ID: 0a017199

Some animal-behavior studies involve observing wild animals in their natural habitat, and some involve capturing wild animals and observing them in a laboratory. Each approach has advantages over the other. In wild studies, researchers can more easily presume that the animals are behaving normally, and in lab studies, researchers can more easily control factors that might affect the results. But if, for example, the results from a wild study and a lab study of Western scrub-jays (*Aphelocoma californica*) contradict each other, one or both of the studies must have failed to account for some factor that was relevant to the birds’ behavior.

Which choice best states the main idea of the text?

- A. When the results of a natural-habitat study and those from a lab study of a wild animal such as the Western scrub-jay conflict, the study in the natural habitat is more likely than the lab study to have accurate results.
- B. Studying wild animals such as the Western scrub-jay in both their natural habitat and lab settings is likely to yield conflicting results that researchers cannot fully resolve.
- C. Wild animals such as the Western scrub-jay can be effectively studied in their natural habitat and in the lab, but each approach has drawbacks that could affect the accuracy of the findings.
- D. Differing results between natural-habitat and lab studies of wild animals such as the Western scrub-jay are a strong indication that both of the studies had design flaws that affected the accuracy of their results.

ID: 0a017199 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately states the main idea of the text. The text begins by explaining that wild animals can be studied in their natural habitat or in a laboratory setting, with each setting offering unique advantages to researchers. The text then highlights an instance in which Western scrub-jays were studied in both settings but with conflicting results, indicating that one or both studies may have failed to account for the disadvantages of its research setting. Thus, the main idea of the text is that while wild animals can be effectively studied in natural or lab settings, there are drawbacks to each that need to be considered to ensure accurate results.

Choice A is incorrect because the text does not position one study setting (natural or lab) as superior to the other; rather, the text states that each one has advantages over the other. Choice B is incorrect. The text provides a hypothetical example of two studies in different environments with conflicting results, but this single example cannot be extrapolated to a general claim about the likelihood that results of studies in different environments will conflict. Additionally, the text does not assert anything about how researchers can or cannot resolve conflicting study results. Choice D is incorrect because the text does not state that discrepancies between natural-habitat and lab-based animal behavior studies are due to both of the designs being flawed. Rather, the text states that the conflict in results can be the consequence of one or both of the studies having failed to account for some factor.

Question Difficulty: Hard

Question ID 4d671b68

SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 4d671b68

Algae living within the tissues of corals play a critical role in keeping corals, and the marine ecosystems they are part of, thriving. Some coral species appear brown in color when healthy due to the algae colonies living in their tissues. In the event of an environmental stressor, the algae can die or be expelled, causing the corals to appear white. To recover the algae, the bleached corals then begin to produce bright colors, which block intense sunlight, encouraging the light-sensitive algae to recolonize the corals.

What does the text most strongly suggest about corals that produce bright colors?

- A. These corals have likely been subjected to stressful environmental conditions.
- B. These corals are likely more vulnerable to exposure from intense sunlight than white corals are.
- C. These corals have likely recovered from an environmental event without the assistance of algae colonies.
- D. These corals are more likely to survive without algae colonies than brown corals are.

ID: 4d671b68 Answer

Correct Answer: A

Rationale

Choice A is the best answer. The text says that corals produce bright colors to block sunlight and encourage algae to recolonize after “an environmental stressor.” From this, we can infer that corals that produce bright colors have probably been subjected to an environmental stressor.

Choice B is incorrect. The text says that corals produce bright colors to block intense sunlight, which protects the light-sensitive algae that keep the coral healthy. In other words, bright colors make the coral’s health less vulnerable to intense sunlight. Choice C is incorrect. The text says that corals produce bright colors to encourage algae to recolonize, not that they have recovered without the assistance of algae colonies. Choice D is incorrect. The text never compares the likelihood of differently colored corals surviving without algae colonies.

Question Difficulty: Hard

Question ID e4466b2f

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: e4466b2f

The following text is adapted from Countee Cullen’s 1926 poem “Thoughts in a Zoo.”

They in their cruel traps, and we in ours,
Survey each other’s rage, and pass the hours
Commiserating each the other’s woe,
To mitigate his own pain’s fiery glow.
Man could but little proffer in exchange
Save that his cages have a larger range.
That lion with his lordly, untamed heart
Has in some man his human counterpart,
Some lofty soul in dreams and visions wrapped,
But in the stifling flesh securely trapped.

Based on the text, what challenge do humans sometimes experience?

- A. They cannot effectively tame certain wild animals because of a lack of compassion.
- B. They cannot focus on setting attainable goals because of a lack of motivation.
- C. They quickly become frustrated when faced with difficult tasks because of a lack of self-control.
- D. They have aspirations that cannot be fulfilled because of certain limitations.

ID: e4466b2f Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text metaphorically likens humans to animals in a zoo, suggesting that humans have dreams that they cannot fulfill because they are trapped.

Choice A is incorrect. The speaker says that the lion has an “untamed heart,” but the speaker doesn’t actually mention anything about humans taming wild animals or a lack of compassion. Choice B is incorrect. The speaker doesn’t suggest that humans lack motivation. Rather, the speaker thinks that humans are “trapped” and prevented from achieving their dreams. Choice C is incorrect. The speaker doesn’t mention anything about humans becoming frustrated or lacking self-control. Rather, the speaker thinks that humans are “trapped” and prevented from achieving their dreams.

Question Difficulty: Hard

SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 12b370c2

Disco remains one of the most ridiculed popular music genres of the late twentieth century. But as scholars have argued, the genre is far less superficial than many people believe. Take the case of disco icon Donna Summer: she may have been associated with popular songs about love and heartbreak (subjects hardly unique to disco, by the way), but like many Black women singers before her, much of her music also reflects concerns about community and identity. These concerns are present in many of the genre’s greatest songs, and they generally don’t require much digging to reveal.

- What does the text most strongly suggest about the disco genre?
- A. It has been unjustly ignored by most scholars despite the importance of the themes addressed by many of the genre’s songs.
 - B. It evolved over time from a superficial genre focused on romance to a genre focused on more serious concerns.
 - C. It has been unfairly dismissed for the inclusion of subject matter that is also found in other musical genres.
 - D. It gave rise to a Black women’s musical tradition that has endured even though the genre itself faded in the late twentieth century.

ID: 12b370c2 Answer

Correct Answer: C

Rationale

Choice C is the best answer. The text argues that disco is "far less superficial" than its popular perception might indicate, and that love and heartbreak are "subjects hardly unique to disco."

Choice A is incorrect. This choice conflicts with the text, which says that scholars argue that disco "is far less superficial than many people believe." Choice B is incorrect. This choice says the opposite of what the text suggests. The writer argues that the genre is not as superficial as commonly believed, but that it always reflected "concerns about community and identity." Choice D is incorrect. The text doesn’t support this choice. There’s nothing in the text about disco giving rise to an enduring Black women’s musical tradition.

Question Difficulty: Hard

Question ID c25d4e29

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: c25d4e29

The following text is from William Shakespeare’s play *The Tempest*, first performed in 1611. Miranda has lived on an island with her father, Prospero, since she was three years old. Prospero has stated that Miranda likely does not remember anything other than her life on the island.

MIRANDA: ‘Tis far off,
And rather like a dream than an assurance
That my remembrance warrants. Had I not
Four or five women once that tended me?

PROSPERO: Thou hadst, and more, Miranda. But how is it
That this lives in thy mind? What seest thou else
In the dark backward and abysm of time?
If thou remember’st ought ere thou camest here,
How thou camest here thou mayst.

- In the text, which point does Prospero most directly make about Miranda and her memories?
- A. Miranda’s reminiscences about her early childhood have a melancholy quality that betrays her discontented view of her current circumstances.
 - B. Miranda’s doubts about the accuracy of one recollection of a place other than the island are clouding her judgment and seem to be making her reluctant to explore her recollection of traveling to the island.
 - C. Miranda’s ability to summon details of an experience she had before arriving on the island suggests that she may also be able to summon details of her arrival on the island.
 - D. Miranda’s impression of a scene is vague because she is remembering a scenario she had daydreamed about as a child rather than a scenario that had occurred in reality.

ID: c25d4e29 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it presents a point that Prospero makes about Miranda. The text begins with Miranda responding to Prospero’s claim that she probably doesn’t remember her life before the island. She describes a distant memory, asking if she had "four or five women" caring for her. Prospero confirms this ("thou hadst") and then asks what else she can recall, stating that because she remembers one thing from the time before she lived on the island ("ought ere thou camest here"), she might also remember arriving on the island ("how thou camest here"). That is, Prospero indicates that Miranda’s ability to summon details of an experience from before her arrival on the island suggests that she may also be able to summon details of her arrival.

Choice A is incorrect because Prospero doesn’t say anything about how Miranda presents her early childhood memory of having several people care for her—he indicates only his surprise that she remembers something from so long ago ("the dark backward

and abyss of time") and his thought that she may also be able to recall another childhood event: her arrival on the island. Further, Prospero doesn't suggest that he believes Miranda is discontent in her current circumstances. Choice B is incorrect. Although Miranda suggests some doubt about her recollection of a place other than the island, in that she describes it as "like a dream" she can't be certain of, Prospero doesn't mention her uncertainty—though he himself wonders how it is possible that she correctly recalls something from so long ago ("abyss of time"). Rather than indicating that doubt is making Miranda reluctant, Prospero simply states that Miranda may have the ability to remember traveling to the island. Choice D is incorrect. Although Miranda describes a vague impression of several people who cared for her as a young child and states that it is "rather like a dream" instead of something she is certain is real, Prospero doesn't indicate that Miranda is remembering a childhood daydream. Instead, he confirms that what Miranda remembers actually happened, answering her question about having had caregivers with "thou hadst," and asks her what else she can remember from long ago.

Question Difficulty: Hard

Question ID e3b5bb66

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: e3b5bb66

The most recent iteration of the immersive theater experience *Sleep No More*, which premiered in New York City in 2011, transforms its performance space—a five-story warehouse—into a 1930s-era hotel. Audience members, who wander through the labyrinthine venue at their own pace and follow the actors as they play out simultaneous, interweaving narrative loops, confront the impossibility of experiencing the production in its entirety. The play’s refusal of narrative coherence thus hinges on the sense of spatial fragmentation that the venue’s immense and intricate layout generates.

What does the text most strongly suggest about *Sleep No More*’s use of its performance space?

- A. The choice of a New York City venue likely enabled the play’s creators to experiment with the use of theatrical space in a way that venues from earlier productions could not.
- B. Audience members likely find the experience of the play disappointing because they generally cannot make their way through the entire venue.
- C. The production’s dependence on a particular performance environment would likely make it difficult to reproduce exactly in a different theatrical space.
- D. Audience members who navigate the space according to a recommended itinerary will likely have a better grasp of the play’s narrative than audience members who depart from that itinerary.

ID: e3b5bb66 Answer

Correct Answer: C

Rationale

Choice C is the best answer. The text says that the production’s use of its large, winding space has a very specific effect on the audience. Given that the space itself is so important to creating this effect, it would be difficult to reproduce the production in a different space.

Choice A is incorrect. The fact that the venue is in New York City isn’t connected to the experimental nature of the performance. It’s the size of the venue, not its location in New York, that affects the theatrical experience. Choice B is incorrect. The text never suggests that audience members are disappointed because they can’t see the entire production. In fact, it suggests that that’s an important part of the experience. Choice D is incorrect. The text doesn’t mention a recommended itinerary for audience members.

Question Difficulty: Hard

Question ID 23659e76

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 23659e76

Eighteenth-century economist Adam Smith is famed for his metaphor of the invisible hand, which he putatively used to illustrate a robust model of how individuals produce aggregate benefits by pursuing their own economic interests. Note “putatively”: as Gavin Kennedy has shown, Smith deploys this metaphor only once in his economic writings—to make a narrow point about the then-dominant economic theory of mercantilism—and it was largely ignored until some twentieth-century economists eager to secure an intellectual pedigree for their views elevated it to a fully-fledged paradigm.

Which choice best states the main idea of the text?

- A. Although Smith is famed for his metaphor of the invisible hand, the metaphor was largely ignored until economists in the twentieth century came to realize that the metaphor was a robust model that anticipated their own views.
- B. Some twentieth-century economists gave Smith’s metaphor of the invisible hand a significance it does not have in Smith’s work, but it is nevertheless a useful model of how individuals produce aggregate benefits by pursuing their own economic interests.
- C. Smith’s metaphor of the invisible hand has been interpreted as a model of how individuals acting in their own interest produce aggregate benefits, but it was intended as a subtle critique of the economic theory of mercantilism.
- D. The reputation of Smith’s metaphor of the invisible hand is not due to the importance of the metaphor in Smith’s work but rather to the promotion of the metaphor by some later economists for their own ends.

ID: 23659e76 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main idea of the text. The text explains that economist Adam Smith’s famous metaphor of the invisible hand was putatively (that is, widely assumed but not proven) intended to illustrate a robust model (a consistently accurate generalization) of how individuals pursuing their own economic interests can create broader benefits for the population. The text then emphasizes the lack of affirmative evidence for this idea by calling out the term “putatively,” and explaining that, according to Gavin Kennedy, Smith used the metaphor only once in his works, in reference to specific circumstances related to the now-outdated economic view known as mercantilism, and that the metaphor didn’t garner much attention until economists in the twentieth century held it up as a paradigm (a theoretical framework in the field) and thereby implied that Smith shared some of their views on economics. By emphasizing “putatively,” the text implies that there is no independent reason to believe that Smith would agree with the metaphor’s use outside of the specific context for which he wrote it and that, therefore, the twentieth-century economists who used it did so to support their own views without regard for the metaphor’s importance to Smith’s work.

Choice A is incorrect. Although the text indicates that Smith’s metaphor was largely ignored until some twentieth-century economists revived it and bolstered its status, the text suggests that the later economists used Smith’s metaphor to self-servingly boost their own work while ignoring the original context in which Smith wrote it. Moreover, the statement in this choice fails to reflect the text’s emphasis on Smith’s limited use of the metaphor in his work. Choice B is incorrect. Although the text indicates that some twentieth-century economists altered the significance of Smith’s metaphor, the text doesn’t suggest that the metaphor

is a "useful model" of how aggregate benefits arise from individuals' selfish actions, let alone that this usefulness is unaffected by taking the metaphor out of its original context. Choice C is incorrect. Although the text indicates that Smith's metaphor was intended as a model of how individuals acting in their own interest produce aggregate benefits and it was written within the context of the now-outdated economic theory of mercantilism, these points are subordinate to the primary idea in the text, which is that Smith's use of the metaphor was tightly constrained but twentieth-century economists ignored the original context so that they could use the metaphor to suggest, without support, that Smith would agree with their economic views.

Question Difficulty: Hard

Question ID d2fbb566

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: d2fbb566

In superfluorescence, electrical charges known as dipoles emit light in synchronized bursts so intense that they are visible to the eye. Until recently, this phenomenon has only been observed at extremely cold temperatures because dipoles cannot synchronize at higher temperatures. But in a study, Melike Biliroglu and colleagues observed superfluorescence at room temperature in thin films made of perovskite and other similarly crystalline materials; the researchers propose that the formation of shock-absorbing quasiparticles called polarons in the material protects dipoles from thermal interference.

- Based on the text, how are polarons believed to be involved in the superfluorescence observed in Biliroglu and colleagues’ study?
- A. Polarons enable superfluorescent bursts to cross from one crystalline material to another.
 - B. Polarons allow for the dipoles to synchronize despite higher temperatures.
 - C. Polarons accelerate the dipoles’ release of superfluorescent bursts.
 - D. Polarons decrease the intensity of the superfluorescent burst.

ID: d2fbb566 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes Biliroglu and colleagues’ claim about how the polarons function in relation to superfluorescence. The text indicates that “until recently,” superfluorescence (intense, synchronized bursts of light emitted by dipoles) has solely been observed at very cold temperatures. However, it also states that, recently, Biliroglu and colleagues report observing the phenomenon at room temperature. They achieved this using “thin films made of perovskite and other similarly crystalline materials,” which the researchers claim allows for the formation of polarons. They also suggest that these polarons might absorb the thermal shocks that typically disrupt dipole synchronization at warmer temperatures. Thus, based on the text, Biliroglu and colleagues believe that polarons help dipoles synchronize at temperatures well above those at which superfluorescence had previously been observed.

Choice A is incorrect because the text doesn’t address the prospect of a superfluorescent burst moving between crystalline materials or any other mediums. Choice C is incorrect because the text’s discussion of polarons is about how they might enable superfluorescence at higher temperatures than those at which it had previously been observed. Rather than suggesting that polarons speed up superfluorescent bursts, the text suggests that no superfluorescence can occur at room temperature in the absence of polarons. Thus, the text indicates that polarons make superfluorescent bursts more likely to occur at higher temperatures than those at which it had previously been observed, not that polarons accelerate the bursts. Choice D is incorrect because the text’s discussion of polarons is about how they might enable superfluorescence at higher temperatures than those at which it had previously been observed. In the absence of polarons, the text suggests there would be no superfluorescence at room temperature. Thus, rather than decrease the intensity of superfluorescent bursts, polarons make them more likely to occur under certain circumstances.

Question Difficulty: Hard

Question ID 271ef622

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 271ef622

The following text is from Thomas Mann’s 1924 novel *The Magic Mountain*, translated by John E. Woods in 1995.

The story of Hans Castorp that we intend to tell here—not for his sake (for the reader will come to know him as a perfectly ordinary, if engaging young man), but for the sake of the story itself, which seems to us to be very much worth telling (although in Hans Castorp’s favor it should be noted that it is *his* story, and that not every story happens to everybody)—is a story that took place long ago, and is, so to speak, covered with the patina of history and must necessarily be told with verbs whose tense is that of the deepest past.

©1995 by Alfred A. Knopf, Inc.

What does the text most strongly suggest about the story of Hans Castorp?

- A. Though it is true that stories of even the most uninteresting people are themselves interesting because all people are unique, the reason this story is interesting is nonetheless difficult to understand because of the passage of time.
- B. Even though it is a story of a person of no particular importance, its age and the manner in which it therefore must be told are both indicators that the story itself is important.
- C. Like all stories about the lives of inconsequential people, this story must necessarily be related in a particular way if the reason the story is consequential is to be made evident to the audience.
- D. It is a remarkable story that happened to an unremarkable person, though one could plausibly argue that because the story is valuable, some of its value accrues to the person at its center.

ID: 271ef622 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it presents a statement about Hans Castorp’s story that is suggested by the text. The narrator of the text indicates that the story about Hans Castorp will be told not because there is something particularly notable about him, since he is pleasant but "perfectly ordinary," but because the story itself is remarkable ("very much worth telling"). The narrator then notes that there is a benefit in being at the heart of the story—that it is "in Hans Castorp’s favor" that the story is his, and maybe uniquely so ("not every story happens to everybody"). Thus, the text suggests both that the story that will be told is a remarkable one that happened to an unremarkable person and that it is reasonable to argue that the person at the center of a valuable story takes on some of the story’s value.

Choice A is incorrect. Although the narrator of the text makes the point that "not every story happens to everybody," the narrator doesn’t state that stories are interesting simply because the people they are about are unique. Rather, the narrator suggests that one particular story is "very much worth telling" on its own and that Hans Castorp benefits from the fact that the story is remarkable and may be unique to him. Further, the narrator never suggests that the story will be hard to understand even though it is old. Choice B is incorrect. Although the narrator of the text suggests that Hans Castorp is of no particular importance, since he is a "perfectly ordinary" person, the narrator never reveals what makes the story of Castorp important, just that "the story itself" is "very much worth telling." The narrator states that the story "took place long ago," is "covered with the patina of history," and can be

told only "with verbs whose tense is that of the deepest past," but the story's age and the way it must be told aren't presented as reasons the story is important; the narrator is simply providing details about how the story will be told. Choice C is incorrect because the narrator of the text doesn't suggest that all stories about people who are "perfectly ordinary" (like Hans Castorp) must be told in particular ways to make it clear why those stories are consequential. Further, the narrator suggests that Hans Castorp's story must be told "with verbs whose tense is that of the deepest past" because it took place so long ago, not because telling it that way will convey the story's importance.

Question Difficulty: Hard

Question ID e752ee68

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: e752ee68

The following text is adapted from Lewis Carroll’s 1889 satirical novel *Sylvie and Bruno*. A crowd has gathered outside a room belonging to the Warden, an official who reports to the Lord Chancellor.

One man, who was more excited than the rest, flung his hat high into the air, and shouted (as well as I could make out) “Who roar for the Sub-Warden?” Everybody roared, but whether it was for the Sub-Warden, or not, did not clearly appear: some were shouting “Bread!” and some “Taxes!”, but no one seemed to know what it was they really wanted.

All this I saw from the open window of the Warden’s breakfast-saloon, looking across the shoulder of the Lord Chancellor. “What can it all mean?” he kept repeating to himself. “I never heard such shouting before—and at this time of the morning, too! And with such unanimity!”

Based on the text, how does the Lord Chancellor respond to the crowd?

- A. He asks about the meaning of the crowd’s shouting, even though he claims to know what the crowd wants.
- B. He indicates a desire to speak to the crowd, even though the crowd has asked to speak to the Sub-Warden.
- C. He expresses sympathy for the crowd’s demands, even though the crowd’s shouting annoys him.
- D. He describes the crowd as being united, even though the crowd clearly appears otherwise.

ID: e752ee68 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it presents a statement about how the Lord Chancellor responds to the crowd that is supported by the text. The text indicates that the people in the crowd are roaring and shouting “Bread!” or “Taxes!” and presents them as not knowing what they really want. The Lord Chancellor’s response is to ask what their shouting means but also to observe that they’re shouting with “unanimity,” or total agreement. Clearly, this isn’t the case, which supports the statement that the Lord Chancellor describes the crowd as being united even though it’s not.

Choice A is incorrect because it isn’t supported by the text. Although the text indicates that the Lord Chancellor asks about the meaning of the crowd’s shouting, it doesn’t suggest that he knows what the crowd really wants. Choice B is incorrect because the text doesn’t suggest that the Lord Chancellor wants to speak to the crowd. Furthermore, the text doesn’t indicate that the crowd wants to hear from the Sub-Warden. Although the crowd roars when asked “Who roar for the Sub-Warden?” it’s unclear what the roaring means. Choice C is incorrect because the text doesn’t suggest that the Lord Chancellor knows of or sympathizes with the crowd’s demands. In addition, the text doesn’t indicate that the crowd’s shouting annoys the Lord Chancellor, just that it causes him to keep repeating “What can it all mean?”

Question Difficulty: Hard

Question ID d2316673

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: d2316673

The following text is from Maggie Pogue Johnson’s 1910 poem “Poet of Our Race.” In this poem, the speaker is addressing Paul Laurence Dunbar, a Black author.

Thou, with stroke of mighty pen,
Hast told of joy and mirth,
And read the hearts and souls of men
As cradled from their birth.
The language of the flowers,
Thou hast read them all,
And e’en the little brook
Responded to thy call.

Which choice best states the main purpose of the text?

- A. To praise a certain writer for being especially perceptive regarding people and nature
- B. To establish that a certain writer has read extensively about a variety of topics
- C. To call attention to a certain writer’s careful and elaborately detailed writing process
- D. To recount fond memories of an afternoon spent in nature with a certain writer

ID: d2316673 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states the main purpose of the text. In the first part of the text, the speaker addresses Paul Laurence Dunbar’s ability to understand people (he has “read the hearts and souls of men” and written of their “joy and mirth”). In the second part of the text, the speaker describes Dunbar’s thorough understanding of the natural world (he has read “the language of the flowers” and engaged with “the little brook”). Thus, the text mainly praises Dunbar for being especially perceptive about people and nature.

Choice B is incorrect because the speaker describes Dunbar as having read the “hearts and souls of men” and the “language of flowers” to convey Dunbar’s ability to comprehend people and nature, not to suggest that Dunbar has literally read any of these things or has read a great deal about them. Choice C is incorrect because the text notes how well Dunbar has made sense of the topics he’s written about but doesn’t address any specific parts of Dunbar’s writing process beyond the suggestion that he used a pen. Choice D is incorrect because the text focuses on Dunbar’s understanding of people and nature as expressed in his writing. Nothing in the text suggests that the speaker is recalling a particular afternoon actually spent in nature with Dunbar; even if there had been a shared experience, the text isn’t focused on reminiscing.

Question Difficulty: Hard

Question ID b8abc32e

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: b8abc32e

The following text is from Milan Kundera’s 1984 novel *The Unbearable Lightness of Being* (translated by Michael Henry Heim in 1984). Karenin is a dog that belongs to Tomas and Tereza.

Karenin was not overjoyed by the move to Switzerland [from Prague]. Karenin hated change. Dog time cannot be plotted along a straight line; it does not move on and on, from one thing to the next. It moves in a circle like the hands of a clock, which—they, too, unwilling to dash madly ahead—turn round and round the face, day in and day out following the same path. In Prague, when Tomas and Tereza bought a new chair or moved a flower pot, Karenin would look on in displeasure. It disturbed his sense of time. It was as though they were trying to dupe the hands of the clock by changing the numbers on its face.

©1984 by Milan Kundera. Translation ©1984 by Harper & Row, Publishers, Inc.

- Which choice best states the main idea of the text?
- A. As a dog, Karenin possesses a sense of time that involves a strong preference for predictability and an aversion to disruption.
 - B. After he’s moved to a new home, Karenin’s negative response to changes has become more pronounced.
 - C. Similar to Tomas and Tereza, Karenin comprehends time as circular rather than as a straightforward progression.
 - D. As is the case for other dogs, Karenin’s sense of time seems to accelerate depending on the objects and places that surround him.

ID: b8abc32e Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states the main idea of the text. The text begins by stating that Tomas and Tereza’s dog Karenin felt disrupted by a recent move because of his dislike of change. The text then goes on to suggest that this is because the way a dog experiences time differs from the way humans experience time: time for a dog doesn’t move linearly, going "on and on, from one thing to the next," but instead moves circularly, "like the hands of a clock." That is, time for a dog is experienced as a cyclical pattern characterized by routine and predictability, with each day "following the same path." The text then concludes by providing examples of seemingly insignificant changes in routine that profoundly "disturbed [Karenin’s] sense of time," causing him to feel displeasure. Thus, the main idea of the text is that Karenin’s sense of time as a dog involves a strong preference for predictability and an aversion to disruption.

Choice B is incorrect. Although the text emphasizes Karenin’s displeasure with the recent move to a new home, it doesn’t suggest that the move has made his negative responses more pronounced than they once were. Rather, in accounting for Karenin’s displeasure with the move to Switzerland, the text explains that Karenin generally has a negative response to any kind of change.

Choice C is incorrect because the text doesn’t suggest that Karenin comprehends time similarly to how Tomas and Tereza comprehend it. On the contrary, the text strongly implies a contrast between dogs’ circular experience of time with the way humans experience time as a straightforward progression that can be "plotted on a straight line." Choice D is incorrect because the text provides no indication that a change in the places and objects surrounding Karenin causes him to feel as though time is

accelerating. Although the text does use the language of "dash[ing] madly ahead" in relation to time, the phrase appears in the context of a comparison illustrating how dogs experience time: time for a dog moves just as the hands of a clock do, in a circle and "unwilling to dash madly ahead"—that is, always in a regular and predictable way.

Question Difficulty: Hard

Question ID c47a72e9

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: c47a72e9

Studies of ocean wave breaking have predominantly focused on traveling waves (those propagating along the horizontal plane), so Mark McAllister et al. utilized a circular wave tank to produce and study spike waves, axisymmetric standing waves that can erupt vertically when traveling waves propagating in opposing directions intersect. Traveling waves break when wave steepness (height-to-length ratio) passes a critical threshold; breaking thus constrains wave height. McAllister et al. found that spike waves can exceed that constraint, as other factors than just steepness (e.g., jet stability and cavity shape) mediate spike-wave breaking.

Which choice best states the main idea of the text?

- A. Previous studies have suggested that steepness mediates breaking in traveling waves, but the study by McAllister et al. shows that jet stability and cavity shape may also influence breaking in such waves.
- B. The process of breaking limits the height of traveling waves, but the study by McAllister et al. suggests that spike waves can exceed those limits if their height-to-length ratio reaches a critical threshold.
- C. McAllister et al. suggest that spike waves can form when traveling waves propagating in opposing directions intersect and that spike waves tend to be higher than traveling waves.
- D. The study by McAllister et al. suggests that when traveling waves intersect in specific ways, the resulting wave may be higher than would be expected based on the properties of traveling waves.

ID: c47a72e9 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main idea of the text. The text begins by explaining that most studies of ocean wave breaking have focused on traveling waves (those that move horizontally) but that McAllister et al. studied spike waves, which form when traveling waves moving in opposing directions intersect. The text establishes that while traveling waves break when their steepness exceeds a critical threshold (limiting their height), McAllister et al. found that spike waves can exceed these constraints because factors like jet stability and cavity shape can mitigate the effects of steepness. Thus, the main idea of the text is that spike waves resulting from traveling waves intersecting in specific ways can reach heights greater than what would be expected based on the general properties of traveling waves.

Choice A is incorrect because it misrepresents the information in the text; the text indicates that McAllister et al. showed that jet stability and cavity shape (along with steepness) influence breaking in spike waves, not in traveling waves. Further, the information about specific influences is not the main focus of the text. Choice B is incorrect because it misrepresents the information in the text; the text indicates that McAllister et al. found that spike waves can pass the steepness threshold at which traveling waves break because factors like jet stability and cavity shape affect the breaking of spike waves, not because they've simply reached a critical threshold of steepness. Choice C is incorrect. Although the text does explain that spike waves can form when traveling waves intersect, it presents this as a known fact that McAllister et al.'s study was based on, not as something the researchers suggested. Further, the text indicates that spike waves can exceed a threshold that limits traveling wave height but doesn't focus on the idea that spike waves typically are higher than traveling waves.

Question ID f7e843d4

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: f7e843d4

Artificial leaves are a developing renewable energy technology that mimics the process of photosynthesis in plants. These devices are silicon-based solar cells coated in chemical catalysts that activate reactions that split water molecules into hydrogen and oxygen gas. The technology, while generating lots of interest, is not yet commercially viable as a large-scale energy source. To meet this challenge, scientists from many fields are researching ways to store, transport, and distribute the energy the devices produce while other scientists are working to improve the cost and efficiency of the devices.

Which choice best states the main idea of the text?

- A. Continued research and development in artificial-leaf technology is needed before the devices can be widely used as an energy source.
- B. The recent increase in the commercial use of artificial leaves as an energy source has encouraged many scientists to research ways to improve the technology.
- C. Artificial leaves split water molecules into oxygen and hydrogen gas using catalysts more efficiently than plants do using the process of photosynthesis.
- D. Artificial leaves were developed to mimic the natural process of photosynthesis in plants in order to store energy for long-term commercial use.

