portion doesn’t summarize information that came before it. Whereas the previous two sentences describe fires’ ability to provide physical warmth to homes, the underlined portion focuses on the psychological comfort the fires offered. Choice C is incorrect. Although the text’s second sentence mentions that fires were built in the summer because fog came in, which may have cooled the house, this detail isn’t the focus of the underlined portion. Instead, the underlined portion indicates that fires were built for reasons beyond physical warmth: to create a sense of being home and safe. Choice D is incorrect because the underlined portion focuses on the emotional significance the author places on having a fire going inside the home. There is no indication that the author feels equally comfortable without a fire present.

The following text is adapted from Akwaeke Emezi’s 2019 novel *Pet*. Jam is a teenager who lives with her father, Aloe, and her mother, Bitter, who is a painter.

Bitter finished the painting in the dark morning of a day—it was well past midnight when Jam heard the studio door creak open. She stared into the velvet black of her room and listened to her mother’s footsteps walking in her [mother] and Aloe’s bedroom. There was a weight thrumming through the floorboards in a low song, and that was how Jam knew the painting was done. Bitter’s feet were singing the news.

©2019 by Akwaeke Emezi

Which choice best states the function of the underlined sentence in the text as a whole?

- A. It indicates that Jam is more interested in music than in art.
- B. It adds to the idea that Bitter’s footsteps reveal something to Jam.
- C. It indicates that Bitter always sings when working on a painting.
- D. It describes Aloe’s reaction upon seeing the painting for the first time.

ID: d8672594 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The text establishes that Jam hears Bitter’s studio door open early in the morning, when it is still dark. Jam then listens to her mother’s footsteps, which seem to create a song that runs through the floorboards. The text indicates that the sound of Bitter’s footsteps convey to Jam that Bitter is done painting. The underlined sentence then builds on this idea, stating explicitly that Bitter’s feet sing the news of her completion of a painting. Thus, the sentence stating that “Bitter’s feet were singing the news” further emphasizes that Bitter’s footsteps themselves reveal information to Jam.

Choice A is incorrect because the text provides no evidence that Jam prefers music to art. While the underlined sentence uses musical imagery to describe the vibrations Jam feels, this is figurative language that is describing the footsteps’ vibrations; it isn’t an indication of Jam’s personal interests. Choice C is incorrect because the text doesn’t suggest that Bitter herself sings while working on paintings. The references to singing in the text are figurative descriptions of how Bitter’s footsteps sound or feel to Jam, not literal statements about Bitter singing. Choice D is incorrect because the underlined sentence only describes Jam’s perception of her mother’s footsteps. It doesn’t provide any details about Aloe or his reaction to the painting; in fact, the text doesn’t mention Aloe seeing the painting at all.

Historians Tiya Miles and Roy E. Finkenbine have both documented the assistance Indigenous peoples gave to Black freedom seekers leaving the South before the US Civil War. Much of the historical evidence of this help comes from Indigenous oral traditions and from autobiographies written by the freedom seekers. One such narrative is Jermain Loguen’s autobiography, which tells about how Neshnabé (Potawatomi) villagers offered him food, lodging, and directions during his 1835 journey from Tennessee to Canada.

Which choice best describes the function of the underlined sentence?

- A. It provides an example of an autobiography that describes help given by an Indigenous people to a Black freedom seeker.
- B. It shows why Loguen decided to write in great detail about his experiences traveling from Tennessee to Canada in his autobiography.
- C. It argues that autobiographies are particularly important sources of information about geography in the United States before the Civil War.
- D. It suggests that most historians believe that Neshnabé villagers were more successful in assisting freedom seekers than other people were.

ID: 45f3c80a Answer

Correct Answer: A

Rationale

Choice A is the best answer. The previous sentence broadly mentions "autobiographies written by the freedom seekers." This sentence identifies Loguen’s autobiography as a specific example.

Choice B is incorrect. The sentence never explains why Loguen chose to write about his experiences. Choice C is incorrect. The previous sentence identifies autobiographies as useful sources of historical information about a specific topic, but not for "information about geography." The underlined sentence provides details of one autobiography as an example of a source of information about that specific topic (interactions between Indigenous people and Black freedom seekers). Choice D is incorrect. The text never discusses other specific people who helped freedom seekers, and therefore can’t make a comparison between the Neshnabé and anyone else.

The following text is from Holly Goldberg Sloan’s 2017 novel *Short*.

More than two years ago my parents bought a piano from some people who were moving to Utah. Mom and Dad gave it to my brothers and me for Christmas. I had to act really happy because it was such a big present, but I pretty much hated the thing from the second it was carried into the hallway upstairs, which is right next to my bedroom. The piano glared at me. It was like a songbird in a cage. It wanted to be set free.