ID: f7e843d4 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states the main idea of the text. According to the text, artificial leaves are a renewable energy technology that’s in development and generating interest. The text goes on to state that artificial-leaf technology "is not yet commercially viable as a large-scale energy source" and that scientists from several fields are doing additional research to refine the technology. Thus, the main idea is that continued research and development in artificial-leaf technology is needed before the devices can be widely used as an energy source.

Choice B is incorrect. While the text does state that scientists from many fields are researching artificial leaves, they’re doing so to address the fact that the leaves are not yet commercially viable, rather than in response to an increase in commercial use. Choice C is incorrect. Although the text does explain that artificial leaves help split water molecules into oxygen and hydrogen gas using catalysts, it doesn’t argue that this process is more efficient than photosynthesis. This is merely a detail of the text and not the main idea, which is about the additional research needed to improve the cost and efficiency of these artificial leaves. Choice D is incorrect. Although the text indicates that artificial leaves mimic photosynthesis in plants, this is an incidental detail in support of the main idea that additional research is needed to make artificial leaves commercially viable.

Question Difficulty: Hard

Question ID c7e43751

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: c7e43751

Philosophers note that many people have an intuitive sense that while we ought not to lie, there may be circumstances in which lying is permissible. If this intuition is correct and we lack an inviolable duty to speak truthfully, what grounds opposition to lying in the first place? Japa Pallikkathayil has advanced one answer by appealing to a duty to respect others’ agential interests: the possession of false beliefs constrains agency, and thus we ought not to impede the formation of true beliefs unless doing so prevents a greater constraint on someone’s agency or an otherwise impermissible end.

Which choice best states the main idea of the text?

- A. One potential means of justifying opposition to lying is Pallikkathayil’s argument that we have an obligation to respect other people’s agency that entails a commitment to truthfulness except in certain circumstances.
- B. Many people have an intuitive sense that lying is permissible in some circumstances but lack a principled way to identify those circumstances, and Pallikkathayil’s argument may provide a means of resolving that problem.
- C. Pallikkathayil’s argument suggests that if we have a duty to respect other people’s agential interests and if possession of false beliefs constrains agency, then we have an inviolable duty to speak truthfully.
- D. Pallikkathayil’s argument shows that if our intuition that circumstances may make lying permissible is correct, then it is unclear whether there are any grounds for an opposition to lying in the first place.

ID: c7e43751 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states the main idea of the text. The text begins by noting a common intuition that lying might sometimes be permissible, which raises the question of what is the reason for being against lying. The text then presents Pallikkathayil’s answer to this question: we have a duty to respect others’ agential interests (that is, we have an obligation to allow people to exercise their free will in order to best serve their own ends), false beliefs constrain agency (the implication here being that people who are deceived about what is true are impeded in acting in their own best interests), and so we should not hinder the formation of true beliefs (we should not deliberately deceive a person) unless doing so prevents a greater limitation on someone’s agency or prevents some otherwise impermissible end (for example, it might be morally permissible to lie to someone in the rare circumstance where a false belief would lead a person to act in their own best interest, and where they would not do so if they knew the truth). Thus, the main idea of the text is that Pallikkathayil offers a potential justification for opposing lying based on respecting agency, while still allowing for exceptions in specific circumstances.

Choice B is incorrect because the text doesn’t focus on people’s lack of a principled way to identify circumstances where lying is permissible or indicate that Pallikkathayil’s argument resolves this specific problem. Rather, the text presents Pallikkathayil’s argument that lies limit agency but may be permitted in very specific situations (to prevent a greater limitation on someone’s agency or an otherwise unacceptable outcome) as one of a number of possible arguments about why lies are undesirable but sometimes permissible. Choice C is incorrect because it directly contradicts the text. Pallikkathayil’s argument, as described in the text, wouldn’t lead to an "inviolable duty to speak truthfully." On the contrary, the text explicitly states that Pallikkathayil’s position is that interfering with people developing accurate beliefs is wrong, except when such interference prevents either a more significant

limitation on someone's agency or an outcome that would be unacceptable for other reasons. This indicates that Pallikkathayil's argument allows for some exceptions to the duty to speak truthfully, making it not inviolable. Choice D is incorrect because Pallikkathayil's argument doesn't suggest that if it is permissible to lie in at least some circumstances, then it is unclear whether there are good reasons for opposing lying in any circumstances. Instead, the text presents Pallikkathayil as offering a specific ground for opposing lying (respecting others' ability to act in their own best interests) while qualifying that assertion by presenting a situation in which lying might sometimes be morally permissible.

Question Difficulty: Hard

Question ID bf43e45f

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: bf43e45f

Paleontologist Lucas E. Fiorelli and colleagues have reported the discovery at a mine in Brazil of several egg clutches, partially preserved single eggs, and egg shells from the Late Cretaceous period. The researchers have concluded that the area was once a nesting and breeding site for titanosaurs, a group of sauropod dinosaurs. The finding is significant given the previous lack of known nesting sites in northern regions of South America, which led many paleontologists to assume that titanosaurs migrated south to lay eggs.

What does the text most strongly suggest about the site discovered by the researchers?

- A. It is the earliest known example of a titanosaur nesting and breeding site.
- B. It was very difficult to excavate given that it was discovered in a mine.
- C. It may have been occupied by other sauropods in addition to titanosaurs.
- D. It is farther north than any other nesting site discovered in South America.

ID: bf43e45f Answer

Correct Answer: D

Rationale

Choice D is the best answer because it presents a statement about the site discovered by the researchers that is supported by the text. The text discusses Fiorelli and colleagues’ discovery of egg clutches, single eggs, and eggshells in a Brazilian mine. According to the text, the presence of these eggs, which are from the Late Cretaceous period, led the researchers to conclude that the location was once a nesting and breeding site for titanosaurs. The text then explains that the finding is important because of the “previous lack of known nesting sites in northern regions of South America.” If there haven’t been any other discoveries of a nesting site in South America’s northern regions and the site in the Brazilian mine is the first, then the text strongly suggests that the site is farther north than other nesting sites that have been discovered in South America.

Choice A is incorrect because the text doesn’t suggest that the site discovered by Fiorelli and colleagues is the earliest titanosaur nesting and breeding site known to paleontologists but rather that it’s the first nesting site found in northern regions of South America. Moreover, the text doesn’t suggest how the timeline of the newly discovered site compares with that of other titanosaur nesting and breeding sites. Choice B is incorrect because there is no mention in the text about any difficulties that Fiorelli and colleagues faced when they were excavating the nesting and breeding site in the Brazilian mine. Choice C is incorrect because the text doesn’t support the idea that the nesting and breeding site in the Brazilian mine was occupied by sauropods other than titanosaurs. The text simply mentions that titanosaurs are sauropod dinosaurs and presents the researchers’ conclusion that the site they discovered was for titanosaurs.

Question Difficulty: Hard

Question ID 497015e1

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 497015e1

For centuries, the widespread acknowledgment of the involvement of the cerebellum—a dense brain structure in vertebrates—in coordinating motor control in humans has hindered recognition of other possible functions of the structure. Neuroscience research from the last two decades now suggests that the cerebellum regulates emotion and social behavior, and recent research by Ilaria Carta and colleagues has identified a pathway connecting the cerebellum to a center for motivation and reward processing known as the ventral tegmental area (VTA).

Which choice best states the main idea of the text?

- A. The recent verification of a pathway between the VTA and the cerebellum confirms the cerebellum’s long-suspected role in motor coordination.
- B. Recent advances in the field of neuroscience have challenged widely accepted claims about the function of a pathway connecting the VTA and the cerebellum.
- C. The cerebellum has primarily been thought to regulate motor functioning, but in recent years neuroscience researchers have been uncovering additional functions.
- D. Technological limitations have historically hindered the study of the cerebellum, but the recent development of new technologies has led to greater insights into its functions.

ID: 497015e1 Answer

Correct Answer: C

Rationale

Choice C is the best answer. The text says that the cerebellum has long been thought to regulate motor functioning, but new research shows that it may also have other functions—including regulating emotion and social behavior and some connection to motivation and rewards processing.

Choice A is incorrect. The VTA is described as “a center for motivation and reward processing,” and the discovery of the pathway between the VTA and the cerebellum supports the theory that the cerebellum is involved in functions other than motor coordination. Choice B is incorrect. The text says that recent research has identified this pathway, but it doesn’t discuss any previous “widely accepted claims” about the pathway’s function. The “widespread acknowledgement” mentioned early in the passage is about the cerebellum alone, not its connection to the VTA. Choice D is incorrect. The text never discusses any technological limitations or any new technologies.

Question Difficulty: Hard

Question ID 57fb41c0

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 57fb41c0

The following text is adapted from William Shakespeare’s 1609 poem “Sonnet 27.” The poem is addressed to a close friend as if he were physically present.

Weary with toil, I [hurry] to my bed,
The dear repose for limbs with travel tired;
But then begins a journey in my head
To work my mind, when body’s work’s expired:
For then my thoughts—from far where I abide—
[Begin] a zealous pilgrimage to thee,
And keep my drooping eyelids open wide,

What is the main idea of the text?

- A. The speaker is asleep and dreaming about traveling to see the friend.
- B. The speaker is planning an upcoming trip to the friend’s house.
- C. The speaker is too fatigued to continue a discussion with the friend.
- D. The speaker is thinking about the friend instead of immediately falling asleep.

ID: 57fb41c0 Answer

Correct Answer: D

Rationale

Choice D is the best answer it most accurately states the main idea of the text. The speaker describes going to bed for “repose” (rest) but finding that his thoughts are focused on the friend the speaker is addressing, and the thoughts are keeping the speaker awake.

Choice A is incorrect because the speaker isn’t asleep; the thoughts about the friend are keeping the speaker awake. Choice B is incorrect because the speaker isn’t talking about taking a literal trip; rather, the speaker uses the metaphor of a journey to describe internal thoughts. Choice C is incorrect because the speaker isn’t having a discussion with the friend.

Question Difficulty: Hard

Question ID aa460243

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: aa460243

The fynbos shrubland is a diverse habitat found only in South Africa. It is adjacent to the Afro-temperate forest, with almost no transition space between the two distinct habitats. Plants in the fynbos have uniquely thin and long root systems that spread out over large distances to absorb nutrients from the soil. Ecologists transplanted tree seedlings from the forest into plots in the fynbos. Seedlings in plots isolated from the roots of fynbos plants exhibited a growth rate five times greater than that of the seedlings in plots in close proximity to the roots of fynbos plants.

Based on the text, what role do fynbos roots most likely have in maintaining the border between the fynbos shrubland and the Afro-temperate forest habitats?

- A.

Fynbos roots damage the root systems of forest plants, leaving those plants unable to acquire sufficient nutrients.
- B.

Fynbos roots extend close enough to the forest plants’ roots that they constitute a physical barrier that forest plants’ roots cannot pass.
- C.

The root systems of fynbos plants allow the plants to take in so many soil nutrients that forest plants are prevented from flourishing in the fynbos.
- D.

The root systems of fynbos plants enhance the soil immediately surrounding the plants, allowing them to thrive in an otherwise harsh habitat.

ID: aa460243 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it presents a conclusion about the role of fynbos roots in maintaining the border with the Afro-temperate forest that can be reasonably inferred from the text. The text states that plants in the fynbos have "uniquely thin and long root systems that spread out over large distances to absorb nutrients from the soil." The text then describes an experiment where forest tree seedlings grown in plots isolated from fynbos roots grew at a rate five times greater than seedlings in areas near fynbos roots. This strongly suggests that fynbos roots are depleting soil nutrients to such an extent that forest plants can’t get enough nutrients from that soil to flourish, thereby hindering the formation of any significant "transition space" between the habitats and helping keep the border between them sharp.

Choice A is incorrect because there is no evidence in the text that fynbos roots physically damage the root systems of forest plants. Instead, the text explicitly describes fynbos plants as having "uniquely thin and long root systems that spread out over large distances to absorb nutrients from the soil." This description establishes that fynbos roots are specialized for efficient nutrient absorption. The experiment then confirms this function of the roots by showing that forest seedlings "isolated from the roots of fynbos plants exhibited a growth rate five times greater" than those near fynbos roots. This result demonstrates that when forest seedlings don’t have to compete with the nutrient-absorbing fynbos roots, they grow much better. Choice B is incorrect. Although the text does indicate that the fynbos and the Afro-temperate forest are distinct from, and adjacent to, each other and that there is "almost no transition space" (area of mixed fynbos and forest plants), the experiment shows that forest plants can grow in soil occupied by fynbos roots, just not very well. So, the idea that the fynbos roots physically obstruct forest plants is unsupported by the text. Choice D is incorrect because it directly contradicts the text’s claim that fynbos roots absorb

nutrients from, and therefore deplete, the soil they're in, and furthermore, nothing in the text suggests that the habitat of the fynbos is harsh in general.

Question Difficulty: Hard

Question ID c1f1a631

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: c1f1a631

Modern dog breeds are largely the result of 160 years of owners crossbreeding certain dogs in order to select for particular physical appearances. Owners often say that some breeds are also more likely than others to have particular personality traits—basset hounds are affectionate; boxers are easy to train—but Kathleen Morrill and colleagues found through a combination of owner surveys and DNA sequencing of 2,000 dogs that while physical traits are predictably heritable among purebred dogs, behavior varies widely among dogs of the same breed.

Which choice best states the main idea of the text?

- A. Dog breeds would not exist without many years of human intervention in dogs’ reproduction.
- B. Research fails to confirm a commonly held belief about dog breeds and behavior.
- C. The dog breeds most popular among owners have often changed over the past 160 years.
- D. A study of dog breeds is notable for its usage of both opinion surveys and DNA sequencing.

ID: c1f1a631 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately states the main idea of the text. The text indicates that dog owners typically claim that some dog breeds are “more likely than others to have particular personality traits.” In other words, the text points out that a commonly held belief about dog breeds is that their personality traits are heritable. The text then states that Kathleen Morrill and colleagues undertook research about dog trait heritability and found that “behavior varies widely among dogs of the same breed.” Because Morrill and colleagues found evidence for variability rather than consistency in the behavior of dogs of the same breed, the statement that research fails to uphold a commonly held belief about dog breeds and behavior accurately reflects the main idea of the text.

Choice A is incorrect. Although the text mentions that humans have long intervened in dogs’ reproduction by intentionally crossbreeding certain dogs, it doesn’t argue that such intervention is essential to the existence of dog breeds. Choice C is incorrect because the text doesn’t discuss the popularity of any dog breeds; breeds are mentioned as having certain traits, but the text says nothing about the popularity of these breeds or traits. Choice D is incorrect. Although the text briefly mentions that Morrill and colleagues conducted a study about dog traits using both surveys and DNA sequencing, this is not the main focus of the text. The text concerns the study’s results about the heritability of dog traits, not the particular methodology used by Morrill and colleagues.

Question Difficulty: Hard

Question ID 68bef552

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 68bef552

Many literary theorists distinguish between *fabula*, a narrative’s content, and *syuzhet*, a narrative’s arrangement and presentation of events. In the film *The Godfather Part II*, the *fabula* is the story of the Corleone family, and the *syuzhet* is the presentation of the story as it alternates between two timelines in 1901 and 1958. But literary theorist Mikhail Bakhtin maintained that *fabula* and *syuzhet* are insufficient to completely describe a narrative—he held that systematic categorizations of artistic phenomena discount the subtle way in which meaning is created by interactions between the artist, the work, and the audience.

Which choice best states the main idea of the text?

- A. Literary theorist Mikhail Bakhtin argued that there are important characteristics of narratives that are not fully encompassed by two concepts that other theorists have used to analyze narratives.
- B. Literary theorist Mikhail Bakhtin claimed that meaning is not inherent in a narrative but is created when an audience encounters a narrative so that narratives are interpreted differently by different people.
- C. The storytelling methods used in *The Godfather Part II* may seem unusually complicated, but they can be easily understood when two concepts from literary theory are utilized.
- D. Narratives that are told out of chronological order are more difficult for audiences to understand than are narratives presented chronologically.

ID: 68bef552 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states the main idea of the text. The text begins by explaining that many literary theorists rely on the concepts of *fabula* (a narrative’s content) and *syuzhet* (a narrative’s arrangement and presentation of events) and illustrates these concepts by explaining how they can be applied to the film *The Godfather Part II*. The text then discusses how Mikhail Bakhtin, a literary theorist, argued that *fabula* and *syuzhet* can’t fully describe a narrative, since systematic categorizations such as these fail to account for all the ways in which interactions between the artist, the work, and the audience produce meaning. Thus, the main idea is that Bakhtin argued that there are important characteristics of narratives that are not fully encompassed by two concepts that other theorists have used to analyze narratives.

Choice B is incorrect because according to the text, Mikhail Bakhtin believed that meaning was created through the interactions of the artist, narrative, and audience, not simply through the interaction between the audience and narrative; moreover, the text doesn’t address whether Bakhtin focused on the ways in which different people interpret narratives differently. Choice C is incorrect. Although the text implies that the storytelling methods used in *The Godfather Part II* are complicated, it discusses the film only to illustrate how the concepts of *fabula* and *syuzhet* may be applied to a narrative. The film’s storytelling methods aren’t the primary focus of the text. Choice D is incorrect. The text discusses *The Godfather Part II*, whose narrative doesn’t adhere to a single chronological order, only to illustrate the concepts of *fabula* (a narrative’s content) and *syuzhet* (a narrative’s arrangement and presentation of events). The primary focus of this text isn’t the structure of this film or of other narratives that are told out of chronological order; moreover, the text doesn’t consider whether such structures make it harder for audiences to understand narratives.

Question ID 2d77d2b7

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 2d77d2b7

For many years, the only existing fossil evidence of mixopterid eurypterids—an extinct family of large aquatic arthropods known as sea scorpions and related to modern arachnids and horseshoe crabs—came from four species living on the paleocontinent of Laurussia. In a discovery that expands our understanding of the geographical distribution of mixopterids, paleontologist Bo Wang and others have identified fossilized remains of a new mixopterid species, *Terropterus xiushanensis*, that lived over 400 million years ago on the paleocontinent of Gondwana.

- According to the text, why was Wang and his team’s discovery of the *Terropterus xiushanensis* fossil significant?
- A. The fossil constitutes the first evidence found by scientists that mixopterids lived more than 400 million years ago.
 - B. The fossil helps establish that mixopterids are more closely related to modern arachnids and horseshoe crabs than previously thought.
 - C. The fossil helps establish a more accurate timeline of the evolution of mixopterids on the paleocontinents of Laurussia and Gondwana.
 - D. The fossil constitutes the first evidence found by scientists that mixopterids existed outside the paleocontinent of Laurussia.

ID: 2d77d2b7 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it states why Wang and his team’s discovery of the *Terropterus xiushanensis* fossil was significant. The text explains that up until Wang and his team’s discovery, the only fossil evidence of mixopterids came from the paleocontinent of Laurussia. Wang and his team, however, identified fossil remains of a mixopterid species from the paleocontinent Gondwana. Therefore, the team’s discovery was significant because the fossil remains of a mixopterid species were outside of the paleocontinent Laurussia.

Choice A is incorrect. Although the text states that Wang and his team identified fossilized remains of a mixopterid species that lived more than 400 million years ago, it doesn’t indicate that mixopterid fossils previously found by scientists dated to a more recent period than that. Choice B is incorrect. Although the text states that mixopterids are related to modern arachnids and horseshoe crabs, it doesn’t suggest that the fossil discovered by Wang and his team confirmed that this relationship is closer than scientists had previously thought. Choice C is incorrect because the team’s fossil established the presence of mixopterids on Gondwana, not on Laurussia. Moreover, the text only discusses the fossil in relation to the geographical distribution of mixopterids, not in relation to their evolution.

Question Difficulty: Hard

Question ID f37f0c11

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: f37f0c11

In a paper about p-i-n planar perovskite solar cells (one of several perovskite cell architectures designed to collect and store solar power), Lyndsey McMillon-Brown et al. describe a method for fabricating the cell’s electronic transport layer (ETL) using a spray coating. Conventional ETL fabrication is accomplished using a solution of nanoparticles. The process can result in a loss of up to 80% of the solution, increasing the cost of manufacturing at scale—an issue that may be obviated by spray coating fabrication, which the researchers describe as “highly reproducible, concise, and practical.”

What does the text most strongly suggest about conventional ETL fabrication?

- A. It is less suitable for manufacturing large volumes of planar p-i-n perovskite solar cells than an alternative fabrication method may be.
- B. It is more expensive when manufacturing at scale than are processes for fabricating ETLs used in other perovskite solar cell architectures.
- C. It typically entails a greater loss of nanoparticle solution than do other established approaches for ETL fabrication.
- D. It is somewhat imprecise and therefore limits the potential effectiveness of p-i-n planar perovskite solar cells at capturing and storing solar power.

ID: f37f0c11 Answer

Correct Answer: A

Rationale

Choice A is the best answer. Conventional solar cell fabrication increases “the cost of manufacturing at scale,” but spray coating might get rid of that problem.

Choice B is incorrect. This is not completely supported by the text. While it’s true that conventional ETL fabrication is expensive at scale, there’s nothing in the text that mentions other perovskite solar cell architectures. Choice C is incorrect. This choice does not match the text. Only one conventional method of ETL fabrication is described, so we can’t compare the solution loss in this method to that of other conventional methods. Choice D is incorrect. This choice isn’t supported by the text. The text never suggests that the effectiveness of solar cells changes based on their method of fabrication.

Question Difficulty: Hard

Question ID e7b2ca56

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: e7b2ca56

Optical tweezers are specialized scientific tools—particularly useful in biology and medicine—that use high-powered beams of light to trap and manipulate minuscule particles for study. Use of the tool has led to several scientific and medical breakthroughs over the last few decades, but the particles are often under prolonged exposure to the intense heat of the light beams. To overcome the risk of overheating, and thereby damage, researchers sometimes attach nano-sized glass beads to particles, allowing the light to focus on the beads instead of the particles.

Based on the text, what is one advantage of attaching glass beads to particles when using optical tweezers?

- A. It decreases the time it takes for the optical tweezers to locate and capture the particles.
- B. It facilitates the maneuvering of particles without directly heating the particles themselves.
- C. It allows researchers to use weaker light beams to manipulate particles.
- D. It adds a material to which particles can transfer any heat absorbed from the optical tweezers’ light beam.

ID: e7b2ca56 Answer

Correct Answer: B

Rationale

Choice B is the best answer. The text says that the glass beads get the "focus" of the light beams so that the particles don't overheat. From this, we can infer that the beads allow the particles to be manipulated without being directly heated by the light beams.

Choice A is incorrect. The text never says that attaching the glass beads saves time in any way. Choice C is incorrect. The text never says that attaching the glass beads allows researchers to use weaker light beams. Choice D is incorrect. The text doesn't say that the particles can transfer heat to the glass beads—rather, it says the heat from the light focuses on the glass beads instead of the particles.

Question Difficulty: Hard

Some astronomers searching for extraterrestrial life have proposed that atmospheric NH₃ (ammonia) can serve as a biosignature gas—an indication that a planet harbors life. Jingcheng Huang, Sara Seager, and colleagues evaluated this possibility, finding that on rocky planets, atmospheric NH₃ likely couldn't reach detectably high levels in the absence of biological activity. But the team also found that on so-called mini-Neptunes—gas planets smaller than Neptune but with atmospheres similar to Neptune's— atmospheric pressure and temperature can be high enough to produce atmospheric NH₃.

- Based on the text, Huang, Seager, and colleagues would most likely agree with which statement about atmospheric NH₃?
- A. Its presence is more likely to indicate that a planet is a mini-Neptune than that the planet is a rocky planet that could support life.
 - B. Its absence from a planet that's not a mini-Neptune indicates that the planet probably doesn't have life.
 - C. It should be treated as a biosignature gas if detected in the atmosphere of a rocky planet but not if detected in the atmosphere of a mini-Neptune.
 - D. It doesn't reliably reach high enough concentrations in the atmospheres of rocky planets or mini-Neptunes to be treated as a biosignature gas.

ID: 260f8d93 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it states a conclusion the researchers likely agree with, given the details in the text. The text explains that a biosignature gas is a gas that can be used as an indicator that a planet harbors some form of life and some astronomers have proposed that NH₃ could serve as a biosignature gas. The researchers evaluating this claim found that the atmosphere of rocky planets would be unlikely to reach "detectably high levels" of NH₃ without biological activity, which would support the proposal of NH₃ serving as a biosignature gas. However, the text also states that mini-Neptune planets can produce NH₃ in the absence of biological activity. Thus, the text is structured to lead to the conclusion that detectable levels of NH₃ in the atmospheres of rocky planets could constitute a biosignature, but that is not the case for detectable levels of the gas in the atmospheres of mini-Neptune planets.

Choice A is incorrect because the text indicates that biological activity likely accounts for detectable levels of NH₃ in the atmospheres of rocky planets but mini-Neptune planets can have detectable levels of NH₃ in their atmospheres in the absence of biological activity. Therefore, both rocky planets and mini-Neptune planets can have detectable levels of atmospheric NH₃. Choice B is incorrect because the text states that for NH₃ to reach detectable levels in the atmospheres of rocky planets likely means they harbor biological activity, meaning that rocky planets with detectable NH₃ usually harbor biological activity. However, that does not entail that every rocky planet with biological activity will have detectable levels of NH₃ in their atmospheres. Choice D is incorrect because the text claims only that some astronomers have proposed using NH₃ as a biosignature gas without mentioning a minimum concentration of atmospheric NH₃ that must be met for it to function as a biosignature gas.

The following text is Vita Sackville-West’s circa 1920 poem “Evening.” Spars are ships’ masts, moorings are ropes that hold docked ships in place, and a riding-light is a light that a ship shines when it is anchored.

When little lights in little ports come out,
Quivering down through water with the stars,
And all the fishing fleet of slender spars
Range at their moorings, veer with tide about;

When race of wind is stilled and sails are furled,
And underneath our single riding-light
The curve of black-ribbed deck gleams palely white,
And slumbrous waters pool a slumbrous world;

—Then, and then only, have I thought how sweet
Old age might sink upon a windy youth,
Quiet beneath the riding-light of truth,
Weathered through storms, and gracious in retreat.

- Which choice best states the main idea of the text?
- A. The tranquility of a port in the evening can incline a person to appreciate the stillness of old age.
 - B. The difficulty of bringing a ship into port is apt training for dealing with the types of struggles encountered in old age.
 - C. A person who leads a long life that is varied and active may find it difficult to stay in a calm place.
 - D. The contrast between the peacefulness of a port at night and its activity during the day reflects the contrast between the calm of old age and the vibrancy of youth.

ID: fcc7687a Answer

Correct Answer: A

Rationale

Choice A is the best answer because it best states the main idea of the text. The speaker describes an evening scene observed from a boat: "little lights in little ports come out" and are reflected in the water’s surface "with the stars," fishing boats are moored, "sails are furled" (rolled up), and the riding-light is shining. The speaker emphasizes the calmness of the scene, noting that the "race of wind is stilled" and the atmosphere is sleepy ("slumbrous waters pool a slumbrous world"), and then indicates that the calmness prompts thoughts of how old age might be "sweet" and "quiet" and "gracious in retreat" after "a windy youth" with "storms." Thus, the main idea is that the tranquility of a port in the evening can lead a person to appreciate the potential stillness of old age.

Choice B is incorrect because the speaker isn’t discussing the difficulty of bringing a ship into port but describing the calmness of

the port at night. And rather than suggesting that old age involves struggles, the speaker suggests that after "a windy youth" with "storms" to be weathered, old age will be "sweet," "quiet," and "gracious"—that is, old age will be tranquil like a port at night. Choice C is incorrect because the speaker isn't suggesting that a person who has lived a varied and active life might find it difficult to stay in a calm place in old age. On the contrary, the speaker suggests that after a "windy youth" with "storms," old age can be welcomed as something "sweet," "quiet," and "gracious," just like a calm port at night. Choice D is incorrect. Although the speaker does touch on the idea of a "windy youth" followed by "sweet old age," the speaker doesn't tie that idea to a contrast between daytime activity and nighttime peacefulness at a port. The speaker doesn't address any activity during the day at a port, only briefly mentioning that the "race of wind is stilled" at the end of the day, and instead focuses on the tranquility of the port at night and how it prompts thoughts of "quiet" and "gracious" old age.

Question ID 3d7ee626

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 3d7ee626

The following text is adapted from Fanny Burney’s 1778 novel *Evelina*. The text is an excerpt from a letter by Lady Howard to Evelina’s guardian, Reverend Villars, in which Lady Howard discusses an upcoming trip to London planned by her daughter Mrs. Mirvan’s family.

It is very earnestly [the Mirvans’] wish to enlarge and enliven their party by the addition of your amiable ward, who would share, equally with her own daughter, the care and attention of Mrs. Mirvan. Do not start at this proposal; it is time that [Evelina] should see something of the world. When young people are too rigidly sequestered from it, their lively and romantic imaginations paint it to them as a paradise of which they have been beguiled; but when they are shown it properly, and in due time, they see it such as it really is, equally shared by pain and pleasure, hope and disappointment.

Based on the text, Lady Howard would most likely agree with which statement about Reverend Villars?

- A. Although the manner in which he has raised Evelina is in many ways exemplary, he has been misguided in shielding her from the influence of other young people.
- B. He has imparted to Evelina his own idealistic view of the world, which results in her being unprepared to face inevitable disappointments.
- C. Although his desire to guard Evelina from unscrupulous people is commendable, his general mistrust has led him to be unduly wary of the Mirvans.
- D. He is overly protective of Evelina, who would likely benefit from a greater variety of experiences than she has had thus far.

ID: 3d7ee626 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it presents a statement about Reverend Villars that Lady Howard would most likely agree with based on the text. In the text, Lady Howard urges Reverend Villars to allow his ward, Evelina, to join the Mirvans on a trip to London. Her first words after describing the Mirvans’ wish—“Do not start at this proposal”—suggest that she believes Villars will be alarmed by the idea, and she goes on to assure him that this alarm is unwarranted because Evelina will benefit from visiting London. Lady Howard supports her claim by arguing that excessive isolation from the world leads young people to entertain unrealistic, idealized views of it. On the other hand, she suggests, giving young people appropriate access to the world when they, like Evelina, are ready can help them develop a more balanced view of the world and its moral complexities. These words indicate that Lady Howard believes Evelina risks becoming too sheltered because of her guardian’s protectiveness and that she would benefit from exposure to a wider range of experiences than she has had thus far.

Choice A is incorrect because while the text does suggest that Lady Howard believes Reverend Villars has sheltered Evelina too much, it doesn’t specifically mention shielding her from the influence of other young people. Lady Howard refers more broadly to getting more exposure to the world and doesn’t focus on peer relationships. Additionally, the text doesn’t indicate whether Lady Howard finds other aspects of how Villars has raised Evelina to be exemplary. Choice B is incorrect because the text doesn’t suggest that Lady Howard believes Reverend Villars’s view of the world is idealistic or that he has imparted an idealistic view of

the world to Evelina. While Lady Howard does warn that young people who are too sheltered may develop romantic, idealized views of the world, she presents this as a general principle about sheltered youth, not as a specific criticism of Villars for having transmitted a naïve outlook to Evelina. Choice C is incorrect because the text doesn't mention Reverend Villars being specifically concerned about protecting Evelina from unscrupulous people or suggest that he is exceptionally wary of the Mirvans. While Lady Howard's words certainly anticipate some resistance from Villars, the text doesn't specify the nature of his concerns beyond the general desire to protect Evelina from the world.

Question Difficulty: Hard

Question ID 0c3c70ff

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 0c3c70ff

Conservationists worldwide are working to protect ecosystems from habitat destruction and biodiversity loss, and in many cases, initiatives that rely on natural features or processes can help address such challenges. In response to a rapidly dwindling population of blueback salmon, the Quinault Indian Nation (a tribe in Washington State) partnered with the conservation organization Wild Salmon Center to restore naturally occurring logjams in the Quinault River. The logjams create shady pools where the blueback salmon can rest and spawn, thus promoting blueback population recovery.

Which choice best states the main idea of the text?

- A.

A partnership between the Quinault Indian Nation and Wild Salmon Center shows the importance of collaborative approaches to preserving biodiversity.
- B.

Nature-based approaches can be effective ways to achieve conservation goals.
- C.

As indicated by a recent project, logjams help the blueback salmon thrive and reproduce.
- D.

Scientists now realize that nature-based conservation methods offer better long-term solutions to environmental issues than methods that are not nature-based do.

ID: 0c3c70ff Answer

Correct Answer: B

Rationale

Choice B is the best answer because it best states the main idea of the text: that nature-based approaches can be effective for achieving conservation goals. The text indicates that in many cases where conservationists are trying to protect ecosystems, their methods depend on natural processes or features. The text then gives an example of this phenomenon, a project with the Quinault Indian Nation that allowed logjams to form naturally in a river, creating spawning habitats for blueback salmon.

Choice A is incorrect. Although the text does suggest that the partnership with the Quinault Indian Nation was beneficial, this is not the central aim of the text; the text primarily argues that nature-based approaches to conservation can be effective. Choice C is incorrect. Although the text indicates that logjams are helpful to blueback salmon, the example of the blueback salmon project is included to illustrate the larger point made earlier in the text: that nature-based approaches to conservation are often effective. Choice D is incorrect. There is no evidence in the text to support a direct comparison of the efficacy of nature-based conservation approaches to other types of approaches. The text merely indicates that nature-based approaches can often be effective.

ID: eb5814a5

To understand how temperature change affects microorganism-mediated cycling of soil nutrients in alpine ecosystems, Eva Kaštovská et al. collected plant-soil cores in the Tatra Mountains at elevations around 2,100 meters and transplanted them to elevations of 1,700–1,800 meters, where the mean air temperature was warmer by 2°C. Microorganism-mediated nutrient cycling was accelerated in the transplanted cores; crucially, microorganism community composition was unchanged, allowing Kaštovská et al. to attribute the acceleration to temperature-induced increases in microorganism activity.

It can most reasonably be inferred from the text that the finding about the microorganism community composition was important for which reason?

- A. It provided preliminary evidence that microorganism-mediated nutrient cycling was accelerated in the transplanted cores.
- B. It suggested that temperature-induced changes in microorganism activity may be occurring at increasingly high elevations.
- C. It ruled out a potential alternative explanation for the acceleration in microorganism-mediated nutrient cycling.
- D. It clarified that microorganism activity levels in the plant-soil cores varied depending on which microorganisms comprised the community.

ID: eb5814a5 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it accurately describes why the finding about the microorganism community composition was important. The text describes an experiment by Eva Kaštovská and her team in which they collected plant-soil cores at one elevation and transplanted them to sites at a lower elevation, where the mean air temperature was warmer. Kaštovská and her team observed that microorganism-mediated nutrient cycling was accelerated in the transplanted cores and that "crucially, microorganism community composition was unchanged," which allowed the team to attribute the acceleration to changes in microorganism activity brought about by the difference in temperature. This strongly implies that the team wouldn't have been able to make that attribution otherwise, meaning that a change in microorganism composition represented another possible explanation for the acceleration that had to be ruled out.

Choice A is incorrect. Although the text says microorganism-mediated cycling of soil nutrients increased in the transplanted cores, this is unrelated to what's important about the finding that the microorganism composition didn't change—that it allowed the team to attribute the change in activity solely to the change in temperature. Choice B is incorrect. Although the text compares activity in one core at two different elevations, the text doesn't address changes in activity at various elevations over time. Choice D is incorrect. Although different microorganisms likely exhibit different levels of activity, the text indicates that there was no change in microorganism composition, and there is nothing in the text about different microorganisms having different activity levels.

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: a61a35f5

In 2019, 20 previously unknown moons were confirmed to be orbiting Saturn. Three of the moons have prograde orbits (orbiting in the direction the planet spins), and the other 17 have retrograde orbits (orbiting in the opposite direction of the planet’s spin). All but one of the 20 moons are thought to be remnants of bodies that orbited Saturn until they broke apart in collisions. Although the one exceptional moon orbits in the same direction as the planet’s spin, its orbit is highly eccentric compared to the rest, which may suggest that it has a different origin than the other 19 moons.

Based on the text, which choice best describes the moon with the eccentric orbit?

- A. It doesn’t have a retrograde orbit, but it likely has the same origin as the moons with retrograde orbits.
- B. Its orbit is so tilted with respect to the other moons’ orbits that it’s neither prograde nor retrograde.
- C. It has a prograde orbit that is likely the result of having collided with another body orbiting Saturn.
- D. It has a prograde orbit and may not be a remnant of an earlier body that orbited Saturn.

ID: a61a35f5 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes the moon with the eccentric orbit. The text indicates that three of the 20 newly discovered moons have prograde orbits, meaning that they orbit Saturn in the same direction as the planet’s spin, while the other 17 moons have retrograde orbits, meaning that they orbit Saturn in the opposite direction of the planet’s spin. The text then states that 19 of the 20 moons appear to be the remains of earlier bodies that orbited Saturn but were broken apart in collisions. The one exception is a moon that orbits Saturn in the same direction as the planet’s spin, meaning that the exceptional moon’s orbit is prograde. The text goes on to state that the exceptional moon’s orbit is so eccentric that the moon may have formed through a different process than the other 19 moons. The moon with the eccentric orbit, therefore, has a prograde orbit and may not be a remnant of an earlier body that orbited Saturn.

Choice A is incorrect because nothing in the text supports the idea that the moon with the eccentric orbit likely has the same origin as the moons with retrograde orbits. Although it’s true that the moon has a prograde orbit (and thus doesn’t have a retrograde orbit), the only information the text provides about the moon’s origin is that it may be different than the origin of the other 19 moons. Choice B is incorrect because the text states that the moon in question orbits Saturn in the same direction as the planet’s spin, meaning that the moon’s orbit is prograde, not that its orbit is neither prograde nor retrograde. Choice C is incorrect because the text merely notes that the moon in question has a prograde orbit without giving any indication of what likely caused that orbit.

Question Difficulty: Hard

Question ID 4e66210f

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 4e66210f

The following text is adapted from María Cristina Mena’s 1914 short story “The Vine-Leaf.”

It is a saying in the capital of Mexico that Dr. Malsufrido carries more family secrets under his hat than any archbishop. The doctor’s hat is, appropriately enough, uncommonly capacious, rising very high, and sinking so low that it seems to be supported by his ears and eyebrows, and it has a furry look, as if it had been brushed the wrong way, which is perhaps what happens to it if it is ever brushed at all. When the doctor takes it off, the family secrets do not fly out like a flock of parrots, but remain nicely bottled up beneath a dome of old and highly polished ivory.

Based on the text, how do people in the capital of Mexico most likely regard Dr. Malsufrido?

- A. Many have come to tolerate him despite his disheveled appearance.
- B. Few feel concerned that he will divulge their confidences.
- C. Some dislike how freely he discusses his own family.
- D. Most would be unimpressed by him were it not for his professional expertise.

ID: 4e66210f Answer

Correct Answer: B

Rationale

Choice B is the best answer. The text describes a saying in the capital that Malsufrido keeps more secrets than an archbishop. It also says that when he takes off his hat, “the family secrets do not fly out... but remain nicely bottled up,” suggesting that he will not betray his confidences.

Choice A is incorrect. This choice doesn’t reflect the text. While his hat is large and appears to have been brushed in the wrong direction, Dr. Malsufrido does not seem to be regarded as ill-dressed or disheveled. Choice C is incorrect. This choice is the opposite of what the text says. The secrets of families (his and others’) remain “bottled up” in his head. Choice D is incorrect. This choice isn’t supported by the text. His professional expertise is not discussed in the passage.

Question Difficulty: Hard

Question ID e67a5268

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: e67a5268

Having written the impassioned call to arms “Letter to the Spanish Americans” in 1791, Peruvian intellectual Juan Pablo Viscardo y Guzmán is often considered a forerunner for the independence movements in Latin America. But Viscardo’s role in history would have remained insignificant were it not for Venezuelan revolutionary Francisco de Miranda, who was handed the unpublished letter after Viscardo’s death. Miranda not only helped circulate the letter, but his edits and footnotes to the text position Miranda as a central figure in the text’s creation.

Which choice best states the main idea of the text?

- A. The original authorship of “Letter to the Spanish Americans” is disputed by contemporary historians.
- B. The majority of the most eloquently stated arguments in “Letter to the Spanish Americans” were written by Miranda.
- C. Miranda played a crucial role in influencing the content and distribution of “Letter to the Spanish Americans.”
- D. “Letter to the Spanish Americans” persuaded many people in Latin America to pursue national independence.

ID: e67a5268 Answer

Correct Answer: C

Rationale

Choice C is the best answer. The text describes how Miranda circulated, edited, and added footnotes to “Letter to the Spanish Americans,” and it claims that the letter and its author would have “remained insignificant” if it weren’t for Miranda’s efforts.

Choice A is incorrect. The text only says that Viscardo wrote the letter and that Miranda edited it: it never suggests that the original authorship of the letter is up for debate. Choice B is incorrect. This contradicts the text. The text says that Miranda edited and footnoted the letter, but it identifies Viscardo as the letter’s author. It also never identifies certain arguments as more eloquent than others. Choice D is incorrect. This is outside the scope of the text. The paragraph describes Miranda’s role in the creation and distribution of the letter, but it doesn’t get into the effects of the letter on other people.

Question Difficulty: Hard

Question ID 10691563

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 10691563

The following text is from Mick Herron’s 2023 novel *The Secret Hours*. The narrator is describing members of a government committee.

Finally, and adding much-needed gravitas, was Sir Winston Day, whose features seemed moulded to adorn a bust, or possibly a stamp, and whose forehead was so evidently bulging with grey matter that it would have been impertinent to inquire too closely into the actual achievements his half century of public service had produced. His recently published memoirs possibly cast light on this enigma, but given that such details were not provided until after the thirty-page mark, they might as well have remained state secrets.

©2023 by Mick Herron

- Based on the text, which choice best describes Sir Winston Day?
- A. He has the appearance of a distinguished figure, but it is uncertain whether he has accomplished anything to earn distinction.
 - B. He looks like a person worthy of respect, but his memoirs reveal that some of his actions were dishonorable.
 - C. He would be a celebrated public figure if his achievements did not have to be kept secret.
 - D. He has maintained a modest profile even though he has served the public capably for many years.

ID: 10691563 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it accurately describes Sir Winston Day as he is portrayed in the text. The text indicates that Sir Winston’s “features seemed moulded to adorn a bust, or possibly a stamp,” suggesting that he appeared distinguished. But the text also indicates that his “actual achievements” during his long public service constitute an “enigma,” or mystery, highlighting the point with a joke about Sir Winston’s uninteresting memoirs (any information about his achievements past the first thirty pages “might as well have remained state secrets” since, it’s implied, no one bothered to read that far). Thus, the text suggests that Sir Winston appears distinguished even though his known accomplishments, if any, are relatively few.

Choice B is incorrect because nothing in the text indicates that Sir Winston behaved dishonorably. Rather, the text indicates that his “actual achievements” during his long public service constitute an enigma, or mystery, suggesting that he may have done very little, not that what he has done was disreputable. Choice C is incorrect. Although the text says that Sir Winston’s achievements that appear “after the thirty-page mark” in his memoirs “might as well have remained state secrets,” this is a joke about the public’s lack of interest in the memoirs, not a sincere claim that secrecy was intended. Choice D is incorrect because the text does not associate Sir Winston with modesty, nor does it suggest that he was a capable public servant. Rather, by indicating that Sir Winston’s “features seemed moulded to adorn a bust, or possibly a stamp,” the text suggests that Sir Winston’s appearance communicated importance, not modesty. The text further indicates that his “actual achievements” during his long public service constitute an enigma, or mystery, suggesting that he may have done very little, not that he was particularly capable.

Question Difficulty: Hard

Question ID b3c62fd2

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: b3c62fd2

Jürgen Kocka and other historians of capitalism rarely discuss domestic capitalism in Africa before the period of European colonization, implicitly presenting capitalism as external to and imposed on Africa. Crislayne Alfagali and other Africanist scholars have shown, however, that in parts of Africa, returns-focused investment, the establishment of open markets for wage labor, and other features of capitalism predated colonization. One reason for this discrepancy is that historians of capitalism tend to focus on longitudinal economic data drawn from archival records, which do not exist for much of precolonial Africa.

Which statement about Alfagali and other Africanist scholars is best supported by information in the text?

- A. They likely make use of different types of evidence than historians of capitalism typically rely on.
- B. They likely differ from historians of capitalism in the methods they use to derive longitudinal economic data from archival records.
- C. They likely have a different view about which activities should be considered capitalist in nature than historians of capitalism do.
- D. They likely view capitalism as having been more beneficial for Africa than historians of capitalism do.

ID: b3c62fd2 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it presents a statement about Alfagali and other Africanist scholars that is supported by the text. The last sentence of the text explains that historians of capitalism generally rely on a type of data that requires "archival records, which do not exist for much of precolonial Africa." Nevertheless, Alfagali and other Africanist scholars have demonstrated that features of capitalism including "returns-focused investment,...open markets for wage labor, and other features of capitalism" existed in parts of Africa before colonization. Because archival records typically used by historians of capitalism aren't available for precolonial Africa, Alfagali and other Africanist scholars of precolonial capitalism in Africa likely used atypical sources for their studies.

Choice B is incorrect because the text states that archival records containing longitudinal economic data "do not exist for much of precolonial Africa." If these records don't exist for precolonial Africa, then Alfagali and other Africanist scholars couldn't derive data from them by any method. Choice C is incorrect because the text doesn't suggest that Alfagali and other Africanist scholars define capitalism differently than other historians of capitalism do. On the contrary, the text simply asserts that specific features they found, such as "returns-focused investment [and] open markets for wage labor," are "features of capitalism," which implies scholarly agreement that these activities are capitalist in nature. Choice D is incorrect because the text doesn't indicate any effects of capitalism in Africa, positive or negative. Rather, the text explains why precolonial Africa has been omitted from mainstream histories of capitalism and presents work by Alfagali and other Africanist scholars that challenges and corrects the historical record of precolonial capitalism.

Question Difficulty: Hard

Question ID bea987a6

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: bea987a6

Several scholars have argued that conditions in England in the late ninth through early eleventh centuries—namely, burgeoning literacy amid running conflicts between England’s Anglo-Saxon kingdoms and Danish invaders—were especially conducive to the production of the Old English epic poem *Beowulf*, and they have dated the poem’s composition accordingly. It is not inconceivable that *Beowulf* emerged from such a context, but privileging contextual fit over the linguistic evidence of an eighth- or even seventh-century composition requires a level of justification that thus far has not been presented.

Which choice best states the main idea of the text?

- A. Although there are some grounds for believing that *Beowulf* was composed between the late ninth and early eleventh centuries, advocates for that view tend to rely on evidence that has been called into question by advocates for an earlier date.
- B. Although several scholars have dated *Beowulf* to the late ninth through early eleventh centuries, others have argued that doing so privileges a controversial interpretation of the social conditions of the period.
- C. Although *Beowulf* fits well with the historical context of England in the late ninth through early eleventh centuries, it fits equally well with the historical context of England in the seventh and eighth centuries.
- D. Although the claim of a late ninth- through early eleventh-century composition date for *Beowulf* has some plausibility, advocates for the claim have not compellingly addressed evidence suggesting an earlier date.

ID: bea987a6 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main idea of the text. The text states that some scholars have dated the composition of *Beowulf* to the late ninth through early eleventh centuries due to the poem’s fit with that period’s historical context. The text goes on to say that while it is “not inconceivable that *Beowulf* emerged from such a context”—that is, it is possible that *Beowulf* was composed during the late ninth through eleventh centuries—there is linguistic evidence that the poem was composed earlier, in the seventh or eighth century. According to the text, favoring the historical context over the linguistic evidence requires justification that scholars have not yet supplied. In other words, the text suggests that scholars who favor the later composition date need to explain why the poem’s fit with historical context should take precedence over the linguistic evidence, but they have not yet done so. Thus, the main idea of the text is that while there is some plausibility to the later composition date, advocates for the later date have not compellingly addressed evidence suggestive of an earlier date.

Choice A is incorrect because the text says that scholars who date the poem to the late ninth through early eleventh centuries have failed to account for the linguistic evidence that the poem may have been composed earlier, not that the evidence those scholars cite in favor of their view is unreliable or that anyone has cast doubt on that evidence. In other words, the text does not suggest that there are problems with the evidence cited by advocates of the later composition date, only that there is other evidence of an earlier composition date that those advocates need to consider. Choice B is incorrect because nothing in the text suggests that those scholars who date the poem to the late ninth through early eleventh centuries are giving priority to a controversial view of the social conditions at that time. The text makes no reference to any controversy about how scholars interpret that historical period. Instead, the text suggests that scholars who date the poem on the basis of its fit with the historical

context of England in the late ninth through early eleventh centuries have failed to account for linguistic evidence that the poem may have been composed earlier. Choice C is incorrect because the text says nothing about how well the poem fits the historical context of England in the seventh and eighth centuries, let alone that it fits that historical context as well as it fits the historical context of the late ninth through early eleventh centuries. Rather, the text says that there is linguistic evidence that the poem may have been composed in the seventh or eighth century.

Question Difficulty: Hard

Question ID e4c9f55e

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: e4c9f55e

In 2018, scientists discovered an immense aggregation of *Muusoctopus robustus* (pearl octopuses) along a hydrothermal vent 3,200 meters beneath the ocean’s surface. Water temperatures at this site—named the Octopus Garden—climb as high as 11°C, much warmer than the ambient 1.6°C typical at this depth. Based on observations made over three years, scientists concluded that temperatures at the site likely confer reproductive benefits and that the site is used exclusively for reproduction—6,000 *M. robustus* adults, hatchlings, and eggs were observed at the garden, but no juveniles were present.

- Which statement about *M. robustus* and the Octopus Garden is best supported by the text?
- A. *M. robustus* leave the Octopus Garden upon reaching an intermediary stage of development.
 - B. The *M. robustus* population at the Octopus Garden remains stable despite variations in water temperature.
 - C. *M. robustus* nests in the Octopus Garden contain on average fewer but larger eggs than nests at similar ocean depths.
 - D. The Octopus Garden provides an ideal feeding ground for *M. robustus* hatchlings.

ID: e4c9f55e Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most logically completes the text’s discussion of the *M. robustus* population at the Octopus Garden. The text states that the scientists concluded that the site is likely used only for reproduction because over three years they saw many adults, freshly hatched octopuses, and eggs but didn’t see any juveniles. This suggests that the *M. robustus* octopuses that hatch at the Octopus Garden leave the site when they reach an intermediary state of development, returning only as adults for reproductive purposes.

Choice B is incorrect because the text never discusses the stability of the *M. robustus* population at the site, only that the scientists observed 6,000 adults, hatchlings, and eggs there. Further, the text presents the site’s temperatures as likely beneficial.

Choice C is incorrect because the text doesn’t provide any details about the eggs at the site and makes no mention of nests; it indicates only that eggs are present along with hatchlings and adults. Choice D is incorrect because the text makes no mention of the hatchlings feeding at the Octopus Garden, indicating only that the temperatures at the site are probably beneficial and that the site is likely used for reproduction.

Question Difficulty: Hard

Question ID 18d2dfab

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 18d2dfab

Elizabeth Asiedu has identified a negative correlation between the share of developing countries’ economies derived from natural-resource extraction and those countries’ receipts of foreign investment. This may appear counterintuitive—resource extraction requires initial investments (in extractive technology, for instance) at scales best met by multinational corporations—but Asiedu notes that natural-resource industries’ boom-bust cycle can destabilize local currencies and increase developing countries’ vulnerability to external shocks, creating levels of uncertainty to which foreign investors are typically averse.

Which choice best states the main idea of the text?

- A. Although it may seem surprising that foreign investment declines in developing countries as natural-resource extraction makes up a larger share of those countries’ economies, that decline happens because resource extraction requires initial investments too large for foreign investors to supply.
- B. Although developing countries tend to become less dependent on foreign investment as natural-resource industries make up a larger share of their economies, this change may not occur if the boom-bust cycle of those industries destabilizes local currencies or increases countries’ vulnerability to external shocks.
- C. Although one might expect that foreign investment would increase as natural-resource extraction makes up a larger share of developing countries’ economies, the opposite happens because heavy reliance on natural resources can lead to unattractive conditions for investors.
- D. Although foreign investors tend to avoid initial investments in natural-resource industries in developing countries, foreign investment may increase significantly as those industries stabilize and the risks associated with them decline.

ID: 18d2dfab Answer

Correct Answer: C

Rationale

Choice C is the best answer because it accurately states the main idea of the text. According to the text, contrary to what some might expect, foreign investment is typically lower in developing countries whose economies are more dependent on natural-resource extraction. The text explains that high reliance on natural-resource extraction can subject a developing country to economic shocks that can destabilize the local currency and introduce economic uncertainty that tends to keep investors away. In other words, although we may think otherwise, foreign investors are less willing to invest in projects in developing countries whose economies are heavily dependent on natural-resource extraction because those economies tend to exhibit instability that investors want to avoid.

Choice A is incorrect. The text does indicate that foreign investment is typically lower in developing countries whose economies are more dependent on natural-resource extraction; the text further indicates that natural-resource extraction requires substantial initial investments (to acquire things like required technologies) for which there are fewer investors willing to participate at this stage than one might think. But the text does not implicate the cost of these initial investments as a reason why foreign investment is less widely available than some might think. Choice B is incorrect. The text indicates that greater dependence on natural-resource extraction makes a developing country less appealing to foreign investors because of associated economic instability. Rather than arguing that the goal of developing countries is to become less dependent on foreign investment, as the

phrasing of choice B suggests, the text focuses only on why foreign investors become less involved with such countries, which suggests that more investment would be preferable. Choice D is incorrect. Although the text indicates that natural-resource extraction requires substantial initial investments (to acquire things like required technologies) and that there are fewer likely investors willing to participate at this stage than one might think, the text does not address what investors are likely to do over time as the industry stabilizes itself.

Question Difficulty: Hard

Question ID 5544272f

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 5544272f

In a study of new technology adoption, Davit Marikyan et al. examined negative disconfirmation (which occurs when experiences fall short of one’s expectations) to determine whether it could lead to positive outcomes for users. The team focused on established users of “smart home” technology, which presents inherent utilization challenges but tends to attract users with high expectations, often leading to feelings of dissonance. The researchers found that many users employed cognitive mechanisms to mitigate those feelings, ultimately reversing their initial sense of disappointment.

Which choice best states the main idea of the text?

- A. Research suggests that most users of smart home technology will not achieve a feeling of satisfaction given the utilization challenges of such technology.
- B. Although most smart home technology is aimed at meeting or exceeding users’ high expectations, those expectations in general remain poorly understood.
- C. Research suggests that users with high expectations for a new technology can feel content with that technology even after experiencing negative disconfirmation.
- D. Although negative disconfirmation has often been studied, little is known about the cognitive mechanisms shaping users’ reactions to it in the context of new technology adoption.

ID: 5544272f Answer

Correct Answer: C

Rationale

Choice C is the best answer. The passage begins by describing the study, and concludes with its results: "many users employed cognitive mechanisms to mitigate those feelings [of negative disconfirmation]."

Choice A is incorrect. This is the opposite of what the text claims. Rather, the researchers found that "many users" reversed "their initial sense of disappointment." Choice B is incorrect. This choice doesn’t reflect the text. What the expectations of smart home tech users are is not discussed. Choice D is incorrect. This choice doesn’t reflect the text. How often these topics have been studied is not mentioned.

Question Difficulty: Hard

Question ID cdd766df

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: cdd766df

In their 2022 paper, Christos Dimopoulos et al., having granted that the existence of antigravity—in which antimatter and matter repel rather than attract each other—lacked affirmative experimental support, rightly argued that such antigravity was worth considering on theoretical grounds given that evidence against it was similarly lacking. But a 2023 report by an international team of researchers details the first direct ballistic observations of antihydrogen atoms under gravity inside a CERN particle accelerator. Corresponding most closely to predictions under gravitational attraction, these observations were thoroughly inconsistent with antigravity.

Which choice best states the main idea of the text?

- A. Antihydrogen ballistics observations were conducted at CERN to test specific conclusions about antigravity presented in the 2022 paper by Dimopoulos et al.
- B. Although theoreticians were justified in studying antigravity before the release of the 2023 report, the report’s findings suggest that the rationale for theoretical consideration offered in the 2022 paper by Dimopoulos et al. is no longer applicable.
- C. The theoretical approach represented in the 2022 paper by Dimopoulos et al. assumed that unambiguous proof of antigravity would not be achievable, but the results in the 2023 report undermine that assumption.
- D. Before 2023, researchers’ inordinate focus on theoretical considerations hindered the development of the experimental regimen for direct antihydrogen ballistics observations.

ID: cdd766df Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately states the main idea of the text. The text begins by acknowledging that in 2022, Dimopoulos et al. were justified in arguing for antigravity on theoretical grounds because although there was no experimental evidence supporting its existence at that time, there was no evidence contradicting its existence either. The text then introduces the 2023 report describing an experiment that produced observations "thoroughly inconsistent with antigravity." Thus, the main idea is that while the study of antigravity was theoretically justified before the 2023 report (due to lack of evidence against it), the report’s findings undermine the rationale for such theoretical consideration since there is now evidence against this hypothetical phenomenon.

Choice A is incorrect. Although antihydrogen ballistics observations were conducted at CERN, the text provides no evidence that they were conducted to test conclusions in Dimopoulos et al.’s 2022 paper. Rather, the text presents the 2023 report as new evidence that contradicts the existence of the hypothetical phenomenon that Dimopoulos et al. had considered. Choice C is incorrect because the text doesn’t suggest that Dimopoulos et al. assumed that unambiguous proof of antigravity would be unattainable. Rather, the text states that they argued antigravity was worth considering theoretically because evidence against it was lacking at that time. At the same time, the results in the 2023 report do not undermine but strengthen the idea that the proof of antigravity might not be achievable. Choice D is incorrect because the text doesn’t suggest that there was an "inordinate focus on theoretical considerations" before 2023 or that such a focus hindered the development of experimental methods. In fact, the text describes Dimopoulos et al.’s position regarding the theoretical consideration of antigravity as "rightly argued," indicating

approval of their approach given the absence of experimental evidence at that time.

Question Difficulty: Hard

Question ID 4c18f6b4

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 4c18f6b4

Poetry in Classical Nahuatl, the language of the Aztec Empire, relies on *difrasismo*, or a parallel noun construction that conventionally operates as a single metaphor. For example, the common difrasismo *in cuauhtli in ocelotl* (literally, “the eagle, the jaguar”) signifies “warrior.” The device’s function is both formal—providing structure to lines of verse—and ritual: semantic relations among the two nouns and the concept they signify can be tenuous, as in the previous example, such that difrasismos are often only intelligible according to the conceptual associations observed in Aztec ceremonial culture.

Which statement about the difrasismo *in cuauhtli in ocelotl* is most strongly supported by the text?

- A. Its metaphorical significance derives from the semantic equivalence of the two nouns constituting the difrasismo.
- B. Its unintelligibility may cause its formal function within a line of verse to go unnoticed by present-day readers.
- C. Its apparent obscurity can be resolved when considered in the proper cultural context.
- D. Its frequency in Classical Nahuatl poetry confirms its intelligibility to the Aztec audience.

ID: 4c18f6b4 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it presents a statement about the difrasismo *in cuauhtli in ocelotl* that is directly supported by the text. The text begins by describing difrasismo, a device used in Classical Nahuatl poetry. The text then mentions the device’s two functions: a formal one (giving structure to lines of verse) and a ritualistic one. The text indicates that the relation between the words in a difrasismo may appear tenuous without the additional information supplied by Aztec ceremonial culture but that the meaning becomes intelligible in the context of that information. Therefore, the difrasismo’s apparent obscurity can be resolved when considered in the proper cultural context.

Choice A is incorrect because the text doesn’t indicate that the two nouns used in a difrasismo are semantically equivalent; instead, the text indicates that the two nouns used in a difrasismo make up a single metaphor whose meaning is often intelligible only in the context of information supplied by Aztec ceremonial culture. Choice B is incorrect because the text doesn’t indicate that there’s a relationship between the formal function of the difrasismo and the difrasismo’s intelligibility. Additionally, the text suggests that present-day readers who are familiar with Aztec ceremonial culture wouldn’t find the difrasismo to be unintelligible. Choice D is incorrect because the text doesn’t indicate that the frequency of difrasismo’s use in Classical Nahuatl is a necessary feature of intelligibility: the text indicates that an infrequently used difrasismo would presumably also be intelligible to members of an Aztec audience who are sufficiently familiar with Aztec ceremonial culture.

Question Difficulty: Hard

Question ID ba29d116

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: ba29d116

Electronic music pioneer Wendy Carlos is credited with the music for three feature films: *A Clockwork Orange* (1971), *The Shining* (1980), and *Tron* (1982). However, her musical score for *A Clockwork Orange* is mostly made up of her arrangements of Ludwig van Beethoven’s work. Also, almost all the music that she and Rachel Elkind composed for *The Shining* was unused by director Stanley Kubrick. It did not appear in the film. Of the three films, *Tron* is the one in which audiences can hear the most of Carlos’s original compositions.

Which choice best states the main idea of the text?

- A. Of the three films for which Carlos is credited, *Tron* features the most original music from her.
- B. The director of *The Shining* used most of the music that Carlos composed for it.
- C. Beethoven is widely considered to be a more important composer than Carlos.
- D. Carlos is a notable innovator among film composers in the 1970s and 1980s.