©2017 by Holly Goldberg Sloan

Which choice best states the main purpose of the text?

- A. It explains why the narrator always wanted a piano close to her bedroom.
- B. It establishes how the narrator feels about the piano.
- C. It suggests that the narrator’s brothers are talented piano players.
- D. It describes the event that led the narrator’s parents to buy a piano.

ID: df5d1a01 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it best states the main purpose of the text, which is to establish the narrator’s feelings about the piano. The narrator reveals that she “had to act really happy” about the piano even though she “pretty much hated the thing” as soon as it was placed upstairs near her bedroom. The narrator also describes the piano as glaring at her and compares it to a caged bird that wants to be set free. These details establish the narrator’s feelings about the piano, suggesting that it makes her uneasy.

Choice A is incorrect because the text indicates that the narrator hated having the piano upstairs right next to her bedroom, not that she wanted a piano to be close to her bedroom. Choice C is incorrect because the only information provided in the text about the narrator’s brothers is that they were given the piano along with the narrator. Choice D is incorrect because the text does not describe the event that led the narrator’s parents to buy the piano from the people moving to Utah. Instead, the text focuses on the narrator’s feelings about the piano after it was given to her and her brothers.

The following text is adapted from Jason Reynolds’s 2016 novel *Ghost*. The narrator, who is in middle school, is at a bus stop.

I just go there [to the bus stop] to look at the people working out. See, the gym across the street has this big window—like the whole wall is a window—and they have those machines that make you feel like you walking up steps and so everybody just be facing the bus stop, looking all crazy like they’re about to pass out. And trust me, there ain’t nothing funnier than that. So I check that out for a little while like it’s some kind of movie: *The About to Pass Out Show*, starring stair-stepper person one through ten.

©2016 by Jason Reynolds

Which choice best states the main purpose of the text?

- A. To give a reason why the narrator is excited to start middle school
- B. To describe an activity that the narrator finds amusing
- C. To explain a problem that the narrator has overcome
- D. To discuss a movie that the narrator saw in a theater

ID: fc9fc0c1 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the main purpose of the text. The text describes how the narrator watches people working out at a gym through a window near a bus stop. The narrator says that "there ain’t nothing funnier" than watching people try to work out on the stair climber machine. Thus, the main purpose of the text is to describe an activity that the narrator finds amusing.

Choice A is incorrect because the text isn’t about the narrator beginning middle school. The text describes how the narrator finds people working out at a gym amusing and makes no mention of school life. Choice C is incorrect because the text doesn’t mention any problems that the narrator currently has or has overcome. It just describes how the narrator finds watching people work out amusing. Choice D is incorrect because the narrator invents the made-up movie mentioned in the text. The text doesn’t indicate that the narrator has seen a movie in a theater. The focus of the text is on the narrator watching people at the gym, not watching a movie.

In the past, historians who wanted to examine Frederick Douglass’s diary and other personal papers had to visit the Library of Congress in Washington, DC, to view them on microfilm (film containing scaled-down reproductions of documents). But traveling to the library often added time and costs to research projects. Now, by going to the library’s website, researchers can access digitized versions of Douglass’s papers without physically going anywhere.

Which choice best describes the function of the underlined portion in the text as a whole?

- A. It gives information about a famous person.
- B. It explains the meaning of a word.
- C. It describes a debate among historians.
- D. It summarizes an unexpected finding.

ID: df8062aa Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes how the underlined portion functions in the text as a whole. The underlined portion is a parenthetical phrase directly following the word “microfilm,” and it describes film containing small (“scaled-down”) images; the placement and focus of the portion indicate that it is serving to define the term “microfilm.”

Choice A is incorrect. Although the text is about accessing the writings of a famous historical figure (Douglass), the underlined portion doesn’t give information about Douglass or any other person. Instead, it explains what microfilms are. Choice C is incorrect because the text never describes any kind of debate or disagreement; it simply describes a change in how researchers can access historical documents, with the underlined portion defining an important term. Choice D is incorrect because the text never makes any mention of a particular finding, unexpected or otherwise; it simply describes a change in how researchers do some of their work, with the underlined portion defining an important term.

Oral histories—whether they consist of interviews or recordings of songs and stories—can offer researchers a rich view of people’s everyday experiences. For her book about coal mining communities in Kentucky during the twentieth century, Karida Brown therefore relied in part on interviews with coal miners and their families. By doing so, she gained valuable insights into her subjects’ day-to-day lives.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It provides a little-known geographical fact about Kentucky.
- B. It argues that Karida Brown is an expert on United States politics.
- C. It presents a major historical event that took place in the twentieth century.
- D. It describes how Karida Brown benefited from incorporating oral history in her book.