ID: ba29d116 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it best states the main idea of the text. The text indicates that Wendy Carlos scored three feature films: *A Clockwork Orange*, *The Shining*, and *Tron*. It also indicates that Carlos’s work on *A Clockwork Orange* consisted primarily of electronic arrangements of Beethoven compositions and that very little of what she and Rachel Elkind composed for *The Shining* was used in the film. But the soundtrack for *Tron* consists largely of music composed by Carlos, so it contains more of her original music than do the soundtracks for the other two films. Thus, the main idea of the text is that of the three films for which Carlos is credited, *Tron* features the most original music from her.

Choice B is incorrect because it directly contradicts the text’s claim that "very little of what she and Rachel Elkind composed for *The Shining* was used in the film." Choice C is incorrect because the text doesn’t address the perceived quality of different composers, instead, it discusses how much of Carlos’s original work was used in each of the three films she scored. Choice D is incorrect because it doesn’t relate to any of the major themes of the text: the work Wendy Carlos did for three feature films, how much of that work was composed by Carlos, and how much of her original work was ultimately used in the film.

Question Difficulty: Hard

Question ID ff953239

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: ff953239

The recovery of a 1,000-year-old Chinese shipwreck in the Java Sea near present-day Indonesia has yielded a treasure trove of artifacts, including thousands of small ceramic bowls. Using a portable X-ray fluorescence analyzer tool, Lisa Niziolek and her team were able to detect the chemical composition of these bowls without damaging them. By comparing the chemical signatures of the bowls with those of the materials still at old Chinese kiln sites, Niziolek and her team can pinpoint which Chinese kilns likely produced the ceramic bowls.

Which choice best states the main idea of the text?

- A. Because of a new technology, researchers can locate and recover more shipwrecks than they could in the past.
- B. Researchers have been able to identify the location of a number of Chinese kilns in operation 1,000 years ago.
- C. With the help of a special tool, researchers have determined the likely origin of bowls recovered from a shipwreck.
- D. Before the invention of portable X-ray fluorescence, researchers needed to take a small piece out of an artifact to analyze its components.

ID: ff953239 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately states the main idea of the text. According to the text, thousands of ceramic bowls were found in a recovered Chinese shipwreck. The text goes on to say that Niziolek and her team used a special tool, a portable X-ray fluorescence analyzer, to determine the bowls’ chemical signatures. Comparing these chemical signatures with the chemical signatures of materials they had collected from old Chinese kiln sites, the text says, allowed the researchers to identify which kilns had produced the bowls. In other words, the researchers determined the bowls’ origin.

Choice A is incorrect. Although the text indicates that the researchers used technology in the form of a portable X-ray fluorescence analyzer, it doesn’t specifically state that this technology is new. In addition, the text says that Niziolek and her team used the tool to determine the chemical composition of bowls that were found in a Chinese shipwreck, not to locate and recover the shipwreck itself. There’s no indication in the text that a new technology can help researchers locate and recover shipwrecks. Choice B is incorrect because the text indicates that the researchers collected materials from old kiln sites for chemical comparison with the ceramic bowls, which means that the researchers must have already known the location of those kiln sites. Rather than identifying the location of the kilns, the researchers determined which kilns in operation 1,000 years ago had likely produced the bowls that were found in the shipwreck. Choice D is incorrect. Although the text says that using a portable X-ray fluorescence analyzer tool enabled Niziolek and her team to analyze artifacts in the form of ceramic bowls without damaging them, the text doesn’t discuss how researchers analyzed artifacts before this tool was invented. Moreover, the point that the bowls were left undamaged isn’t the text’s main idea. Rather, it’s a detail that’s provided to develop the main idea, which is that the researchers used a special tool to determine where the bowls had been produced.

Question Difficulty: Medium

Question ID bda73a5a

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: bda73a5a

Archaeologists have discovered a runestone in Norway that may contain the earliest example of written words in Scandinavia. Carbon dating at the discovery site revealed that the stone was likely carved between 1 and 250 CE. Runologist Kristel Zilmer believes the stone will be helpful in learning more about the use of runic alphabets in early Iron Age Scandinavia.

Which choice best states the main topic of the text?

- A. Battles of the Iron Age
- B. A runestone found in Norway
- C. A new method for dating rock samples
- D. The research interests of Kristel Zilmer

ID: bda73a5a Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately states the main topic of the text. The text begins by stating that archaeologists in Norway have discovered what may be the oldest known runestone (a stone with an inscription in the runic alphabets used in the region in ancient times). According to the text, the object was created between 1 and 250 CE. The text then mentions a researcher who comments on the runestone’s significance to the study of runic alphabets. Thus, the main focus throughout the text is a runestone found in Norway.

Choice A is incorrect because the text mentions the Iron Age only to indicate the era when the runestone was created and when runic alphabets were in use; there’s no discussion of battles during this era. Choice C is incorrect because the text mentions the carbon dating method just once and does so only to indicate the age of the runestone; moreover, the text doesn’t suggest that this method is new. Choice D is incorrect. Although the text indicates that Zilmer is a runologist, or a scholar of runestones, it does so in a single sentence, so Zilmer’s scholarly interests are therefore not a primary focus of the text.

Question Difficulty: Medium

Question ID 23c33e5e

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 23c33e5e

Recently, scientists looked at data collected by NASA’s InSight lander to learn more about seismic activity on Mars, known as marsquakes. The data show that the marsquakes all started from the same location on the planet. This discovery was surprising to scientists, as they expected that the marsquakes would originate from all over the planet because of the cooling of the planet’s surface. Now, scientists believe that there could be areas of active magma flows deep beneath the planet’s surface that trigger the marsquakes.

According to the text, what was surprising to scientists studying the seismic activity data from NASA’s InSight lander?

- A. The surface temperature of Mars has been rising.
- B. There were different types of seismic waves causing marsquakes.
- C. NASA’s InSight lander collected less data than scientists had expected.
- D. All the marsquakes started from the same location on the planet.

ID: 23c33e5e Answer

Correct Answer: D

Rationale

Choice D is the best answer because it presents a statement about what surprised the scientists that is supported by the text. The text states that the marsquakes described in the data from NASA’s InSight lander originated from the same location on Mars. The text goes on to say that because they had expected the opposite (that marsquakes would originate from all over the planet) this discovery surprised the scientists.

Choice A is incorrect because the text doesn’t say that the data from NASA’s InSight lander revealed any surprising information about the planet’s surface temperature. Instead, the text mentions the cooling of Mars’s surface as a reason the scientists expected that marsquakes had multiple origins. In addition, cooling would indicate that the temperature has been falling rather than rising. Choice B is incorrect. Although the text indicates that by studying seismic activity scientists found a possible explanation for what causes marsquakes, the text doesn’t say that they discovered that marsquakes are caused by different types of seismic waves. Rather, the text states that based on the data from NASA’s InSight lander, scientists now believe that this seismic activity happens because of areas of active magma that flow below the planet’s surface. Choice C is incorrect because the text doesn’t discuss the amount of data NASA’s InSight lander collected or whether scientists who studied the data found the amount to be as expected. Instead, the text focuses on what the data revealed about where on Mars the marsquakes originated.

Question Difficulty: Medium

Question ID aefb6235

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: aefb6235

NASA’s Aspera mission, led by Carlos Vargas, will investigate the circumgalactic medium (CGM), the huge swaths of low-density gas that fill and surround galaxies. Specifically, the team will focus on portions of the gas that exist in a “warm-hot” phase: these portions haven’t previously been observable but are thought to fuel new star formation and hold most of the mass that makes up a galaxy. Using a telescope capable of revealing these parts of the CGM, the Aspera mission should help answer long-standing questions about how galaxies emerge, change, and even interact.

- Which choice best states the main idea of the text?
- A. As the leader of NASA’s Aspera mission, Vargas will be the first person to investigate the makeup of the CGM.
 - B. Although galaxies that are surrounded by the CGM have been studied, researchers have been unable to directly observe low-density gas in the CGM in the “warm-hot” phase.
 - C. Researchers don’t yet have a complete understanding of the process of galaxy evolution but have raised the possibility that galaxies interact with each other at times.
 - D. The Aspera mission is expected to produce the first direct observations of CGM gas in the “warm-hot” phase, which likely has an important role in the evolution of galaxies.

ID: aefb6235 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main idea of the text. The text begins by mentioning NASA’s Aspera mission, which will investigate the low-density gas that makes up the circumgalactic medium (CGM). According to the text, this mission will focus on a portion of the CGM’s gas that exists in a “warm-hot” phase; this “warm-hot” gas has not been previously observed, but it is thought to make up most of the mass of galaxies and play a part in star formation. Finally, the text mentions a telescope capable of examining this previously unobservable “warm-hot” gas: the Aspera mission will use this telescope in the hope of answering questions about galaxy formation and change. Therefore, the main idea of the text is that the Aspera mission is likely to produce the first direct observations of CGM gas in the “warm-hot” phase, which likely has an important role in the evolution of galaxies.

Choice A is incorrect. Although this choice mentions the Aspera mission, names its leader, and generally states the mission’s purpose, it does not reference the “warm-hot” gas or fully convey the reason why the Aspera mission is significant. Choice B is incorrect. Although this choice mentions the “warm-hot” gas that makes up a portion of the CGM, it does not reference the Aspera mission or describe its importance. The text also does not mention that galaxies surrounded by the CGM have been studied. Choice C is incorrect. Although this choice describes a problem related to the CGM that researchers have been attempting to solve and presents the speculation of those researchers, it does not mention the Aspera mission or describe its purpose.

Question Difficulty: Medium

Question ID f48d9861

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: f48d9861

Cats can judge unseen people’s positions in space by the sound of their voices and thus react with surprise when the same person calls to them from two different locations in a short span of time. Saho Takagi and colleagues reached this conclusion by measuring cats’ levels of surprise based on their ear and head movements while the cats heard recordings of their owners’ voices from two speakers spaced far apart. Cats exhibited a low level of surprise when owners’ voices were played twice from the same speaker, but they showed a high level of surprise when the voice was played once each from the two different speakers.

According to the text, how did the researchers determine the level of surprise displayed by the cats in the study?

- A. They watched how each cat moved its ears and head.
- B. They examined how each cat reacted to the voice of a stranger.
- C. They studied how each cat physically interacted with its owner.
- D. They tracked how each cat moved around the room.

ID: f48d9861 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it explains how the researchers determined the level of surprise displayed by the cats in the study. The text states that Saho Takagi and colleagues played recordings of the voice of each cat’s owner and measured how surprised the cat was by the recording based on how it moved its ears and head.

Choice B is incorrect because, as the text explains, the recordings played for each cat in the study were of the voice of the cat’s owner, not a stranger’s voice. Choice C is incorrect because the text explains that during the study, the cats didn’t interact directly with their owners; instead, the cats listened to recordings of their owners’ voices. Choice D is incorrect because the text doesn’t indicate that the researchers monitored the cats’ movement around the room in which the study was conducted.

Question Difficulty: Medium

Question ID 1f246569

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 1f246569

Using the Stratospheric Observatory for Infrared Astronomy (SOFIA), a team of astronomers mapped out the magnetic field of G47, one of the Milky Way’s galactic bones (dense clouds of gas and dust that run through the middle of the arm of a spiral galaxy). Surprisingly, the map revealed a magnetic field with no clear pattern or direction. The researchers had expected the magnetic field to be similar to the more uniform fields seen in galactic bones in other arms of the Milky Way.

According to the text, what was surprising about the researchers’ mapping of the magnetic field of galactic bone G47?

- A. It showed a weaker magnetic field than expected.
- B. It implied that previous mappings of the magnetic field were inaccurate.
- C. It produced magnetic field measurements similar to those for other galactic bones.
- D. It revealed a magnetic field that wasn’t uniform.

ID: 1f246569 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it presents the point about the magnetic field mapping that the text describes as surprising. The text indicates that a team of astronomers mapped the magnetic field of G47, a galactic bone in the Milky Way, and that the mapping "surprisingly" revealed "no clear pattern or direction" in the magnetic field. The text then adds that the researchers had thought the magnetic field would be as uniform as the magnetic fields of other galactic bones in the Milky Way are. In other words, the researchers were surprised that the mapping revealed a magnetic field that wasn’t uniform.

Choice A is incorrect because the text doesn’t indicate that the mapping surprisingly showed a weaker magnetic field than the researchers had expected. The text makes no mention of the magnetic field’s strength, only its lack of a clear pattern or direction. Choice B is incorrect because the text doesn’t indicate that the magnetic field mapping suggested to researchers that previous mappings were inaccurate. Although the text states that the mapping didn’t show what researchers had expected based on their knowledge of other magnetic fields, there’s no indication that G47’s magnetic field had ever been mapped before. Choice C is incorrect because the text indicates that the researchers were surprised that the magnetic field was different from, not similar to, the magnetic fields of other galactic bones; the text states that because other galactic bones in the Milky Way are more uniform, the researchers had expected the magnetic field of G47 to be more uniform than it turned out to be.

Question Difficulty: Medium

Question ID 798a9aa8

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 798a9aa8

Businesses selling clothing and other fashion items face obstacles in trying to forecast how much product to order: tastes and styles change quickly, while manufacturing clothing takes a significant amount of time. Researchers Youran Fu and Marshall Fisher have found that combining sellers’ own data with information gathered from social media can dramatically improve the accuracy of such forecasts—by 24 to 57 percent in the cases they directly studied. Better predictions mean demand is easier to meet without retailers becoming overstocked.

Which choice best states the main idea of the text?

- A. Using multiple data sources can enhance the ability of sellers in the fashion industry to anticipate demand.
- B. Social media is revolutionizing how both sellers and researchers view the fashion industry.
- C. Becoming overstocked is the main preoccupation of sellers trying to forecast demand for fashion items.
- D. Retailers can use their own data to accurately predict how tastes and styles are evolving.

ID: 798a9aa8 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states the main idea of the text. The text explains that fashion retailers face challenges in forecasting product demand due to rapidly changing tastes and lengthy manufacturing times. It then presents research by Fu and Fisher showing that combining retailers’ own data with social media information significantly improves forecast accuracy. The text concludes by noting that better predictions help retailers meet demand without becoming overstocked. Thus, the main idea is that using multiple data sources (retailers’ own data combined with social media information) can enhance fashion retailers’ ability to anticipate demand.

Choice B is incorrect because the text doesn’t claim that social media is revolutionizing, or fundamentally changing, how sellers and researchers view the fashion industry. The text never addresses the way the fashion industry is viewed; rather, it discusses a practical approach sellers in the industry can take to better match production with demand. Choice C is incorrect. Although avoiding overstocking is mentioned as a benefit of an approach that can help fashion sellers better predict demand, the text doesn’t focus on overstocking or characterize it as the main concern of sellers. Rather, the text is focused on discussing the approach itself. Choice D is incorrect because the text suggests that fashion sellers encounter obstacles when using their own data to try to forecast demand as tastes and styles change; the text focuses on the idea that instead of using their own data alone, retailers should combine their own data with social media information to more accurately forecast demand.

Question Difficulty: Medium

Question ID a901c1d5

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: a901c1d5

Choctaw/Cherokee artist Jeffrey Gibson turns punching bags used by boxers into art by decorating them with beadwork and elements of Native dressmaking. These elements include leather fringe and jingles, the metal cones that cover the dresses worn in the jingle dance, a women’s dance of the Ojibwe people. Thus, Gibson combines an object commonly associated with masculinity (a punching bag) with art forms traditionally practiced by women in most Native communities (beadwork and dressmaking). In this way, he rejects the division of male and female gender roles.

Which choice best describes Gibson’s approach to art, as presented in the text?

- A. He draws from traditional Native art forms to create his original works.
- B. He has been influenced by Native and non-Native artists equally.
- C. He finds inspiration from boxing in designing the dresses he makes.
- D. He rejects expectations about color and pattern when incorporating beadwork.

ID: a901c1d5 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately describes Gibson’s approach to art. As the text explains, Gibson, who is Cherokee and Choctaw, transforms punching bags into art pieces by applying (or attaching) to them beadwork and elements of Native dressmaking, including leather fringe and the jingles of the jingle dress. The text goes on to say that in most Native communities, the art forms of beadwork and dressmaking are traditionally practiced by women. Therefore, Gibson’s approach to art consists of creating original works by drawing from traditional Native art forms.

Choice B is incorrect. Because Gibson incorporates Native art forms into his own original artwork, it can be inferred that he has been influenced by other Native artists, but the text never suggests that non-Native artists have influenced him. Choice C is incorrect because the text doesn’t indicate that Gibson designs dresses influenced by boxing but instead that he turns punching bags, which are used in boxing, into works of art by applying elements of Native dressmaking to them. Choice D is incorrect. Although Gibson does incorporate beadwork into his art, the text never mentions the colors or patterns that he uses or suggests that his art defies the expectations that people might have about color and pattern in beadwork.

The following text is from Mark Haber’s 2022 novel *Saint Sebastian’s Abyss*. The narrator and Schmidt are both art critics.

When my first wife admitted to Schmidt over dinner that she didn’t find art, painting in particular, especially compelling, Schmidt winced, set down his fork, and sighed dramatically; he then excused himself, explaining an appointment he’d forgotten about had suddenly and inexplicably been remembered, while making it abundantly clear there was no appointment at all.

©2022 by Mark Haber

Based on the text, what is notable about Schmidt’s behavior?

- A. Schmidt is only given to theatrical behavior when in the company of the narrator and his first wife.
- B. Schmidt’s absentmindedness regarding his schedule is uncharacteristic of him.
- C. Schmidt’s departure is occasioned by the resumption of a previous disagreement with the narrator’s first wife about a particular painting.
- D. Schmidt conveys his feelings about one of his dining companions without explicitly stating them.

ID: 6bef385a Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes what is notable about Schmidt’s behavior. According to the text, when the narrator’s first wife admits she doesn’t find art particularly compelling, Schmidt responds by wincing, sighing dramatically, and abruptly leaving dinner with an obviously false excuse about a remembered appointment. The narrator makes it clear that there is no actual appointment and that the excuse is merely a pretense. Through these actions—the physical reactions of wincing and sighing, followed by the transparent excuse to leave—Schmidt clearly communicates his disapproval of the wife without directly stating his feelings about her.

Choice A is incorrect because the text provides no evidence that Schmidt’s theatrical behavior—wincing, sighing dramatically, and abruptly leaving dinner—is unique to situations involving the narrator and his first wife. The text describes only one interaction involving Schmidt, so there’s no basis for determining whether his dramatic reactions are typical of him in all situations or limited to this particular social context. Choice B is incorrect because nothing in the text suggests that Schmidt is typically mindful of his schedule or that forgetting appointments would be uncharacteristic of him. Rather, the text makes it clear that Schmidt hasn’t actually forgotten an appointment at all—the narrator indicates that Schmidt’s reason for leaving is an obvious fabrication, not a genuine instance of absentmindedness. Choice C is incorrect because the text doesn’t mention any previous disagreement between Schmidt and the narrator’s first wife about a particular painting or any other topic. The text presents what appears to be a spontaneous reaction by Schmidt to the wife’s statement about not finding art compelling, not the continuation of an earlier conversation or dispute.

Question Difficulty: Medium

Question ID 4dbbf00a

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 4dbbf00a

The following text is from Ezra Pound’s 1909 poem “Hymn III,” based on the work of Marcantonio Flaminio.

As a fragile and lovely flower unfolds its gleaming
foliage on the breast of the fostering earth, if
the dew and the rain draw it forth;
So doth my tender mind flourish, if it be fed with the
sweet dew of the fostering spirit,
Lacking this, it beginneth straightway to languish,
even as a floweret born upon dry earth, if the
dew and the rain tend it not.

Based on the text, in what way is the human mind like a flower?

- A. It becomes increasingly vigorous with the passage of time.
- B. It draws strength from changes in the weather.
- C. It requires proper nourishment in order to thrive.
- D. It perseveres despite challenging circumstances.

ID: 4dbbf00a Answer

Correct Answer: C

Rationale

Choice C is the best answer because it presents a description of how the human mind is like a flower that is directly supported by the text. The text compares the needs of a “fragile and lovely flower” to those of the speaker’s “tender mind”: both need to be fed if they’re going to survive. Without such feeding, they’ll “beginneth straightway to languish,” or weaken. Thus, the text suggests that the human mind is like a flower in that they both need proper nourishment in order to thrive.

Choice A is incorrect because the text doesn’t address the passage of time or describe either the human mind or a flower as becoming increasingly vigorous. Choice B is incorrect because the text doesn’t suggest that human minds or flowers draw strength from changes in weather. The references to rain in the text pertain to a flower’s need for water rather than the general effects of changing weather. Choice D is incorrect because the text doesn’t suggest that the human mind or a flower will persist regardless of challenging circumstances. In fact, the text indicates that they’ll both languish right away if not given what they need.

Question Difficulty: Medium

Question ID 6e2f1377

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 6e2f1377

Biologists have predicted that birds’ feather structures vary with habitat temperature, but this hadn’t been tested in mountain environments. Ornithologist Sahas Barve studied feathers from 249 songbird species inhabiting different elevations—and thus experiencing different temperatures—in the Himalaya Mountains. He found that feathers of high-elevation species not only have a greater proportion of warming downy sections to flat and smooth sections than do feathers of low-elevation species, but high-elevation species’ feathers also tend to be longer, providing a thicker layer of insulation.

Which choice best states the main idea of the text?

- A.

Barve’s investigation shows that some species of Himalayan songbirds have evolved feathers that better regulate body temperature than do the feathers of other species, contradicting previous predictions.
- B.

Barve found an association between habitat temperature and feather structure among Himalayan songbirds, lending new support to a general prediction.
- C.

Barve discovered that songbirds have adapted to their environment by growing feathers without flat and smooth sections, complicating an earlier hypothesis.
- D.

The results of Barve’s study suggest that the ability of birds to withstand cold temperatures is determined more strongly by feather length than feather structure, challenging an established belief.

ID: 6e2f1377 Answer

Correct Answer: B

Rationale

Choice B is the best answer. The text describes how Barve found an association between habitat temperature and feather structure among Himalayan songbirds, which supports the general prediction that birds’ feather structures vary with habitat temperature.

Choice A is incorrect. Barve’s study isn’t said to contradict previous predictions. In fact, the study supports the prediction described in the first sentence, which is that birds’ feather structures vary with habitat temperature. Choice C is incorrect. Barve’s study isn’t said to “complicate an earlier hypothesis.” In fact, the study supports the earlier prediction described in the first sentence, which is that birds’ feather structures vary with habitat temperature. Choice D is incorrect. The text doesn’t compare the importance of feather length and feather structure, and it doesn’t say that Barve’s study challenges any established beliefs. In fact, the study supports the prediction described in the first sentence, which is that birds’ feather structures vary with habitat temperature.

Question Difficulty: Medium

Question ID 2f16288f

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 2f16288f

The following text is adapted from Robert Louis Stevenson’s 1883 novel *Treasure Island*. Bill is a sailor staying at the Admiral Benbow, an inn run by the narrator’s parents.

Every day when [Bill] came back from his stroll he would ask if any seafaring men had gone by along the road. At first we thought it was the want of company of his own kind that made him ask this question, but at last we began to see he was desirous to avoid them. When a seaman did [stay] at the Admiral Benbow (as now and then some did) he would look in at him through the curtained door before he entered the parlour; and he was always sure to be as silent as a mouse when any such was present.

According to the text, why does Bill regularly ask about “seafaring men”?

- A. He’s hoping to find an old friend and fellow sailor.
- B. He’s trying to secure a job as part of the crew on a new ship.
- C. He isn’t sure that other guests at the inn will be welcoming of sailors.
- D. He doesn’t want to encounter any other sailor unexpectedly.

ID: 2f16288f Answer

Correct Answer: D

Rationale

Choice D is the best answer. The narrator says that, at first, they thought Bill asked regularly about other seafarers because he wanted their company, but eventually they realized that Bill actually wanted to avoid them.

Choice A is incorrect. This isn’t the reason the text gives for why Bill regularly asks about “seafaring men.” The narrator says that, at first, they thought Bill asked regularly about other seafarers because he wanted their company, but eventually they realized that Bill wanted to avoid them. Choice B is incorrect. This isn’t the reason the text gives for why Bill regularly asks about “seafaring men.” The narrator says that, at first, they thought Bill asked regularly about other seafarers because he wanted their company, but eventually they realized that Bill wanted to avoid them. Choice C is incorrect. This isn’t the reason the text gives for why Bill regularly asks about “seafaring men.” The narrator says that, at first, they thought Bill asked regularly about other seafarers because he wanted their company, but eventually they realized that Bill wanted to avoid them.

ID: 396cc35d

Utah is home to Pando, a colony of about 47,000 quaking aspen trees that all share a single root system. Pando is one of the largest single organisms by mass on Earth, but ecologists are worried that its growth is declining in part because of grazing by animals. The ecologists say that strong fences could prevent deer from eating young trees and help Pando start thriving again.

According to the text, why are ecologists worried about Pando?

- A. It isn't growing at the same rate it used to.
- B. It isn't producing young trees anymore.
- C. It can't grow into new areas because it is blocked by fences.
- D. Its root system can't support many more new trees.

ID: 396cc35d Answer

Correct Answer: A

Rationale

Choice A is the best answer because it presents an explanation that is directly stated in the text for why ecologists are worried about Pando. The text states that Pando is a colony of about 47,000 quaking aspen trees that represents one of the largest organisms on Earth. According to the text, ecologists are worried that Pando's growth is declining, partly because animals are feeding on the trees. In other words, the ecologists are worried that Pando isn't growing at the same rate it used to.

Choice B is incorrect. Rather than indicating that Pando isn't producing young trees anymore, the text reveals that Pando is indeed producing young trees, stating that those trees can be protected from grazing deer by strong fences. Choice C is incorrect because the text states that fences can be used to prevent deer from eating Pando's young trees, not that Pando itself can't grow in new areas because it's blocked by fences. Choice D is incorrect because the text offers no evidence that Pando's root system is incapable of supporting new trees or is otherwise a cause of worry for ecologists.

Question Difficulty: Medium

Question ID 040a02c5

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 040a02c5

A contraction of “you all,” the pronoun “y’all” has long been used as a plural version of “you” in the South and in Black communities around the US. In recent decades, most other English-speaking communities in the US have begun to use “y’all.” What explains its rise in popularity? Many varieties of English have no pronoun that specifically addresses more than one person and instead must use “you” to address both one person and more than one. But “y’all” always refers to two or more people. As a result, it conveys the speaker’s meaning more precisely than “you” can.

Which question does the text most directly attempt to answer?

- A. How many other plural versions of the pronoun “you” are there in English, besides “y’all”?
- B. Why has the pronoun “y’all” become more widely used in the US?
- C. When was the first recorded use of the pronoun “y’all” in the English language?
- D. Is “y’all” commonly used in English-speaking regions of the world besides the US?

ID: 040a02c5 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it presents a question that the text is attempting to answer: why has the pronoun "y'all" become more widely used in the US? The text begins by explaining where and how the plural pronoun "y'all" originated and then goes on to state that its use has been rising in popularity, even in areas outside of its place of origin. The text then attributes this rise in popularity to the fact that many varieties of English do not have a pronoun to address more than one person, and thus "you" must function as both a singular and plural pronoun.

Choice A is incorrect because while the text states that "y'all" is used as a plural of "you" in English, it does not discuss other plural forms of the word. Choice C is incorrect because while the text discusses the general origins of the pronoun "y'all," it does not state when the use of the pronoun was first recorded in the English language. Choice D is incorrect because though the text addresses the use of the pronoun "y'all" within English-speaking communities in the US, it does not address its use outside of that geographic area.

Question Difficulty: Medium

Question ID 84a32bb2

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 84a32bb2

The following text is adapted from Charles W. Chesnutt’s 1901 novel *The Marrow of Tradition*.
Mrs. Ochiltree was a woman of strong individuality, whose comments upon her acquaintance[s], present or absent, were marked by a frankness at times no less than startling. This characteristic caused her to be more or less avoided. Mrs. Ochiltree was aware of this sentiment on the part of her acquaintance[s], and rather exulted in it.

- Based on the text, what is true about Mrs. Ochiltree’s acquaintances?
- A. They try to refrain from discussing topics that would upset Mrs. Ochiltree.
 - B. They are unable to spend as much time with Mrs. Ochiltree as she would like.
 - C. They are too preoccupied with their own concerns to speak with Mrs. Ochiltree.
 - D. They are likely offended by what Mrs. Ochiltree has said about them.

ID: 84a32bb2 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it presents a statement about Mrs. Ochiltree’s acquaintances that is supported by the text. The text indicates that Mrs. Ochiltree makes comments about her acquaintances that are frank, or direct and blunt, and sometimes startling. It also states that because of this behavior, the acquaintances tend to avoid Mrs. Ochiltree. Together, these details suggest that the acquaintances choose not to be around Mrs. Ochiltree because they are offended by the things she has said about them.

Choice A is incorrect because the text doesn’t suggest that Mrs. Ochiltree’s acquaintances avoid discussing topics that would upset Mrs. Ochiltree; instead, it states that they avoid being around Mrs. Ochiltree at all. Choice B is incorrect because the text makes it clear that Mrs. Ochiltree knows her acquaintances often avoid her and is pleased about it (she “rather exulted in it”), not that she wants to spend more time with them. Choice C is incorrect because the text doesn’t suggest that Mrs. Ochiltree’s acquaintances don’t speak with Mrs. Ochiltree because they are too focused on their own concerns, but rather because they don’t like the frank comments she makes.

Question Difficulty: Medium

Question ID 72c9c72e

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 72c9c72e

In present-day Chiapas, Mexico, archaeologist Robert Rosenswig, remote-sensing specialist Ricardo López-Torrijos, and colleagues have located 41 smaller settlements surrounding the ancient Mesoamerican city of Izapa. The researchers have concluded that these settlements were culturally linked to Izapa because each of the settlements is the same age and configured in the same manner as Izapa, with a pyramid to the north and a plaza to the south. Their shared structural orientation suggests that residents of the settlements likely performed some of the same cultural ceremonies as residents in Izapa did.

Which choice best states the main idea of the text?

- A. Researchers have determined that the arrangement of Izapa’s structures was based on those of other nearby settlements.
- B. Cultural ceremonies in Izapa seem to have played a more important role for its residents than those in smaller, surrounding settlements did.
- C. Although archaeologists have learned much about Izapa over years of research, they have only recently found the smaller settlements that surrounded it.
- D. Researchers have inferred that Izapa was related to the smaller settlements that surrounded it based in part on the similarity of their construction.

ID: 72c9c72e Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main idea of the text. The text indicates that Rosenswig, López-Torrijos, and colleagues concluded that there is a cultural link between the city of Izapa and the 41 smaller settlements they located around the city. According to the text, the researchers reached this conclusion because Izapa and the settlements are of the same age and configuration in that all have a pyramid to the north and a plaza to the south. Thus, the main idea of the text is that researchers have inferred that Izapa was related to the smaller settlements that surrounded it based in part on the similarity of their construction.

Choice A is incorrect. Although the text discusses a similarity between how structures in Izapa and nearby settlements are arranged, the text doesn’t indicate that the arrangement in Izapa is based on those of the nearby settlements. Choice B is incorrect. Although the text mentions that residents of Izapa and its surrounding settlements may have performed the same cultural ceremonies, the text doesn’t discuss the ceremonies’ importance for the residents. Choice C is incorrect. Although the text describes findings about Izapa, it doesn’t specify how much archaeologists have learned about Izapa over the years. Additionally, while the text indicates that the discovery of the 41 smaller settlements surrounding Izapa was made in present-day Chiapas and thus may be of recent date, this is a detail in the text, not its main idea.

Question Difficulty: Medium

Question ID 767f55a5

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 767f55a5

Believing that living in an impractical space can heighten awareness and even improve health, conceptual artists Madeline Gins and Shusaku Arakawa designed an apartment building in Japan to be more fanciful than functional. A kitchen counter is chest-high on one side and knee-high on the other; a ceiling has a door to nowhere. The effect is disorienting but invigorating: after four years there, filmmaker Nobu Yamaoka reported significant health benefits.

Which choice best states the main idea of the text?

- A. Although inhabiting a home surrounded by fanciful features such as those designed by Gins and Arakawa can be rejuvenating, it is unsustainable.
- B. Designing disorienting spaces like those in the Gins and Arakawa building is the most effective way to create a physically stimulating environment.
- C. As a filmmaker, Yamaoka has long supported the designs of conceptual artists such as Gins and Arakawa.
- D. Although impractical, the design of the apartment building by Gins and Arakawa may improve the well-being of the building’s residents.

ID: 767f55a5 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main idea of the text. According to the text, conceptual artists Gins and Arakawa have designed an apartment building that is disorienting because of several unconventional elements, such as uneven kitchen counters and “a door to nowhere.” The text goes on to suggest that there may be benefits to this kind of design because filmmaker Yamaoka lived in the apartment building for four years and reported health benefits. Thus, although the design is impractical, it may improve the well-being of the apartment building’s residents.

Choice A is incorrect. Although the text mentions that Yamaoka lived in the apartment for four years, it doesn’t address how long someone can beneficially live in a home surrounded by fanciful features or whether doing so can be sustained. Choice B is incorrect. Although the text mentions the potential benefits of living in a home with disorienting design features, it doesn’t suggest that this is the most effective method to create a physically stimulating environment. Choice C is incorrect because the text refers to Yamaoka to support the claim that Gins and Arakawa’s apartment building design may be beneficial, but the text doesn’t indicate that Yamaoka supports the designs of other conceptual artists.

Question Difficulty: Medium

Question ID b03ba38b

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: b03ba38b

The following text is from Ahmet Hamdi Tanpınar’s 1961 novel *The Time Regulation Institute* (translated from the Turkish in 2014 by Maureen Freely and Alexander Dawe). The narrator was once involved with the Time Regulation Institute, a fictional bureaucracy that regulates the time of Turkey’s clocks.

I may be the most humble and absurd man in the world and, as my wife says, the most slovenly creature you may ever meet—that is, before the founding of our institute—but I did come to know a truly great man who possessed a natural genius for invention. I spent years at his side. I watched the way he worked. I witnessed how an idea would suddenly catch fire in his mind and take shape, like a tree sprouting shoots and branches, before coming into being.

©2014 by Maureen Freely and Alexander Dawe

Which choice best states the main idea of the text?

- A. A person was fortunate enough to have found love despite his obvious shortcomings.
- B. An exceptionally talented person professes humility to avoid intimidating others.
- C. A person appreciates the extensive time he passed in the company of someone he deeply admired.
- D. A truly brilliant person lets ideas mature in his mind before expressing them aloud.

ID: b03ba38b Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes the main idea of the text: a person appreciates the extensive time he passed in the company of a man he deeply admired. The speaker says that he spent "years" (a long period of time) in the company of a "truly great man" with "a natural genius for invention." These phrases indicate the speaker’s feelings of admiration.

Choice A is incorrect because though the text indicates that the speaker feels professional admiration for the "truly great man," the text does not indicate that the speaker feels love for him; nor does the text indicate that the speaker’s humility, absurdity, and slovenly nature proved to be an obstacle to this professional relationship. Choice B is incorrect because though the speaker describes himself as humble, the text does not indicate that he is exceptionally talented; nor does the text indicate that the "truly great man" professes humility or is concerned with whether he intimidates others. Choice D is incorrect because the text does not indicate how either the speaker or the "truly great man" express their ideas.

Question Difficulty: Medium

Question ID 6a9a3621

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 6a9a3621

The painter María Izquierdo played an important role in the development of twentieth-century Mexican art, but her work has never been well-known in the United States except among art historians. One reason for Izquierdo’s relative obscurity is the enormous popularity of some of her peers. In particular, the painters Frida Kahlo and Diego Rivera have so captivated the interest of US audiences that Izquierdo and other Mexican artists from the period often get overlooked, despite the high quality of their work.

Which choice best states the main idea of the text?

- A. Izquierdo’s work is not as well-known in the United States as it should be because Kahlo and Rivera draw so much of the public’s attention.
- B. During Izquierdo’s lifetime, her paintings were displayed in galleries in the United States much more frequently than paintings by Kahlo and Rivera were.
- C. Izquierdo painted some of the same subjects that Kahlo and Rivera painted but used different techniques than they used.
- D. Few of Izquierdo’s works are in galleries today because she produced only a small number of paintings.

ID: 6a9a3621 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states the main idea of the text. The text begins by stating that María Izquierdo was an important figure in the history of twentieth-century Mexican art, but despite her importance, her work hasn’t received widespread recognition in the United States. According to the text, one reason for this is that Frida Kahlo and Diego Rivera are so famous in the US that they overshadow other important Mexican artists, including Izquierdo. Thus, the main idea of the text is that Izquierdo’s work is less well known in the US than it should be because Kahlo and Rivera draw most of the public’s attention.

Choice B is incorrect because the text doesn’t discuss the appearance of Izquierdo’s paintings in galleries in the US during her lifetime, nor does it suggest that her paintings were displayed more frequently than paintings by Kahlo or Rivera were. Instead, the text focuses on the fact that Izquierdo has been overlooked in the US because of Kahlo’s and Rivera’s greater popularity. Choice C is incorrect because the text doesn’t discuss either the subject matter of Izquierdo’s paintings or the techniques she used, nor does it compare these aspects of her paintings with those of Kahlo’s and Rivera’s paintings. Choice D is incorrect because the text doesn’t mention how many of Izquierdo’s paintings appear in galleries today, nor does it state that she produced only a small number of paintings.

Question Difficulty: Medium

Question ID e6d591f4

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: e6d591f4

The following text is from Anton Chekhov’s 1898 short story “Ionitch” (translated by Marian Fell in 1915). The text is set in a Russian city referred to as the city of S.

If newcomers to the little provincial city of S. complained that life there was monotonous and dull, its inhabitants would answer that, on the contrary, S. was a very amusing place, indeed, that it had a library and a club, that balls were given there, and finally, that very pleasant families lived there with whom one might become acquainted. And they always pointed to the Turkins as the most accomplished and most enlightened family of all.

- What does the text suggest about the Turkins?
- A. They are relative newcomers to the city of S.
 - B. They have a unique status in the city of S.
 - C. They have long disliked living in the city of S.
 - D. They are amused by the other residents of the city of S.

ID: e6d591f4 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it presents a statement about the Turkins that is suggested by the text. The text explains that while many pleasant families live in the city of S., inhabitants of the city consider the Turkins to be "the most accomplished and most enlightened family of all." Thus, by indicating that they are seen as more accomplished and more enlightened than all the other families in the city of S., the text suggests that the Turkins have a unique status there.

Choice A is incorrect because the text doesn’t indicate that the Turkins have recently moved to the city of S.; it provides no information about when the Turkins arrived. Choice C is incorrect because the text explains how the Turkins are viewed by others in the city of S. but gives no indication of how the Turkins feel about living there. Choice D is incorrect because the text explains how the Turkins are viewed by other residents of the city of S. but gives no indication of how the Turkins view the other residents.

Question Difficulty: Medium

Question ID 87d834ef

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 87d834ef

The following text is adapted from Edgar Allan Poe’s 1849 story “Landor’s Cottage.”

During a pedestrian trip last summer, through one or two of the river counties of New York, I found myself, as the day declined, somewhat embarrassed about the road I was pursuing. The land undulated very remarkably; and my path, for the last hour, had wound about and about so confusedly, in its effort to keep in the valleys, that I no longer knew in what direction lay the sweet village of B—, where I had determined to stop for the night.

Which choice best states the main idea of the text?

- A. The narrator remembers a trip he took and admits to getting lost.
- B. The narrator recalls fond memories of a journey that he took through some beautiful river counties.
- C. The narrator describes what he saw during a long trip through a frequently visited location.
- D. The narrator explains the difficulties he encountered on a trip and how he overcame them.

ID: 87d834ef Answer

Correct Answer: A

Rationale

Choice A is the best answer. The narrator is “embarrassed” about the route he took, which ends up leaving him lost and confused about how to get to his destination for the evening.

Choice B is incorrect. This choice doesn’t match the passage. The narrator is embarrassed, rather than fond, and he doesn’t describe the beauty of the place. Choice C is incorrect. This choice doesn’t match the passage. We don’t know from this excerpt whether or not the narrator has visited this part of New York multiple times. Choice D is incorrect. This choice doesn’t match the passage. The narrator doesn’t explain how he overcame being lost in this excerpt.

Question Difficulty: Medium

Question ID 5cebee9e

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 5cebee9e

Historians point to the rule of the Piast dynasty as crucial to the formation of the Polish state. However, some differentiate between members of the dynasty like Mieszko II Lambert, who ruled as king from 1025 to 1031 CE, and less well-documented figures like Siemomysł, who is said to have ruled in the 10th century but whose historical actuality is disputed. Siemomysł appears in the *Gesta principum Polonorum*, a chronicle of medieval Polish history written between 1112 and 1118. However, the chronicle’s documentation of Siemomysł relies on oral tradition, unlike its records of later rulers.

- According to the text, what is a difference between how historians view Siemomysł and how they view Mieszko II Lambert?
- A. Historians agree that Mieszko II Lambert existed, but disagree about whether Siemomysł existed.
 - B. Historians believe that the *Gesta principum Polonorum* provides more evidence for Siemomysł’s existence than it does for Mieszko II Lambert’s existence.
 - C. Historians agree that Siemomysł ruled Poland much later than Mieszko II Lambert.
 - D. Historians find the orally transmitted stories affirming the existence of Mieszko II Lambert to be more convincing than similar stories about Siemomysł.

ID: 5cebee9e Answer

Correct Answer: A

Rationale

Choice A is the best answer because it presents a statement about how historians view Siemomysł and Mieszko II Lambert that is supported by the text. The text states that the Piast dynasty had a number of different members. The text refers to two of the rulers in the Piast dynasty by name: Mieszko II Lambert, whose rule was known to have occurred from 1025 to 1031 CE, and Siemomysł ("whose historical actuality is disputed"), for whom less is known and who therefore is the subject of debate among historians. The text further casts doubt about Siemomysł by stating that he is "said to have ruled" during the 10th century, or the 900s, which suggests the possibility that he didn’t rule. The text also mentions that the chronicle’s documentation of Siemomysł relies on oral tradition, unlike its records of later rulers, including Mieszko II Lambert. This indicates that historians agree that Mieszko II Lambert was an actual historical figure, but they disagree about whether Siemomysł existed.

Choice B is incorrect because the text states that the *Gesta principum Polonorum*’s documentation of Siemomysł comes from oral tradition—spoken rather than written documentation—unlike its records of rulers who came after Siemomysł. This suggests that the chronicle provides less reliable evidence rather than more evidence for Siemomysł’s existence in the 900s (or the 10th century) than it does for later rulers like Mieszko II Lambert, who ruled from 1025 to 1031 CE. Choice C is incorrect because the text indicates the opposite: Siemomysł supposedly ruled earlier in the 10th century, while Mieszko II Lambert ruled from 1025 to 1031 CE. The 10th century spans the years from 901 to 1000 CE, so Siemomysł is believed to have ruled earlier than Mieszko II Lambert did, not later as this choice states. Choice D is incorrect. Although the text mentions that information in the written chronicle *Gesta principum Polonorum* draws its information about Siemomysł from the oral tradition, it doesn’t mention orally transmitted stories about Mieszko II Lambert. Instead, it states that the chronicle’s documentation of Siemomysł relies on oral tradition unlike the records of later rulers do, which suggests that the documentation of later rulers such as Mieszko II Lambert did not rely on oral tradition. Thus, no comparison can be made about how convincing the orally transmitted stories of each ruler

are to historians.

Question Difficulty: Medium

Question ID dc2af3a1

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: dc2af3a1

Microplastics are tiny pieces of plastic waste. Areas of the ocean with higher concentrations of microplastic particles also have smaller and fewer waves. A study by Yukun Sun and colleagues found that the concentration of microplastic particles cannot be the only reason for this reduced wave activity because the concentration of particles that would have the observed effect is much higher than that found in these areas of the ocean. However, they found that surfactants, chemicals often used to manufacture plastics, are released into the water from microplastics and have a much stronger wave-reducing effect.

According to the text, what did Sun and colleagues discover about surfactants?

- A. They have a much stronger effect on wave activity than microplastics alone do.
- B. They are mainly composed of water.
- C. They are helpful for removing microplastics from the ocean.
- D. They can be used to contain microplastics within certain areas of the ocean.

ID: dc2af3a1 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it presents a statement about surfactants that is supported by the text. The text indicates that higher concentrations of microplastics have been associated with waves that are relatively small and few. According to the text, however, a study by Sun and colleagues found that concentrations of microplastic particles can't be the only reason for the reduced wave activity because a much higher concentration of particles is needed to produce that observed effect. Instead, the text indicates that Sun and colleagues found that surfactants are released from microplastics into the ocean and have a much stronger wave-reducing effect than microplastics alone do.

Choice B is incorrect because the text doesn't discuss what surfactants are made of. Instead, it indicates that surfactants are frequently used to manufacture microplastics and that Sun and colleagues discovered that surfactants are released from microplastics into the ocean. Choice C is incorrect because the text doesn't discuss how microplastics can be removed from the ocean. Instead, the text indicates that Sun and colleagues discovered that surfactants are released into the ocean from microplastics and have a much stronger wave-reducing effect than microplastics alone do. Choice D is incorrect because the text doesn't indicate that surfactants can be used to contain microplastics within certain areas of the ocean. Instead, the text indicates that Sun and colleagues discovered that surfactants are released from microplastics into the ocean and have a much stronger wave-reducing effect than microplastics alone do.

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 64f87faf

In many of his sculptures, artist Richard Hunt uses broad forms rather than extreme accuracy to hint at specific people or ideas. In his first major work, *Arachne* (1956), Hunt constructed the mythical character Arachne, a weaver who was changed into a spider, by welding bits of steel together into something that, although vaguely human, is strange and machine-like. And his large bronze sculpture *The Light of Truth* (2021) commemorates activist and journalist Ida B. Wells using mainly flowing, curved pieces of metal that create stylized flame.

Which choice best states the text’s main idea about Hunt?

- A. He often depicts the subjects of his sculptures using an unrealistic style.
- B. He uses different kinds of materials depending on what kind of sculpture he plans to create.
- C. He tends to base his art on important historical figures rather than on fictional characters.
- D. He has altered his approach to sculpture over time, and his works have become increasingly abstract.

ID: 64f87faf Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states the main idea of the text. According to the text, many of Richard Hunt’s sculptures “use broad forms rather than extreme accuracy”—in other words, they are more abstract than realistic. To illustrate Hunt’s abstract approach, the text characterizes his sculpture of Arachne as “vaguely human” and his work in honor of Ida B. Wells as “using mainly flowing, curved pieces of metal that create stylized flame.” Thus, the main idea is that Hunt often depicts the subjects of his sculptures using an unrealistic style.

Choice B is incorrect. Although the text indicates that one of Hunt’s sculptures is made of steel and another of bronze, there is no mention of why he chose these materials. Choice C is incorrect because the text says nothing about how Hunt chose the subjects for his sculptures. Furthermore, of the two examples provided in the text, only Ida B. Wells is an important historical figure; Arachne is a “mythical character.” Choice D is incorrect because the text says nothing about how Hunt’s style changed over time. In fact, although the two examples of Hunt’s work discussed in the text were created 65 years apart, they are both described as heavily stylized rather than realistic, which may suggest that some aspects of Hunt’s style haven’t changed over that time.

SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 48f28116

In a study by Mika R. Moran, Daniel A. Rodriguez, and colleagues, residents of Quito, Ecuador, and Lima, Peru, were surveyed about parks in their cities. Of the 618 respondents from Quito, 82.9% indicated that they use the city’s parks, and of the 663 respondents from Lima, 72.7% indicated using city parks. Given that the percentage of Quito respondents who reported living within a 10-minute walk of a park was much lower than that reported by Lima respondents, greater proximity alone can’t explain the difference in park use.

- The text makes which point about the difference between the proportions of Quito residents and Lima residents using parks?
- A. It was much larger than the researchers conducting the study expected.
 - B. It is caused by something other than the parks’ proximity to city residents.
 - C. It could be due to inaccuracies in the survey results.
 - D. It was calculated using sources that predate the survey.

ID: 48f28116 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it presents a statement about the difference between the proportions of Quito residents and Lima residents using parks that is supported by the text. The text states that 82.9% of surveyed Quito residents and 72.7% of surveyed Lima residents reported using their city’s parks. The text then notes that compared to Lima respondents, a much smaller percentage of Quito respondents said they live within a 10-minute walk of a park. The text concludes that because a greater proportion of Quito respondents used parks despite generally living farther from them than Lima respondents did, "greater proximity"—being closer to a park—"can’t explain the difference in park use." That is, the text makes the point that the difference between the proportions of Quito residents and Lima residents using parks is caused by something other than the distance of the parks from city residents.

Choice A is incorrect because the text doesn’t address whether the researchers had expected a particular result and doesn’t indicate that they were surprised by the difference in park usage between the two cities’ residents. The text simply presents the survey findings without stating the researchers’ expectations. Choice C is incorrect because the text gives no indication that there might be inaccuracies in the survey results; the text presents the findings as factual information and uses them as the basis for a conclusion that a certain factor doesn’t explain differences in park usage between Quito and Lima residents. Choice D is incorrect because the text doesn’t mention any sources that predate the survey or suggest that the difference in proportions was calculated using such sources. According to the text, the information about park usage came directly from the survey of residents in Quito and Lima.

Question Difficulty: Medium

Question ID 865d6194

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 865d6194

The ancient writing system used in the Maya kingdoms of southern Mexico and Central America had a symbol for the number zero. The earliest known example of the symbol dates to more than 2,000 years ago. At that time, almost none of the writing systems elsewhere in the world possessed a zero symbol. And the use of zero in Mexico and Central America may be even more ancient. Some historians suggest that Maya mathematicians inherited it from the Olmec civilization, which flourished in the region 2,400–3,600 years ago.

According to the text, what do some historians suggest about Maya civilization?

- A. Maya civilization acquired the use of zero from the Olmec civilization.
- B. Maya civilization respected its historians more than it respected its mathematicians.
- C. Maya civilization was highly secretive about its intellectual achievements.
- D. Maya civilization tried to introduce its writing system to other civilizations.

ID: 865d6194 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it presents information about Maya civilization that is supported by the text. The text states that the writing system used in the Maya kingdoms had a symbol for the number zero. It goes on to say that at the time of the zero symbol’s earliest example, more than 2,000 years ago, almost no other writing systems in the world featured such a symbol. The text also points out that some historians suggest that Maya mathematicians inherited the use of zero from the Olmec civilization, which existed in the same area as the Maya civilization at an earlier date. Thus, according to the text, some historians suggest that the Maya civilization acquired the use of zero from the Olmec civilization.

Choice B is incorrect because although the text mentions present-day historians and Maya mathematicians, it does not say anything about how much the Maya civilization respected its historians and mathematicians. Choice C is incorrect because the text does not indicate that the Maya civilization treated its use of the zero symbol, or any other intellectual achievements, as secrets to be kept from other civilizations. Choice D is incorrect because although the text mentions historians who suggest that the writing system of the Maya civilization inherited some features from the earlier Olmec civilization, the text does not describe any attempts of Maya civilization to introduce its writing system to other civilizations.

Question Difficulty: Medium

Question ID 58b90851

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 58b90851

In 1934 physicist Eugene Wigner posited the existence of a crystal consisting entirely of electrons in a honeycomb-like structure. The so-called Wigner crystal remained largely conjecture, however, until Feng Wang and colleagues announced in 2021 that they had captured an image of one. The researchers trapped electrons between two semiconductors and then cooled the apparatus, causing the electrons to settle into a crystalline structure. By inserting an ultrathin sheet of graphene above the crystal, the researchers obtained an impression—the first visual confirmation of the Wigner crystal.

Which choice best states the main idea of the text?

- A. Researchers have obtained the most definitive evidence to date of the existence of the Wigner crystal.
- B. Researchers have identified an innovative new method for working with unusual crystalline structures.
- C. Graphene is the most important of the components required to capture an image of a Wigner crystal.
- D. It’s difficult to acquire an image of a Wigner crystal because of the crystal’s honeycomb structure.

ID: 58b90851 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states the main idea of the text. According to the text, Eugene Wigner hypothesized that a crystal could exist that would be composed of electrons and have a honeycomb-like shape. The text goes on to say that the existence of the Wigner crystal remained unconfirmed until Feng Wang and colleagues were able to make an impression of one using two semiconductors and an ultrathin sheet of graphene. Thus, the main idea is that researchers have obtained the most definitive evidence to date of the existence of the Wigner crystal.

Choice B is incorrect because the text focuses on one kind of crystal—the Wigner crystal— and doesn’t discuss crystalline structures in general. And although the text conveys that Wang and colleagues figured out a way to capture an image of a Wigner crystal, it doesn’t address the idea of applying this approach to other types of crystals. Choice C is incorrect because the text describes in general the process Wang and colleagues followed to obtain an impression of the Wigner crystal; it doesn’t address the relative importance of each component in that process. Choice D is incorrect because the text doesn’t state that researchers had a hard time getting an impression of the Wigner crystal because of its honeycomb structure. Nothing in the text indicates why it took so long to prove the existence of this crystal or take an impression of it.

Question Difficulty: Medium

Question ID c0ee4b2d

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: c0ee4b2d

The ice melted on a Norwegian mountain during a particularly warm summer in 2019, revealing a 1,700-year-old sandal to a mountaineer looking for artifacts. The sandal would normally have degraded quickly, but it was instead well preserved for centuries by the surrounding ice. According to archaeologist Espen Finstad and his team, the sandal, like those worn by imperial Romans, wouldn't have offered any protection from the cold in the mountains, so some kind of insulation, like fabric or animal skin, would have needed to be worn on the feet with the sandal.

What does the text indicate about the discovery of the sandal?

- A. Temperatures contributed to both protecting and revealing the sandal.
- B. The discovery revealed that the Roman Empire had more influence on Norway than archaeologists previously assumed.
- C. Archaeologists would have found the sandal eventually without help from the general public.
- D. The sandal would have degraded if it hadn't been removed from the ice.

ID: c0ee4b2d Answer

Correct Answer: A

Rationale

Choice A is the best answer. A "particularly warm summer" revealed the sandal, and centuries of ice kept it "well preserved."

Choice B is incorrect. This choice doesn't reflect the information in the text. The sandal is similar to Roman sandals, but there is no indication that it was a result of Roman influence. Choice C is incorrect. The text doesn't support this choice. We don't have enough information to know whether or not archaeologists would have found the sandal without people like the treasure-hunting mountaineer. Choice D is incorrect. The text says the opposite of this choice. The sandal was preserved by the ice for centuries.

Question Difficulty: Medium

Question ID 093f6988

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 093f6988

A subject of much speculation, distinctive sets of parallel ridges mark the icy crust of Europa, Jupiter’s smallest moon. Researchers now claim that the ridges’ formation mechanism mirrors that of a strikingly similar pair on Greenland’s ice sheet. There, surface water seeped through fissures in the sheet and formed a water pocket that subsequently disrupted the overlying ice, forcing fragments of it upward and outward into peaks, as the pocket froze and expanded. Although Europa lacks liquid surface water, the same process could be driven by the moon’s subsurface ocean.

Which choice best states the main idea of the text?

- A. Researchers think that the ridges on Europa and the ridges in Greenland may have been formed by the same process even though Europa, unlike Greenland, doesn’t have liquid water on its surface.
- B. The primary difference between the ridges on Europa and the ridges in Greenland is that unlike the Europa ridges, the Greenland ridges are parallel.
- C. The pair of ridges found on Greenland’s ice sheet appear to have formed long before the recently discovered sets of ridges on Europa formed.
- D. Researchers don’t understand why Europa is marked by so many sets of ridges when the moon doesn’t have any liquid water on its surface that could have collected and expanded under the icy crust.

ID: 093f6988 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it accurately states the main idea of the text. The text focuses on formations of parallel ice ridges on Jupiter’s moon Europa that are said to be formed by the same mechanism that formed a parallel set of ridges on Greenland’s ice sheet. The text indicates that in Greenland, water on the surface seeps to the lower portion of the ice sheet, resulting in uplift that creates the ridges, and it states that although Europa lacks liquid water on its surface, the same process could be driven by an ocean below Europa’s surface. In other words, the main idea of the text is that parallel ridges in the ice on Europa and Greenland are likely caused by similar processes even though in Greenland the process begins with liquid water on the surface while Europa lacks liquid water on the surface.

Choice B is incorrect because the text states outright that the ridges on Europa are parallel and furthermore refers to Greenland’s ridges as "strikingly similar" to those on Europa. Choice C is incorrect because the text makes no mention of when any of the ice ridges formed, either separately or relative to one another. Choice D is incorrect because the text does not indicate any uncertainty about the reason for the ice ridges on Europa and, in fact, clearly states that researchers now claim to know the mechanism that created the ridges.

Question Difficulty: Medium

Question ID 5ff54c6e

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 5ff54c6e

The following text is adapted from Christina Rossetti’s 1881 poem “Monna Innominata 2.”

I wish I could remember that first day,
First hour, first moment of your meeting me,
If bright or dim the season, it might be
Summer or Winter for [all] I can say;
So unrecorded did it slip away,
So blind was I to see and to foresee,
So dull to mark the budding of my tree
That would not blossom yet for many a May.

Which choice best states the main idea of the text?

- A. The speaker celebrates how the passage of time has strengthened a relationship that once seemed unimportant.
- B. Because the speaker did not anticipate how important a relationship would become, she cannot recall how the relationship began, which she regrets.
- C. As the anniversary of the beginning of an important relationship approaches, the speaker feels conflicted about how best to commemorate it.
- D. After years of neglecting a once valuable relationship, the speaker worries it may be too late for her to salvage the relationship.

ID: 5ff54c6e Answer

Correct Answer: B

Rationale

Choice B is the best answer. The speaker says that they wish they could remember when they first met someone, but they can’t remember the meeting at all, because they didn’t know at the time that the relationship would "blossom" later on.

Choice A is incorrect. The speaker does say that the relationship has "blossomed" over time, but only briefly at the end—and they don’t really "celebrate" that fact. Rather, the text has a more regretful tone: it’s about how the speaker can’t remember first meeting this person, and they wish they could. Choice C is incorrect. The speaker doesn’t mention an anniversary—in fact, the speaker can’t remember when they met the person they’re talking about. Choice D is incorrect. The speaker doesn’t say that they neglected the relationship. In fact, the speaker suggests that the relationship has become very important to them—that’s why the speaker wishes that they could remember their first meeting.

Question Difficulty: Medium

Question ID b2e55b8a

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: b2e55b8a

To understand how Paleolithic artists navigated dark caves, archaeologist M^a Ángeles Medina-Alcaide and her team tested different lighting methods in a cave in Spain using replicas of artifacts found in European caves with art. They used three different Paleolithic light sources—torches, animal-fat lamps, and fireplaces—determining that each likely had a specific purpose. For instance, the team learned that the animal-fat lamps were less useful than torches while walking because the lamps didn't illuminate the cave floor.

Which choice best states the main idea of the text?

- A. Medina-Alcaide and her team's study demonstrated that fireplaces were essential to the creators of Paleolithic cave art.
- B. Medina-Alcaide and her team discovered that Paleolithic cave artists in Spain used animal-fat lamps more often than they used torches.
- C. Medina-Alcaide and her team were reluctant to draw many conclusions from their study because of the difficulty they had replicating light sources based on known artifacts.
- D. Medina-Alcaide and her team tested Paleolithic light sources and learned some details about how Paleolithic artists traveled within dark caves.

ID: b2e55b8a Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main idea of the text. The text indicates that archaeologist M^a Ángeles Medina-Alcaide and her team used replicas of Paleolithic light sources to understand how Paleolithic artists moved through dark caves. The researchers learned, for example, that torches were more helpful for moving through caves than animal-fat lamps were. Thus, the main idea of the text is that Medina-Alcaide and her team tested Paleolithic light sources and learned some details about how Paleolithic artists traveled within dark caves.

Choice A is incorrect because the text doesn't address the usefulness of fireplaces for Paleolithic cave artists; it only mentions fireplaces briefly as one of the three lighting methods the researchers tested. Choice B is incorrect because the text doesn't discuss how often Paleolithic cave artists used each kind of light source tested. Although the text does compare animal-fat lamps with another lighting method, the point of that comparison is that animal-fat lamps were less useful than torches when walking, not that one method was used more often than another. Choice C is incorrect because the text doesn't discuss either how difficult it was for Medina-Alcaide and her team to replicate light sources or how the team felt about drawing conclusions from their study. Instead, the text reveals that the team was able to conclude that each light source likely had a distinct purpose.

Question Difficulty: Medium

Question ID c6b3a54e

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: c6b3a54e

To protect themselves when being attacked, hagfish—jawless marine animals that resemble eels—will release large quantities of slimy, mucus-like threads. Because these threads are unusually strong and elastic, scientist Atsuko Negishi and her colleagues have been trying to recreate them in a lab as an eco-friendly alternative to petroleum-based fibers that are often used in fabrics. The researchers want to reproduce the threads in the lab because farming hagfish for their slime would be expensive and potentially harmful to the hagfish.

Which choice best states the text’s main idea?

- A. The slimy threads that hagfish release might help researchers create a new kind of fabric.
- B. Hagfish have inspired researchers to develop a new petroleum-based fabric.
- C. Hagfish are not well suited to being raised in captivity.
- D. The ability of hagfish to slime their attackers compensates for their being jawless.

ID: c6b3a54e Answer

Correct Answer: A

Rationale

Choice A is the best answer. The text first describes hagfish slime and its properties, then it transitions to talking about the possibilities of using lab-made equivalents to use in eco-friendly fabrics.