ID: b40343d6 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes how the underlined sentence functions in the text as a whole. The text begins by pointing out one of the advantages of oral histories: that they allow researchers to document the daily experiences of people. The text then goes on to describe how Karida Brown utilized interviews with coal miners and their families for her book about twentieth-century coal mining in Kentucky. The underlined sentence affirms that the general advantages of oral histories mentioned earlier in the text were also benefits in Brown’s particular case. Thus, the underlined sentence describes how Karida Brown benefited from incorporating oral history in her book.

Choice A is incorrect because though the text mentions coal miners who live in Kentucky, the underlined sentence does not offer a geographical fact about Kentucky. Choice B is incorrect because the underlined sentence does not mention United States politics or that Brown is an expert in this particular area. Choice C is incorrect. Although the text mentions that Brown’s book revolved around coal miners during the twentieth century, the underlined sentence does not focus on a major historical event during this time.

The following text is adapted from Charles Chesnutt’s 1899 short story “Mars Jeems’s Nightmare.” The narrator and his wife have recently moved to the southern United States, and Julius is their carriage driver.

Julius [was] very useful when we moved to our new residence. He had a thorough knowledge of the neighborhood, was familiar with the roads and the watercourses, knew the qualities of the various soils and what they would produce, and where the best hunting and fishing were to be had. He was a marvelous hand in the management of horses and dogs.

Which choice best states the main purpose of the text?

- A. To compare the narrator’s reaction to a new home with his wife’s reaction
- B. To give an example of Julius’s knowledge about soil
- C. To show that the narrator and Julius often hunt and fish together
- D. To explain different ways in which Julius was helpful

ID: 98ed45b9 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes the main purpose of the text, which is to explain different ways in which Julius was helpful. The text begins with the narrator stating that Julius was very helpful to him and his wife when they moved to their new residence. The narrator then provides a list of examples to illustrate Julius’s helpfulness. For instance, the narrator states that Julius was familiar with the neighborhood’s roads, which suggests that he was helpful in navigating them, and that Julius helped manage the horses and dogs. The text’s many examples of Julius’s usefulness reinforce just how helpful he was and in how many different ways.

Choice A is incorrect because the text doesn’t portray either the narrator’s or his wife’s reaction to their new home. Rather, the text focuses on how Julius was useful to the narrator and his wife in their new home. Choice B is incorrect. Although the text states that Julius was knowledgeable about the soil, this is one of several supporting details that illustrate how helpful Julius was. Moreover, the text merely states that Julius was knowledgeable about soil; it doesn’t provide an example of that knowledge. Choice C is incorrect because there’s nothing in the text to suggest the frequency with which the narrator and Julius hunted and fished together. In fact, it’s unclear from the text whether the narrator and Julius hunted and fished together at all. The text merely indicates that Julius knew the best places to hunt and fish—a detail that supports the text’s main purpose by conveying Julius’s usefulness.

The following text is adapted from Jean Webster’s 1912 novel *Daddy-Long-Legs*. The narrator is a young college student writing letters detailing her weekly experiences.

[The college is] organizing the Freshman basket-ball team and there’s just a chance that I shall make it. I’m little of course, but terribly quick and wiry and tough. While the others are hopping about in the air, I can dodge under their feet and grab the ball.

Which choice best states the main purpose of the text?

- A. To compare basketball with other sports
- B. To provide details of how to play basketball
- C. To state how players will be chosen for the basketball team
- D. To explain why the narrator thinks she might make the basketball team

ID: 398f2cb7 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes the main purpose of the text. In the first sentence of the text, the narrator states that she thinks there’s a chance she will become part of the basketball team at her college. She goes on to explain that she is "quick" and "tough." Based on these characteristics, she thinks she has a chance to join the team. Thus, the main purpose of the text is to explain why the narrator thinks she might make the basketball team.

Choice A is incorrect because the text focuses solely on basketball and doesn’t mention any other kinds of sports. Choice B is incorrect because the text doesn’t describe aspects of the game of basketball. Instead, it provides the narrator’s reasoning for thinking that she might make her school basketball team. Choice C is incorrect. Although the narrator explains why she thinks she will be chosen for the basketball team at her school, the text doesn’t go into the general decision-making process or the requirements for being picked for the team.

The following text is from Ameen Rihani’s 1921 poem “The Wanderer.”