Choice B is incorrect. The text says the opposite of this choice. The researchers are developing an alternative to petroleum-based fabric. Choice C is incorrect. This choice is too narrow to be the main point of the text. Only one line describes how farming would be “potentially harmful” to the hagfish. Choice D is incorrect. This choice isn’t supported by the text. We don’t know from the text whether being jawless makes the hagfish more vulnerable.

Question Difficulty: Medium

Question ID 778c959a

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 778c959a

Since its completion in 2014, Bosco Verticale (Vertical Forest)—a pair of residential towers in Milan, Italy, covered by vegetation—has become a striking symbol of environmental sustainability in architecture. Stefano Boeri intended his design, which features balconies that are home to hundreds of trees, to serve as a model for promoting urban biodiversity. However, the concept has faced skepticism: critics note that although the trees used in Bosco Verticale were specifically cultivated for the project, it’s too early to tell if they can thrive in this unusual setting.

According to the text, why are some critics skeptical of the concept behind Bosco Verticale?

- A. Some essential aspects of Bosco Verticale’s design are difficult to adapt to locations other than Milan.
- B. The plant life on Bosco Verticale ended up being less varied than Boeri had envisioned it would be.
- C. The construction of Bosco Verticale was no less environmentally damaging than the construction of more conventional buildings is.
- D. It is unclear whether Bosco Verticale can support the plant life included in its design.

ID: 778c959a Answer

Correct Answer: D

Rationale

Choice D is the best answer because it presents a statement about critics’ skepticism of Bosco Verticale that is supported by the text. The text states that Boeri’s design for Bosco Verticale features hundreds of trees on balconies and is intended to serve as a model for promoting urban biodiversity. But the text goes on to state that some critics believe that it is too early to determine if the trees planted on Bosco Verticale can thrive there. Therefore, according to the text, critics are skeptical of the concept behind Bosco Verticale because it is unclear whether Bosco Verticale can support the plant life included in its design.

Choice A is incorrect. Although the text states that one of Boeri’s goals was for Bosco Verticale to serve as a model for promoting biodiversity in architecture, which suggests that Boeri would likely support the idea of reproducing the same concept in other locations, the text does not discuss whether it is feasible to adapt the design to locations other than Milan. Instead, the text describes critics’ concerns that the plant life that currently exists on Bosco Verticale might not thrive in its current setting. Choice B is incorrect. Although the text states that one of Boeri’s goals in creating Bosco Verticale was to promote biodiversity, which implies a goal of including varied plant life in the design, it does not mention whether the hundreds of trees that were planted on its balconies failed to meet this goal. Rather, the text states that some critics are concerned that the trees on Bosco Verticale’s balconies may not thrive in this setting. Choice C is incorrect because the text does not mention how Bosco Verticale was constructed, let alone how environmentally destructive its construction may have been relative to the construction of more conventional buildings.

Question Difficulty: Medium

Question ID fc8a5930

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: fc8a5930

Philadelphia’s Black Pearl Chamber Orchestra, founded by Jeri Lynne Johnson, performs classical music, from well-known compositions by Beethoven to contemporary works by Jessie Montgomery. For the orchestra’s iConduct! program, Johnson invites community members to learn some basic elements of conducting and then experience conducting the Black Pearl orchestra themselves.

Which choice best states the main idea of the text?

- A. The Black Pearl orchestra performs music from all over the world but mostly performs music composed by Philadelphians.
- B. Johnson founded the Black Pearl orchestra to perform classical music by contemporary artist Jessie Montgomery.
- C. The Black Pearl orchestra gives community members the chance to both listen to and participate in classical music performance.
- D. Johnson has community members conduct an orchestra to demonstrate how difficult the task is.

ID: fc8a5930 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately states the main idea of the text. The text begins by stating that the Black Pearl orchestra performs classical music, and then goes on to explain that the orchestra offers an iConduct! program. According to the text, this program offers community members the opportunity to learn some basics about conducting and then apply what they learn by conducting the orchestra themselves. Thus, the main idea of the text is that community members can both listen to and participate in a classical music performance.

Choice A is incorrect. Although the text states that the Black Pearl orchestra is based in Philadelphia, it doesn’t indicate that most of the music it plays was composed by Philadelphians. Choice B is incorrect. Although the text does state that Johnson founded the Black Pearl orchestra, this is just a detail and not the main focus of the text. Moreover, while the text does say that the orchestra sometimes plays music by Montgomery, it doesn’t assert that the orchestra was founded solely for the purpose of performing Montgomery’s work. Choice D is incorrect. Although the text explains that community members are invited to conduct the Black Pearl orchestra after participating in the iConduct! program, the text doesn’t indicate that Johnson allows community members to do this for the specific purpose of showing how difficult the task is.

Question Difficulty: Medium

Question ID b750e649

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: b750e649

The following text is adapted from Jack London’s 1903 novel *The Call of the Wild*. Buck is a sled dog living with John Thornton in Yukon, Canada.

Thornton alone held [Buck]. The rest of mankind was as nothing. Chance travellers might praise or pet him; but he was cold under it all, and from a too demonstrative man he would get up and walk away. When Thornton’s partners, Hans and Pete, arrived on the long-expected raft, Buck refused to notice them till he learned they were close to Thornton; after that he tolerated them in a passive sort of way, accepting favors from them as though he favored them by accepting.

- Which choice best states the main idea of the text?
- A. Buck has become less social since he began living with Thornton.
 - B. Buck mistrusts humans and does his best to avoid them.
 - C. Buck has been especially well liked by most of Thornton’s friends.
 - D. Buck holds Thornton in higher regard than any other person.

ID: b750e649 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main idea of the text. After establishing that Buck views most people “as nothing,” the text explains that Buck won’t acknowledge people other than Thornton unless they appear friendly toward Thornton, and even then he’s only reluctantly accepting. Thus, the text focuses on the idea that Thornton has a special status in Buck’s mind, with Buck holding him in higher regard than other people.

Choice A is incorrect because the text conveys that Buck isn’t social with people other than Thornton but doesn’t address Buck’s life or temperament before he lived with Thornton. Choice B is incorrect because the text conveys that Buck doesn’t really care about people other than Thornton and is aloof toward them. However, there’s no indication that Buck mistrusts and avoids people generally; indeed, he accepts Thornton, who is a human. Choice C is incorrect because the text refers to random travelers praising and petting Buck and Thornton’s partners giving Buck favors, but there’s no indication that any of these people are Thornton’s friends or that they have a particular fondness for Buck.

Question Difficulty: Medium

Question ID efd69225

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: efd69225

The following text is adapted from Guy de Maupassant’s nineteenth-century short story “The Trip of Le Horla” (translated by Albert M. C. McMaster, A. E. Henderson, Mme. Quesada, et al.). The narrator is part of a group traveling in a hot-air balloon at night.

The earth no longer seems to exist, it is buried in milky vapors that resemble a sea. We are now alone in space with the moon, which looks like another balloon travelling opposite us; and our balloon, which shines in the air, appears like another, larger moon, a world wandering in the sky amid the stars, through infinity. We no longer speak, think nor live; we float along through space in delicious inertia. The air which is bearing us up has made of us all beings which resemble itself, silent, joyous, irresponsible beings, peculiarly alert, although motionless.

Which choice best states the main idea of the text?

- A. The narrator feels a growing sense of isolation even though his companions are nearby during the balloon ride.
- B. The narrator and his companions are completely absorbed in the change in perspective they gain while riding in the balloon.
- C. The narrator and his companions are troubled by the disorienting effects of the altitude while riding in the balloon.
- D. The narrator is pleasantly surprised by his companions’ unrestrained enthusiasm about the sensation of riding in the balloon.

ID: efd69225 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately states the main idea of the text. The narrator describes the view he and his companions have from the balloon: the earth lies beneath "milky vapors," and the balloon itself looks like another moon. The narrator goes on to explain how the people riding in the balloon are affected by the ride, explaining that they are immersed in the experience: floating along in "delicious inertia," or inactivity, like "silent, joyous, irresponsible beings." Thus, the main idea is that the narrator and his companions are completely absorbed in the change in perspective they gain while riding in the balloon.

Choice A is incorrect because the narrator never describes himself as feeling isolated from his companions; instead, he characterizes riding in the balloon as an experience he is sharing with them. And although he does imply a sense of isolation, it is isolation from those on the ground, as when he says of himself and his companions, "We are now alone." Choice C is incorrect because the narrator doesn’t suggest that he or his companions are troubled by the effects of the balloon ride. Instead, he describes himself and his companions as "joyous" and the experience of floating in the balloon as "delicious." Choice D is incorrect because nothing in the text suggests that the narrator is surprised by his companions’ response to the balloon ride. In fact, the text indicates that the narrator and his companions are having the same experience: they’re described as "silent" and "motionless," rather than as having unrestrained enthusiasm.

Question Difficulty: Medium

Question ID 19f553cc

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 19f553cc

Paleontologists searching for signs of ancient life have found many fossilized specimens of prehistoric human ancestors, including several from the Pleistocene era discovered in a geological formation in the Minatogawa quarry in Japan. However, to study the emergence of the earliest multicellular organisms to appear on Earth, researchers must turn elsewhere, such as to the Ediacaran geological formation at Mistaken Point in Canada. A UNESCO World Heritage Site, the 146-hectare reserve contains more than 10,000 fossils that together document a critical moment in evolutionary history.

What does the text indicate about the geological formation at Mistaken Point?

- A. It holds a greater number of fossils but from a smaller variety of species than the formation in the Minatogawa quarry does.
- B. It has provided evidence that the earliest human species may have emerged before the Pleistocene era.
- C. It is widely considered by paleontologists to be the most valuable source of information about prehistoric life forms.
- D. It contains specimens from an older time period than those found in the formation in the Minatogawa quarry.

ID: 19f553cc Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text says that the formation at Mistaken Point contains fossils of “the earliest multicellular organisms,” which implies that these fossils are from an older time period than the fossils of “prehistoric human ancestors” found in the Minatogawa quarry.

Choice A is incorrect. The text says that the formation at Mistake Point contains “more than 10,000 fossils,” but it doesn’t compare this number to the number of fossils in the Minatogawa quarry. It also doesn’t say anything about the variety of species in either formation. Choice B is incorrect. The text says that the formation at Mistaken Point contains fossils of “the earliest multicellular organisms,” but it never says that the site contains early human fossils too. Rather, the early human fossils mentioned in the text were found in the formation at Minatogawa quarry. Choice C is incorrect. The text says that the fossils at Mistaken Point “document a critical moment in evolutionary history,” but it never says that Mistaken Point is the most valuable source of information about prehistoric life forms.

Question Difficulty: Medium

Question ID d09d33ca

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: d09d33ca

When Kenyan writer Ngũgĩ wa Thiong’o, who had previously published four novels in English, began writing in his native language, Gĩkũyũ, in the 1970s, several fellow writers and critics cautioned that doing so might make his works inaccessible outside his own community. Some noted that Kiswahili—widely spoken in Kenya and elsewhere in Africa—would be a more practical choice. Rejecting their arguments, Ngũgĩ went on to author dozens of acclaimed works in Gĩkũyũ that have been translated into a total of more than thirty languages.

Which choice best states the main idea of the text?

- A.

The reaction to Ngũgĩ’s rejection of English illustrates that some literary experts believe that fame is most easily gained by writing in a widely understood language, such as Gĩkũyũ.
- B.

Although Ngũgĩ insisted on publishing his first works in Gĩkũyũ, they have since been translated into many other languages.
- C.

Although Ngũgĩ’s decision to write in Gĩkũyũ was met with some skepticism, it didn’t prevent him from achieving literary success.
- D.

In the 1970s, Ngũgĩ became convinced that literature ought to be written in authors’ native languages, and he proceeded to publish many works in Gĩkũyũ.

ID: d09d33ca Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately states the main idea of the text. The text begins by explaining that Kenyan writer Ngũgĩ wa Thiong’o had published four novels in English before he began writing in his native language, Gĩkũyũ, in the 1970s. The text then explains that fellow writers and critics were skeptical of this decision, warning that the choice to publish in his native language, which the text implies isn’t widely understood, would limit his readership. The text concludes by stating that despite those warnings, Ngũgĩ proceeded to publish several acclaimed novels in Gĩkũyũ that were translated into several languages, suggesting that Ngũgĩ’s works in Gĩkũyũ achieved literary success in the forms of critical recognition and a wide international readership. Thus, the main idea is that although Ngũgĩ’s decision to write in Gĩkũyũ was met with some skepticism, this choice didn’t prevent him from achieving literary success.

Choice A is incorrect because it contradicts the description of Gĩkũyũ provided in the text. Rather than indicating that Gĩkũyũ is a widely understood language, as this choice claims, the text states that colleagues cautioned Ngũgĩ that writing in Gĩkũyũ instead of English “might make his works inaccessible outside his own community.” Furthermore, the text contrasts the choice of Gĩkũyũ with another alternative to English, Kiswahili, which the text indicates is “a more practical choice” given that it is “widely spoken in Kenya and elsewhere in Africa.” Choice B is incorrect because it contradicts information in the text. Although the text states that the novels Ngũgĩ published in Gĩkũyũ were later translated into other languages, the text explicitly states that Ngũgĩ had previously published four novels in English before he began writing in Gĩkũyũ in the 1970s. Thus, his first works were published in English, not Gĩkũyũ. Choice D is incorrect. The text doesn’t address what motivated Ngũgĩ’s choice to publish in his native Gĩkũyũ, and nothing in the text suggests that he intended for other authors to follow his example.

Question ID cbf71488

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: cbf71488

Paleontologist Alan Tennyson and colleagues studied fossil bones found in New Zealand that are more than 55 million years old. The researchers determined that the fossil bones belonged to two previously unknown species of prehistoric penguins. Moreover, they estimated that one of the two penguin species was more than three times the size of the emperor penguin, which is the largest penguin species that exists today.

Based on the text, which choice best describes the two previously unknown penguin species?

- A. They are frequently studied by paleontologists.
- B. They are no longer living species.
- C. They were smaller than penguin species that exist today.
- D. They spent little of their lives in water.

ID: cbf71488 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it presents a statement about the two previously unknown penguin species that is supported by the text. According to the text, Alan Tennyson and colleagues studied fossil bones belonging to two previously unknown penguin species that are described as prehistoric, or ancient. The text goes on to say that one of the two species was considerably larger than the emperor penguin, which is currently the largest penguin in existence. Thus, the text indicates that the other species aren't in existence today, or that the two previously unknown penguin species are no longer living species.

Choice A is incorrect. Although the text states that Alan Tennyson is a paleontologist who studied the fossils of two previously unknown penguin species, it doesn't say whether these penguins are frequently studied by paleontologists. Choice C is incorrect because the text says that one of the two previously unknown penguin species was three times larger than the emperor penguin (a penguin alive today), not that they were both smaller than penguin species that exist today. Choice D is incorrect because the text doesn't discuss whether the two previously unknown penguin species spent any time in water.

SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: c4af450c

In West Africa, jalis have traditionally been keepers of information about family histories and records of important events. They have often served as teachers and advisers, too. New technologies may have changed some aspects of the role today, but jalis continue to be valued for knowing and protecting their peoples’ stories.

Which choice best states the main idea of the text?

- A. Even though there have been some changes in their role, jalis continue to preserve their communities’ histories.
- B. Although jalis have many roles, many of them like teaching best.
- C. Jalis have been entertaining the people within their communities for centuries.
- D. Technology can now do some of the things jalis used to be responsible for.

ID: c4af450c Answer

Correct Answer: A

Rationale

Choice A is the best answer because it best states the main idea of the text. According to the text, jalis’ traditional role has been to maintain information about families’ histories and significant events. The text goes on to say that although technological changes have altered jalis’ role somewhat, jalis are still valued for preserving the histories of their communities.

Choice B is incorrect because the text says nothing about jalis’ views of the various tasks they perform. There is no information to support the idea that many jalis prefer teaching to other tasks. Choice C is incorrect because the text doesn’t describe jalis as being sources of entertainment. Rather, jalis are presented as valued sources of knowledge. Additionally, the text gives no indication of how long jalis have been serving their communities. Choice D is incorrect because the main focus of the text is on jalis’ role and their continued value despite the effects of technology, not on what technology can now do. Although the text indicates that jalis’ role has changed as a result of technological changes, the text doesn’t present any specific information about technology performing tasks that jalis once performed.

SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 6fa8303d

In her 1998 book *Blues Legacies and Black Feminism*, Angela Y. Davis bases her analysis in part on recordings of songs sung in the 1920s by Gertrude “Ma” Rainey and Bessie Smith. Davis focuses on how Rainey and Smith improvised the lyrics—replacing the original lines with mischievous jokes and wordplay. Davis’s work was particularly labor intensive because in order to transcribe, or write down, the lyrics as Rainey and Smith sang them, Davis had to listen repeatedly to the vinyl recordings, which weren’t very clear.

What does the text most strongly suggest about the songs sung by Rainey and Smith?

- A. The songs have grown in popularity since Rainey and Smith first sang them.
- B. There were more recordings made of Rainey’s songs than there were of Smith’s.
- C. There were few, if any, reliable transcriptions of Smith’s and Rainey’s improvised lyrics when Davis began her research.
- D. According to Davis, the songs sung by Rainey were more musically innovative than those sung by Smith typically were.

ID: 6fa8303d Answer

Correct Answer: C

Rationale

Choice C is the best answer because it describes the songs sung by Gertrude "Ma" Rainey and Bessie Smith in a way the text implies is accurate. The text describes Angela Y. Davis’s research on Rainey and Smith for her book *Blues Legacies and Black Feminism*, focusing on her efforts to transcribe the improvised lyrics in Rainey’s and Smith’s songs. The text calls Davis’s transcription process "labor intensive" since the lack of clarity in the recordings required her to listen to each repeatedly to verify the accuracy of her transcripts. The fact that Davis undertook a painstaking transcription process using only fairly low-fidelity recordings suggests that reliable transcriptions were otherwise unavailable to her.

Choice A is incorrect. The text doesn’t discuss the popularity of Rainey’s and Smith’s songs either in the 1920s or after. Although it is plausible that the music of Rainey and Smith is more widely enjoyed than it was in the 1920s, this isn’t supported by the text. Choice B is incorrect. The text doesn’t discuss which of Rainey and Smith was the more prolific recording artist and so provides no support for such a claim. Choice D is incorrect. The text discusses the creativity of both Rainey and Smith, but it does so only to note similarities between them in terms of improvisation and wit, not to emphasize differences between them or Davis’s relative views of the artists’ inventiveness.

Question Difficulty: Medium

Question ID 46df5814

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 46df5814

Many intellectual histories of the Black Power movement of the 1960s and 1970s rely heavily on essays and other explicitly ideological works as primary sources, a tendency that can overrepresent the perspectives of a small number of thinkers, most of whom were male. Historian Ashley D. Farmer has shown that expanding the array of primary sources to encompass more types of print material—including political cartoons, advertisements, and artwork—leads to a much better understanding of the movement and the crucial and diverse roles that Black women played in shaping it.

Which choice best describes the main idea of the text?

- A. Farmer’s methods and research have enriched the historical understanding of the Black Power movement and Black women’s contributions to it.
- B. Before Farmer’s research, historians had largely ignored the intellectual dimensions of the Black Power movement.
- C. Other historians of the Black Power movement have criticized Farmer’s use of unconventional primary sources.
- D. The figures in the Black Power movement whom historians tend to cite would have agreed with Farmer’s conclusions about women’s roles in the movement.

ID: 46df5814 Answer

Correct Answer: A

Rationale

Choice A is the best answer. It best describes the main idea of the text. The text starts by saying that historians of the Black Power movement are too reliant on openly ideological works, which were written mostly by men, as sources. The text then describes Farmer’s research: she has shown that including other kinds of sources leads to a better understanding of the Black Power movement and the role Black women played in it.

Choice B is incorrect. This doesn’t describe the main idea of the text. In fact, it conflicts with the text. The text says that historians have relied on "essays and other explicitly ideological works," which suggests that they *have* studied at least some of the intellectual dimensions of the Black Power movement. Choice C is incorrect. This doesn’t describe the main idea of the text. The text never mentions how other historians of the Black Power movement view Farmer’s use of unconventional sources. In fact, the text itself argues in favor of Farmer’s research, claiming that it has led to a "much better understanding of the movement." Choice D is incorrect. This doesn’t describe the main idea of the text. The text never mentions what any figures in the Black Power movement thought about women’s roles in the movement.

Question Difficulty: Medium

Question ID e2f7ccb7

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: e2f7ccb7

During the World War II era, some Mexican American women adopted a striking new look called *pachuca* style. They wore altered men’s jackets or zoot suits (wide-legged, long-coated suits) and dramatic makeup, and they combed their hair into high, rounded shapes. Some people criticized *pachuca* style, saying it was dangerous and women should dress traditionally. But historians see things differently. They see *pachuca* style as a form of rebellion against the era’s rigid social expectations for women. They say that it showed a desire for self-expression and freedom on the part of women who adopted the style.

According to the text, how do historians view *pachuca* style?

- A. They think that *pachuca* style was such a popular trend that it continues to influence fashion in the United States to the present day.
- B. They think that *pachuca* style was a way for some Mexican American women to express themselves and resist strict social expectations.
- C. They think that *pachuca* style was celebrated because it enabled some Mexican American women to show their support for the United States during World War II.
- D. They think that *pachuca* style was similar to other fashion trends that different groups of women adopted in the same period.

ID: e2f7ccb7 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it presents a statement about how historians view *pachuca* style that is supported by the text. The text first describes the distinctive *pachuca* style of dress adopted by some Mexican American women during World War II, saying that some criticized it and asserted that women should dress traditionally. The text then goes on to contrast this position with that of historians, who "see things differently": according to these historians, the *pachuca* style showed a wish for freedom and self-expression, and it acted as a kind of rebellion against what society expected of women at the time. Therefore, according to the text, historians think that the *pachuca* style was a way for Mexican women to express themselves and resist strict social expectations.

Choice A is incorrect because the text explicitly describes the *pachuca* style as a distinctive look adopted during the World War II era. It does not indicate that the *pachuca* style influences fashion in the United States in the present day. Choice C is incorrect because the text does not indicate that Mexican American women wore the *pachuca* style to show support for the United States during World War II; rather, the style was a means of self-expression and rebellion against social expectations. Choice D is incorrect because the text does not compare the *pachuca* style to other fashion trends: the *pachuca* style is the only style mentioned.

Question Difficulty: Medium

Question ID 5bac62e5

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 5bac62e5

A common assumption among art historians is that the invention of photography in the mid-nineteenth century displaced the painted portrait in the public consciousness. The diminishing popularity of the portrait miniature, which coincided with the rise of photography, seems to support this claim. However, photography’s impact on the portrait miniature may be overstated. Although records from art exhibitions in the Netherlands from 1820 to 1892 show a decrease in the number of both full-sized and miniature portraits submitted, this trend was established before the invention of photography.

- Based on the text, what can be concluded about the diminishing popularity of the portrait miniature in the nineteenth century?
- A. Factors other than the rise of photography may be more directly responsible for the portrait miniature’s decline.
 - B. Although portrait miniatures became less common than photographs, they were widely regarded as having more artistic merit.
 - C. The popularity of the portrait miniature likely persisted for longer than art historians have assumed.
 - D. As demand for portrait miniatures decreased, portrait artists likely shifted their creative focus to photography.

ID: 5bac62e5 Answer

Correct Answer: A

Rationale

Choice A is the best answer. The text says that the impact of photography on the portrait miniature might be "overstated," as some records show a decrease in the number of portrait miniatures *before* the invention of photography. From this, we can conclude that factors *other* than the rise of photography may be more directly responsible for the portrait miniature’s decline.

Choice B is incorrect. The text never discusses the "artistic merit" of either art form. Choice C is incorrect. The text never suggests that the portrait miniature was popular for longer than historians thought—if anything, it suggests that the portrait miniature started losing its popularity *earlier* than historians thought. Choice D is incorrect. The text never suggests that portrait painters shifted to become photographers.

Question Difficulty: Medium

Question ID 5bb02134

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 5bb02134

To dye wool, Navajo (Diné) weaver Lillie Taylor uses plants and vegetables from Arizona, where she lives. For example, she achieved the deep reds and browns featured in her 2003 rug *In the Path of the Four Seasons* by using Arizona dock roots, drying and grinding them before mixing the powder with water to create a dye bath. To intensify the appearance of certain colors, Taylor also sometimes mixes in clay obtained from nearby soil.

Which choice best states the main idea of the text?

- A. Reds and browns are not commonly featured in most of Taylor’s rugs.
- B. Taylor draws on local resources in the approach she uses to dye wool.
- C. Taylor finds it difficult to locate Arizona dock root in the desert.
- D. *In the Path of the Four Seasons* is widely acclaimed for its many colors and innovative weaving techniques.

ID: 5bb02134 Answer

Correct Answer: B

Rationale

Choice B is the best answer. It best states the main idea of the text. The text opens with the statement that Taylor uses local plants and vegetables to dye wool. The rest of the text describes how she does this.

Choice A is incorrect. This doesn’t state the main idea of the text. The text only mentions one rug: *In the Path of the Four Seasons*, in which reds and browns *are* featured. It never mentions whether or not these colors are featured in her other rugs. Choice C is incorrect. This doesn’t state the main idea of the text. The text never says that Taylor finds it difficult to locate Arizona dock roots. Choice D is incorrect. This doesn’t state the main idea of the text. The text never says that *In the Path of the Four Seasons* is widely acclaimed. Rather, it discusses the rug to illustrate the point made earlier in the passage: that Taylor uses local plants and vegetables to dye wool.

Question Difficulty: Medium

Question ID 4f52704c

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 4f52704c

Culinary anthropologist Vertamae Smart-Grosvenor may be known for her decades of work in national public television and radio, but her book *Vibration Cooking: or, the Travel Notes of a Geechee Girl* is likely her most influential project. The 1970 book, whose title refers to Smart-Grosvenor’s roots in the Low Country of South Carolina, was unusual for its time. It combined memoir, recipes, travel writing, and social commentary and challenged notions about conventions of food and cooking. Long admired by many, the book and its author have shaped contemporary approaches to writing about cuisine.

Which choice best describes the main idea of the text?

- A. Smart-Grosvenor’s unconventional book *Vibration Cooking: or, the Travel Notes of a Geechee Girl* is an important contribution to food writing.
- B. Smart-Grosvenor held many different positions over her life, including reporter and food writer.
- C. Smart-Grosvenor’s groundbreaking book *Vibration Cooking: or, the Travel Notes of a Geechee Girl* didn’t receive the praise it deserved when it was first published in 1970.
- D. Smart-Grosvenor was a talented chef whose work inspired many people to start cooking for themselves.

ID: 4f52704c Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states the main idea of the text. The text describes the book *Vibration Cooking: or, the Travel Notes of a Geechee Girl* as Smart-Grosvenor’s “most influential project” and as “unusual for its time.” The text also notes that the book and author have influenced contemporary approaches to writing about food and cooking. Therefore, the text mainly conveys that *Vibration Cooking: or, the Travel Notes of a Geechee Girl* is an unconventional and important contribution to food writing.

Choice B is incorrect. Although the text mentions that Smart-Grosvenor worked in national public television and radio and was a food writer, these details aren’t the main focus. Rather than focusing on Smart-Grosvenor’s various jobs, the text focuses specifically on one specific book she wrote. Choice C is incorrect. Although the text suggests that *Vibration Cooking: or, the Travel Notes of a Geechee Girl* was groundbreaking, it doesn’t suggest that the book didn’t receive praise when it was published. In fact, the text states that the book is “long admired.” Choice D is incorrect because the text states that Smart-Grosvenor was a culinary anthropologist and that her book influenced later approaches to food writing but doesn’t indicate that Smart-Grosvenor or her book influenced people to begin cooking for themselves.

Question Difficulty: Medium

Question ID bfbada16

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: bfbada16

At over a thousand pages across two volumes, *The Fifty-Year Mission*, compiled by Edward Gross and Mark A. Altman, is presented as the “complete, uncensored, unauthorized oral history” as told by the people behind the media franchise *Star Trek*. The work aspires to be comprehensive by, for example, including accounts from cast and crew members of every *Star Trek* television series and film to date. But while *The Fifty-Year Mission* is clearly a unique and valuable resource, it has a shortcoming common among oral histories: it lacks a clear authorial point of view that could otherwise unite the various accounts into a cohesive whole.

Which choice best states the main idea of the text?

- A. The compilers of *The Fifty-Year Mission* had lofty goals for their oral history of the *Star Trek* franchise, but the published work lacks information about many key events in the franchise’s history.
- B. *The Fifty-Year Mission* includes more accounts from people involved with *Star Trek* television shows than it does from people involved with *Star Trek* films.
- C. The large amount of material compiled into *The Fifty-Year Mission* is surprising given that many of the people involved in the *Star Trek* franchise did not participate in the oral history project.
- D. *The Fifty-Year Mission* represents a worthwhile attempt to thoroughly recount the history of the *Star Trek* franchise, but its approach has an important limitation.

ID: bfbada16 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main idea of the text. According to the text, Gross and Altman’s book is a “valuable resource” because it’s a “complete, uncensored, unauthorized oral history” that features accounts from people involved with “every *Star Trek* television series and film” made. However, the text also points out an inherent shortcoming of the oral history approach used by the book’s creators: the lack of an authorial voice that could unify the many accounts into a coherent narrative. Thus, the text’s main idea is that while the book’s attempt at presenting a comprehensive oral history of the *Star Trek* franchise is a worthwhile one, the approach the creators selected has an important limitation.

Choice A is incorrect. While the goal of the book’s creators (providing a comprehensive history of the *Star Trek* franchise) could be described as lofty, the text’s criticism of the book is focused on the shortcomings of the oral history form, not on events in the *Star Trek* franchise that were not reflected in the book. Choice B is incorrect because the text doesn’t suggest that the book includes more accounts from people involved with television shows than with films. In fact, the text explicitly states that the book includes accounts from people involved with “every *Star Trek* television series and film” ever made. Choice C is incorrect because the text doesn’t indicate that many people involved with the *Star Trek* franchise failed to participate in the book’s oral history project. The only mention of the scope of participation states that the book includes accounts “from cast and crew members of every *Star Trek* television series and film to date.” This information implies a high level of participation from relevant individuals, not a lack of participation.

Question ID d7b39ff4

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: d7b39ff4

The following text is adapted from Sylvia Acevedo’s 2018 memoir *Path to the Stars: My Journey from Girl Scout to Rocket Scientist*. The narrator is traveling by car with her family to Mexico City. Mario and Laura are her brother and sister.

Mario and I played games to see how many different license plates we could spot, and Laura liked to look for children in the back seats of the cars we passed. We were used to the forty-five-minute drive to El Paso and familiar with the six-hour ride to Chihuahua, but I wondered what the long journey to Mexico City would be like.

©2018 by Sylvia Acevedo

According to the text, what did the narrator and Mario do while riding in the car?

- A. They read books.
- B. They sang songs.
- C. They went to sleep.
- D. They played games.

ID: d7b39ff4 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes what the narrator and Mario did while riding in the car. The text describes a car trip that the narrator is taking with her family. The text states that during the car ride, the narrator and Mario "played games" to see how many different license plates they could spot.

Choice A is incorrect because the text doesn’t mention the narrator and Mario reading during the car ride and instead describes them playing games. Choice B is incorrect because the text doesn’t mention the narrator and Mario singing songs during the car ride and instead describes them playing games. Choice C is incorrect because the text doesn’t mention the narrator and Mario sleeping during the car ride and instead describes them playing games.

Question Difficulty: Easy

Question ID 835583c7

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 835583c7

Ruth Asawa was an accomplished artist who worked in many art forms, including her unique tied-wire sculptures, but she was dedicated to more than the creation of art. Asawa also wanted to bring art to children in her hometown of San Francisco, California. To that end, in 1968 she cofounded the Alvarado School Arts Workshop, which brought works of art and artists into public schools, and in 1982 she helped found a San Francisco public arts high school, which was later named after her.

Which choice best states the main idea of the text?

- A. Asawa inspired many other artists to share their work with students in public schools.
- B. Asawa’s unique sculptures were appreciated more by local art communities than they were nationwide.
- C. Asawa’s interest in art education prompted her to create art programs for students in San Francisco.
- D. Asawa left a promising career as a sculptor to work as an art teacher in San Francisco schools.

ID: 835583c7 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately states the main idea of the text. The text begins by establishing Ruth Asawa as an artist who worked in several art forms but emphasizes that she was interested in art for reasons other than her desire to create it. The text mentions two ways in which Asawa brought art to children through public schools: cofounding the Alvarado School Arts Workshop in 1968 and helping found a public arts high school in 1982. Thus, the main idea is that Asawa’s interest in art education motivated her to establish arts programs for students in San Francisco.

Choice A is incorrect because the text doesn’t mention Asawa inspiring other artists to share their work with students. While the text does note that the Alvarado School Arts Workshop brought works of art and artists into public schools, it doesn’t state that Asawa motivated these artists. Choice B is incorrect because the text makes no comparison between local and national appreciation of Asawa’s sculptures. While the text does mention that Asawa created unique tied-wire sculptures and was connected to San Francisco, it does not contrast her local and national critical receptions. Choice D is incorrect. Although the text emphasizes Asawa’s educational initiatives, it doesn’t state or imply that she abandoned her career as a sculptor to work as an art teacher. Instead, the text portrays her educational work as a complement to her career as a successful artist.

Question Difficulty: Easy

Question ID 87f45e64

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 87f45e64

Arthropods—brine shrimp, hawk moths, and many other invertebrate animals—have a nervous system made up of a brain, nerve cord, and other nerves. Researchers have gained insights about this system in ancient arthropods from traces found in various fossils. For example, in a study of two fossils of the extinct arthropod species *Mollisonia symmetrica*, Javier Ortega-Hernández, James Weaver, and team observed clear signs of a nerve cord. They also saw possible indications of a synganglion, a brain-like mass of nerves. Researchers hope to identify more features of the nervous systems of prehistoric arthropods as additional fossils are found.

Which choice best states the main idea of the text?

- A. There are several similarities between the brains of hawk moths and the brains of brine shrimp.
- B. Fossil evidence can contribute to the understanding of the nervous system in ancient arthropods.
- C. Newly discovered fossils suggest that ancient hawk moths and ancient brine shrimp had spines.
- D. Researchers need to focus on finding more fossils of ancient arthropods.

ID: 87f45e64 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately states the main idea of the text. The text states that researchers have used fossils to learn about the nervous systems of ancient arthropods. It then provides a specific example of researchers studying fossils of *Mollisonia symmetrica* and finding evidence of a nerve cord and possibly a synganglion (a brain-like mass of nerves). The text concludes by noting that researchers hope to discover more features of prehistoric arthropods’ nervous systems "as additional fossils are found." Thus, the main idea of the text is that fossil evidence can contribute to the understanding of the nervous system in ancient arthropods.

Choice A is incorrect because the text doesn’t compare the brains of hawk moths and brine shrimp. These animals are merely mentioned as examples of arthropods in the opening sentence, and the text doesn’t go on to discuss any similarities between their brains. Choice C is incorrect because the text discusses nervous systems, not spines, in ancient arthropods, and it doesn’t specifically mention findings about ancient hawk moths or brine shrimp. Choice D is incorrect. While the text concludes by noting that researchers aim to discover additional characteristics of prehistoric arthropods’ nervous systems as more fossils are uncovered, this statement doesn’t suggest that researchers need to focus on finding more fossils. Rather, it simply indicates that researchers expect to learn more about this topic as additional fossils are discovered. Moreover, the statement is just a detail that supports the main idea; it’s not the main idea itself.

Question Difficulty: Easy

Question ID 533d6d0e

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 533d6d0e

To make her art more widely available, graphic artist Elizabeth Catlett turned to linocuts. In linocut printing, an artist carves an image into a sheet of linoleum to create a stamp that is used to mass-produce prints. In the linocut series *The Black Woman* (1946–1947), Catlett depicts the everyday experiences of Black women alongside the achievements of well-known Black women. This pairing invites the viewer to draw connections among the women. The linocut process enabled Catlett’s work to reach a wide audience and supported her aim to unite Black women through her art.

- According to the text, what is significant about Catlett’s use of linocut printing?
- A. Linocut printing involved using materials that were readily available to Catlett.
 - B. Linocut printing helped Catlett use art to connect people, especially Black women.
 - C. Catlett became commercially successful once she started using linocut printing.
 - D. Catlett was one of the first Black artists to use linocut printing.

ID: 533d6d0e Answer

Correct Answer: B

Rationale

Choice B is the best answer. The last sentence states that the linocut process “supported her [Catlett’s] aim to unite Black women through her art.”

Choice A is incorrect. The text briefly describes the linocut printing process but doesn’t discuss the availability of the materials used in the process. Choice C is incorrect. The text says that the linocut process “enabled Catlett’s work to reach a wide audience,” but that doesn’t mean that linocuts made her “commercially successful.” In other words, we don’t know how much money she made off her linocuts—we only know that more people were able to see her work. Choice D is incorrect. The text says that Catlett depicted Black women in her linocuts, but not that she was one of the first Black artists to use linocut printing.

Question Difficulty: Easy

Question ID b7c5b4e4

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: b7c5b4e4

Shimmering is a collective defense behavior that researchers have observed in giant honeybee colonies. When shimmering, different groups of bees flip their bodies up and down in what looks like waves. This defense is initiated when hornets hover near a colony, serving to deter the hornets from approaching the bees. Researchers hypothesize that this behavior is a specialized defense response to hornets, as it is not observed when other, larger predators approach the colony.

Which choice best states the main idea of the text?

- A. Researchers are unsure how giant honeybees defend against predators larger than hornets.
- B. Researchers think that shimmering in giant honeybees is a specific defense against hornets.
- C. Hornets are known to be the main predator of giant honeybees.
- D. Several different species of insects use shimmering to defend against hornets.

ID: b7c5b4e4 Answer

Correct Answer: B

Rationale

Choice B is the best answer. The text describes a study about how giant honeybees use shimmering to defend against hornets, but not other predators. The researchers conclude that shimmering could be a specialized defense response to hornets.

Choice A is incorrect. The text says that giant honeybees don’t appear to use shimmering against other, larger predators. However, it never suggests that researchers don’t know which other defenses giant honeybees do use for those predators. Choice C is incorrect. The text says that hornets are one predator of giant honeybees, but it doesn’t say that hornets are the main predator of giant honeybees. This choice also fails to mention “shimmering,” which is a major focus of the text. Choice D is incorrect. The text only discusses the shimmering of giant honeybees—it doesn’t discuss other insects’ defense responses at all.

Question Difficulty: Easy

Question ID a380e0c7

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: a380e0c7

Bicycles were first mass-produced in the late nineteenth century throughout Europe and North America, allowing individuals remarkable freedom to travel longer distances quickly and comfortably. This freedom, coupled with the affordability of the vehicle, made the bicycle immensely popular. Individuals were able to live farther from their workplaces, easily visit neighboring towns, and participate in new leisure and sport activities. Bicycling quickly became a popular social endeavor, with enthusiasts forming local cycling clubs to enjoy these newfound activities with others.

Which choice best states the main idea of the text?

- A. The widespread adoption of the bicycle in the late nineteenth century provided new opportunities for people.
- B. The affordability of the bicycle in the late nineteenth century made it the preferred way to travel.
- C. The popularity of the bicycle in the late nineteenth century gave rise to the first cycling clubs.
- D. The mass production of the bicycle in the late nineteenth century made it safer for people to use.

ID: a380e0c7 Answer

Correct Answer: A

Rationale

Choice A is the best answer. The text discusses how the mass production of bicycles in the late nineteenth century allowed people to travel longer distances, live farther from their workplaces, visit neighboring towns, and participate in new activities and social clubs. All of these are new opportunities that were provided by the widespread adoption of the bicycle.

Choice B is incorrect. The text never says this. It does say that the bicycle was “affordable,” and that the “freedom to travel longer distances quickly and comfortably” made the bicycle “popular,” but it never says that the bicycle was more popular than any other way of traveling (like cars or trains or horses). Choice C is incorrect. This is a detail mentioned in the text, but not the main idea. Cycling clubs are only one of the new opportunities that arose from the popularity of the mass-produced bicycle. A “main idea” should capture more of the information in the text. Choice D is incorrect. The text never says this. It doesn’t mention the safety of the mass-produced bicycle at all.

Question Difficulty: Easy

Question ID 880bf7d5

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 880bf7d5

The following text is from Beatrice Harraden’s 1894 novel *Ships that Pass in the Night*.

In an old second-hand bookshop in London, an old man sat reading Gibbon’s *History of Rome*. He did not put down his book when the postman brought him a letter. He just glanced indifferently at the letter, and impatiently at the postman. Zerviah Holme did not like to be interrupted when he was reading Gibbon; and as he was always reading Gibbon, an interruption was always regarded by him as an insult.

Based on the text, how did Zerviah Holme most likely feel when the letter was delivered?

- A. He felt relieved because he had been expecting an important letter.
- B. He felt excited because the letter was from a good friend.
- C. He felt sad because the postman did not stop to talk with him before leaving.
- D. He felt annoyed because he was interrupted while reading his favorite author.

ID: 880bf7d5 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it presents a description of how Zerviah Holme felt that is directly supported by the text. The text states that Holme "did not like to be interrupted" while reading Gibbon and that he considered interruptions to be "an insult." Furthermore, the text suggests that Gibbon is Holme’s favorite author because, as the text states, "he was always reading Gibbon." Thus, Holme would have felt annoyed at having been interrupted when the letter was delivered.

Choice A is incorrect because the text doesn’t suggest that Holme is relieved to receive the letter. Instead, the text states that Holme "just glanced indifferently at the letter," suggesting that the letter wasn’t important to him. Choice B is incorrect because the text doesn’t suggest that Holme is excited to receive the letter. Instead, the text states that Holme didn’t put down his book to receive the letter and that he looked at the letter "indifferently" and at the postman "impatiently." This suggests that Holme isn’t excited. Also, there is no mention that Holme knows who sent the letter. Choice C is incorrect because the text doesn’t indicate that Holme is sad or that he wants to speak with the postman. Instead, the text describes Holme as looking "impatiently at the postman," which suggests that he wants the postman to leave.

Question Difficulty: Easy

Question ID 14348c71

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 14348c71

Few animals are known to spit: among them are humans, cobras, and camels. But in January 2022 at a nature preserve in southern England, bird-watcher Clare Jacobs observed a gray seal spitting a jet of water at a white-tailed eagle flying overhead. Seals had never been seen spitting before. Biologist Sean Twiss, who studies gray seals, believes that the seal may have been attempting to scare the eagle away from a food source or that the seal may have just been playing.

Which choice best states the main topic of the text?

- A. Bird-watching in southern England
- B. A previously unseen behavior of gray seals
- C. How white-tailed eagles defend their territory against other predators
- D. Differences between gray seals and white-tailed eagles

ID: 14348c71 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately states the main topic of the text. The text begins by noting that few animals are known to spit, and then it focuses on Clare Jacobs’s January 2022 observation of a gray seal spitting water at a white-tailed eagle. The text explicitly notes that this behavior had never before been observed in seals, highlighting that this was a previously unseen behavior. The text concludes with biologist Sean Twiss’s hypotheses about why the seal might have been spitting. Thus, the main topic is the observation of a previously unseen behavior (spitting) of gray seals.

Choice A is incorrect because while the text does mention bird-watcher Clare Jacobs making an observation in southern England, bird-watching itself is not the main topic. The reference to bird-watching is incidental to the central focus of the novel behavior of a gray seal spitting water at an eagle. Choice C is incorrect because the text only mentions a white-tailed eagle as the target of a seal’s spitting behavior; it doesn’t provide any information about how these eagles typically behave when defending territory or interacting with other predators. Choice D is incorrect because the text doesn’t discuss differences between gray seals and white-tailed eagles. While both animals are mentioned, the text is focused on the seal’s unusual spitting behavior rather than comparing the two animals in any way.

Question Difficulty: Easy

Question ID 9a5e205b

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 9a5e205b

Scent is tightly interwoven with our daily lives, often evoking significant memories and important social events. This connection is of growing interest to archaeologists who hope to use it to better understand ancient rituals, trade, social hierarchies, and medicine. Although the speed at which odor molecules dissipate makes identifying ancient scents challenging, advancements in biomolecular technologies show promise in unlocking ancient aromas from preserved artifacts. Archaeological studies making use of these advancements may provide new insights into past societies.

- According to the text, what is one reason some archaeologists are interested in recovering scents from ancient artifacts?
- A. They are investigating whether people’s sense of smell has declined in recent centuries.
 - B. They believe the scents could illuminate important aspects of ancient life.
 - C. They think that ancient scents would be enjoyable to people today.
 - D. They hope to develop new medicines using ancient scent molecules.

ID: 9a5e205b Answer

Correct Answer: B

Rationale

Choice B is the best answer. The text states that archaeologists are interested in using scents to better understand "ancient rituals, trade, social hierarchies, and medicine," all of which are important aspects of ancient life.

Choice A is incorrect. The text doesn’t say anything about investigating if people’s sense of smell has declined in recent centuries. It says that scents fade over time—not that people have gotten worse at smelling scents. Choice C is incorrect. The text says that archaeologists are interested in using scents to better understand "ancient rituals, trade, social hierarchies, and medicine," but it doesn’t say anything about ancient scents being enjoyable to people today. Choice D is incorrect. The text doesn’t say anything about developing new medicines. Rather, it says that archaeologists are interested in using scents to better understand "ancient rituals, trade, social hierarchies, and medicine."

Question Difficulty: Easy

Question ID 4cfd4ab2

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 4cfd4ab2

The following text is from Shyam Selvadurai’s 1994 novel *Funny Boy*. The seven-year-old narrator lives with his family in Sri Lanka. Radha Aunty is the narrator’s aunt.

Radha Aunty, who was the youngest in my father’s family, had left for America four years ago when I was three, and I could not remember what she looked like. I went into the corridor to look at the family photographs that were hung there. But all the pictures were old ones, taken when Radha Aunty was a baby or young girl. Try as I might, I couldn’t get an idea of what she looked like now. My imagination, however, was quick to fill in this void.

©1994 by Shyam Selvadurai.

- According to the text, why does the narrator consult some family photographs?
- A. He wants to use the photographs as inspiration for a story he is writing.
 - B. He is curious about how his father dressed a long time ago.
 - C. He hopes the photographs will help him recall what his aunt looked like.
 - D. He wants to remind his aunt of an event that is shown in an old photograph.

ID: 4cfd4ab2 Answer

Correct Answer: C

Rationale

Choice C is the best answer. The text states that the narrator couldn’t remember what his Radha Aunty looked like, so he went to look at the family photographs she was in.

Choice A is incorrect. There’s no mention of any story that the narrator is writing. Rather, we’re told that the narrator couldn’t remember what his aunt looked like, so he went to look at the family photographs she was in. Choice B is incorrect. The text doesn’t mention how the narrator’s father dressed. Rather, we’re told that the narrator couldn’t remember what his aunt looked like, so he went to look at the family photographs she was in. Choice D is incorrect. The text doesn’t mention any events shown in the photographs. Rather, we’re told that the narrator couldn’t remember what his aunt looked like, so he went to look at the family photographs she was in.

Question Difficulty: Easy

Question ID 0ee9dd5d

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 0ee9dd5d

Artist Justin Favela explained that he wanted to reclaim the importance of the piñata as a symbol in Latinx culture. To do so, he created numerous sculptures from strips of tissue paper, which is similar to the material used to create piñatas. In 2017, Favela created an impressive life-size piñata-like sculpture of the Gypsy Rose lowrider car, which was displayed at the Petersen Automotive Museum in Los Angeles, California. The Gypsy Rose lowrider was famously driven by Jesse Valadez, an early president of the Los Angeles Imperials Car Club.

According to the text, which piece of Favela’s art was on display in the Petersen Automotive Museum in 2017?

- A. A painting of Los Angeles
- B. A sculpture of a lowrider car
- C. A painting of a piñata
- D. A sculpture of Jesse Valadez

ID: 0ee9dd5d Answer

Correct Answer: B

Rationale

Choice B is the best answer. The text describes Favela’s approach to sculpture, and then describes the lowrider car that he depicted in 2017.

Choice A is incorrect. This isn’t what the text says. The Petersen Automotive Museum is located in Los Angeles, but Favela’s artwork isn’t a painting, and it doesn’t depict L.A. Choice C is incorrect. This isn’t what the text says. Favela makes sculptures similar to piñatas, not paintings of them. Choice D is incorrect. This isn’t what the text says. Jesse Valadez owned the lowrider car that Favela depicted in sculpture.

Question Difficulty: Easy

Question ID 9ec5bbff

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 9ec5bbff

Archaeologist Veronica Waweru visited the Lewa Wildlife Conservancy in Kenya. While exploring there, Waweru noticed many rows of shallow pits carved into stone. Waweru believed the pits could have been used as game boards to play ancient versions of mancala, a two-person strategy game that is still popular today. Some of the more recent pits were carved on top of older pits. This led Waweru to think that the game was played at the site for a long time.

According to the text, why does Waweru think that mancala was played at the site for a long time?

- A. Some of the newer pits were carved on top of the older pits.
- B. She noticed many rows of shallow pits carved into stone.
- C. She discovered the pits at the Lewa Wildlife Conservancy.
- D. Some of the pits were shallow and others were quite deep.

ID: 9ec5bbff Answer

Correct Answer: A

Rationale

Choice A is the best answer because it presents a statement about Veronica Waweru’s thinking that is supported by the text. The text begins by discussing Waweru’s discovery of evidence that ancient versions of the board game mancala had been played at a site in the Lewa Wildlife Conservancy. The evidence consisted of many rows of shallow pits carved into stone. The text goes on to state that some newer pits were carved on top of older pits, suggesting that people may have continued to play the game there over multiple generations, creating new pits over time. The text then explicitly states that the presence of newer pits carved on top of older pits was precisely what caused Waweru to think that mancala had been played at the site for a long time.

Choice B is incorrect. While the text does state that Waweru "noticed many rows of shallow pits carved into stone," this observation led her to believe that the pits could have been used as game boards for ancient versions of mancala but did not specifically suggest to her that the game had been played at the site for a long time. The multiple rows of pits merely suggest that these pits functioned as part of a game board; they don’t necessarily indicate how long the site had been used for that purpose. Rather, it was the fact that there appeared to be newer pits carved on top of older pits that led Waweru to think that mancala had been played at the site for a long time. Choice C is incorrect. Although the text states that Waweru found the pits at the Lewa Wildlife Conservancy, this isn’t the reason the text gives for why she thought that mancala had been played at the site for a long time. The location of the discovery only provides information about where the game was played, not how long the game had been played there. Choice D is incorrect because the text doesn’t mention any variation in the depth of the pits. The text only describes the pits collectively as shallow and doesn’t indicate that the depth of the pits factored into Waweru’s thinking about how long the site had been used for playing mancala.

Question Difficulty: Easy

Question ID c5043ec4

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: c5043ec4

The following text is adapted from Johanna Spyri’s 1881 novel *Heidi* (translated by Elisabeth Stork in 1915). Eight-year-old Heidi and her friend’s grandmother are looking at some illustrated books.

Heidi had come and was looking with wondering eyes at the splendid pictures in the large books, that Grandmama was showing her. Suddenly she screamed aloud, for there on the picture she saw a peaceful flock grazing on a green pasture. In the middle a shepherd was standing, leaning on his crook. The setting sun was shedding a golden light over everything. With glowing eyes Heidi devoured the scene.

- Which choice best states the main idea of the text?
- A. Heidi is upset until she sees a serene image of a pasture in one of Grandmama’s books.
 - B. Heidi is delighted and fascinated by an image she sees in one of Grandmama’s books.
 - C. Heidi is initially frightened by an image in one of Grandmama’s books but quickly comes to appreciate its beauty.
 - D. Heidi is inspecting an image in one of Grandmama’s books because she has never seen a shepherd with his sheep before.

ID: c5043ec4 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most effectively states the main idea of the text, which is that Heidi is delighted and fascinated by an image she sees in one of Grandmama’s books. In the text, Heidi screams upon first seeing the picture of the green pasture. In another context, such a reaction might suggest fear, but here the reaction is followed by descriptions of an image that’s peaceful rather than scary. The text goes on to describe Heidi’s eyes as “glowing” and states that she “devoured the scene,” suggesting that the image delights and fascinates her so much that she wants to examine every detail. Together, these descriptions suggest that Heidi is thrilled and intrigued by the image in the book.

Choice A is incorrect because there’s nothing in the text to suggest that Heidi is upset before seeing the peaceful image of the green pasture. Before Heidi sees that image, the text describes her as “looking with wondering eyes at the splendid pictures” in the book, suggesting that Heidi is intrigued, not that she’s unhappy. Choice C is incorrect. Although Heidi screams upon first seeing the image, the text’s description of the image and Heidi’s other reactions to it suggest that she is screaming with delight, not fear. The text describes the images in the book as “splendid” and the particular image that causes her to scream as peaceful rather than frightening. It also describes Heidi’s eyes as “glowing” and states that she “devoured the scene,” suggesting that the image of the green pasture delights and fascinates her so much that she wants to examine every detail. Choice D is incorrect because it’s unclear from the text whether Heidi has ever seen a shepherd with his sheep before. The text merely suggests that she is delighted and fascinated by the image of the shepherd and his sheep.

Question Difficulty: Easy

Question ID ac40b6ba

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: ac40b6ba

In the 1960s, Chavela Vargas became an unlikely star in ranchera, a style of traditional Mexican music. Most ranchera singers had clear, polished voices and performed with a full band. But Vargas accompanied her raspy voice with just her guitar. Dressed in men’s trousers and a poncho, she would perform classic songs that had been written from a male point of view and were usually sung by men. She also altered those songs by performing them much more slowly than other ranchera singers did. The slower tempo allowed her to express the emotional quality of the lyrics more fully.

According to the text, what is one way that Vargas differed from other ranchera singers?

- A. She possessed a voice that was clear and polished.
- B. She avoided singing songs written from a male point of view.
- C. She disliked performing classic songs.
- D. She altered classic songs by slowing them down.

ID: ac40b6ba Answer

Correct Answer: D

Rationale

Choice D is the best answer because it accurately describes an aspect of Chavela Vargas that the text indicates is unusual among ranchera artists. According to the text, Vargas differed from other ranchera singers by slowing the tempo of classic songs, which allowed her to express the emotional quality of the lyrics more fully.

Choice A is incorrect because the text states that Vargas possessed an unusually raspy voice for a ranchera singer, not a clear and polished voice. Choice B is incorrect because the text indicates that Vargas was known to perform songs written from a male point of view, not that she avoided such songs. Choice C is incorrect because nothing in the text suggests that Vargas disliked performing classic songs. Rather, it suggests that she found innovative ways of performing them to emphasize their emotional content, which seems to suggest an affinity for such songs, not dislike.

Question Difficulty: Easy

Question ID af117e6b

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: af117e6b

Microplastics are pieces of plastic that are smaller than a grain of rice. These small plastics can be found in large quantities in ocean waters. Ecologist Jessica Reichert and her team are studying the role reef-building corals have in capturing microplastics from ocean waters. Through research, her team has found that these corals may be storing up to 20 million kilograms of microplastics each year in their skeletons and tissues.

Which choice best states the main idea of the text?

- A. Ecologists are interested in learning more about how certain corals build large reefs.
- B. Questions remain around the impact certain corals have on ocean ecosystems.
- C. Microplastics are small pieces of plastic that can be found in ocean waters.
- D. Ecologists predict that corals store large amounts of microplastics from ocean waters.

ID: af117e6b Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text describes a study about how reef-building corals capture microplastics from ocean waters, which found that these corals are storing 20 million kilograms of microplastics in their skeletons and tissues.

Choice A is incorrect. While the researchers are studying “reef-building corals,” the focus of their study isn’t how the corals build the reefs. Rather, they’re studying how corals may be storing microplastics from ocean waters. Choice B is incorrect. The text doesn’t mention any unanswered questions about the impact of corals on ocean ecosystems—rather, the study assesses one interaction between corals and microplastics. Choice C is incorrect. The text does say this, but it’s a detail—not the main idea. The main idea of the text is about the study that found that corals may be storing microplastics from ocean waters in their skeletons and tissues.

Question Difficulty: Easy

Question ID f7b78f6e

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: f7b78f6e

Xin Wang and colleagues have discovered the earliest known example of a flower bud in a 164-million-year-old plant fossil in China. The researchers have named the new species *Florigerminis jurassica*. They believe that the discovery pushes the emergence of flowering plants, or angiosperms, back to the Jurassic period, which occurred between 145 million and 201 million years ago.

According to the text, how old was the fossil that Wang and colleagues discovered?

- A. 150 million years old
- B. 145 million years old
- C. 164 million years old
- D. 201 million years old

ID: f7b78f6e Answer

Correct Answer: C

Rationale

Choice C is the best answer because it gives the age for the fossil discovered by Wang and colleagues that is directly supported by the text. According to the text, Xin Wang and colleagues discovered a 164-million-year-old plant fossil. This plant fossil included a flower bud, which the researchers believe provides evidence that flowering plants emerged in the Jurassic period, which falls between 145 million and 201 million years ago.

Choice A is incorrect because the text states that Wang and colleagues discovered a 164-million-year-old flowering plant fossil in China, not one that is 150 million years old. Although 150 million years ago would fall within the Jurassic period, according to the text it isn't the age of the discovered fossil. Choice B is incorrect because the text states that Wang and colleagues discovered a 164-million-year-old flowering plant fossil in China, not one that is 145 million years old. Although 145 million years ago would fall at the end of the Jurassic period, according to the text it isn't the age of the discovered fossil. Choice D is incorrect because the text states that Wang and colleagues discovered a 164-million-year-old flowering plant fossil in China, not one that is 201 million years old. Although 201 million years ago would fall at the beginning of the Jurassic period, according to the text it isn't the age of the discovered fossil.

NASA’s *Cassini* probe has detected an unusual wobble in the rotation of Mimas, Saturn’s smallest moon. Using a computer model to study Mimas’s gravitational interactions with Saturn and tidal forces, geophysicist Alyssa Rhoden and colleagues have proposed that this wobble could be due to a liquid ocean moving beneath the moon’s icy surface. The researchers believe other moons should be examined to see if they too might have oceans hidden beneath their surfaces.

- Which choice best states the main idea of the text?
- A. Rhoden and colleagues were the first to confirm that several of Saturn’s moons contain hidden oceans.
 - B. Research has failed to identify signs that there is an ocean hidden beneath the surface of Mimas.
 - C. Rhoden and colleagues created a new computer model that identifies moons with hidden oceans without needing to analyze the moons’ rotation.
 - D. Research has revealed that an oddity in the rotation of Mimas could be explained by an ocean hidden beneath its surface.

ID: 883e22fb Answer

Correct Answer: D

Rationale

Choice D is the best answer. The study isn’t definitive, but it says that Mimas’s wobbly rotation could be explained by the hidden ocean.

Choice A is incorrect. This choice goes too far beyond the information in the text. Rhoden’s team proposed that one moon of Saturn could have a liquid ocean beneath its surface, and that other moons should also be examined, but no one has confirmed anything. Choice B is incorrect. This choice conflicts with the text. Research has identified at least one sign—the unusual wobble in Mimas’s rotation—that might be due to a hidden ocean beneath its surface. Choice C is incorrect. This choice doesn’t reflect the text. The computer model studies “gravitational interactions,” which seem to account for the wobbly rotation of Mimas.

Question Difficulty: Easy

Question ID 1adb7166

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 1adb7166

The average age at which people in the United States start businesses is 35. Economist Andrés Hincapié studied why young adults are relatively less likely to start businesses and whether there are ways to increase entrepreneurship in early adulthood. Hincapié found that one impediment is lack of knowledge about the practical details of how businesses are started; he further found that simply providing young adults with good informational resources on the topic significantly alleviates this problem.

Based on the text, what would Hincapié most likely say is a promising way to increase entrepreneurship in early adulthood?

- A. Creating social networks of young adults who are interested in starting a business
- B. Encouraging young adults to brainstorm business ideas
- C. Providing young adults with practical information about how to start a business
- D. Giving young adults training opportunities at a variety of businesses

ID: 1adb7166 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it presents a conclusion about increasing entrepreneurship in early adulthood that can be reasonably inferred from the text. The text explains that Andrés Hincapié investigated why young adults are less likely than older adults to start businesses and found that lack of knowledge of practical aspects of starting a business is a barrier. The text then states that Hincapié found that providing relevant informational resources greatly helps address that problem. Offering young adults practical information about how to start a business would be an example of providing relevant informational resources, so Hincapié would most likely say it is a promising way to increase early adult entrepreneurship.

Choice A is incorrect because creating social networks of young adults interested (but presumably inexperienced) in starting a business wouldn't involve a clear source of practical information for those young adults, and the text indicates that Hincapié identified offering relevant informational resources about starting a business as a way to significantly reduce the problem of young adults' low participation in entrepreneurship. Choice B is incorrect because encouraging young people to brainstorm business ideas wouldn't involve a clear source of practical information for those young adults, and the text indicates that Hincapié identified offering relevant informational resources about starting a business as a way to significantly reduce the problem of young adults' low participation in entrepreneurship. Choice D is incorrect because providing young adults with training opportunities at existing businesses would give those young people exposure to businesses that already exist but not necessarily information about how to start a business, and the text indicates that Hincapié identified offering relevant informational resources about starting a business as a way to significantly reduce the problem of young adults' low participation in entrepreneurship.