I wander among the hills of alien lands
Where Nature her prerogative resigns
To Man; where Comfort in her shack reclines
And all the arts and sciences commands.
But in my soul
The eastern billows roll—
I hear the voices of my native strands.

- Which choice best describes the function of the underlined lines in the text as a whole?
- A. It establishes that the speaker’s enthusiasm about current travels conflicts with the growing urge to return home.
 - B. It illustrates the speaker’s uncertainty about maintaining strong links with relatives in distant places.
 - C. It conveys the speaker’s sense of feeling a pull toward home while traveling in an unfamiliar place.
 - D. It reveals that upon returning after an extended absence, the speaker longs for the way a location once felt.

ID: c353626c Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes the function of the underlined lines in the text as a whole. In the opening line of the text, the speaker describes wandering in "alien lands," which establishes that the speaker is traveling in unfamiliar territory. In the underlined lines, the speaker describes "billows" (large waves) rolling in the soul, which suggests that the speaker feels inner turmoil. The underlined lines go on to associate these rolling billows with voices calling to the speaker from the speaker’s "native strands," or homeland, indicating that thoughts of home are prompting the emotional experience these lines describe. Taken together, the imagery in the underlined lines thus implies that the speaker feels a deep emotional connection to, or pull toward, home while traveling in an unfamiliar place.

Choice A is incorrect. While the text’s first line states that the speaker is traveling and the underlined lines indicate that the speaker experiences an emotional pull toward home, neither the underlined lines nor the text as a whole establishes an enthusiasm about the current travels that conflicts with a growing urge to return home. The text’s description of the lands the speaker is traveling in focuses on their artificial quality, stating, "Nature her prerogative resigns / To Man," which doesn’t suggest enthusiasm but rather a sense of detachment or even critique. Choice B is incorrect because the underlined lines don’t address uncertainty about maintaining links with relatives in distant places. In the underlined lines, the speaker expresses a sense of connection to the speaker’s homeland ("native strands") but doesn’t refer to any family members the speaker may have there or to concerns about maintaining any familial ties. Choice D is incorrect because the poem doesn’t indicate that the speaker has returned home after an absence. Rather, the speaker explicitly states, "I wander among the hills of alien lands," establishing that the current setting is a foreign place. Moreover, the underlined lines express a sense of connection with, or pull toward, a distant

homeland, not a sense of longing for how that homeland or any other location once felt.

San Francisco is known for the colorful murals painted on many of its buildings. The densest collection of murals is found on Balmy Alley in the Mission District neighborhood. In the 1970s, Latina artists painted vivid scenes of community life on walls along this block. As the original murals have faded, later generations of artists have painted new ones over them. As a result, Balmy Alley has become a living showcase of San Francisco’s artistic spirit, with its murals reflecting changes in the cultural life of the city.

- Which choice best states the main purpose of the text?
- A. To compare the Balmy Alley murals to other murals in San Francisco
 - B. To offer an overview of the history and importance of the Balmy Alley murals
 - C. To urge people to protect the murals of San Francisco from decay
 - D. To describe the rise of mural painting in San Francisco beginning in the 1970s

Correct Answer: B

Rationale

Choice B is the best answer because it best states the main purpose of the text. The text begins by briefly stating that San Francisco is known for its murals, then transitions to a discussion of a single collection of murals, which is found on Balmy Alley in the city’s Mission District. The text explains that the murals in this area were originally created in the 1970s, then observes that they have changed over time: as some have faded through the decades, others have been painted in their place. The text ends by emphasizing that these murals are significant because they reflect San Francisco’s artistic spirit and cultural life. Therefore, the text provides an overview of the history and importance of the Balmy Alley murals.

Choice A is incorrect. Although it can be inferred from the text that there are murals in other areas of San Francisco besides Balmy Alley, the text doesn’t specifically discuss murals in other areas or compare the murals of Balmy Alley to those in other areas. Choice C is incorrect. By observing that some of the murals of Balmy Alley have been replaced due to fading, the text implies that murals can decay, but it never urges readers to protect this specific collection of murals—or any murals elsewhere in San Francisco, for that matter. Indeed, by describing the ever-changing murals of Balmy Alley as “a living showcase of San Francisco’s artistic spirit,” the text emphasizes the positive aspects of the fact that the original Balmy Alley murals have faded and been replaced with new murals. Choice D is incorrect because the text doesn’t describe the rise of mural painting in San Francisco generally or note when this occurred. The only historical development of the 1970s mentioned in the text is the origin of the murals in a specific area of the city: Balmy Alley in the Mission District.