In 2022, researchers rediscovered ancient indigenous glyphs, or drawings, on the walls of a cave in Alabama. The cave’s ceiling was only a few feet high, affording no position from which the glyphs, being as wide as ten feet, could be viewed or photographed in their entirety. However, the researchers used a technique called photogrammetry to assemble numerous photos of the walls into a 3D model. They then worked with representatives of tribes originally from the region, including the Chickasaw Nation, to understand the significance of the animal and humanoid figures adorning the cave.

According to the text, what challenge did the researchers have to overcome to examine the glyphs?

- A. The cave was so remote that the researchers couldn’t easily reach it.
- B. Some of the glyphs were so faint that they couldn’t be photographed.
- C. The researchers were unable to create a 3D model of the cave.
- D. The cave’s dimensions prevented the researchers from fully viewing the glyphs.

ID: 695c3f5f Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text describes the very low ceiling of the cave, making it impossible to photograph the very wide glyphs all at once.

Choice A is incorrect. The text doesn’t say this. It never suggests that the cave was remote or difficult to access, just that the cave itself was difficult to photograph well. Choice B is incorrect. The text doesn’t say this. The glyphs were so wide that they couldn’t be photographed completely. Choice C is incorrect. The text states the opposite of this. The researchers “used a technique called photogrammetry to assemble numerous photos of the walls into a 3D model.”

Question ID dd581cac

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: dd581cac

Hevea brasiliensis, a tree in the Amazon rainforest, is the world’s main source of natural rubber. The tree produces a milky substance called latex that is used to make rubber. The bark of *Hevea brasiliensis* is helpful for the process of making rubber because it has a unique structure that makes it easy to collect latex. A network of tubes in the tree’s inner bark helps the latex to flow out easily when people make small cuts into the bark.

What feature of *Hevea brasiliensis* does the text say is helpful for the process of making rubber?

- A. Its latex produces rubber of an especially high quality.
- B. Its bark has a unique structure that makes it easy to collect latex.
- C. It is able to grow in a wide variety of climates around the world.
- D. It is one of only two trees in the Amazon that produce latex.

ID: dd581cac Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately states what feature of *Hevea brasiliensis* is helpful for the process of making rubber. According to the text, this tree species produces latex, which is used to make rubber, and its inner bark contains a "network of tubes" that, when cut, enables the latex to flow out. The text explicitly states that this feature of *Hevea brasiliensis* is "helpful for the process of making rubber."

Choice A is incorrect because the text doesn’t mention the quality of the rubber produced from the latex of *Hevea brasiliensis* or compare its quality to that of rubber produced from other sources. Choice C is incorrect because the text never discusses the climates in which *Hevea brasiliensis* grows. Moreover, the text mentions only one region where this tree is found: the Amazon rainforest. Choice D is incorrect. Because the text states that *Hevea brasiliensis* is the world’s "main source of natural rubber," it can be inferred that there is at least one other source. However, the text doesn’t specify whether that other source is also a tree species and, if so, whether that species grows in the Amazon rainforest.

Question ID 183bd6b1

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 183bd6b1

When fashion designer Lloyd Henri Kiva New opened his store in Scottsdale, Arizona, in 1945, he quickly became known for creating delicately crafted leather goods, like belts and hats. He was perhaps most renowned for his colorful handbags, which he made by hand using a long and painstaking process. As he gained more customers, New began using sewing machines and other tools to help him produce bags more efficiently, though he continued to handcraft the crucial details that made each bag unique.

Based on the text, what would have been the most likely consequence if New had not begun using sewing machines?

- A. He would have been unable to ensure that each bag included unique, handcrafted details.
- B. He would have struggled to meet the increasing demand for his bags.
- C. He would have had to individually design each bag he produced.
- D. He would not have been able to generate as much interest in his bags.

ID: 183bd6b1 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it presents the most likely consequence if New had not begun using sewing machines. The text states that New gained new customers and that sewing machines allowed him to make bags more efficiently, or in less time than he could when sewing by hand. It’s reasonable to conclude that if New hadn’t reduced the time it took to make each bag by starting to use sewing machines, it would have been hard for him to keep up with the increased demand.

Choice A is incorrect because the text indicates that New added unique, handcrafted details to his bags before he started using sewing machines and continued to do so after he started using them. Choice C is incorrect because the text doesn’t suggest that individually designing each bag would have been a consequence of not using sewing machines, since New was already designing unique details for each bag before he started using sewing machines and continued to do so after he started using them. Choice D is incorrect because the text indicates that people were already interested in New’s bags before he started using sewing machines. Rather than allowing New to generate more interest in his bags, sewing machines helped New keep up with the interest that had already grown.

In the 1960s, Gloria Richardson led a movement to promote racial equality. Her involvement in this effort was inspired by her daughter, Donna Richardson. In 1961, Donna joined protests organized by the Student Nonviolent Coordinating Committee in Cambridge, Maryland. Following her daughter, Gloria joined these protests too. Gloria soon became the cochair of the Cambridge Nonviolent Action Committee. She was also the leader of what became known as the Cambridge movement.

According to the text, what did Gloria Richardson lead?

- A. The Cambridge movement
- B. Her daughter Donna’s high school
- C. Protests to support environmental protections
- D. A new business in Cambridge, Maryland

ID: e48f2f19 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it presents information about Gloria Richardson that is supported by the text. The text provides a number of details about Gloria’s involvement in efforts to promote racial equality, including that she was the leader of what became known as the Cambridge movement.

Choice B is incorrect because the text never indicates that Gloria Richardson led her daughter Donna’s high school. The text says only that Gloria was inspired by her daughter to become involved in efforts to promote racial equality. Choice C is incorrect because the text doesn’t mention protests related to environmental protections. Rather, the text discusses Gloria Richardson’s involvement in efforts to promote racial equality. Choice D is incorrect because the text doesn’t indicate that Gloria Richardson led a new business in Cambridge, Maryland. Rather, the text states that she led what became known as the Cambridge movement.

Question Difficulty: Easy

Question ID b8ee13cc

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: b8ee13cc

In 2014, Amelia Quon and her team at NASA set out to build a helicopter capable of flying on Mars. Because Mars’s atmosphere is only one percent as dense as Earth’s, the air of Mars would not provide enough resistance to the rotating blades of a standard helicopter for the aircraft to stay aloft. For five years, Quon’s team tested designs in a lab that mimicked Mars’s atmospheric conditions. The craft the team ultimately designed can fly on Mars because its blades are longer and rotate faster than those of a helicopter of the same size built for Earth.

According to the text, why would a helicopter built for Earth be unable to fly on Mars?

- A. Because Mars and Earth have different atmospheric conditions
- B. Because the blades of helicopters built for Earth are too large to work on Mars
- C. Because the gravity of Mars is much weaker than the gravity of Earth
- D. Because helicopters built for Earth are too small to handle the conditions on Mars

ID: b8ee13cc Answer

Correct Answer: A

Rationale

Choice A is the best answer because it presents an explanation about a helicopter that is directly supported by the text. The text states that Mars’s atmosphere is much less dense than Earth’s, and as a result, the air on Mars doesn’t provide the resistance required to support the blades of a helicopter built for Earth and to keep the helicopter aloft. In other words, a helicopter built for Earth can’t fly on Mars because of the differences in the two planets’ atmospheres.

Choice B is incorrect because instead of stating that the blades of helicopters built for Earth are too large to work on Mars, the text indicates that the helicopter built to fly on Mars actually has even longer blades than a helicopter built for Earth. Choice C is incorrect because the text never addresses the role of gravity on Mars or on Earth; instead, it focuses on atmospheric conditions. Choice D is incorrect because the text doesn’t indicate that helicopters built for Earth are too small to operate in the conditions on Mars. In fact, the text states that the size of the helicopter built to fly on Mars is the same size as a helicopter built for Earth, even though it has longer blades that rotate faster.

Question Difficulty: Easy

Question ID eb57012b

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: eb57012b

The following text is from David Barclay Moore’s 2022 novel *Holler of the Fireflies*. The narrator has just arrived at summer camp, which is far away from his home.

This place was different than I thought it would be. I’d never been somewhere like this before. I did feel scared, but also excited.

©2022 by David Barclay Moore

According to the text, how does the narrator feel about being at summer camp?

- A. He feels overjoyed.
- B. He feels peaceful.
- C. He feels both scared and excited.
- D. He feels both angry and jealous.

ID: eb57012b Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately states how the narrator feels about being at summer camp. In the text, the narrator states that after arriving at the camp, he found it to be different than he’d expected and that as a result, he felt "scared, but also excited."

Choice A is incorrect. In the text, the narrator describes himself as "excited." Although excitement is a positive emotion, it isn’t as intensely positive as feeling overjoyed is. Moreover, the narrator also notes that he felt "scared." In other words, his excitement (a positive emotion) is balanced with fear (a negative emotion). Given this mixture of positive and negative emotions, it would be inaccurate to characterize the narrator as overjoyed. Choice B is incorrect because in the text, the narrator describes himself as having felt both fear and excitement. Neither of these emotions can be thought of as peaceful and, in fact, are almost the opposite of a sense of peace. Choice D is incorrect because in the text, the narrator describes himself as both "scared" and "excited," not angry and jealous.

Question Difficulty: Easy

Question ID cc98ded7

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: cc98ded7

The following text is adapted from Ann Petry’s 1946 novel *The Street*. Lutie lives in an apartment in Harlem, New York.

The glow from the sunset was making the street radiant. The street is nice in this light, [Lutie] thought. It was swarming with children who were playing ball and darting back and forth across the sidewalk in complicated games of tag. Girls were skipping double dutch rope, going tirelessly through the exact center of a pair of ropes, jumping first on one foot and then the other.

©1946 by Ann Petry

Which choice best describes what is happening in the text?

- A. Lutie is observing the appearance of the street at a particular time of day and the events occurring on it.
- B. Lutie is annoyed by the noise of children playing games on her street.
- C. Lutie is puzzled by the rules of certain children’s games.
- D. Lutie is spending time alone in her apartment because she doesn’t want to interact with her neighbors.

ID: cc98ded7 Answer

Correct Answer: A

Rationale

Choice A is the best answer because it most accurately states what is happening in the text. The narrator notes that Lutie thinks the street looks nice in the light of the sunset. The narrator goes on to describe what Lutie can see in the street: children playing ball or tag and girls skipping rope. Thus, what is happening in the text is that Lutie is observing the appearance of the street at a particular time of day and the events occurring on it.

Choice B is incorrect. Although Lutie is observing children playing games on her street, the text doesn’t suggest that she is annoyed by the noise of the games. Instead, the text says that Lutie thinks the street looks nice in the light of the sunset. Choice C is incorrect. Although Lutie is observing children playing games on her street, the text doesn’t suggest that she is puzzled by the rules of the games. Choice D is incorrect because there is no evidence in the text that Lutie doesn’t want to interact with her neighbors or that she is in her apartment alone. All the text indicates about Lutie is that she is watching the events on the street and thinks the street looks nice in the light of the sunset.

Question Difficulty: Easy

Question ID 69405b6e

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 69405b6e

The following text is adapted from Edith Nesbit’s 1906 novel *The Railway Children*.

Mother did not spend all her time in paying dull [visits] to dull ladies, and sitting dully at home waiting for dull ladies to pay [visits] to her. She was almost always there, ready to play with the children, and read to them, and help them to do their home-lessons. Besides this she used to write stories for them while they were at school, and read them aloud after tea, and she always made up funny pieces of poetry for their birthdays and for other great occasions.

According to the text, what is true about Mother?

- A. She wishes that more ladies would visit her.
- B. Birthdays are her favorite special occasion.
- C. She creates stories and poems for her children.
- D. Reading to her children is her favorite activity.

ID: 69405b6e Answer

Correct Answer: C

Rationale

Choice C is the best answer because it describes something that is true of Mother, as presented in the text. The text indicates that in addition to other activities, Mother writes stories for her children while they are at school and makes up “funny pieces of poetry” for certain occasions.

Choice A is incorrect because the text suggests that Mother prefers to spend her time with her children and doesn’t sit at home hoping that ladies will visit her. Choice B is incorrect because the text says only that Mother makes up poetry for the children’s birthdays, not that she likes birthdays more than other special occasions. Choice D is incorrect because the text doesn’t suggest that Mother prefers reading to her children over the other activities she does with them, such as playing with them and writing stories and poems for them.

Question Difficulty: Easy

Question ID 5db52639

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 5db52639

It has long been thought that the original author of the US Pledge of Allegiance was Francis Bellamy, who said that he wrote the pledge one evening in August of 1892. But a historian recently discovered a newspaper article that was published several months before August 1892. The article describes students reciting the same pledge that Bellamy claims he first wrote in August. This means that Bellamy may not have created the pledge after all.

Based on the text, what piece of knowledge about the Pledge of Allegiance has recently become uncertain?

- A. How many changes were made to the pledge in the 1900s
- B. The identity of the person who first wrote the pledge
- C. The name of the newspaper that first published the pledge
- D. Which part of the pledge students liked best in 1892

ID: 5db52639 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it presents a supposed fact about the Pledge of Allegiance that, as the text explains, has recently become uncertain. The text begins by explaining the long-held belief that the original author of the US Pledge of Allegiance was Francis Bellamy, who claimed to have written it in August 1892. The text then describes a historian’s recent discovery of a newspaper article published several months before August 1892 that mentions students reciting the same pledge. The text concludes that this discovery suggests Bellamy may not have created the pledge after all. Thus, what has recently become uncertain is the identity of the person who first wrote the pledge.

Choice A is incorrect because the text doesn’t address any changes made to the Pledge of Allegiance in the 1900s. The text focuses solely on the question of who originally authored the pledge in or before 1892 and doesn’t mention any subsequent modifications to its wording. Choice C is incorrect. While the text does mention a historian’s discovery of a newspaper article that described students reciting the pledge, it doesn’t suggest that the pledge was published in its entirety within that article. Moreover, the text doesn’t identify the newspaper by name or suggest the possibility of an earlier mention of the pledge in a different newspaper. Choice D is incorrect because the text doesn’t mention which parts of the Pledge of Allegiance students preferred in 1892 or at any other time. The text only states that a newspaper article described students reciting the pledge, without providing any information about their preferences regarding different portions of it.

Question Difficulty: Easy

Question ID 35d6bc93

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 35d6bc93

Scrapbooks of saved fabric pieces were commonly kept by women in the nineteenth-century United States, but few are as meticulously detailed as Hannah Ditzler Alspaugh’s work. Alongside each piece of fabric, Alspaugh recorded intimate memories, such as dressmaking with her sister. Additionally, she listed the prices and how she used the fabric. Historians note that by representing fifty years of changing textures, patterns, and dress styles, the scrapbook is a record of nineteenth-century textiles and dressmaking as well as Alspaugh’s life.

Which choice best states the main idea of the text?

- A. Alspaugh inspired other women to save pieces of fabric in scrapbooks and provide historical records of nineteenth-century fashions in the United States.
- B. Historians rely on fabric scrapbooks to understand how fashions changed throughout the nineteenth-century United States.
- C. Fabric scrapbooks were a popular hobby for many women in the nineteenth-century United States.
- D. Alspaugh’s scrapbook provides a detailed account of her life and historical record of fashion trends in the nineteenth-century United States.

ID: 35d6bc93 Answer

Correct Answer: D

Rationale

Choice D is correct. The text describes how Alspaugh’s scrapbook is both a record of her life and a historical record of nineteenth-century textiles and dressmaking.

Choice A is incorrect. The text says that it was common for American women to keep scrapbooks of fabric pieces in the nineteenth century, and it says that Alspaugh was one of these women. However, it never says that other women were inspired by Alspaugh. Choice B is incorrect. This is too general and too strong. The text says that Alspaugh’s scrapbook is a historical record of nineteenth-century textiles and dressmaking, but it never says that historians rely on such scrapbooks in general to understand how fashions changed throughout that time period. This choice also fails to even mention Alspaugh, who is the real focus of the text. Choice C is incorrect. The text does say this, but it’s a detail—not the main idea. The text is mainly about one woman’s scrapbook (Alspaugh’s), and this choice doesn’t even mention her.

Question Difficulty: Easy

Question ID 1eecf68b

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 1eecf68b

The following text is adapted from Frances Hodgson Burnett’s 1911 novel *The Secret Garden*. Mary, a young girl, recently found an overgrown hidden garden.

Mary was an odd, determined little person, and now she had something interesting to be determined about, she was very much absorbed, indeed. She worked and dug and pulled up weeds steadily, only becoming more pleased with her work every hour instead of tiring of it. It seemed to her like a fascinating sort of play.

Which choice best states the main idea of the text?

- A. Mary hides in the garden to avoid doing her chores.
- B. Mary is getting bored with pulling up so many weeds in the garden.
- C. Mary is clearing out the garden to create a space to play.
- D. Mary feels very satisfied when she’s taking care of the garden.

ID: 1eecf68b Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main idea of the text. The text describes Mary’s activities in an overgrown hidden garden, saying that she was “very much absorbed” and was “only becoming more pleased with her work every hour” rather than getting tired of it. She also thinks of garden activities as a “fascinating sort of play.” Thus, the main idea of the text is that Mary feels very satisfied when taking care of the garden.

Choice A is incorrect because the text never makes any mention of Mary’s chores. Choice B is incorrect because the text indicates that Mary finds pulling up weeds to be fascinating, not boring. Choice C is incorrect because Mary thinks of garden activities in and of themselves as play, not as something necessary to do to create a space to play.

Question Difficulty: Easy

Question ID 6b4fce6d

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 6b4fce6d

The following text is from Laila Lalami’s 2019 novel *The Other Americans*. The narrator is a member of her middle school’s jazz band.

One day the jazz band was invited to perform at the Summer Festival in Palm Springs. Walking across the stage to the piano, I did what my teacher had advised. Pretend you’re only playing for one person. That way you won’t be so nervous. I glanced at my father, who sat in the front row, leaning his head just so, waiting. Then I closed my eyes, and began to play.

©2019 by Laila Lalami

According to the text, what does the narrator do as she walks across the stage?

- A. She thinks about the differences between playing the piano alone and playing in a band.
- B. She feels excitement about playing in a music festival for the first time.
- C. She remembers how hard she has practiced for the performance.
- D. She follows her teacher’s advice about managing her nervousness.

ID: 6b4fce6d Answer

Correct Answer: D

Rationale

Choice D is the best answer because it presents a statement about what the narrator is doing that is directly supported by the text. According to the text, as the narrator walks across the stage to her piano, she recalls her teacher’s advice to pretend that she is playing for only one person. The text indicates that this advice was intended to help manage any nerves related to performing. Moreover, the text implies that the narrator follows this advice by deciding to focus on her father sitting in the audience. Thus, the text supports the idea that as she walks across the stage, the narrator follows her teacher’s advice about managing her nervousness.

Choice A is incorrect because the text doesn’t indicate that the narrator is thinking about how playing the piano alone is different from playing the piano in a band. Rather, the narrator thinks about her teacher’s advice to pretend that she is playing the piano for only one person to help ease her nervousness about performing. Choice B is incorrect because the text provides no indication that this is the first music festival that the narrator has performed in. Furthermore, the text indicates that the narrator is nervous, not excited, to play the piano at the festival. Choice C is incorrect because the text doesn’t suggest that the narrator is remembering how hard she practiced for the performance. Rather, she is thinking about what her teacher told her to do to help ease her nerves about playing the piano in front of an audience.

Question Difficulty: Easy

Question ID 059bfe10

SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 059bfe10

Oluwaseyi Moejoh cofounded U-recycle Initiative Africa when she was only a teenager. Moejoh and her team founded the organization to teach young people how their actions affect the environment and why recycling is important. For example, the organization put on an exhibit of art made using recycled materials.

According to the text, what is one reason Moejoh and others founded U-recycle Initiative Africa?

- A. To bring attention to overlooked African artists
- B. To teach young people why recycling is important
- C. To help adults gain important outdoor skills
- D. To give teenagers advice about starting businesses

ID: 059bfe10 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it describes a reason that Moejoh and team founded U-recycle Initiative Africa. The text mentions two reasons the initiative was founded: to teach young people about how they affect the environment and to teach them “why recycling is important.” Thus, teaching the importance of recycling to young people accurately describes a motivation that the text cites as a reason for the initiative’s founding.

Choice A is incorrect. Although art is mentioned in the text, there are no details about artists or whether they are being overlooked. Choice C is incorrect because the text is explicitly about young people and their relationship to the environment and recycling. There is no mention of adults or outdoor skills. Choice D is incorrect. Although the text discusses young people, which likely includes teenagers, there is no mention of starting businesses.

Question Difficulty: Easy

Question ID 4c3211c7

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Information and Ideas	Central Ideas and Details	

ID: 4c3211c7

The following text is from Jane Austen’s 1811 novel *Sense and Sensibility*. Elinor lives with her younger sisters and her mother, Mrs. Dashwood.

Elinor, this eldest daughter, whose advice was so effectual, possessed a strength of understanding, and coolness of judgment, which qualified her, though only nineteen, to be the counsellor of her mother, and enabled her frequently to counteract, to the advantage of them all, that eagerness of mind in Mrs. Dashwood which must generally have led to imprudence. She had an excellent heart;—her disposition was affectionate, and her feelings were strong; but she knew how to govern them: it was a knowledge which her mother had yet to learn; and which one of her sisters had resolved never to be taught.

- According to the text, what is true about Elinor?
- A. Elinor often argues with her mother but fails to change her mind.
 - B. Elinor can be overly sensitive with regard to family matters.
 - C. Elinor thinks her mother is a bad role model.
 - D. Elinor is remarkably mature for her age.

ID: 4c3211c7 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it provides a detail about Elinor that is established in the text. The text indicates that although Elinor is “only nineteen,” she gives good advice and exhibits such a high level of understanding and judgment that she serves as “the counsellor of her mother.” Thus, Elinor is mature beyond her years.

Choice A is incorrect because it isn’t supported by the text: although the text says that Elinor advises her mother and often counteracts her mother’s impulses, there’s no mention of Elinor arguing with her mother or failing to change her mother’s mind. Choice B is incorrect because it isn’t supported by the text: although the text mentions that Elinor has strong feelings, it doesn’t indicate that she’s excessively sensitive when it comes to family issues. Choice C is incorrect because it isn’t supported by the text: there’s no mention of what Elinor thinks about her mother and no suggestion that she thinks her mother is a bad role model. Because she’s described as having “an excellent heart,” Elinor likely doesn’t think ill of her mother.

In 1935 Hallie Flanagan was chosen to lead the Federal Theatre Project (FTP). This project was part of the new Works Progress Administration (WPA), a program created by President Franklin D. Roosevelt to provide jobs for unemployed people during the Great Depression. As the director of the FTP, Flanagan created jobs for over 12,500 performers, designers, and other theater professionals across the country. She also kept ticket prices low for the shows they staged, which meant that many people could afford to experience theater for the first time.

Which choice best states the main idea of the text?

- A. Jobs provided by the FTP were intended mainly for performers, designers, and other theater professionals.
- B. President Roosevelt created the WPA to provide jobs for unemployed people.
- C. During the Great Depression, many people couldn't afford to buy theater tickets.
- D. As the director of the FTP, Flanagan succeeded in creating many jobs and introducing people to theater.

ID: 003a8f92 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately states the main idea of the text. The text begins by stating that Flanagan was chosen in 1935 to lead the Federal Theatre Project (FTP), which was part of a program created by President Franklin D. Roosevelt. The text then explains that as the director of the FTP, Flanagan created jobs for more than 12,500 theater professionals and ensured that ticket prices stayed low so that many people could afford to experience theater for the first time. Thus, the main idea of the text is that as the FTP's director, Flanagan succeeded in creating many jobs and introducing people to theater.

Choice A is incorrect. The text does suggest that jobs provided by the FTP were intended mainly for theater professionals, but this isn't the text's main idea. The focus of the text is Hallie Flanagan's work as the director of the FTP, with the text's main point being that Flanagan succeeded in creating many jobs and introducing people to theater. Choice B is incorrect. The text does state that President Roosevelt created the WPA to provide jobs for unemployed people, but this is supporting information, not the text's main idea. The focus of the text is Hallie Flanagan's work as the director of the FTP, which was part of the WPA, and the text's main point is that Flanagan succeeded in creating many jobs and introducing people to theater. Choice C is incorrect. It's true that many people couldn't afford to buy theater tickets during the Great Depression, but this isn't the text's main idea. The focus of the text is Hallie Flanagan's work as the director of the FTP, with the text's main point being that Flanagan succeeded in creating many jobs and introducing people to theater.

The following text is from Edith Nesbit’s 1902 novel *Five Children and It*. Five young siblings have just moved with their parents from London to a house in the countryside that they call the White House.

It was not really a pretty house at all; it was quite ordinary, and mother thought it was rather inconvenient, and was quite annoyed at there being no shelves, to speak of, and hardly a cupboard in the place. Father used to say that the ironwork on the roof and coping was like an architect’s nightmare. But the house was deep in the country, with no other house in sight, and the children had been in London for two years, without so much as once going to the seaside even for a day by an excursion train, and so the White House seemed to them a sort of Fairy Palace set down in an Earthly Paradise.

Which choice best states the main idea of the text?

- A. Although their parents believe the house has several drawbacks, the children are enchanted by it.
- B. The children don’t like the house nearly as much as their parents do.
- C. Each member of the family admires a different characteristic of the house.
- D. The house is beautiful and well built, but the children miss their old home in London.

ID: 94d9329f Answer

Correct Answer: A

Rationale

Choice A is the best answer. The text lists complaints about the house made by the mother and father, but then it says that the children thought the house was a "Fairy Palace" and "Earthly Paradise."

Choice B is incorrect. The text states the opposite of this. It describes how the mother and father dislike the house and says the children think the house seems like paradise. Choice C is incorrect. This isn’t what the text says. Only the children are said to admire the house; mother and father both complain about the house. Choice D is incorrect. The text states the opposite of this. It tells us the house was ugly and poorly built ("an architect’s nightmare") and suggests the children were tired of London.

In the 1700s and 1800s, European composers experimented with volume in their musical works. They did so by increasing the number of musicians playing in the orchestra. For example, in some of his operas, German composer Richard Wagner added more horns, trombones, and tubas to the orchestra. With more instruments playing at the same time, the orchestra could play extremely loudly at key moments in his operas.

According to the text, how did Richard Wagner achieve moments of extremely high volume in his operas?

- A. By moving the performances of his operas from outdoor stages to indoor ones
- B. By increasing the number of musicians playing horns, trombones, and tubas in the orchestra
- C. By building a concert hall whose shape would cause sounds to echo
- D. By insisting that the singers undergo special training to sing for extended periods of time

ID: d60f1300 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it presents a statement about how Richard Wagner achieved moments of extremely high volume in his operas that is supported by the text. The text states that European composers experimented with volume in their works by increasing the number of musicians in the orchestra and provides the example of Wagner, who "added more horns, trombones, and tubas to the orchestra." The text explains that by having more of these instruments playing at the same time, the overall volume of the orchestra could be dramatically increased at key moments in Wagner’s operas.

Choice A is incorrect because the text never indicates that Wagner moved his operas indoors to achieve moments of extremely high volume, nor does it indicate that his operas were previously performed outdoors. The only technique discussed in the text for achieving extremely high volume is Wagner’s addition of more instruments to create a bigger, louder orchestra. Choice C is incorrect because the text never says that Wagner built or used a specially designed concert hall to increase volume through echoes. The only technique discussed in the text is Wagner’s addition of more instruments to create a bigger, louder orchestra. Choice D is incorrect because the text never mentions any special training for singers related to volume or singing for extended periods. The text’s focus is entirely on the orchestra and how Wagner and other European composers used instruments to experiment with volume in their musical works.

Psychologists wanted to test how young children think about rewards and fairness. In an experiment, two teachers handed out rewards while children (ages four to six) watched. The teachers gave out the same number of rewards, but one of them counted the rewards out loud. The children were then asked who was fairer. 73% chose the teacher who counted. The psychologists think that counting showed the children that the teacher wanted to be fair. The children may have believed that the teacher who did not count did not care about fairness.

- Which choice best states the main idea of the text?
- A. Psychologists think children cannot understand the concept of fairness until they are six years old.
 - B. An experiment found that counting out loud is the best way to teach mathematical concepts to children.
 - C. Psychologists think young children expect to be rewarded when the children show that they care about fairness.
 - D. An experiment showed that the way rewards are given out may affect whether young children think the situation is fair.

ID: 378ad9dd Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text describes a study assessing how children think of rewards and fairness and its results. It concludes that the children in the study may have thought that a teacher who counted out loud when giving rewards cared more about fairness than a teacher who did not count out loud.

Choice A is incorrect. The children in the study are described as being “four to six,” and the text doesn’t mention any differences among the different ages. Choice B is incorrect. The experiment wasn’t about teaching math—rather, it was about how counting out loud affected the children’s perception of fairness. Choice C is incorrect. The experiment doesn’t focus on whether the children care about fairness, and the text never mentions the children’s expectations of being rewarded.

ID: 712c1559

The following text is adapted from Oscar Wilde’s 1891 novel *The Picture of Dorian Gray*. Dorian Gray is taking his first look at a portrait that Hallward has painted of him.

Dorian passed listlessly in front of his picture and turned towards it. When he saw it he drew back, and his cheeks flushed for a moment with pleasure. A look of joy came into his eyes, as if he had recognized himself for the first time. He stood there motionless and in wonder, dimly conscious that Hallward was speaking to him, but not catching the meaning of his words. The sense of his own beauty came on him like a revelation. He had never felt it before.

According to the text, what is true about Dorian?

- A. He wants to know Hallward’s opinion of the portrait.
- B. He is delighted by what he sees in the portrait.
- C. He prefers portraits to other types of paintings.
- D. He is uncertain of Hallward’s talent as an artist.

ID: 712c1559 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it presents a statement about Dorian that is directly supported by the text. The narrator of the text says that when Dorian sees his portrait, “his cheeks flushed for a moment with pleasure” and “a look of joy came into his eyes.” The narrator goes on to say that Dorian looked at the portrait “in wonder” and presents him as being so entranced by the portrait that he doesn’t notice what Hallward is saying to him. All these details support the description of Dorian as being delighted by what he sees in the portrait.

Choice A is incorrect because Dorian isn’t depicted as interested in Hallward’s opinion of the portrait but rather as so enraptured by the painting that he’s hardly even aware of Hallward. Choice C is incorrect because the portrait of Dorian is the only painting that is mentioned in the text, so there’s no evidence that Dorian prefers portraits to other types of paintings. Although Dorian is depicted as delighted with this particular portrait, there’s no way of knowing from the text whether he likes portraits better than other kinds of paintings. Choice D is incorrect because nothing in the text suggests that Dorian is uncertain about Hallward’s talent. Instead, the text is focused on Dorian’s delight with the portrait.
